THE MAILS, &c.

The P. and O. mail, bringing the above advices, was delivered, *via* Brindisi, on Saturday, being two days early. The next inward (French) mail, with advices Yokohama 24th, Shanghai 27th Nov., Hong Kong 3rd, Singapore 11th Dec., which is due, *via* Marseilles, on Monday next, the 11th inst., left Suez on the 28th ult., four days in advance of its due date, and may be expected in London by Thursday or Friday next.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. str. *Venetia*, arrived Dec. 30.—From Singapore: Mr. and Mrs. Bell, five children, and two servants.

To Venice.—From Hong Kong: Mr. W. G. Price, Mr. G. Oliver, Dr. A. McDonald, R.N. From Ceylon: Mr. Lang.

To Southampton, per P. and O. str. *Baroda*, expected Jan. 11.—From Yokohama: Mr. W. Verney, Dr. Greenslade, Miss Reeves. From Hong Kong: Mr. C. Chappers, Mr. R. Cumberland, Mr. G. S. Hogg. From Shanghai: Mrs. J. White and three children, Mrs. Allcott. From Singapore: Mr. Stevens. From Galle: Mr. Mortimer.

Per Nederland Company's steamer *Voorwaarts*, from Batavia to Nieuwdiep.—Mr. W. T. Penard, Mr. and Mrs. P. H. Falkman and five children, Mr. P. T. Quartero Mr. van Sprew and three children, Mr. and Mrs. C. E. G. Ottenhoff and four children, Mr. and Mrs. T. C. Stuffers and four children, Mr. and Mrs. W. C. B. de Bas and six children, Mr. and Mrs. T. H. Knyff and child, Mr. W. Humme, Mr. W. T. Veroloet, Mr. G. H. Aalders, Mr. P. A. Schiil, Mr. Holsteyn, Mr. and Mrs. Hovy, Mr. L. van Olbeek, Mr. P. D. T. des Buerry de Maurégnault.

PASSENGERS OUTWARD.

Per French steamer *Ava*, from Marseilles, Jan. 3.—To Galle: Mr. Buchanan, Mr. E. H. Hurst. To Singapore: Mr. Archer, Mr. Hilty. To Hong Kong: Mr. and Mrs. Bell, Mr. Berger. To Batavia: Mr. Veautier. To Saigon: Mr. Pollas, Mr. Amons, Mr. Imbert. To Shanghai: Mrs. King, Mr. Sichel, Mr. O. Sichel, Mr. Groth, Mr. Lefebre. To Yokohama: Mr. Muigre.

Per French steamer *Hoogly*, Jan. 17.—To Yokohama: Mr. Boeke. To Hong Kong: Mr. Hillier, Mr. Duval, Mr. Lancken, Mr. Wanecke. To Shanghai: Mr. G. Rohl, Mr. E. Hunt. To Galle: Mr. and Mrs. Canque. To Batavia: Mr. C. Winx.

Per French steamer *Irawaddy*, Jan. 31.—To Galle: Mr. and Mrs. Gausseremburg. To Singapore: Mr. Hill.

Per French steamer *Meikong*, Feb. 28.—To Shanghai: Mr. M. R. Mackellar, Mr. Gordon, Mr. and Mrs. Jerdein.

Per French steamer *Peiho*, Feb. 14.—To Hong Kong: Mr. and Mrs. Hutchinson. To Shanghai: Mr. and Mrs. olVsch.

Per P. and O. steamer *Bokhara*, from Southampton, Dec. 31.—To Hong Kong: Mrs. F. Kinahin, Mr. Morgan, Capt. Buller, R.N., Surg. A. H. L'Estrange, Mr. M. Pinl, Mr. H. K. Maynard, Sub.-Lieut. Luther. To Shanghai: Mr. W. J. Tucker. To Singapore: Mr. M. Armstrong, Mr. Paterson. To Ceylon: Mr. M. H. Foster.

Per P. and O. steamer *Sumatra*, from Brindisi, Jan. 11.—To Yokohama: Mr. W. S. Lockhart. To Hong Kong: Mr. S. Hughes, Mr. Kofod. To Ceylon: Dr. P. Goldschmidt. To Singapore: Mr. W. Cadell.

Per P. and O. steamer *Cathay*, from Southampton, Jan. 14.—To Ceylon: Mr. S. le Cocq, Mr. E. Lemprien, Mrs. Gow, Mr. Chamberlain and friend.

Per P. and O. steamer *Baroda*, from Brindisi, Jan. 25.—To Hong Kong: Mr. Robslikke.

Per P. and O. steamer *Malwa*, from Southampton Jan. 28.—To Hong Kong: Mrs. Armstrong.

Per steamer *Gleuartney*, from London, Jan. 7.—To Hong Kong: Mr. Beveridge, Mr. and Mrs. Murray Bain. To Shanghai: Mr. Montire.

From San Francisco, per Pacific Mail Steamship Company's chartered steamer *Vancouver*, Capt. Shaw.—For Yokohama: J. Macpherson Grant, Mrs. R. Varnum and child, Mrs. Deville, Mrs. Drulin, A. Kirby, M. Cohen, Robert Smith, E. Wiegand and wife. For Shanghai: W. Otho, N. Shaw, Edw. Cunningham, Fred. D. Bush. For Hong Kong: Hely d'Oissel.

Summary of News from the Far East.

JAPAN.

Dates by this opportunity extend to the 17th Nov., but there is nothing to record. The Pacific mail steamer *Great Republic* arrived at San Francisco on the 19th Dec. with dates to 26th Nov., and her advices may be expected here on the 7th inst.

CHINA.

TIENTSIN.

The correspondent of the *North China Herald* writes as follows:—

Since the Japanese High Commissioner Okubo departed, all excitement has ceased, and we have been leading a quiet, humdrum life; meditating perhaps, however, over the extraordinary solution of the late negotiations. Miracles apparently have not ceased, nor wonders ended. I suppose that immediately this river is closed to navigation Li Hung-chang will depart for Paouting-foo for the winter months, as arranged by Imperial decree in 1870. The Governments of China and Japan having become friends, and their representative high officials having cordially embraced each other the other day at Peking, all preparations of a warlike character on the seaboard, designed to repel a Japanese enemy, have of course come to an end.

Mr. T. Watters, who has been acting interpreter at H.B.M. Consulate at Tientsin for the last two years, having received instructions from Peking to remove to the Shanghai Consulate, left on the 10th Nov. and he carries with him the best wishes of this community.

Digitized by Google

H.M. gun-vessel *Hornet*, Commander Cameron, has left here for the south, having been replaced by the *Midge*, which is intended to remain here during the winter. At present, for winter protection, we have in port one British, one Russian, and one French gunboat; and rumour says we shall have yet an American gunboat, the *Palos*.

On the 8th Nov., hare-hunting commenced, and as the open country around is to a great extent free from water, this sport will be much pursued during the winter.

As to the weather, we have had first rain, then sleet, and finally snow, and the country is now partially covered with a white mantle. The peasantry are at present occupied in gathering in the later products of the soil as rapidly as possible so as to get them housed before the more severe weather sets in. Owing to the absence of inundations and to the gathering in of crops above average, the peasantry are this year in good circumstances.

The steamer *Shantung*, leaving here on the 12th Nov., will take away the body of Woo Tung-ling, who died here on the 1st September last, and who was formerly Chief of the Southern Legion in this province. A large body (3,000) of the officers and men of the Southern Legion escorted the coffin to the steamer; and the flags of the Chinese gunboat *Chinhae* and the C.M.S.N. Co. were put half-mast high. The foreign gunboats also hoisted their flags half-mast as a token of respect for the deceased.

SHANGHAI.

The present mail brings advices from this port to the 20th November; the P. and O. mail from London Oct. 2 was received on the 16th November. The following summary of news is from the *North China Herald*:—

Telegrams received from Yedo on the 14th Nov. state that the Japanese Government entirely approves the agreement come to between its High Commissioner, Okubo, and the Tsungli Yamen, and that it was much pleased with the action of H.B.M. Minister, Mr. Wade, in assisting to bring the difficulty to an honourable and peaceful settlement. The Japanese transports would leave shortly for Formosa, and the expedition will probably retire from the island before the 20th December—the date stipulated in the agreement. This intimation will dispel some lingering suspicion that the Japanese Government might, regarding the monetary part as unsatisfactory, take exception to the settlement concluded by his Excellency Okubo, and is an assurance of its desire to avoid a war. It further shows that, as was to be inferred from the protracted character of the negotiations, Okubo's mission was all along intended to secure peace, if that were compatible with maintaining the honour of his country. We may notice here that on the 12th Nov. his Excellency and suite left Shanghai, for Amoy and Formosa, in the *Kanagawa-maru*, on board which also a passage was given to a Chinese officer, the bearer of despatches.

We hear that the first Tls. 100,000 of the sum which the Chinese have agreed to pay the Japanese has been handed over by the Haikwan (Customs) Bank here. The Shanghai Customs treasury has to furnish another Tls. 100,000 of the indemnity. The Customs funds seem to be always ready for the dredging of bars political, whatever they may be for bars physical. Mr. Edward McKean, of the Customs Service, will probably go to Formosa on special duty in connection with the evacuation of the island by the Japanese. It will be remembered that the same gentleman was selected to be the bearer of despatches from Peking to Yedo, at an early stage of the difficulty between China and Japan.

A sight of unusual interest was afforded to people who happened to be on the Bund on the 13th Nov., in the simultaneous departure of H.M.S. *Modeste*, the gunboat *Dwarf*, and the French mail steamer *Hoogly*. As the *Modeste* moved off, the *Dwarf's* crew manned the yards, and gave three cheers, and the *Modeste's* men swarmed up her rigging, and heartily returned the compliment. The *Dwarf* flew the homeward bound pennant, and looked in very smart trim as she steamed rapidly after her big sister. Only her crew go home, however, we believe, the gunboat being recommissioned at Hong Kong. The stately *Hoogly*, looking the *beau ideal* of a mail steamer, started in advance of the *Dwarf*, and dipped her ensign as she passed. Admiral Shadwell and his staff went down to Woosung in the *Modeste*, to rejoin the flagship, in pursuance of the arrangements we mentioned last week; and not a few of those who witnessed the departure of the vessel had come out to "speed the parting guest."

At the meeting of the French Municipal Council of 27th Oct., a letter from the Consul-General was read, announcing that the French Minister had agreed to the request of the Council that the Chancellerie of the Consulate should cease to exact two per cent. on the Chinese contribution to the Municipal Budget. The Chairman was asked to thank the Consul-General for supporting the request.—The Chairman and Vice-Chairman were delegated to discuss, with two members of the English Council, matters relating to the interests which the two Administrations have in common.—The substitution of a system of numbering, adopted by both municipalities, for monthly cards for jinrickshas, was approved.—The Secretary was directed to reply, to a request by the English Council, that the Council was, as it had always been, in favour of the opening of a common dispensary, as soon as simultaneous action can be taken. Believing that it would be more economical to have but one establishment for all the Settlements, the Council also directed the Secretary to enquire if the place already built for that purpose is large enough for both Municipalities, and in that case, what share the French Council would have to bear in the expense already incurred or to be incurred.—The Secretary, in informing the English Council of the arrival of an iron bridge, to replace No. 4 wooden bridge on the Yangking-pang, was directed to advise them that the erection of the new bridge would necessitate the reconstruction of the abutments on the north side of the creek. A report by the Commission charged with the consideration of the scheme for widening certain roads, and with determining the value of the ground which might be required, was presented. The Commission agreed in the desirability of the scheme, and even extended the latitude it proposed to allow certain roads. The Council adopted the views of the Commission unreservedly, and publish a list of roads, with the width to be given to each. The Commission think it preferable that the matter of compensation for ground should be left to the Council and the proprietors. The Council requested the chairman to convey its thanks to the members of the Commission for their friendly co-operation in the matter.—The Council refused two applications for tavern licenses, and thinking that these places are already too numerous will consider rather how their number may be reduced.

The S. C. V. Autumn Prize Meeting for rifle shooting began on the 13th Nov., the events for the first day being the National Rifle Association's Medal, and the Municipal Challenge Cup, which were respectively won by Private Glass, Mih-ho-loongs, and Private Carnie, No. 1 Company. On the following day Captain Tucker, No. 3 Company, won the Officers' Cup; Private Milsom, No. 1 Company, the Ladies' Purse; and Private Starkey, No. 3 Company, the Consolation Prize. The Mih-ho-loong Challenge Cup was won by Sergeant Dunman, of that company, and the Mih-ho-loongs have the honour of winning the companies' match. The entries showed a falling off from last year, but there were still enough men, and among them the best shots of the Corps, to make good contests. It is a pity, however, that new men coming to the place do not offer as freely as might be expected to fill up the gaps, both in the ranks of the Corps and in its competitions, created by the retirement of old members, which is occasioned by the frequency of changes in Shanghai. But the number of men who shot at former meetings occasionally led to difficulty in getting through with the competitions in reasonable time; and probably indifferent shots got tired of having an "*r*" placed after their names, and retiring early in the day, to make way for men better skilled or more fortunate than themselves.

A singular case has been brought before the Mixed Court magistrate and Mr. Stronach. It appears that a coolie and another native were stopped in the Nankin-road, near the Kiukiang-road, by two *likin* runners, the coolie carrying a covered cash-basket containing opium. Of course the usual dispute occurred, and a Mr. J. J. Aroozoo came up, demanded the release of the opium, as being his property, and told the runners to desist from their efforts to seize it. Two foreign gentlemen were passing at the moment, and upon their advice, as we are informed, the whole of the persons went to the Louza station, accompanied by a native constable. Mr. Aroozoo there accused the runners with having assaulted him, one of them having held his hands behind his back. When the case came on for hearing, the complainant supplemented his charge of assault by saying that the breast pocket of his coat had been torn and Tls. 15 in notes abstracted. He had mentioned nothing about his alleged loss at the police station on the previous evening, but he produced a note in Court to prove that he had on the same day received Tls. 15. The magistrate declined to enter into this statement, not crediting the inference that the runners had committed robbery. The charge of assault, on being investigated, was dismissed. The complainant thereupon said he felt his life was in danger, and that in future he should carry arms to defend himself. He was, however, advised by the Court not to do so, or he might run the risk of getting into serious trouble.

The *Shunpao* reports an incident of popular feeling which occurred in the native city the other day, and which is noteworthy only because of the promptitude with which the Taoutai acted to anticipate any disturbance. The affair was trivial in itself, but there was just a tiny spark of trouble which with judicious and mischievous fanning might have flared up into a conflagration. The *Shunpao* gives the following particulars:—

To the west of the Roman Catholic Church there is an asylum established by that religious body for the reception of the destitute aged and infirm—a very worthy and benevolent institution. The expenses are defrayed by the Church, and the people received into it must be either Roman Catholics themselves or be introduced by converts. On the evening of the 5th of this moon (the 13th Nov.) an old Nanking man, being very infirm and poor, got some people to carry him to the asylum. The doorkeeper, as he knew nothing of the man, refused to receive him, but the coolies who brought him carried him up to the door and wanted to go away. The doorkeeper stopped them, however, and directed them to take him away again, and an altercation

Digitized by Google

ensued, which attracted passers by, who formed an increasing crowd. Some of these said, since the asylum was for the benefit of the aged, an old man like the one who had been brought should be admitted—how could anyone have the heart to send him away? The doorkeeper's rejoinders only added to the excitement, and the crowd seemed likely to express their feelings by physical force. The doorkeeper, therefore, thought it prudent to get inside and shut the door, upon which the crowd dispersed. A *waiyuen* attached to the police got information of the matter, however, and hurried to inform the Taoutai, who instructed the officer in charge of his bodyguard to proceed to the spot and prevent any disturbance, sending an intimation also to the head of the foreign drilled troops. When the guard arrived on the spot they found everything as usual. The coolies took the opportunity while the altercation occurred to run away and leave the old man, who was received into the asylum, in consideration of his age, his infirmity, and his helplessness. The Chehsien was absent on a visit to Soonkiong and Soochow, but hearing of the affair while at the former place, put off his visit to the latter and returned to Shanghai. The authorities have made one arrest, and intend to have others of the mob caught and punished.

There has been another display of popular feeling against missionaries at Soochow, where last Sunday a crowd assembled, insulted a Chinese congregation, and assaulted the officiating missionary. Information having been sent to the district magistrate's yamen, he despatched half-a-dozen of his runners to the scene, and the crowd dispersed at their approach. The officials appear to be anxious to check disturbance; but the literati, as usual, inflame the popular mind, by a revival of the old libels against missionaries.

A Soochow correspondent of the *Shunpao*, who has recently been travelling in the district "north of the Yangtsze," reports that the change of course of the Yellow River near its mouth, where it seems to have reverted to its old bed, has caused widespread inundation and distress. About twenty miles from Haichow, a place in the north of Kiangsu, near the coast, some thirty miles south from the border of Shantung, the country for several hundred *li* was one vast ocean, and the homesteads deserted. The inhabitants who remained on the higher grounds informed him that the inundation had been sudden and severe, and that they had to fly from the villages and hamlets. At Pe-show, a place some fifty miles inland, but in about the same latitude, the flooding had been still more disastrous, and the inhabitants were in a very destitute condition.

We hear that there is now small probability of H.B.M. Minister, Mr. Wade, paying a visit to Shanghai this winter, as it was some time ago expected he would do. The peaceful adjustment of the Formosan difficulty has, we believe, led to this change of plan.

A Chinese sailor has met his death by falling from the rail of the barque *George Washington* to the bottom of the Old Dock. No one saw him fall, but he was found lying on the floor of the dock, with his skull fractured, quite dead. Dr. McDougall was sent for, but his services were of no avail. The deceased's friends removed the body for burial.

The purchasers of the wreck of the *Lucerne* have had to complain of the pillaging propensities of the Chinese boat people, and efforts are being made to get the native authorities near the locality to interfere in favour of the rightful owners of the property.

The brig *St. François* has been placed in dock at Messrs. Boyd and Co.'s. Judging by her appearance and by the small patch over the point of contact with the *Cardor Castle*, her injuries are not so extensive as was at first supposed.

During the passage of the P. and O. Mail steamer *Geelong* from Hong Kong to Shanghai in lat. 24.39 N. and long 118.44½ E., she fell in with a junk exhibiting signals of distress. A boat was lowered in charge of the second officer, Mr. Coleman, and Mr. Coates, pilot, who rescued eighteen men from the junk, which was then abandoned. The men were brought on to Shanghai.

The C.M.S.N. Co.'s steamer *Aden*, which has just returned from a run to Amoy and Keelung, is likely to be handed over by her present owners to the Chinese Government, to be used as a despatch vessel, a purpose for which she is much better suited than she is for a cargo boat.

In accordance with the instructions from the trustees to the estate of Messrs. Dent and Co., the "Paoshan" property at Ningpo was put up to auction by Mr. F. A. Groom. The property consisted of ten mow of ground, a two-storied dwelling-house, two large godowns, offices, stabling, &c., walled into a height of sixteen feet. The river frontage extends to one hundred and ninety-five feet. There was a languid competition, and the property was knocked out at Tls. 5,600.

HONG KONG.

Our advices by the present mail extend to the 26th Nov.; the French mail from London 9th October was received on the 19th November. The following P. and O. mail of the 16th October, which was due on the 26th Nov., had been detained by an accident. The following items of news are from the *China Mail*:—

Gambling houses are said to have vastly increased in number at Canton since the death of the late Viceroy.—A movement is on foot to start a steam ferry service between the city and Kowloong, for Europeans only.—The British ship *Minhanao*, which went down in the late typhoon, has been floated.—H.M.S. *Challenger* arrived at Hong Kong on the 15th. H.M.S. *Iron Duke*, bearing the flag of Vice-Admiral Shadwell, arrived on the 25th.—Chang, the Chinese giant, has returned to Hong Kong.—Quinsy is very prevalent in the colony just now.—The dengue fever, which has extensively prevailed during the past three months, is disappearing.—The Government Civil Hospital has been removed to the former Hotel d'Europe, Hollywood-road.—Mr. Carl von Bismark, H.I.G.M. Consul at Tientsin, and who acted as interpreter at the late audience with the Emperor, passed through Hong Kong on the 11th.—The news of the death of Mr. E. C. Bowra has caused very general regret both here and at Canton.—A farewell dinner was given by the Volunteer fire brigade, on the 20th to Mr. A. F. Chambers, their foreman.—Twenty large shops were destroyed by fire at Macao on the 20th.—The transport *India*, bringing 240 Portuguese troops for the garrison, arrived at Macao on the 21st.—During the discussion on the Estimates for 1875 in the Hong Kong Legislative Council, on the 13th, the non-official members refused to pass the Police vote, on the ground that no attention had been paid to the recent action of the Captain Superintendent of Police; the vote was carried by an official majority.—A grant of $1,000 towards the republication by Dr. Eitel of Dr. Williams's valuable "Tonic Cantonese Dictionary" was agreed to *nem. con.*—Fresh measures are being taken to float the P. M. S. S. *Alaska*. Mr. Roberts of Shanghai has contracted for the work for a sum, it is said, of $30,000.

The following is from the *Daily Press*:—According to the latest news on the subject there is unfortunately some kind of hitch with reference to the telegraph which it was some time ago stated would be erected between Foochow and Amoy. The material was shipped from Hong Kong about a month ago, and at that time matters seemed in a fair way of progress. Unfortunately, however, in the meantime the question became discussed at that tomb of all progressive measures, Peking, and it now seems that the officials have withdrawn their co-operation from the scheme. According to the *Foochow Herald* of the 19th inst., the line is still being pushed forward, but it remains to be seen whether, without official protection, the work can be carried out, and considers that it is doubtful whether this can be done, and is certain that it will not to accomplished without considerable difficulty. With the kind of obstructiveness that has to be met with under such circumstances people in China are already familiar. Petty village risings accompanied by assaults on the foreigners engaged in the work, and damage to the work itself, are the form in which this kind of opposition usually arises, and when the Mandarins are opposed to any scheme of the kind these difficulties usually prove insurmountable. If, therefore, the local authorities at Foochow and Amoy are indisposed to afford any support to the project, it may be feared that it will not be possible to carry it out successfully. There are, on the other hand, some grounds which may yet lead to the hope that it will be accomplished. The Great Northern Telegraph Company have been especially successful in overcoming local opposition of this kind, and it may be hoped that they will be able to put the same tact successfully in force in the present instance. It is possible, too, that the Viceroy may not in reality be greatly opposed to allowing the work to proceed. The opposition comes from Peking, and it may be that the local officials will be really in favour of the project, notwithstanding, and may give it their support secretly, though they cannot do so officially.

(FROM OUR OWN CORRESPONDENT.)

HONG KONG, NOV. 26.

However welcome the peaceful termination of the Chino-Japanese imbroglio on the Formosa question may be to those who have at heart the preservation undisturbed of peace as security to commerce, yet there are individual mercantile firms here in the Far East to whom the news of the success of Okubo's mission to Peking came like a most unwelcome thunder clap. It shattered fondly-cherished schemes of fortune. The aspect of affairs looked so threatening that the opinion of the majority was that war could not possibly be averted. Japanese and Chinese were buying up arms and ammunition recklessly and at extravagant prices. Some holders of old muskets and carbines made great hits. Many firms, in the certainty of war being declared, have issued large orders on their correspondents at home for lethal weapons and explosives. It is feared that they themselves will be heavily hit.

I see some mention, vague enough, in the home papers respecting a proposed loan by a Bank here to the Chinese Government. I am in a position to inform you on indisputable authority that such a loan is in train. The amount being negotiated for is only two million of taels, or two thirds of a million sterling, and the probable lender is the Hong Kong and Shanghai Bank. Why a country of the immense resources of China should borrow so trumpery a sum may be a matter of as much conjecture as why she should need it. The fact is there, and is not astonishing to those who know the hopeless mess and mud-hole into which a Chinaman, whether a private individual or a statesman, is sure to get his financial affairs.

Digitized by Google

The incoming English mail will be six days late. This may not be the fault of any one in particular. Accidents may happen even in the well-regulated service of the P. and O. Company. But it is rather odd that the *Bangalore* should have left Singapore at ten A.M. on Monday, the 23rd inst., and that in a case like this, when news of the mail was anxiously expected, the agents of the company in this place should have had no notice of it till the next day.

We have a very creditable local Punch published in Hong Kong, called the *China Punch*. The last number is particularly heavy on both officials and colonists. Some "Ornithological Notes," caricaturing several prominent persons, are complained of by the former as not sufficiently down upon the merchants, while these complain that they are too severely castigated, and the officials are let off light. I will not decide this question. Mr. Austin, the Colonial Secretary, *Grus Nebulosa Austinii* (the blind stork), is so riled at his caricature that he has withdrawn his subscription to *Punch*, which proves either that the point of the joke is very sharp, or that Mr. Austin is not pachydermatous.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Our advices extend to the 3rd December; the French mail from London Oct. 23 arrived out on the 23rd November, and the following P. and O. mail of Oct. 30 was received on the 1st December. The following summary of news is from the *Straits Times*:—

Though the native States have been comparatively peaceful since the able and successful negotiations of Sir Andrew Clarke and the initial inauguration of his new policy of active supervision, it was to be expected that the restless and turbulent leaders who have so long kept the country in anarchy would at the outset make some effort to return to the old state of things, which, though disastrous to the country, and paralysing its trade and the development of its resources, nevertheless yielded immediate profit to them. Such is at present the case in Sunghie Ujong, a district within a few miles of our own settlement of Malacca, deriving its revenues chiefly from its tin trade, carried on by capital from this colony; there a small chief has risen up in arms against his ruler, under circumstances which necessitated the prompt interference of this Government. The disturbance has arisen out of a quarrel between the Datu Klana, who is the chief of the country, and the Datu Bandar, the chief of the river only. The Datu Bandar has been joined by Rajah Mahmood, a friend of the notorious Rajah Mahdie, and this leader inspired such a dread among the Datu Klana's men that they all fled with the exception of some half-dozen Arabs. An officer (Police Superintendent Hayward) sent by our Government with a force of thirty to forty police, to make inquiries into the state of affairs, was, together with the Datu Klana and his half-dozen Arabs, closely besieged by Rajah Mahmood with a force of about 200 Malays, at a point some sixteen miles from the nearest landing place. The expedition consists of fifty men of the 1-10th Regiment, twenty to twenty-five artillerymen with a field howitzer and ammunition, Captain Dunlop, with Inspector Richards and fifty police, and H.M. ships *Charybdis* and *Hart*, whence more men can be furnished if required. The steam-tug *Pilot Fish* was also chartered for the occasion.

The proceedings of the expedition have been, so far as we can ascertain, as follows:—H.M.S. *Charybdis*, *Hart*, and the steamer *Pilot Fish*, anchored off Malacca on the forenoon of Nov. 25, when the Lieut.-Governor and Major Stammers of the 10th Regiment came afloat to receive his Excellency. At half-past two in the afternoon his Excellency the Governor, with Capt. Smith, of the *Charybdis*, Lieut.-Governor Shaw, and other officers, landed and proceeded to the Stadt House. Having then received full details of the proceedings up to this time, Capt. Dunlop, with fifty police, was despatched to occupy Lookut and secure the co-operation of Rajah Bot, the chief of that place. About this time intelligence was received from Lieutenant Palmer, of the 10th Regiment, who had already started to Sunghie Ujong by way of Permatung Passir, that Mr. Pickering and the Klana's forces were safe and had maintained their position against the attacks made upon them. The chief anxiety entertained up to this time was of course now set at rest; but his Excellency still considering that, having gone so far, an imposing demonstration of the resolve of the Straits Government to put down all anarchy and internecine disturbances in the Malay States with which it was connected, was not only advisable, but necessary for the future peace of the country, decided that the troops should proceed on to Sunghie Ujong as originally contemplated. The *Charybdis* and *Hart* therefore started, about nine P.M., for the Lookut river, and anchored off its mouth about half-past seven next morning, where Rajah Bot was found, in every way friendly and ready to co-operate. At this point Captain Dunlop had already landed his police force. At noon, the disembarkation of the troops and forces commenced.

The Governor, after the landing of the troops, proceeded in H.M.S. *Hart* to the Qualla Jugra, up which river he steamed in the *Mata Mata* as far as Langat, where the Sultan of Salangore's palace and stockades are situated. H.H. the Sultan expressed his deep distress that the Bandar's conduct should have given any occasion for the intervention of the Straits Government, and after a long conference with H.E. the Governor, volunteered to send a hundred men to Qualla Labu to keep the Bandar in check there, and further promised to give him no shelter in Langat, but should he make his appearance there, to render him up to the British authorities. We have not as yet had further intelligence, but we know that the troops landed at Lookut commenced their march to Sungie Ujong at daylight on the 27th Nov., in capital spirits. The day was a good marching day, overcast, with occasional slight showers, and it was expected they would accomplish the march, in all eighteen miles, by that evening. There can be no doubt that, on arrival at Sungie Ujong, the presence of such a combined force will make a convincing impression upon the minds of our turbulent Malay neighbours that it is not the intention of this Government to deal with dissension among them by negotiation only.

In consequence of the instructions of the Secretary of State for the Colonies when returning the Chinese Immigrants Ordinance, passed last year, for amendment, it is probable the Government will deem it necessary to bring in another Ordinance embodying the proposed alterations. In view of this, a petition is in course of signature against any legislation on the subject whatever, as likely to operate prejudicially upon the labour market, while failing to benefit the coolies whose interests it is intended to protect. The petition states, with much truth, that as the evil complained of by the Chinese was that the coolies were kidnapped after arrival for service outside the colony, no restrictions on their importation or landing would be effective to prevent their being finally deceived or stolen after their ultimate arrival on shore; and urges the Government, instead of proceeding with the measure, to direct its efforts towards the suppression of the Secret Societies, which were the declared cause of the grievance sought to be remedied by the original Ordinance.

We are glad to learn that a postal convention has at last been concluded between this Government and that of Cochin China, whereby the rates of postage by private steamers will be six cents per half-ounce for letters, two cents per four ounces for newspapers, and six cents per four ounces for book or pattern packets. Letters may be registered on payment of six cents extra. Prepayment is not compulsory, but unpaid mail matter will be charged double postage on delivery, and a double fine will be imposed for deficient prepayment. The rates by French mail steamers will remain as at present. These rates take effect on and after the 1st of January.

The news from Atchin is very meagre. The military commander has succeeded in taking an important position, but at last accounts the Atchinese were still showing a determined front contesting the ground inch by inch, while disease was constantly thinning out the ranks of the Dutch forces, and constant reinforcements were necessary to keep the garrison up to the required strength. Whether a third expedition will be despatched by the Netherlands Indian Government has not yet transpired, but unless this is done, it is evident that the subjugation of the Atchinese will not be accomplished, the present forces in and near the Kraton having apparently enough to do to maintain the security of their own position.

The King of Siam has, we learn, written to the European and other Governments tending free hospitality to astronomers and scientific men who may visit Siam to witness the eclipse in April next, offering to defray all their expenses from the time of landing to their departure from the country out of his own private purse. This generous offer evinces his Majesty's anxiety to further the cause of science, and affords a proof of the rapid strides Siam is making in its advancement towards material progress.

On the 20th Nov. the officers and men of H.M.S. *Charybdis* gave a very successful entertainment at the Town-Hall in aid of the widows and orphans of the seamen and marines who lost their lives in the Ashantee war, and we understand realised some $300 over and above all expenses. This is, we believe, the first entertainment instituted for this object; but now that the *Charybdis* has taken the initiative, it is probable the example will be followed in other parts, and a considerable sum collected by this means.

The following report of the Committee of Administration of the Sarawak Government appears in the Sarawak *Gazette* of the 16th Nov:—

The despatches received from H.H. the Rajah were read and explained to the Datus. The Committee was informed by the president that instructions had been sent to the Hon. J. B. Cruickshank to build a fort and establish a station at Kapit, about 160 miles up the Rejang. Arrangements were made for placing the management of the Sadong mines in other hands. The Datus were informed that the proposed Penitentiary having met the Rajah's approval, the building will be erected on his Highness's arrival from Europe. The s.s. *Heartsease*, being considered beyond repair, is to be sold. The boiler of the *Ma'u Sibu* having arrived, the boat is to be got ready at once, and placed at the disposal of Dr. Robertson to assist him in his explorations at Lingga and Silantik.

During a thunder storm two Malays from Tanjong Katong were fishing about a mile from shore, when the boat was struck by lightning. Only one of the men survives; he is a good deal

Digitized by Google

scorched, and all he recollects is that he was struck by lightning and fell to the bottom of the boat. His comrade has not been heard of—but as a native craft, which had a mast shivered to atoms, was quite close to where the men were fishing, it seems a fair inference that the missing man was killed by lightning.

A few days since Capt. Dunlop and Superintendent Maxwell, with a party of police, endeavoured to surprise a party of gamblers at a house in Hong Kong-street, obtaining admittance through two houses some doors away. A slight delay occurred in getting the doors of one of these houses open; this afforded the inmates of the gambling-house, of whom there were many, an opportunity of escape, and only six of them were secured as prisoners.

Soundings are being taken round the Islands of Mauritius and Reunion, for the purpose of fixing upon the most convenient landing-place for the electric cable between the Cape and Aden. This line will place Singapore in telegraphic communication with those places.

Commercial Report.

(For dates see first page.)

IMPORTS.

HANKOW.—The improved demand noticed in our last report had not been maintained, and there was only a very small business to report. The enquiry had chiefly been confined to Grey Shirtings.

SHANGHAI.—During the fortnight business had been on a very limited scale, and the market at the close showed no signs of any improvement. At the auctions a considerable decline had been established for Camlets, Spanish Stripes, and Long Ells. A large quantity of damaged American Drills were also sold at auction, which had filled the dealers' hands for the time. Cotton Goods.—Grey Shirtings: Only a limited business had been done. Common goods were 1 cand. lower, but there was no change in better descriptions. T-Cloths were without change, but very little had been done. White Shirtings: Inferior goods lower, while better sorts remained without alteration. Drills were also rather lower, and business in sound goods on a very small scale. Velvets: Hardly anything doing, but prices unchanged. Fancy Cottons had been in small request, but showed no alteration. Woollens.—The demand had been limited, and prices in most cases showed a reduction. Camlets had been sold 5 to 6 mace lower, and Long Ells had declined about 2 mace. Spanish Stripes were without alteration, but business had been on a very small scale.

FOOCHOW.—Import sales had been as follows:—T-Cloth: 7 lb., 500 pieces at $1.70 piece. Lead: Small sales at $8.25 to $8.50 per picul against tea.

HONG KONG.—The arrivals during the interval, besides the mail steamer had been the s.s. Glaucus, Sylvia, Deucalion, Agamemnon, and ship Chinaman, bringing full supplies of manufactured goods for this market and the North. A small business had been done in Imports during the fortnight, without any improvement in prices. Importers were willing sellers of both goods and yarn, but the dealers showed great reluctance to go into stock, and while supplies continued to come forward on a large scale there is little hope of obtaining better prices.

BATAVIA.—During a greater part of the interval business in imports was almost entirely suspended, in consequence of the native new year's holidays, and although these festivities were at an end little or no revival was apparent; any transactions that had taken place had been confined principally to Dutch staples.

SINGAPORE.—Messrs. Boustead's Report says:—There has been very little animation in piece goods since our last. 8¼ lbs. Grey Shirtings have been placed to a moderate extent, while 6 lbs. and 7lbs. keep very dull. In T-cloths 6 lbs. have been in most request, but clearances on the whole have been small; 7 lbs. quiet and rather lower; 4 lbs. and 5 lbs. are difficult of sale. 36 inch White Shirtings of all descriptions are quiet at the close. 45 inch 15-16 White Cambrics have been dull and prices rather weaker. Grey Yarn: The small enquiry for 40's has been supplied at quotations; other counts dull. Coloured Yarns very dull and lower. Turkey Red Cambrics: Small transactions reported at about late rates. Iron is quiet, and prices are nominally as last quoted, though very weak; lower rates are looked for. Yellow Metal meets with a moderate enquiry at about former prices. Copper Sheathing is in no demand; there have been no late sales. Zinc Sheathing is neglected. There is a small enquiry for roll Zinc. Pig Lead continues dull and difficult of sale. Steel is still weak, and late prices are barely maintained.

PENANG.—There had been rather more enquiry for goods generally during the fortnight, but still, transactions in the aggregate had been very moderate; prices were without improvement, and in one or two instances lower rates had been acceded to in order to effect sales.

EXPORTS.

TEA.

HANKOW.—Settlements, 1,343 chests. Shipments on native account, nil. Export of Hankow district Teas to 14th November, 1874, 53,822,266 lbs.; export of Hankow district Teas to 14th November, 1873, 53,941,276 lbs.; decrease, 1874, 119,010 lbs.

KIUKIANG.—Arrivals had been small, and supplies were nearly exhausted. Export from the commencement of season to 11th November, 21,682,540 lbs.; export from the commencement of season to 11th November, 1873, 19,570,121 lbs.

SHANGHAI.—Black: An unimportant business had been transacted since the departure of the last mail. Prices remain unchanged; the stock had been reduced to a small compass; supplies were drawing to a close. Settlements for the fortnight, 3,550 chests; re-shipments on owner's account, 700 chests; stock; 2,000 chests. Green: A moderate demand had existed during the fortnight. Prices for fine Teas had been maintained, but medium and common chops showed a decline of Tls. 1 to 2. The reported stock, although large, did not represent all of the Tea on the market, as many Teamen were not showing all their musters. There was every reason to suppose that the crop would be in excess of that of last season. The following were about the prices paid:—For Country Tea, Tls. 24 to 39 per picul; Pingsuey, Tls. 22½ to 33 per picul; settlements, 23,846 half-chests; total stock, 96,990 half-chests.

FOOCHOW.—Messrs. Westall, Galton, and Co.'s Weekly Letter says:—A considerable business for the time of year has been passing, and settlements in Congou have amounted to upwards of 14,000 chests, which have been principally taken for the London market. But few desirable parcels now remain on offer, and for these teamen are very firm. Prices have ruled for all grades much as last quoted, and our market closes very quiet. The remaining stock consists of a more undesirable selection, and arrivals from the country are nearly at an end. Souchong: Only one chop has found a buyer. Oolong: But trifling purchases have taken place. Flowery Pekoe and Scented Teas: No transactions. Settlements:—Congou: 12,250 chests, common to flavoury, 1s. to 1s. 2⅝d.; 1,180 chests, common, 8¼d. to 11⅜d.; 1,076 chests, dust to leafy, 7d. to 9¾d.; Souchong: 102 chests, common, 1s. 1¾d.; Oolong: 200 half-chests, good, 1s. 2½d. The Export to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 51,954,790 lbs., against 46,639,996 lbs. at the same time last year. To America, 864,675 lbs., against, 2,259,781 lbs. To the Colonies, 11,161,355 lbs., against 11,891,055 lbs. last year.

AMOY AND TAMSUI.—Since the 9th Nov. about 15,000 half-chests of Ooloong had been bought at prices which, on the whole, showed no change. The receipts to date had been 192,800 half-chests, and with the quantity yet to arrive from the country the season's supply would be about 200,000 half-chests. The Joachim Christian had cleared for New York with a cargo of 462,955 lbs. Ooloong, and the Carmelite and Ida were expected for the same port. Advices from Tamsui extend to 15th instant. Total settlements of Formosa Ooloong to date had been 85,000 half-chests, against 57,000 half-chests at the same time last year, and the exports to the China coast had been 2,795,000 lbs.

CANTON.—Messrs. Deacon and Co.'s Report says:—Considering the low description of Tea on offer a fair business was transacted early in the fortnight, at very full prices, in fact, in many instances, quite Tls. 4 have been paid over last London rates by telegram; of late, however, there has not been much doing, but former high rates have been maintained. Canton District Congou: Only one small parcel has been sold at Tls. 17. At Macao large contracts are said to have been made at about former prices. Scented Teas: Musters of Capers now on offer, show that the season is closing fast. Teamen are very firm, but have reason to be so, as they obtain nearly in all instances what they ask. Of Orange Pekoes about 1,800 boxes have been taken for either the Australian or Continental markets, the remaining settlements are for England. The following is a summary of the fortnight's business:—Canton District Congou, 700 boxes, at Tls. 17 per picul; Scented Orange Pekoe, 3,000 boxes, at Tls. 15 to Tls. 27 per picul; Scented Caper, 6,500 boxes, at Tls. 17 to Tls. 24 per picul; Imperial, 500 boxes, at Tls. 18 per picul.

SILK.

SHANGHAI.—The sudden collapse on the London market had caused an unusually quiet state of business, and since the departure of the last English mail the settlements had scarcely reached 400 bales. Of these about 150 bales had been taken for America, comprising exclusively Re-reeled Tsatlees and Hainings, while for Europe the purchases had been restricted to Yellow Silks at Tls. 185 to 255, and common Laeyongs at Tls. 210, besides some small lots of Tsatlee and other sorts, said to be on native or joint account. The Chinese had shown much pertinacity in maintaining prices, and only in a few instances was any willingness to grant even a trifling concession displayed; and, in the absence of any important transactions, quotations remained nominally unchanged. Settlements for the past fortnight—Chinas, 400 bales. Total settlements since 1st June, 53,900 bales; against 1873-74, 41,500 bales; 1872-73, 43,200 bales. Comparative unsold stock 1874, 13,500 bales; 1873, 7,000 bales; 1872, 4,500 bales.

CANTON.—Messrs. Deacon and Co. report that there are no symptoms of lower rates obtaining, and holders seem apathetic about quitting stocks. Transactions have been on a moderate scale; settlements for the fortnight are 380 bales, 240 of which were purchased previous to departure of last French mail. There is now little doubt that the season's export will be a short one; probably under 8,000 bales. Loong-kongs: Only fine sorts are enquired for, and of these there is scant supply. Long-reels: Parsees have taken 150 piculs for the Bombay market. Re-reels have been in limited request, settlements about 300 boxes. Waste: 200 to 300 bales of No. 2 quality are said to have changed hands. Stock is estimated at 700 bales Tsatlee, 150 bales Loong-kong. 150 bales Cumchuck and Lacklow, 100 bales Kow-kong and about 400 bales of inferior kinds.

LATEST TELEGRAMS.

CHINESE GOVERNMENT LOAN.

HONG KONG, DEC. 30.—The Chinese Government has contracted a loan of £627,675, bearing 8 per cent. interest. The loan will be issued at 95 per cent. through the Hong Kong and Shanghai Bank, under Imperial authority, and secured by the customs revenues. £300,000 of the loan are to be placed in China at the exchange of 4s. 1¼d. per dollar. The subscription list will close on the 16th proximo.

THE ATCHIN WAR.

THE HAGUE, DEC. 31.—The Government has received a despatch from Atchin, dated 25th instant, announcing that the Dutch squadron would probably leave at the end of the month for the west coast of the recalcitrant states. The natives are preparing for a vigorous resistance.

THE SALE OF A DANISH IRONCLAD TO CHINA.

The Finance Committee at Copenhagen having demanded to see the contract and all documents relating to the sale of ironclads belonging to Denmark, the Government produced the same. The contract shows that the sale was effected by Baring Brothers direct, acting under a leading counsel's advice. At the demand of the Committee the Government will instantly commence a suit, claiming £180,000 as the balance of the proceeds of sale.

RUSSIA AND KASHGAR.

ST. PETERSBURG, DEC. 27.—Yakoob Khan of Kashgar has paid the compensation demanded for his interfering with the mercantile operations of a Russian caravan last year. Yakoob, in return for the Sultan's recognising him as Khan, is coining silver money with the name and insignia of Abd-ul-Aziz, as though he were a vassal and tributary of the Porte.

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, DEC. 30.—The P. and O. Company's steamer Venetia, with the homeward India and China mail, arrived at noon, and the mail left at 1.50 P.M. for London.

NEXT INWARD MAIL.—SUEZ, DEC. 28.—The Messageries Maritimes steamer Peiho, with the inward French mails, from China and Japan, left here to-day for Port Said and Marseilles, at which latter port she may be looked for on the 5th of January.

HEAVY PORTION OF LAST INWARD P. AND O. MAIL.—SOUTHAMPTON, DEC. 30.—The P. and O. Company's steamer Australia arrived this morning, with the heavy India, China, and Australian mails, 137 passengers, £400,000 in specie, and 11,458 packages of cargo. The Australia left Calcutta, Nov. 19; Madras, 23; Galle, 27; Aden, Dec. 6; Suez 13; Port Said, 14; Malta, 19; Gibraltar, 25.

INWARD MAIL DUE JANUARY 25.—GALLE, DEC. 31.—The Messageries Maritimes steamer Meikong, with the homeward French mails from China and Japan, left here to-day for Aden.

OUTWARD MAIL OF DECEMBER 25.—SUEZ, JAN. 2.—The P. and O. steamers Sunda left at 6, and the Mongolia at 7 A.M., with the outward India, China, and Australian mail of the 17th—25th ult., for Bombay and Calcutta respectively.

OUTWARD MAIL OF DECEMBER 4.—GALLE, DEC. 31.—The Messageries Maritimes steamer Tigre, from Marseilles 6th December, left here to-day for Singapore.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Dec. 30, at London, from Rangoon, Jemma Parodi; Jan. 1, at Falmouth, from Maulmain, Glasgow; at London, from Shanghai, Red Riding Hood; from Colombo, Clodian; at New York, from Colombo, Dorothy; 2, at London, from China, &c., Glenfalloch (str.); 3, Cawdor Castle (str.); from Colombo, Rija (str.); from Foochow, Undine; at King Road, from Passraoeang, Elizabeth Ann.

DEPARTURES.—Dec. 22, from Glasgow, for Batavia, William McKinnon (str.).

LAID ON.—At London, for Hong Kong, Hervatska; for Singapore, East Lomond. At London, for Colombo, &c., Rajpootana (str.).

SPOKEN.—Scawfell, London to Colombo, Nov. 1, 20 S., 28 W.; Corea, London to Shanghai, Nov. 11, 15 S., 33 W.; P.Q.G.F. (barque), Cardiff to Galle, 35 days out; T.R.C.H., Cardiff to Hong Kong; Helena Henrietta (Dut. barq.), Java to Amsterdam, Nov. 25, 21 S., 1 E.; G. H. Metz (Dut. barq.), from Java, Nov. 7, 35 S., 24 E.; Fortune (Amer. ship), Manila to Boston, Nov. 4, 28 S., 45 E.; Felix Mendelssohn (Ger. ship), Manila to New York, Nov. 4, 35 S., 22 E.; Zingra (barq.), Batavia to Boston, Nov. 27, 20 S., 3 W.; Lempey Eysteiz (?) (barq.), Hong Kong to Buenos Ayres, Oct. 26, 30 S., 37 E.; Derico (Amer. ship), Java to Stockton, United States, November 16, 36 S., 17 E.; Camilla (barque), Manila to Falmouth, Nov. 28, off St. Helena, Crested Wave (barque), Hong Kong to Buenos Ayres, Nov. 14, 35 S., 20 E.; Beatrice (barq.), Batavia to Amsterdam, Nov. 30, 19 S., 4 E., 50 days out; Mountain Laurel, Manila to Liverpool, Oct. 9, off Java; Frederick (barq.), Batavia to Falmouth, Nov. 27, 32 S., 29 E., 40 days out; P.Q.D.S. (Com. Code,) (Germ. ship, Batavia to Ghent; Khersonne (barq.), Plymouth to Galle, Nov. 23, 18 S., 30 W.; Green Jacket (ship), Cardiff to Hong Kong, Nov. 28, 6 S., 32 W.

CASUALTIES.—The Jessie M'Donald, Sivewright, arrived in the River Dec. 29, from Macao, reports:—Left Macao with a S.W. monsoon, ran aground on Cuarteran reef, but got off after heaving overboard part of cargo forward without assistance, and part cargo forward apparently without any damage, having been about an hour and a half on the reef. Dartmouth, 31st Dec.—The Marianna Catharina Elizabeth, Reeders, from Macassar to Amsterdam, put in here to-day, with loss of sails. Amsterdam, 29th Dec.—The 4 Gebroeders, v. d. Zee, which arrived at Nieuwe Diep to-day, from New York, encountered a heavy gale on the 18th Dec., in lat. 47 N., lat. 15 W., and lost sails.

AT ST. HELENA.—Nov. 24, Flying Spur, from Manila; Dec. 3, George Ville, Duchess, from Java; 3, Antipodes, from Ilo Ilo; 4, Trinidad, from Manila; 5, Pride of the Ocean, from Java; 8, Indus, from Java; 11, Swiftsure, from Zebu; Nov. 29, Lauderdale, from Shanghai; Nuevo Lantaro, from Singapore; Ernestine, from Java; 30, Alexander, from Singapore; Dec. 1, Esperanzo, from Singapore; 1, Luzon, from Penang; 2, Gwendoline, from Samarang; 2, Vigilant, from Java; 2, Samuel G. Reed, from Yokohama; Nov. 24, Sing Tai, from Hong Kong; 26, Triton, from Java; 27, Norham Castle, from Shanghai; 30, Eolus, Waterloo, from Java; 30, Borealis, from Shanghai; 30, Don Ricards, from Java; Dec. 2, Nicolaas Witsin, from Java; 5, Phalton, from Java; 6, Bestivaer, from Java.

AT ASCENSION.—Nov. 20, Aradus, Apuns, from Padang.

OFF ASCENSION.—Dec. 4, H.C.R.S. Lizzie Nedale (British barque), from Manila for Falmouth; 5, J.M.L.B. Leucadia (British barque), from Shanghai, for London; 6, T.H.K.T. Duke of Abercorn (British ship), from Shanghai, for London; 8, R.B.M.J. (German ship), from Java, for England; 9, N.C.L.D. Beatrice (British barque), from Batavia, for Amsterdam; 11, H.P.N.V. Cora Linn (British barque), Janci, from Sarawak, for London; 12, H.D.F.G. Phaeton (British barque), from Java, for Cork.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ALLEN—On the 5th Nov., at Shanghai, the wife of I. W. Allen, of a daughter.

ALT—On the 28th Dec., at Woburn Park, Weybridge, Mrs. William J. Alt, of a daughter.

ANSON—On the 23rd Dec., at Ventnor, Isle of Wight, the wife of Commander Charles V. Anson, R.N., of a daughter.

HASLAM—On the 2nd Nov., at Hankow, Mrs. W. H. Haslam, of a son.

JARDINE—On the 23rd Dec., at Glen Stuart, Dumfriesshire, the wife of Sir Alexander Jardine, Bart., of Applegirth, of a daughter.

LYALL—On the 25th Nov., at Singapore, the wife of William Lyall, of a son.

MCGILVARY—On the 24th Nov., at Bangkok, the wife of Rev. D. McGilvary, of the Amer. Presbyterian Mission of Chiengmai, of a son.

NEAVE—On the 21st Nov., at Singapore, the wife of John S. Neave, of a daughter.

PELL—On the 1st Dec., at Singapore, the wife of Bennett Pell, of a son.

SCOTT—On the 15th Nov., at Canton the wife of Edward Irwin Scott, M.D., of a son.

MARRIAGES.

DICKSON—DICKSON.—On the 13th Nov., at St. John's Cathedral, Hong Kong, by the Rev. R. Hayward Kidd, M.A., Matthew Dickson, M.D., English Presbyterian Mission, Taiwan, to Jane Hall Dickson, second daughter of W. Dickson, Coatbridge, Glasgow, Scotland.

GORDON—INGRAM.—On the 13th Nov., at St. John's Cathedral, Hong Kong, by the Rev. R. Hayward Kidd, M.A., the Rev. Robert Gordon, M.A., English Presbyterian Mission Amoy, to Mary, second daughter of the Rev. William Ingram, Free Church, Rothiemay, Banffshire, Scotland.

MANGER—VINCENT.—On the 9th Nov., at St. John's Cathedral, Hong Kong, by the Rev. Hayward Kidd, Joseph Edward Manger, to Susannah Vincent, daughter of the late Captain George Graham, of Workington, Cumberland.

SCHMID—CORNOCK.—On the 11th Nov., at Trinity Church, Shanghai, Stephen Henry Schmid, of Shanghai, to Jane Elizabeth Cornock, of London.

DEATHS.

DOW—On the 12th Nov., at Shanghai, Francis Louis Dow, aged thirteen months.

HART—On the 21st Nov., at Hong Kong, Ivor Charles Frank Hart, aged 4 years.

HENDERSON—On the 2nd Nov., at the U. S. Consulate, Koolangsoo, Amoy, of acute dysentery Gertie, the beloved daughter of E. A. Henderson and J. J. Henderson, aged 2 years.

HUTCHINSON—On the 23rd Dec., at Canton, of typhoid fever, St. John Hutchinson third son of R. S. Hutchinson, M.D., of Scarborough, aged 26.

LAEN—On the 22nd Dec., at Belvedere House, Bellevue-terrace, Southsea, Sarah, the widow of the late Capt. Laen, R.N., Master Attendant, Chatham Dockyard, aged 78.

O'GERAN—On the 24th Nov., at Murray Barracks, Hong Kong, Edward H. B. O'Geran, Lieut. H. M. 80th Regiment, aged 29 years.

REINHARD—On the 24th Dec., at 10, Boswell-road, Highbury, Hugo Reinhard, formerly of China, native of Havelberg, Brandenburg, in the 59th year of his age.

SPOTTISWOODE—On the 29th Nov., at Singapore, Archibald James Spottiswoode, aged 52 years.

TORDOFF—On the 28th Dec., aged 51, at Blenheim Mount, Bradford, Sarah Ann Render, wife of Thomas Denbigh Tordoff.

Miscellaneous.

THE FORMOSA TREATY.

The Prince of Kung, Wen Seang, Paoyun, Mao Ts'anghe, Tung Seun, Shenk kwei fun, Tsunglun, Tsunghow, Chenglin, Hsia Kiakao, imperially appointed Commissioners for Foreign Affairs of the Tatsing Empire, &c.: and Okubo, Minister Plenipotentiary of the Japanese Empire, &c., hereby execute this instrument in proof of their having agreed upon certain articles by which each party binds itself to carry out certain measures.

Whereas in all cases where the subjects of a country need protection from harm it is for that country to adopt its own measures for affording such protection in an effective manner, and where any occurrence takes place in any country it devolves upon that country to deal with the matter. Now, as regards the cruel wrongs done to subjects of Japan by the savages of Formosa, wrongs which Japan at first thought to hold the perpetrators responsible for, and consequently sent an army to call the said savages to account, but having now come to an arrangement with China to withdraw this army and to adopt measures for future advantage, therefore the following Articles have been mutually agreed upon:—

"1. The action taken by Japan having had for its object the righteous purpose of protecting her own subjects, China undertakes to refrain from pronouncing it irregular.

"2. China undertakes to pay an indemnity to the families of the persons who were wronged on the occasion referred to, and she professes herself willing to retain for her own use the roads and houses which Japan has constructed in the locality indicated, binding herself in the first instance to pay a certain sum for the same as per separate article agreed upon.

"3. All the correspondence which has passed between the two countries in reference to this matter will be retracted severally by each and cancelled, never again to be referred to. China must, as a matter of course, take measures for the effective control of the savages in the said locality, so that they may never again prove a source of danger to seafaring men."

"CONVENTION.

"The Prince of Kung, and seven others, as before named, Imperially appointed Commissioners, &c., and Okubo, Minister Plenipotentiary, &c., have agreed upon the following Convention:—

"The Formosan question having been satisfactorily arranged by H. E. Wade, of England, in consultation with the representatives of the two countries, and an instrument embodying the course of proceeding having this day been executed, China consents as a preliminary measure to indemnify the families of the wronged Japanese to the extent of 100,000 taels. China also consents to take over for her own use the roads and buildings constructed by the Japanese upon their evacuation of the territory, and to pay for these the sum of 400,000 taels.

"It is further agreed that on the {20th / 12th} day of the {12th / 11th} moon of the {7th / 13th} year of {Mingche / Tungche} of {Japan / China} {the whole of the / the whole of the} forces shall be removed {by {Japan / China}} without the slightest failure or money shall be paid {by {Japan / China}} without the slightest failure or delay, and if the Japanese soldiers shall not have been wholly removed on that day, then the Chinese money need not be wholly paid. In witness whereof this Convention is drawn up; a copy to be preserved by each contracting party.

"Tungche, 13th year 9th month—day.

"Mingche, 7th year 10th month—day."

PACIFIC MAIL COMPANY.

IRWIN'S EXAMINATION.

WASHINGTON, DEC. 17.—The Committee on Ways and Means continued the examination of Irwin to-day by its sub-committee, which met at his room in the hotel as on Wednesday. The testimony is still kept strictly private by order of the committee, and nothing but frag-

Digitized by Google

mentary and somewhat doubtful statements of the nature of the testimony taken can be obtained. The statement of the committee in regard to the examination is that Mr. Irwin is in a very weak condition, and that he cannot be kept on the stand for more than an hour or two at a time. They think the ends of truth and justice will be best served by withholding his testimony from publication till he has said all he has to say. They assert that Irwin has answered very frankly and candidly all the questions of the committee, thus far. So far as can be learned, it seems that he has not yet directly implicated any member of Congress in corrupt negotiations for the passage of the subsidy. It is believed that clues have been given which will enable the committee to learn from other witnesses important facts concerning the transactions. Subpœnas have been sent to New York for other witnesses, who are expected to arrive in a day or two. As soon as the object of the committee in keeping the testimony secret has been attained it will be given in full to the press. It is certain that, however important or unimportant Irwin's testimony has been up to this time, it is all exceedingly interesting, and will prove a valuable contribution to the solution of the Pacific Mail mystery. A large number of witnesses are in attendance, who will be examined as soon as the committee is through with Irwin. The rumours are constantly renewed in regard to the names of certain Congress men, but they are not based upon disclosures of new facts. It may be said in this connection that the amount which it is reported Mr. Parsons received as his share in the business was $5,000. As Mr. Parsons had no delicacy about stating that he received a sum of money, he probably has no wish to conceal the amount of it; but whether he has or not, the committee will inquire of him specially about it, and he is likely to be the next witness after Mr. Irwin has concluded. The rival interests which are operating to defeat the renewal of the Pacific Mail subsidy are very great.

CHINESE EMIGRATION.—In Congress at Washington, Mr. Hager, of California, submitted a resolution providing that so much of the annual Message of the President as relates to Chinese immigration be referred to the Committee on Foreign Relations for report by Bill or otherwise, to remedy the evils to which the President calls the attention of Congress. Also, referring to that committee the resolutions of the California Legislature on the same subject; and the resolution presented by him last session instructing the Committee on Foreign Relations to inquire into the expediency of preventing the importation of Chinese women for immoral purposes, and suppressing the coolie trade. Agreed to. Representative Page, of California, was heard by the House Committee on Foreign Relations in an argument to show the necessity of action by the Federal Government to prevent the importation of coolies under servile labour contracts, and Chinese women for immoral purposes. Mr. Page proved the unanimity of public sentiment in California on this subject by reading from the platforms of both political parties Governor Booth's last message, resolutions of the Legislature, monster petitions, and other documents. The fact of the existence of the evils complained of was exhibited also by affidavits of missionaries resident in San Francisco, and the necessity for Federal action set forth by quoting a decision of the United States Circuit Court, holding the State law passed to correct these evils to be in conflict with the Burlingame treaty and the Constitution of the United States. Mr. Page also showed that the provisions of the treaty requiring both nations to enact laws against the compulsory introduction of Chinese subjects into the United States had never been properly complied with by this country, and not at all by China; and that no steps whatever had been taken by Congress to prevent the importation of Chinese women as slaves for prostitution. Congressman Luttrell, of California, was present, and corroboroted his colleague's statement. He read a letter from the Japanese Consul in San Francisco indorsing this movement, and also briefly addressed the committee, urging the necessity for prompt action. The members of the committee expressed themselves fully impressed with the magnitude of the evils described, and gave the California Representatives assurances that action on the subject should be promptly taken.

ENGLISH MAIL PACKETS AND THE WEATHER.—The following is an extract from a letter written by a commander of a mail packet on a foreign station to his brother, and forwarded by him to *The Times* as an example of what is required of the sailors of the present day:—"I have had nothing but gales of wind right ahead the whole of the voyage, and being on the new contract, they allow me only seven days to run 1,630 miles. I was seven days at one P.M. to-day, and have still 240 miles to go. If I can get in before three P.M. to-morrow the ship is only fined £100, if after three P.M., £200; and £100 for every twelve hours after that. There is no allowance made for bad weather. On the 30th I ran only ninety miles; the old ship was quite buried, driving full speed in the teeth of a gale, making four and a half knots per log, and one and a half actual speed per hour. I have had to beat her over under sail, the wind never allowing her to lay her course. It is too hard on the poor old ship; and, to make matters worse, they give us coals which will not burn; but she has behaved very well, and I still hope to be in before the £200 fine, if the sea will only go down a little, or I get a slant with the sails. I have been wishing I could have the Postmaster-General on our forecastle all this trip; he would be a fit companion for Lot's wife by this time, and the next time he made a contract would, perhaps, allow a little for head winds and bad weather.—P.S. I just saved the £100 fine by about half an hour, which was close work. I had to come round the corners very close to save my distance, we had such a strong head wind."

THE *Daily News* and the *Examiner* have been engaged in a conflict on the subject of the Lindau family, in the course of which one of the three brothers—owing to an unlucky stroke on the part of the *Examiner*—seems to have been killed. There were certainly three of them some little time ago, all more or less known to fame—namely, Paul Lindau, author of several dramas, of "Molière in Deutschland," and other critical productions; Rudolph Lindau, author of a collection of novels and tales and of a series of letters written from the headquarters of the Prussian guard corps during the late war; and Richard Lindau, who, after the murder of Capt. Schmidt, was sent as consul to Bayonne with instructions to draw up a report on the measures taken by the French Government for guarding the Franco-Spanish frontier. The *Examiner* cannot help accepting Paul Lindau, to whose literary merits it readily bears witness. But it declines to allow him more than one brother. Whether it is Rudolph Lindau or Richard Lindau whose existence the *Examiner* is unwilling to recognise does not appear. But, as a matter of fact, Richard Lindau holds the post of German Consul at Bayonne, and Rudolph Lindau the post of Attaché to the German Embassy at Paris.

THE *Economist*, remarking upon the subject of the Chinese Loan, says:—The moderation of the amount of the proposed loan is no doubt an element in favour of China, but whatever the amount, the points to be kept in mind by investors are that China is practically an unknown country undergoing a tedious political and social revolution in consequence of its enforced contact with Western Powers, and that it is quite uncertain whether such a country can possess that kind of political stability which is essential to financial good faith. Lending to China may be a good enough speculation for those who know something about it and can afford to take the risk, but the case is one where much knowledge is required and should be used, and where the risk, judging by the rate of interest, will presumably be appreciable. It is greatly to be feared, however, that China, like Japan and other new borrowers of recent years will be demoralised by the cordiality of its welcome to the money markets of the West, and will be tempted to exceed the proper limits of indebtedness, even if it should now be keeping within them. Yet why should China be able to borrow a sixpence without first producing its accounts of revenue and expenditure?

A PASSENGER by the *Sumatra*, from Brindisi for Alexandria, warns travellers to and from India and China *viâ* Brindisi against the frequent robberies of luggage which take place between Naples and Brindisi. "My portmanteau (a good strong leather one, with a good lock) was," he says, "opened, and a small box containing jewellery to the value of between £50 and £60 taken out. It must have been done in the luggage van, as the only time it was changed was at Foggia, where it stood for more than an hour, but in the middle of the platform, where it could not be tampered with unseen. The lock was not broken. A fellow passenger by the *Sumatra* was also robbed in a similar manner on another of the Italian railways."

IN addition to the changes announced in another column, Mr. R. P. Forshaw has established himself as a tea broker, at 32, Rood-lane. Mr. E. R. Cock, of the late firm of Cock, Gabriel, and Co., 9, Fenchurch-street, has taken into partnership Mr. Septimus Maitland and Mr. James Maitland, both late of Shanghai. The business will in future be conducted under the style of Cock, Gabriel, and Maitland.

A JAPANESE gentleman, twenty-four years of age, said to be the son of the Mikado's principal physician, has just taken his degree as a Doctor of Medicine at the University of Berlin. The Japanese doctor is now preparing for practical experience in Austria, Italy, and France, after which he intends to visit England.

THE small planets discovered by Palisa at Pola, near Trieste, on March 18, April 21, and October 13, last year, have received the names Austria, Melibœa, and Siwa, respectively. The only one still in want of a name is that discovered by Professor Watson, in China, on October 10.

THE Nederland Company's royal mail steam-ship *Prins Hendrik*, Captain Braat, which left Southampton on the 15th ult. for Batavia, reached Port Said on the forenoon of the 26th inst. This is, we believe, an unprecedented passage, representing an average speed of 11 knots.

ON the 29th Dec. Messrs. Caird and Co., of Greenock, launched a new screw steamer, the *Salak*; she is built for the Netherlands India Steamship Company, is 1,097 tons gross, and measures 255 feet on the main deck, 30 feet in width, and 18 feet 6 inches in depth (moulded).

Naval and Military.

We hear that it is intended to transfer the 28th Regiment, now serving at Malta, to Hong Kong.

Colonel T. W. Milward, C. B., Royal Artillery, aide-de-camp to the Queen, and superintendent of the Royal Laboratories, Woolwich Arsenal, died on the 31st ult. Colonel Milward was an officer of great scientific attainments, and his career in the army, thus prematurely closed, has been brilliant and remarkable. In 1846-7 he was actively engaged in the China campaign, being present at Sinho, Tangku, and the capture of the Taku Forts. While in China he was appointed deputy assistant-quartermaster-general when the ill-fated Captain Brabazon was taken prisoner by the enemy, and at the close of the campaign received, with his medal and clasps, the brevet rank of major. He was brigade-major at Woolwich from 1861 to 1864. He was engaged in the Russian war, being in the Crimea at the siege of Sebastopol, for which he has the medal and clasp besides the Turkish medal. He was made assistant director of ordnance in 1864, and in 1868 was appointed to command the mounted steel gun batteries of artillery employed in the memorable Abyssinian Expedition, and was present at the capture of Magdala. It was on the retirement of Colonel Boxer, in 1870, that Colonel Milward was appointed superintendent of the Royal Laboratories, and the works have been largely developed and improved under his hands.

THE HEALTH OF THE ARMY IN CHINA.

The annual report on the Health of the Army in China has just been published. During the greater part of 1872 (the year to which the report relates) the first battalion of the 10th Regiment was serving at Hong Kong; and on leaving for Singapore (where it is at the present time stationed) it was relieved by the 80th regiment, which has since remained in China. A battery of the Royal Artillery, detachments of the Royal Engineers, and the Army Hospital Corps, and the Garrison Staff, made up an average strength of 769.

Digitized by Google

The admissions to hospital were 1,463, and the deaths, including that of an invalid at sea, on the voyage home, were fifteen. The ratios for both were much in excess of those for the preceding year, but below the average for the past ten years. General diseases are nearly twice as prevalent as in 1871. Among them were four cases of enteric fever, —two in the Royal Artillery and two in the 10th Regiment, and one in each corps proved fatal. Paroxysmal fevers were much more prevalent than during the preceding year, and many of the men were much prostrated and debilitated by repeated attacks of malarious fever. A large proportion of the cases were in the 10th Regiment, and chiefly in the left wing, which arrived from Singapore on the 28th of March. The surgeon attributes many of the attacks to the much greater coldness of the climate of Hong Kong at that season. The change of climate, however, did not affect the men of the Artillery, which arrived at the same time, to anything like the same extent; and it appears that the men of the 10th Regiment who were quartered in the Victoria Barracks suffered to a much greater extent than those who were quartered in the Murray and Wellington Barracks. Rheumatism was nearly three times as prevalent as in 1871; but there was a reduction of no less than 22 per 1,000 in the number of admissions for those diseases against which the Contagious Diseases Acts are directed. Diseases of the nervous system were below the average, but three deaths were caused by them. Diseases of the circulatory and respiratory systems were greatly above the average; and those of the digestive system caused more admissions than any other order except the febrile group of general diseases. The admissions for debility were more than four times the average; most occurred in the 10th Regiment, and they are attributed by the surgeon to the prevalence of malarious disease. There were sixteen admissions for delirium tremens, and one for alcoholic poisoning, but this high ratio was due to the repeated admissions of a comparatively small number of men. Accidental injuries were more numerous than in the preceding year, but none were fatal. Two cases of homicide occurred in the 10th Regiment. One man while on guard was shot by a sentry of his own regiment, and another was killed by a blow received in a fight. There were no deaths by suicide and no admissions for self-inflicted injuries.

The average strength of the Asiatic troops stationed at Hong Kong was 354. The admissions to hospital were 278, and the deaths six, the ratio of the former being not much more than half, but the latter more than double, the ratio for 1871. During the year there was an out-break of small-pox among the 13th Madras Native Infantry (who were then serving in China). Twenty-five cases were admitted to hospital. The regiment was sent to Kowloon, and placed under canvas, the sick being isolated by being sent to the gaol on Stonecutter's Island, which was given up temporarily as a hospital. While in camp the whole of the men were re-vaccinated. The disease did not spread further, and there were no deaths from it. Deputy-Inspector-General Crocker, referring to the prevalence of intermittent fever in the garrison, says :—

"Although there are no swamps on the island, the soil of Hong Kong favours the generation of the malarious poison, which is productive of intermittent fever, as it is composed of disintegrated granite, and is very retentive of moisture. Nearly all the cases of intermittent occurred in the 10th Regiment, and the detachment of that corps, which arrived from Singapore just as the rainy season commenced, suffered greatly from the disease. It is worthy of remark how large a proportion of the cases came from the upper block of the Victoria Barracks, which have been the last built, and are nearest to the mountain which rises abruptly behind. In the upper block not a single family escaped, and several children died from diarrhœa and debility consequent thereon. The same thing was observed in the east block, married quarters, which was formerly the native hospital, but has been converted into very convenient quarters for married people by brick partitions, and the walls were not thoroughly dry. Here also every family suffered. This is entirely in accordance with what is the common observation of medical practitioners in the colony, that newly-built houses are for a long time unhealthy. At a later period of the year both these buildings were for a time vacated, on my recommendation, as so many of the inhabitants were suffering from enlarged spleens, and a general debilitated state of health, the result of repeated attacks of ague. But although this disease was such a fertile source of sickness, it did not cause a single death amongst the men."

Referring to the cases of typhoid fever, the Deputy-Inspector General says :—"The first instance of this disease appeared in an artilleryman from the North Barracks, and endeavours were made to trace out its origin, but at the time without any satisfactory result. The water, from a well in the barracks which was occasionally used for drinking, was suspected, and carefully examined, but was found to contain hardly a trace of organic matter, though it held in solution a large quantity of chloride, owing, I presume, to its proximity to the sea. As a precautionary measure, however, the pump was locked up. A few weeks afterwards, when some alterations were being effected in the barrack yard, the drain for carrying off the waste water from the pump was laid open, and found to be completely choked up throughout its whole extent; the night-coolies, moreover, after emptying the soil-pans, were frequently in the habit of washing them out at the pump, and throwing the refuse water on the ground. This, therefore, had soaked into the well and vitiated the supply, and hence, no doubt, the cause of typhoid fever."

THE HEALTH OF THE ARMY IN THE STRAITS SETTLEMENTS.

From the annual reports on the health of the army it appears that the average strength of the troops serving in the Straits Settlements in 1872 (the 10th and 80th Regiments, and two batteries of Royal Artillery) was 708. The admissions to hospital were 1,611, and the deaths twenty. Both were in excess of 1871.

There was a great increase in the prevalence of diseases of the febrile group. One case of small-pox occurred in the detachment of the 80th Regiment at Malacca. Continued fevers were much above the average in the detachment at Penang. Their prevalence and fatality were attributed by the medical officer in charge to the unsuitable nature of the accommodation provided for the men, which consisted of the old Sepoy lines hastily adapted for their new purpose, and deficient in many sanitary requirements, and to the youth and short foreign service of the men, and their ignorance of the precautions necessary for the preservation of their health in a tropical climate. At the other stations there was no undue prevalence of these diseases and no mortality from them.

There were a large number of cases of ague. The diseases against which the Contagious Diseases Acts are directed were considerably less prevalent than during the preceding year. Diseases of the nervous system were four times as prevalent as in 1871, but those of the digestive system were considerably reduced. Diseases of the skin greatly increased, the excess being chiefly in the 80th Regiment. The prevalence of pemphigus was attributed by the regimental surgeon to the excessive heat of the weather on the arrival of the regiment, and the irritation produced by the serge clothing, which the men had to wear for six weeks after their arrival in consequence of their white clothing not being ready. The admissions for accidental injuries were more numerous than during the preceding year, but considerably below the average. Two men of the 10th Regiment were drowned while bathing in a tank at Singapore, having, in diving, become fixed in the tenacious mud which formed its bottom. There were no deaths by suicide, and no admissions for self-inflicted injuries. The 19th Regiment, Madras Native Infantry, which at the termination of the previous year was distributed between Singapore, Penang, and Malacca, continued to occupy those stations during the first four months of 1872, but on the 12th May it returned to India without having been relieved, and from that date the Straits Settlements were without Asiatic troops. The strength of the 19th Regiment, reduced to the average for the year, was 222; the admissions into hospital were 358; and the deaths were six. The admissions were considerably below, but the deaths considerably above, the average.

Surgeon-major Reade presents an elaborate report on the sanitary condition of the station. The unusual prevalence of ague in the 80th Regiment at Singapore, he states, was attributed by the medical officer to the rank vegetation, jungle, and low marshy ground by which the barracks were surrounded, and also to the youth and unacclimatised constitution of the men, many of whom were mere lads. The fever at Penang was chiefly owing to the general insalubrity of the season, the unhealthy site and bad construction of the barracks, the insufficient elevation of the floors above ground, and the very imperfect drainage. Details of the barrack accommodation, alterations in barracks, the water supply, the hospitals, &c., are given. The means of recreation at the disposal of the soldiers comprised libraries, reading rooms (fairly furnished with papers and periodicals), the usual games,—bagatelle, backgammon, chess, &c., and cricket, skittles, quoits, fives, &c., and occasional theatrical performances, all much appreciated. The construction of a fives court and the provision of swings, parallel bars, &c., had been recommended by the medical officer, Penang.

During the year fifty-three men of the European force were sent as invalids from this command to England, and twenty-five were discharged the service at Netley. The ratios both of invalids sent to England and of those finally discharged the service were considerably below the average. Constitutional affections and diseases of the digestive system furnished more than half of the invalids; and of those discharged the service constitutional affections and diseases of the circulatory and digestive systems collectively furnished rather more than two-thirds. There was no invaliding from the Asiatic troops.

The average number constantly sick during the year was 41·30 in the European force in China, and 46·39 in that in the Straits Settlements; 14·45 in the Asiatic force in China, and 10·29 in that in the Straits Settlements. Compared with 1871, this shows a reduction in the European force in China, but an increase in that at the Straits Settlements. There was a reduction in the sickness of the Asiatic troops in China. Compared with the average of the past eight years, the reduction of sickness in both the European and the native force in China was very considerable.

NAVAL PRIZE MONEY.

From the annual return just published, it appears that the balance of the amount voted by Parliament to the naval forces employed on the China station between the 1st of October, 1856, and the 28th of June, 1858 (thirty days' additional pay), remaining on the 1st April, 1873, was £5,895 9s. 2d.; and during the year following £2 15s. was distributed and paid. The balance of the net proceeds of junks captured by Her Majesty's ships, for breach of blockade of the Canton River, between the 29th August and the 19th of December, 1857, remaining on the 1st April, 1873, was £1,225 14s. 1d.; and the amount distributed and paid during the year following was 7s. 7d. The balance of the portion of booty captured at Canton by the naval and military forces on the 28th and 29th of December, 1857, awarded to the naval squadron, remaining on the 1st April, 1873, was £1,172 12s. 8d.; and the amount distributed and paid out during the year following was £1 16s. 1d. The balances, therefore, on the 1st of April last were as under :—Booty captured in China, £1,170 16s. 7d.; grant for special service on the China station, £5,892 14s. 2d.; captures for breach of blockade of the Canton River, £1,225 6s. 6d.—On the 12th of May, 1868, the Argus captured a slave-dhow on the China station. The balance of prize money remaining on the 1st of April, 1873, for distribution was £33 14s. 3d.; £4 1s. 9d. was distributed during the following year, which left a balance on the 1st of April last of £29 12s. 6d. On the 14th of May, 1868, the Argus captured another slave-dhow. The balance remaining on the 1st of April, 1873, for distribution was £12 7s. 8d.; £1 10s. was distributed during the following year, which left £10 17s. 8d. on the 1st of April last. On the 5th and 6th of November, 1870, the Teazer, also on the China station, captured three slave-dhows. On the 1st of April, 1873, the balance remaining for distribution was £553 7s. 9d., £182 12s. 6d. was distributed during the year following, leaving a balance of £370 15s. 3d. on the 1st of April last.

Literature.

The Life and Works of Mencius. With Essays and Notes. By JAMES LEGGE, D.D., LL.D. London: Trübner and Co. 1875.

Dr. Legge's efforts to render the Chinese classics fully available to English readers, and to place before them, in an intelligible form, the opinions of the great philosophical writers of China, together with such accounts of their lives and doings as have survived to our times, are deserving of the highest praise and commendation, and it is a matter for deep regret that he should have cause to complain, in connection with this matter, of an unjust aspersion on the part of Dr. Johann Heinrich Plath, of Münich, in his *Confucius und Seiner Schüler Leben und Lehren.* We must charitably suppose that Dr. Plath did not understand the English language sufficiently well to enable him to comprehend the full meaning of the title-page of the first volume of this series,—*The Life and Teachings of Confucius*,—or he would never have ventured to call it "a delusion practised on the public,"—an accusation at which Dr. Legge is naturally and justly indignant. Anyone who has the slightest personal acquaintance with China, or who is at all familiar with the work which has been done in recent years by students of the literature of that country, will know full well that Dr. Legge's name is a sufficient guarantee that a task like the present, for the due execution of which so few scholars are equally qualified, will, when undertaken by him, be well and honestly performed.

In the volume before us the Prolegomena occupies a very important place, and the vast fund of information contained therein is classified under the three following headings:—Chapter I. "Of the Works of Mencius," includes essays on their recognition under the Han dynasty and before it, on the labours of Chaou Ke and other commentators, and on their integrity, authorship, and reception among the classical books. Chapter II. treats of the life of Mencius and his influence and opinions, and in an appendix to it Dr. Legge gives the essays of two distinguished Chinese scholars on the subject of Human Nature, the one of which, he says, is in direct opposition to Mencius' doctrine, while, according to the other, the doctrine is insufficient to explain the phenomena. Chapter III. is devoted to the opinions of Yang Choo and Mih Teih, of whose teachings Mencius himself said, "I am alarmed by these things, and address myself to the defence of the doctrine of the former sages, and to oppose Yang and Mih," whose respective principles are concisely stated as "Each for himself," and "To love all equally," the latter being set forth in an essay on Universal Love by one of Mih's disciples.

If biographies confer any additional lustre on an illustrious name, Mencius is not so fortunate as his predecessor, Confucius, and what there is in that respect it is difficult to make much of, owing to the utter disregard of chronological data. From the philosopher's works, however, the principal incidents of his public life, extending over about twenty-four years, can be gathered, but he gives us no clue as to the order of time in which they happened. Mencius, it is perhaps scarcely necessary to remark, is the latinisation of Mêng tsze, *i.e.*, the philosopher Mêng; his cognomen was Ko, and he was, therefore, properly Mêng Ko. Some uncertainty prevails as to his literary appellation, for it does not appear in his works, nor is any given to him by the most ancient commentators; the legends, however, state that he was called Tsze-chü and Tsze yü, the latter, we believe, being the more usually accepted form. Mencius was born B.C. 372,—Dr. Legge says B.C. 371, but, as is well-known, he reckons dates on a system peculiar to himself, and is always necessarily a year out in his figures—and died in B.C. 289, at the age of eighty-four. It will thus be seen that Plato, Aristotle, Zeno, Epicurus, Demosthenes, &c., were his contemporaries, and Dr. Legge considers that "he can look them in the face, and does not need to hide a diminished head." Dr. Legge gives some curious anecdotes respecting the philosopher and his mother, but, of course, these are not new: he then proceeds to sketch Mencius's movements among the small kingdoms and principalities of those days, up to the time when "he retired from courts and great officers." It is to be supposed that he left a family, for his descendants form a large clan at the present day, but how far their claim to be related to the great philosopher is genuine, it is impossible to say, owing to the absence of authentic records. During the reign of Kea-tsing, of the Ming dynasty, it may be mentioned "He-wen, the fifty-sixth in descent from Mencius, was constituted a member of the Han-lin College, and of the Board in charge of the five King, which honour was to be hereditary in the family."

Some commentators have supposed that Mencius' works comprised eleven books, and it is so stated in a catalogue of Lew Hin, containing a list of the works of scholars, which had been collected up to his time (the commencement of our era), but the historian Sze-ma Tsëen, who lived 100 years earlier, puts the number at seven. Whatever may have been the importance of the four additional books, if they ever existed, they are now lost, and we have left to us seven, of which Dr. Legge has given such a careful English version.

In taking leave of this valuable contribution to our knowledge of Chinese philosophy, we would draw attention to Dr. Legge's concluding remarks on the influence and opinions of Mencius, as they possess considerable interest and significance at the present time. Mencius "has left," he observes, "one maxim which is deeply treasured by the rulers and the people of China at the present day, and feeds the supercilious idea which they are so unwilling to give up, of their own superiority to foreigners. I have heard, said he, of men using (the doctrines of) our great land to change barbarians, but I have never yet heard of any being changed by barbarians." The charm of this dangerous flattery has now lasted for more than 2,000 years, but, adds Dr. Legge, "the idol of Chinese superiority is about to be broken—broken it must be ere long." The sooner that day of change arrives, the better it will be for China and her teeming millions.

The Life and Teachings of Confucius. By JAMES LEGGE, D.D. Third Edition. London: Trübner and Co.

The fact that the "Life and Teachings of Confucius" has reached a third edition is a sufficient proof of the value of the book and the estimation in which it is held by home readers, and we are glad to see that Dr. Legge's labours have met with the reward which is so justly due to them. Dr. Legge's plan is of a twofold nature; he not only gives his readers an English translation of the Chinese classics, but he prefixes thereto a series of explanatory essays to enable them to enter upon a study of the classics with a knowledge of the antecedents of these relics of antiquity. In this, the first volume of the series, he commences with two introductory chapters, in which he explains what books are included under the term "Chinese Classics," and he makes some observations respecting their authority. The teachings of Confucius are comprised in three of what are called the Sze shoo, or Four Books, and these are styled by Dr. Legge the Confucian Analects, the Great Learning, and the Doctrine of the Mean, their respective titles in Chinese being Lun Yu, Ta Hëŏ, and Chung Yung. Dr. Legge devotes to each of these works a separate chapter of preliminary essays, in which he has collected a large amount of information, and he then gives a life of Confucius, followed by remarks on his influence and opinions. If it were only for these two last-named chapters, which contain the results of many years' labour and research, prosecuted with the greatest energy, this volume would be invaluable. Its interest is, of course, greatly enhanced by the scholarly translation of the three works enumerated above, in which the teachings of the great Chinese sage are embodied, and we hope that by its aid they may become familiar to an even larger circle of readers in this country, who, we feel sure, will not repent having entered upon a study of Chinese philosophy under Dr. Legge's guidance.

If the visit of the Shah of Persia to Europe has been unproductive of any real good to his Persian subjects, it has at least had the result of developing the literary resources of his Majesty. The *Diary of the Shah's Tour through Europe* is a quaint narrative, and that portion of it which relates to England is most amusing. Of all the sights shown to the Shah, none seem to have gratified him more than the wax exhibition at Madame Tussaud's, and it is not unlikely that Teheran will one day rival London in its wax-work exhibitions. The journey through Europe was a source of continued wonder, commencing in Russia, and increasing at every fresh stage until it finally reached the culminating point here in England. The Shah was much impressed with the appearance of the crowds who greeted him on his journeyings through London, and he is rather inclined to believe that the homage paid him by a curious mob was due to his importance as a ruler, a surmise it would be perhaps unwise to undeceive him about. The Diary is an interesting supplement to the journey itself, and when we add that the publisher, Mr. John Murray, of Albemarle-street, has spared no pains in the embellishment of the volume, we feel sure that it will be sought for by all those who wish to renew their acquaintance with an Eastern Sovereign whose popularity was so unbounded during his stay amongst us.

The current part of *All the Year Round* contains a short paper entitled "Chinese Proper Names," which is of some interest, as it explains the customs of the Celestials in this respect in a way that will be intelligible to English readers. One point in the article is worthy of notice, and the writer believes that the peculiarity he alludes to is not very generally known, and does not appear to have been mentioned in any work upon Chinese manners and customs. Having stated that Chinese women, when married, assume their husband's family or clan-names—the custom in that respect coinciding, for a wonder, with our own—the writer continues, "When, however, a married woman is mentioned in connection with judicial proceedings, she is frequently described by both her married and maiden surnames; thus we have seen in Chinese documents such expressions as the following:—'A woman of the town of Hêng-yang, of the name of Lo by birth, and Tan by marriage, accuses, &c.;' and afterwards the official in writing of her case, alludes to her by both surnames, calling her 'the woman Tan-Lo.'" A similar practice to this, it may be noted, prevails in some parts of Europe.

EASTERN POLITICS.—CEYLON.

THE state of public feeling, in at any rate one of our Eastern colonies (Ceylon), is at the present moment very peculiar. That island possesses a Legislative Council, Municipal Councils, a Chamber of Commerce, and a Planters' Association, all more or less representative of the public, though in the first-named and most important body only to an unqualified degree. Files of the *Ceylon Times*, received by the last mail, inform us that the public mind of Colombo, *i.e.*, of the Colombo merchants, remain as unsettled as ever in regard to the constitution of the Legislative Council, to which only a section of the Chamber had consented to send a representative. We believe the last member returned on the Governor's requisition was elected by the barest majority as against those who wished to decline keeping up the force of sham representation because, as they maintain, unofficial members are without any power of good, so long as there is an official majority bound to vote with the Government. Those who considered that the mercantile community should not hold aloof from council on this account, believe that some amount of good and useful work may be done by their representations, even though constantly outvoted by officials, as the responsibility of rejecting the unofficial view rests on the Executive. Out of this rather unsatisfactory state of things has arisen another, which to us seems very unpromising. It appears that not only do members of the Chamber of Commerce stand aloof from the Legislative Council Board pending the concession of a more popular constitution, but they abstain from expressing any opinion on measures of a strictly mercantile nature submitted to them for consideration and report. There has been quite recently a Bill before the local legislature for the compulsory registration of partnerships and attorneyships, having special reference to native traders and their business operations, which, in connection with the coast of India, are frequently of a larger extent in Ceylon. On the second reading of this measure the acting Queen's Advocate expressed some surprise that although the Bill had been expressly framed to meet their requirements the merchants had never given expressions of opinion upon it, and he supposed, therefore, they did not care about it. The *Ceylon Times*, in commenting upon this, remarks that the Governor "should remember that the Chamber at present is *entirely unrepresented* in the Legislature. If it had a representative in the Council we have no doubt but that the Chamber would readily tender its advice upon this or any other public measure that happened to be under consideration." It appears to us that our Ceylon contemporary is at fault both in its facts and its logic. It is not the case that the Chamber is entirely unrepresented in the Council, seeing that Mr. J. T. WHITE sits there as the representative of a majority of that Chamber. If it were so that would be precisely the reason why the Chamber should offer its opinion on this measure. We cannot help thinking the present attitude of the Colombo merchants but ill calculated to attain the object they profess to have in view, namely, the improvement of the constitution of the local Legislature.

THE MALAYAN NATIVE STATES.

THE policy adopted by Sir ANDREW CLARKE towards the semi-independent Rajahs whose dominions adjoin the Straits Settlements has lately been discussed approvingly by a correspondent of *The Times*. But the writer referred to has taken the opportunity to do something more than review the negotiations which have been recently carried on for securing a more orderly and effective administration within the territories of the native chiefs; he offers some opinions upon the agricultural and mineral resources of the southern States in the Malay peninsula, and draws a picture of what European capital and skill might accomplish under an orderly government in those regions. With the general spirit of the views expressed we cordially agree; and, indeed, it must be evident to every thoughtful man that since we have abandoned the Atchinese to their fate, since we have given up Sumatra to the Dutch, and thus in a great measure probably closed up an important agricultural field to our own traders, while we helped our rivals to consolidate their power, the time has arrived when those who have charge of our commercial interests in the Far East may appropriately turn their attention to the relations existing between the Singapore Government and the native States which lie within its influence, and may take such steps as, while conducive to peace and friendliness, will tend to spread our trading relations in a field still exclusively our own. The late Governor of the Straits did little or nothing to promote these ends; his chief glory must be that he improved and beautified his capital with a sumptuous Government House; and when he did interfere in the affairs of the local Rajahs he was not successful.

There is undoubtedly much to be hoped for if a peaceably-disposed and wise administration will develop our influence in the south of the Peninsula. The war in Atchin has had this good result, if no other, that it has a little drawn the attention of the British public to its interests in a district of which very few persons know anything except what an atlas can teach them, and this circumstance has indirectly much facilitated Sir ANDREW CLARKE'S operations. Nevertheless, even in the House of Commons there is but scant acquaintance with the political and industrial aspects of the questions involved, and among the people, of course, the ignorance is more serious still. Now there is nothing which the tax-payer at home dislikes more than a little costly war, the object of which he cannot understand, and hence the great need of caution in avoiding even the appearance either of unfriendliness or of a wish for territorial annexation. From this reflection it will immediately occur to our readers, as it has to us, how much good might be looked for towards the accomplishment of those rich commercial successes which *The Times'* correspondent foreshadows, if we possessed some well-written work on the industrial resources of the Malay Peninsula, with particulars as to its labour market, and the variations of its climate, and a summary of the political position of the native States brought down to the present time. English capital and enterprise is but little likely to be attracted to a country till some knowledge as to its capabilities and as to the security for life and property there can be readily obtained.

To revert for a moment to the political aspects of our position in the Straits, it is quite clear that those at home who are most forward to condemn interference of any kind in the affairs of petty independent States commonly know little of the true effects produced where a dominant Western Power has obtained permanent possession of even a small portion of the territory of an Eastern Potentate. We seized half Burmah. Look at the present condition of the independent half! The moral influence produced by the mere presence of the superior nation gradually enfeebles the neighbouring native ruler, and ends in the disorganisation of his people. The causes of all this are too long to set out here, but the French have had similar experiences in Cochin-China, and it may be briefly remarked that the feudal system, common to most Asiatic monarchies,—a system which no one yet seems properly to have examined—while sufficient to maintain order and social cohesion if left completely undisturbed, yet breaks up rapidly on the intervention of a Foreign Power, and of all other broken-down forms of Government is the one

seeing that Mr. J. P. [redacted]
ative of a majority of that Chamber. If it were
would be precisely the reason why the Chamber
offer its opinion on this measure. We cannot help
g the present attitude of the Colombo merchants
l calculated to attain the object they profess to have
w, namely, the improvement of the constitution of
ocal Legislature.

[redacted] long to see one here, but the French have had similar experiences in Cochin-China, and it may be briefly remarked that the feudal system, common to most Asiatic monarchies,—a system which no one yet seems properly to have examined—while sufficient to maintain order and social cohesion if left completely undisturbed, yet breaks up rapidly on the intervention of a Foreign Power, and of all other broken-down forms of Government is the one

Digitized by Google

which involves most confusion and disturbance when it falls. It is with difficulties of this sort that the Malay rajahs of late years have been forced to struggle, but while their own people are easy-tempered, patient, and docile, the invading hosts of Chinese immigrants, with their secret societies, and their rebel leaders who have fled from justice in the Flowery Land, are men of quite a different stamp. Useful enough if controlled by the strong hand of European officials, but setting at defiance the weak commands of a native chieftain whom they neither respect nor fear. Then follows a long course of misrule, involving all classes alike in unceasing misery, and preventing all sound commercial progress. Piracy gets more frequent, British subjects are robbed, and at last we wake up to a true sense of what was our duty from the first, viz., to make such arrangements—in a friendly spirit—with the Rajahs to whom we are allied as shall maintain them in their authority, and promote the happiness of their people, while protecting British interests and fostering British trade.

OPIUM FARMERS AND RETAINERS.

THE *Straits Times* questions the propriety of the ATTORNEY-GENERAL'S acceptance of the large yearly retainer of $1,000 from the Opium Farmer, not for the purpose of giving him his legal aid, but simply that he will refuse his aid to "the other side" in "private prosecutions." If this be the truth, pure and simple, the Opium Farmer must be a shocking law-breaker, or a much persecuted man, to find it worth his while to buy the silence of a lawyer at a salary exceeding that which is given here to our revising barristers. If $1,000 is the price of legal silence, what is the quotation for legal eloquence, we wonder? The objection to these retainers, however, depends on the spelling of a word. They are received, no doubt, by the *counsellor;* but are they not, in the giver's mind, an offering to the *councillor?* In the course of its comment on this arrangement, however, the *Straits Times* brings to light a curious and significant change made in the law, in favour of the revenue farmers, since the law-making for the colony was transferred from Calcutta to a local governor and local advisers, "retained" or otherwise. The Indian Government made all fines for breaches of the revenue laws payable to the municipal fund, and it prohibited under heavy penalties all attempts to compromise a prosecution. By taking away the profit and insisting on a public sifting of every accusation, it evidently sought to meet the danger of getting up false charges with a view to blackmail. But in Sir H. ORD'S time other counsels prevailed; the law was altered, and not only are the farmers allowed to withdraw their prosecutions from investigation, and to take money for doing so, but all the fines which are imposed for a breach of the revenue law are paid over to them instead of to the municipal committees. The *Straits Times* more than hints that the results of the change have amply justified the wisdom of the Indian policy; and certainly the subject is one which requires the attention of the present Governor and of Lord CARNARVON.

PUBLIC OPINION IN FORMOSA.

A SOMEWHAT curious expression of public opinion in Formosa during the recent troubles there has found its way to Japan, and has been published in the columns of the *Japan Mail*. The document in question purports to emanate from "all the scholars and people of Formosa," and is decidedly patriotic and anti-Japanese in its nature. The writers commence by remarking that "the "whole of Formosa has been included in the map of "China for more than two hundred years; and that the "several Emperors of our country, in their successive "reigns, have been moderate in inflicting punishment and "sparing of taxation, so that the four classes of the "people have enjoyed happiness and have grown and "prospered." Our readers will probably think that these sentiments must be received *cum grano salis*, as well as the statement that "if the savages murder any one, the Imperial Government has its own means of punishing them," for that is precisely what the effete administration at Peking neither would nor could do. The Japanese, however, did not place reliance on futile promises in that quarter, but "with evil in their hearts, and spying after "the fertile land, ... changed their dress to that of "the Western nations, to overbear us with their false "appearance." After this delightful acknowledgment of their timidity with regard to the garb of civilisation, the writers proceed to enumerate some of the occurrences connected with the Formosa difficulty, and to give examples of the wickedness of their enemies, of which they say that "to seek out all the instances of Japanese ferocity "would be more work than counting the hairs of one's "head." The concluding portion of this "placard" contains characteristic specimens of the bombastic sentiments which so commonly pervade all public documents in China, and which in their heart of hearts the writers know full well are simply "tall talk" and nothing else, for the chances are that on the first appearance of a few armed Japanese "in the dress of the Western nations," these bellicose scholars and people of Formosa would have turned tail and fled for their lives. "All we scholars and people of Formosa," they say, "eat the fruits and tread "the soil of the land. All of us who have life and breath "cannot but know our rulers and love our relations. How, "then, can we allow foreign marauders to commit these "wild excesses? Each of us ought to fight with fury and "make the quarrel his own. As soon as ever the army "has commenced the attack, let us who form the different "companies of the trainbands, seize upon our weapons and "drive the foe before us, with answering shouts from the "four sides!" These warlike and patriotic sentiments, doubtless, looked very pretty on paper, and possibly for the moment the writers may have really felt something of what they said, but, on the whole, it is, perhaps, just as well that their courage was not actually put to the test, for the result would inevitably have been what we have indicated above.

THE SHANGHAI QUARANTINE REGULATIONS.

THE deadening effects of that limbo at Peking, where so many well-founded complaints and claims against the Chinese authorities are every year carefully docketed, and as carefully consigned to oblivion in the chanceries of the various Legations, have been notably exemplified in the treatment of the "Sanitary Regulations for the Port of Shanghai." A code of rules on this subject, which, it must be admitted, is one of grave importance, especially in Eastern countries, where some diseases spread with such frightful rapidity, was approved by the Treaty Power Consuls at Shanghai so far back as the autumn of 1873, and was, we presume, immediately forwarded by them to Peking for ratification by their several superiors and the Tsungli Yamên. After the lapse of more than a year these regulations, in an amended form, have at last been published in English, French, and Chinese, by the Harbourmaster's Office at Shanghai. It seems a marvellous—not to say scandalous—instance of red tape routine that a simple matter of this nature, which so nearly concerns the health and well-being of a busy port like Shanghai, should have taken this length of time to arrange. The regulations in question are eight in number, and seem calculated effectually to prevent the introduction of infectious diseases by vessels visiting the port, provided only that they be enforced with sufficient stringency. Rather a wide discretion—and probably with wisdom—is placed in the hands of the authorities at Shanghai, when they happen to be called upon to deal with any vessel that may unfortunately have to hoist the yellow flag at the fore, for it is provided that "in any case the time of quarantine may be extended "or continued at the discretion of the Health Officer and "the Consul concerned." If we were inclined to cavil at anything in these regulations, it would be at the loose wording of the second, which runs thus:—"On boarding "vessels at Woosung the officer in charge will, if the vessel "is from any place declared to be *infected*, hand a copy of "these regulations to the master, and request (*sic*) him to "hoist a yellow flag at the fore while proceeding towards "Shanghai." Surely in a matter of such vital importance as this the boarding officer ought to be entrusted with the power of *ordering* the yellow flag to be hoisted, for, if he is not, occasions may not improbably arise when the third

regulation cannot be complied with, and that very mischief may be done which the whole code is designed to prevent.

MARINE DISASTERS AND MARINE INSURANCE IN 1874.

THE year which has just closed upon us has obtained an unenviable notoriety for the long catalogue of disasters which have marked its course. While it has witnessed the two severest catastrophes in the annals of railway travelling, we have had to record a succession of maritime disasters which have occurred to sailing and steam vessels of the highest class, of which the mail steamers *Nil* and *Japan*, the cable steamer *La Plata*, and the emigrant ships *British Admiral* and *Cospatrick*, though exceptionally severe in the loss of life which has attended them, are unfortunately only samples. The past twelve months have been comparatively free from loss among those classes of risks which gave such force to the "Appeal" of the Member for Derby. There has been a sensible reduction in the casualties to timber-laden vessels, which when seaworthy in their hulls—which was not too often the case—were formerly rendered quite unseaworthy and incapable of being navigated by the crowding of the decks with cargo. Greater care has also been evinced in the stowage of grain cargoes—a particularly dangerous cargo for carriage by steam vessels, which frequently capsized by the shifting of the cargo in a mere gale of wind. The number of missing vessels (as posted at LLOYD'S) has been considerably reduced, from 164 in 1873 to 128 in the past year.

On the other hand, the year has been fruitful in losses by fire beyond all precedent (attributed in a great measure to the over-ventilation of vessels carrying any large quantity of coal), while new elements of danger are continually appearing through the revolution in the mercantile marine which has resulted from the use of iron in place of wood, and the employment of steamers for work which used to be carried on by sailing vessels. The risks which were formerly spread over a dozen sailing vessels are now concentrated in one steamer, and the rate of insurance reduced instead of being raised. The result is plainly shown in the published reports of the marine insurance companies, and none are more likely to suffer than the local companies, the bulk of whose business depends on the Eastern trade *via* the Suez Canal. Yet in the face of these unfavourable circumstances, we find the local companies of China seeking to enter the already overcrowded field of competition for business "to all parts of the world," and by a course which can only be justified by success, removing their agencies from the economical management of influential firms, to establish, with all the attendant costs of high salaries and expensive offices, branches under the direction of amiable managers, whose experience of London business has been gained, during their residence abroad, from the letters of their London correspondents. Beyond the natural temptation to show a largely augmented business, which is not unlikely to be purchased by the ruinous expedient of accepting risks below the rates current among the other offices, the managers of the local companies will lose the power they were entitled to exercise of maintaining at a remunerative point the scale of premium for insurances to and from the East.

We have no sympathy with offices which regulate their charges on a panic scale, adding a fraction per cent. for each successive disaster, only to reduce them again after a short period of immunity from loss. The rates of insurance to the East at the beginning of the last year had probably reached their lowest point. A general rise of 30 to 50 per cent. has been made, but even this is already showing signs of relaxation, while the reports of the larger part of the year's business show how inadequate the increase had proved. The fear of losing business, in these days of competition, is after all the chief obstacle to a permanent and satisfactory improvement in the rates of premium. But it is clear that any reduction of the present charges can only result in further loss. For those shareholders who have counted on a certain and substantial return of premium which they think their past experience has entitled them to expect, there remains an inevitable disappointment. The very principle on which the Companies were founded was to secure the direct business of shareholders interested in their welfare, and not to allow their associations to be the easy prey of the clever, if not too scrupulous medium, whose interest it is to do the best for his principal. Another point on which sufficient discrimination has not been exercised, is the necessity of making a broad distinction between owners of good and owners of bad repute. To take a single example. The immunity from any serious disaster which has attended the Ocean Steamship Company's fleet for many years past entitles the enterprising managers to a recognition which the underwriters have not been sufficiently ready to accord. Owners should be made to feel—if insensible in other ways—at least through their pockets, that the appointment of suspended officers to responsible posts, and the selection of captains, however excellent in character, who have never been in steamships before to the charge of their steamers in dangerous and difficult navigation is discreditable to their profession, and needlessly hazardous to the lives of their men.

WHATEVER some writers may say or think to the contrary, it is quite clear that YAKOOB BEG, Ameer of Kashgar, however flushed he may be with the victorious progress he has made in recent years, still stands in the greatest awe of his mighty neighbour, the Czar of ALL THE RUSSIAS, and that when any unfortunate *contretemps* does occur to disturb the harmony of the relations existing between them, he will at once do all in his power to appease the wrath of the offended monarch. By a telegram from the Berlin correspondent of the *Daily Telegraph*, which we reproduce in another column, it will be seen that the Ameer has now despatched envoys to Tashkend with the money due for the losses sustained by a Russian caravan, and also to offer propitiatory presents to the CZAR. The tenor of this telegram fully confirms the view which we recently expressed as to the all-powerful influence which Russia can at any moment, if she chooses, exercise over the movements and proceedings of the AMEER; and this being the case, it behoves China to keep on good terms with her, and not to attempt any such harassing action in the direction of the Amoor Territory, as was reported in the telegram from Wladiwostock, which we published in our last issue.

THE grand old conservatism of China has at last broken down. Following in the wake of her neighbours, she has listened to the voice of the Western charmer, and nego-

Digitized by Google

tiated a loan. No doubt the Formosa difficulty has a great deal to do with this step; but whatever the reason, the result is the same, and China may now be considered to have lost its independence and power of resistance. We may regard this movement as the forerunner of others, such as the exploration of its mines, railways, telegraphs, &c. It is a very encouraging opening of the year for all interested in China.

THE FOREIGN RELATIONS OF THE UNITED STATES.

The China correspondence in the volume before us consists of thirty-eight despatches, comprising thirty from the U.S. Minister at Peking and one from the U.S. Consul at Hong Kong to Mr. Fish at Washington, and seven from the Department of State to Mr. Low. Three despatches relate to the Imperial marriage, in one of which Mr. Low expresses a decided opinion that "an improvement in the *status* of the Foreign Ministers *vis à vis* this Government is specially to be desired," and of this the action of the Chinese Government in connection with the Imperial marriage ceremonial afforded abundant evidence, for "the representatives of the Western Powers were treated in a manner which, to say the least, was discourteous; while those from the tributary States were invited, and took part in the ceremony. All foreigners were rigorously excluded from the streets and places through which the procession passed, while natives of all grades above the lowest official rank were freely admitted to the Imperial grounds to view the pageant." This fact, which we do not remember to have seen noticed before, made the slight to the Foreign Ministers all the more pointed; but Mr. Low says that he would not have thought these incidents worth noticing, were it not "that all this has a mischievous influence on the mass of the people."

Four despatches (one with seventeen inclosures) treat of the troubles which arose from the "covert hostility on the part of the officials to missionary operations" at Hangchow, in the Chekiang province. Mr. E. C. Lord, the U.S. Consul at Ningpo, went in person to Hangchow to look into and arrange, but his visit would not have been of much avail had he not "concluded" to go with Mr. Lolbe *(sic)*,—presumably Mr. E. Solbe,—the interpreter of the British Consulate, for whose good offices and material assistance he does not appear properly grateful. It is a great pity that our American friends do not organise their Consular Service in a better manner, so as to place their interpretorial department on a footing independent of missionary and other outside aid.

No less than eighteen despatches are specially devoted to the Audience Question, and the details of negotiations, the views of the French Government, &c., are very fully given by Mr. Fish and Mr. Low, who also forwards a long account given by Father Ripa of the circumstances attending the audience granted some 150 years ago to Count Ismailof, the Russian Ambassador. Mr. Low, of course, finally gives an account of the reception of the Foreign Ministers by the Emperor, and in reply he is informed by the Department of State that his "action in connection therewith has been discreet and firm, and is deserving of commendation." At this distance of time from the solution of this knotty question the most interesting despatch appears to be the one from Mr. Fish, in which he gives Mr. Low instructions as to the course he is to pursue. "It is the opinion of the President," he says, "that on the part of the United States it (*i.e.*, the right of audience of the Emperor) should now be demanded." Mr. Low was accordingly instructed to make such demand, not separately, but in concert with the representatives of other Powers. Mr. Fish's despatch concludes thus:—"It would seem to be best to proceed by degrees and with due tenderness, for the inveterate prejudices and the grotesque conceit of the Chinese courtiers, the undoubted outgrowth of the long ages, through which the present system has prevailed without intercourse with the rest of the world, and, therefore, in ignorance of the advances made abroad in civilisation and power. If your well-considered and gradual attempts to compass the object should ultimately fail, the President authorises you to inform that Government that you are directed to suspend official intercourse with it. . . ." We are almost inclined to think that this is the very course of action that would have been most pleasing to the Chinese.

Mr. Low writes two despatches on the subject of the visit of the Japanese Embassy to Peking, in the former of which he gives an account of General Le Gendre's call on him, the real object of which was "to intimate that the Japanese Ambassador would insist that his superior rank should be recognised by all the Ministers, native and foreign:" these preposterous pretensions had, of course, to be abandoned. General Le Gendre's method of proceeding was so devoid of tact, and even so insolent, that Mr. Lowe says it "made a very unfavourable impression on his colleagues; it has evidently increased their jealousy and distrust of him. If he displays no more discretion in dealing with the Chinese Ministers, his presence will do the Japanese much harm." In his second despatch Mr. Low writes respecting the objects of the Japanese Embassy: these were two; the first, of course, being the Formosa question, while the second was "to ascertain the precise relations between China and Korea; whether the former claims to exercise such control over her tributary as to render China responsible for the acts of the Koreans, or whether other nations must look to Korea for redress for wrongs and outrages which her people may commit." In the superior interest attaching to the Formosa difficulty, this latter question seems to have been lost sight of, but we hope that ere long it may come to the fore again, for Korea is quite worth opening to foreign trade and intercourse. Early in the year Mr. Fish wrote, disapproving in unmistakable terms of Mr. Jewell, the United States Consul at Canton, having taken jurisdiction in a criminal charge against a citizen of New Granada, and he expresses his surprise that "he should have fallen into the commission of such an error with the laws of the United States, the Consular instructions, and the existing treaties between the United States and China all before him."

The despatch from the United States Consul at Hong Kong to Mr. Fish relates to the extinction of the coolie trade and its expulsion from Hong Kong. He offers suggestions as to the manner of compelling the Portuguese to give it up at Macao, and, besides extracts from the *China Mail* and the *Hong Kong Times*, he transmits a statement by Mr. J. B. Steere, the American gentleman who has been for some time engaged in scientific pursuits in China, as to the result of his observations with regard to Chinese labour in Peru, a statement which will be read with much interest. There is also a despatch from Mr. Fish relating to the kidnapping and apprenticing of Chinese children, and one from Mr. Low, detailing the settlement of the question that arose respecting the transhipment of contraband of war in the Treaty Ports.

The Japan correspondence comprises twenty-six despatches, eighteen from Mr. De Long, and eight from Mr. Fish. No less than twelve despatches relate directly to the well-known case of the Peruvian ship *Maria Luz*, and several others to the state of affairs and negotiations between Japan and Peru. In fact, if it had not been for Peru and matters relating thereto, Mr. De Long's office would, as far as despatch-writing goes, have been comparatively a sinecure, for there are only four of his letters which treat of other subjects. At the outset of the *Maria Luz* case, Mr. De Long got rather a severe rebuff from his superior, who wrote:—"It is regretted that you deemed it proper to take any steps which might wear the aspect of giving the support and countenance of the United States to a vessel suspected by the Japanese Government, not without reason, of complicity in a nefarious traffic, of a character particularly odious to the Government and people of the United States."

In reply to a despatch from Mr. De Long on the relations between Japan and China, and stating how he had introduced General La Gendre to the Japanese authorities, Mr. Fish observes:—"The advice which you have offered to the Japanese authorities, that peaceable means should be pursued, with an earnest effort for their success, to obtain what they desire from the Chinese before resort is had to warlike measures, or serious preparations are made therefor, cannot be too strongly approved. The part which you have taken in the negotiations for the employment of General Le Gendre by the Japanese, with a distinct reference to the use of his services as an adviser in military operations, should they become necessary, would appear to be inconsistent with the peaceful policy thus wisely recommended." Mr. Fish then refers to that portion of the American Statutes at large which prohibits diplomatic officers from recommending any person for any employment of trust or profit under the Government of the country in which they reside, and also from asking for any person any emolument, &c., &c., and he adds:—"The approval of the Department cannot be accorded to proceedings in evasion if not in direct contravention to these terms of the statute."

Mr. De Long was also unfortunate in the measures he took to compel American citizens to register themselves at the Consulates, for in reply to his report of the proceedings against Mr. E. Peschine Smith at Yokohama, Mr. Secretary Fish states that "it is the opinion of the Department that this Statute [extracts from which are given in the despatch] confers upon the Minister in Japan no authority to make a regulation requiring citizens of the United States to register their names, and no power to enforce such a decision judicially." This despatch is not given in its entirety, and it is, therefore, probable that Mr. De Long's action in this matter was even more strongly condemned by his superiors than the above extract would at first sight seem to indicate.

Having heard that the Japanese Government had officially proposed to Italy certain provisional arrangements for admitting Italians into the interior of Japan on condition that they gave up exterritorial rights, Mr. Secretary Fish wrote to General Schenck, in London, in the following terms, at the same time instructing him to communicate the President's views to Lord Granville. "Japan," says Mr. Fish, "has no firmer friend than the United States; no one more ready than we to recognise her rightful autonomy. But, on a candid review of the situation, the President is forced to the conclusion that it is not yet safe to surrender to the local authorities the guaranteed rights of exterritoriality. We have not such knowledge of the administra-

Digitized by Google

tion of justice in that kingdom, and of the means for the protection of the liberties and rights of foreigners, as would justify such surrender at this time." In reply to this despatch General Schenck wrote, saying, "On all points I found Lord Granville entirely in accord with you and with the President." Mr. Bancroft reported that similar views were entertained at Berlin.

A despatch on the coolie trade is also published, which was addressed by Mr. Thomas, U.S. Minister in Peru, to Mr. Fish. He states that 14,269 Chinese coolies had been shipped for Peru during previous years, of whom 12,876 arrived, and 1,393 died on the voyage.

CONSULAR REPORTS.

In the volume of Consular Reports just issued there is a very exhaustive report by Consul Booker on the trade and commerce of California for the year 1873. Mr. Booker so thoroughly identifies himself with the country to which he is appointed that we can pardon the frequent use of the word *our* when speaking of California. He says :—

California has enjoyed another year of prosperity, although the very hopeful expectations of the commencement of it were marred by the excessive dryness of the spring. The drought lessened our grain crops, and caused a scarcity of water for mining purposes during the summer and autumn; however, with this drawback, we increased our merchandise exports fully £1,500,000, and our gold product was not far behind that of 1872. The completion of watercourses and tunnels, to provide water and drainage for the carrying on of our hydraulic mining must in ordinary seasons increase our gold product, and the annual average for some time to come will, in my opinion, exceed that of the past few years. The yield of the silver mines of the adjoining State of Nevada has exceeded that of 1872 by over £2,000,000, and California derives a full share of the benefits of her neighbour's success.

The exports of wheat and flour to England or to Cork for orders amounted to no less than 10,396,387 centals of wheat.

The value of the imports from China and Singapore were as follows :—Tea, £305,825 ; silk, £506,435 ; sugar, £119,488 ; opium, £171,615 ; rice, £150,602 ; hemp, £14,128 ; jute, £8,378 ; oil, £16,752 ; spices, £6,090 ; sundries, £201,640 ; the total being £1,490,953. We would suggest that the imports from China and the Straits Settlements should be dealt with separately in the future.

The imports from Japan were :—Silk, raw, £11,665 ; silk, waste, £53,241 ; silkworms' eggs, £26,700 ; tea, £655,331 ; sundries, £29,906, giving a total of £776,823. From the Dutch East Indies they were as follows :—Coffee, £13,531 ; sugar, £113,203 ; tin, £1,782 ; sundries, £1,628. The following figures show the comparative imports of tea during the last five years :—1869, China, 962,137 lbs., Japan, 1,190,837 lbs. ; 1870, China, 977,845 lbs., Japan, 2,443,615 lbs. ; 1871, China, 1,297,771 lbs., Japan, 2,625,129 lbs. ; 1872, China, 1,290,519 lbs., Japan, 2,349,648 lbs. ; 1873, China, 856,065 lbs., Japan, 2,893,836 lbs. There has been a great falling off in the demand for Shanghai green teas.

Upon the subject of the Pacific Mail Company we find the following :—

The year 1873 will long be remembered by tea importers as one of the most disastrous ever known. In the Atlantic and Western States the failures have been large and numerous. These have been mainly caused—first, by uncalled-for and excessive importations ; and secondly, by the action of the Government in so speedily removing the duties, thus leaving many merchants with heavy stocks of duty-paid goods, upon which large losses became inevitable. Owing to our close proximity to the tea-producing countries, our merchants have not been obliged to carry such large stocks as on the other side of the continent. This fact, together with our gold currency, has enabled us to weather the storm which caused so much disaster in the East. While, therefore, there has not been a single failure to record during the year, still the business done has not been a remunerative one. Until the past two or three months, stocks of all kinds were excessive, and prices for the most part below cost of importation. Owing to the immense quantity of tea in store throughout the United States at the commencement of the past season, the importations from China and Japan were much less than for many previous years. Of this total amount, however, we think a larger proportion came through San Francisco for transportation overland than ever before. It is, therefore, to be regretted that, while we were rejoicing at the increase of this traffic, the Pacific Mail Steamship Company should step forward and announce the withdrawal of their semi-monthly line to the Orient ; that their connections with the Overland Railroad had ceased ; and further, that in future through freight from China and Japan will go hence to New York *via* Panama.

This programme seems so utterly absurd that it would fail of credence were it not officially promulgated. In this connection we venture to assert that, even should the Pacific Mail Steamship Company reduce their through rates very materially, they cannot control the carrying of teas as before. Apart from its shortness, the chief merit of the route *via* San Francisco has been that the teas passed entirely through the temperate zone, and were but a short time exposed to the sea air, with but one handling from ship to car in San Francisco. How can the Pacific Mail Steamship Company now appeal to its former patrons in China and Japan to ship their teas upon steamers where they will be exposed to the sea air for at least sixty days, a great portion of which is in the heat of the tropics, and three or four different handlings at the Isthmus of Panama! Fortunately for us, simultaneously with the announcement of the withdrawal of the semi-monthly line by the Pacific Mail Steamship Company, we are advised of the inauguration of the service of the China Trans-Pacific Steamship Company (Limited)—a British company—whose first vessel, the *Vasco de Gama*, has arrived at this port.

Referring to the Chinese labour question Mr. Booker says :—

The principal thing in connection with labour during the past year has been the outcry against the immigration of Chinese, which had been in the spring somewhat excessive. The democrats had always been opposed to the Chinese, and the feeling ran so strong in that direction that the anti-Chinese cry was taken up by all classes of politicians, and at one time took so forcible a shape that the Chinese companies, who control the immigration, telegraphed to stop it altogether, and for a few months there were no arrivals ; however, of late, every ship from China has brought a few Chinamen, but they are not likely to arrive in sufficient numbers for some time to cause any uneasiness to even those most opposed to them. Notwithstanding all that is said or written against the Chinese, it must be apparent to every one that without them many of the wants of the people would have to go unsatisfied, as in the country they are almost entirely used as domestic servants, and perform many duties for which they are especially adapted. Strong as the prejudice against them may be, it is certain it is not strong enough to keep those who are their most formidable opponents from making use of their services. I do no not think the Chinese have increased of late years, and all here at present are absorbed in the various industries of the country, and do not really affect the question of white labour to an appreciable extent; in fact, the wages of the higher class of mechanics have had rather an upward tendency, and no description of labour has depreciated in value.

MANILA.

Mr. Consul Ricketts reports on the trade and commerce of Manila for the years 1872 and 1873 as follows :—

The total value of the produce exported to Great Britain and her colonies for the year 1873 was $7,750,055, or about $50,000 more than in 1872. As regards the exports of sugar for the year 1873, there would appear to have been a decrease of 176,841 piculs to Great Britain and Australia, and also a decrease of 101,319 piculs on the total quantity exported.

The high prices which have been given for sugar for some time past have had the effect of stimulating its production: a fall in prices having, however, lately taken place, it is not unlikely but that there will be a decrease in the quantity brought to market this year, and consequently a falling off in the exportation of this produce. The average price of clayed sugar for the year 1872 was $5 2½c. ; and that of the unclayed, $3 55c. The average price of the former for the year 1873 was $4 65c. ; and that of the latter $3 30c. The price of Taal sugar is now $2 25c. ; and that of clayed sugar, $4.

The quantity of hemp exported to Great Britain and her colonies in 1873 was 73,857 piculs in excess of that of the year 1872. The export of hemp to all places has also augmented. This increase has been called forth by the high prices which have prevailed during the last three years, $9 the picul having been the average price given in 1872, and $8 the picul in 1873. The price of hemp is now $7 the picul. As this still leaves a large margin of profit for the cleaner, there will probably be little difference in the export of this article for the year 1874.

The quantity of coffee exported to Great Britain in the year 1873 was in excess of that sent in the previous year. The value of coffee has greatly augmented of late, owing to a rise of prices in Europe. The average price of coffee at Manila in the year 1872 was $15, and in 1873 $20.

The quantity of tobacco leaf sent to Great Britain for the year 1873 was somewhat less than that of the year 1872, as will be seen on a reference to the Tables I. and II. herewith annexed. The average price of the tobacco leaf sold by auction at Manila for the year 1872 was $26 the quintal of 100 lbs.; and that of the year 1873 $31 91c. The quality of leaf produced in the year 1872 was considered good, and the crop a fair one. The 1873 crop not having yet come forward, it is difficult to offer any opinion either in respect of its quality or quantity.

The prospects of the present sugar crop in Luzon are good, and the yield expected to be a full one. The crops in the southern islands are, however, expected to be somewhat less than in 1873.

The coffee crop last year was above the average ; this year it is, however, expected to be one-third less, the trees having in many places been damaged by bad weather.

In the month of December last year the ports of Tacloban and Legaspi were opened to foreign commerce. Tacloban, situated at the north-east end of the island of Leyte, is a safe harbour during both monsoons, but the passage to it through the Juanico Straits is somewhat difficult for sailing vessels, owing to the strength of the current running between the island of Samar and the island of Leyte. To steamers drawing fourteen feet of water there would be no difficulty in making this harbour.

Legaspi, situated at the south-east end of the island of Luzon, is an open roadstead, much exposed to the violence of the north-east monsoon. There being also deep water close to the shore, vessels at anchor run a great risk of dragging during the gales which often prevail on that part of the coast. Coral reefs are also said to exist in the bay of Legaspi though not entered on the chart.

The value of the exports from the Philippine Islands for the year 1872 were as follows :—To Great Britain, $6,177,016 ; to Australia, $571,016 ; to Singapore, $529,569 ; to Hong Kong, $432,384. In 1873 they were :—To Great Britain, $5,156,406 ; to Australia, $1,049,184 ; to Singapore, $948,075 ; to Hong Kong, $596,053. The exports from Cebu in 1872 amounted to $1,445,840 ; and in 1873, $1,685,534. From Ilo Ilo in 1872 they were $1,935,619 ; and in 1873 they amounted to $1,713,947.

SAIGON.

Consul Caswell reports on the trade and commerce of Saigon, for the year 1873, as follows :—

The trade of the past twelve months shows a marked increase over that of the previous year, and although the results of most

Digitized by Google

of the rice shipments on the part of Chinese cannot have been remunerative, yet the period has not been characterised by any of the disastrous failures which so seriously threatened the business prosperity of the colony during 1872. A new feature has presented itself in the opening of active commercial relations with Java, which bids fair to remain a permanent one for the future. The Government, considering the imposition of a tax upon immigrants immediately upon their arrival to be undesirable, and tending to prevent the free introduction of labour into the colony, has issued a decree to the following effect :—

That, after the first of January, 1874, all Asiatic immigrants of the third or labouring class shall be exempt from the payment of a poll-tax during the first year of their residence in the colony, in fact, giving them a respite of full twelve months previous to their being called upon for its payment ; but should such immigrants desire to leave the colony, whatever may be the date of their intended departure, or the length of their sojourn here, they are not allowed to do so without having first paid their poll-tax for the current year, and an impost of a further sum of f.25. Upon leaving, a passport will be necessary, which will be only issued upon the production of a certificate of the proper authorities of the place where such immigrant has resided, that all Government dues have been paid.

The British system of measuring vessels has now been adopted, and seems to give general satisfaction. Tonnage dues, in the case of steam vessels, are now levied once in two months, instead of four, as formerly, and the rate of pilotage for this class of shipping has been doubled. During the prevalence of cholera at Bangkok and Singapore, a quarantine was established at Cangio, at the mouth of the Donnai River, but we were happily spared from a visitation of this pestilence.

The exports of Rice, the principal production of Cochin China, show an increase, as compared with the preceding year, of nearly 1,000,000 piculs, the total having reached the large amount of 4,634,452 piculs, equal to nearly 272,600 tons. The average value of these exports is difficult to ascertain with exactness, but it is not far from $1 21c. per picul, making a total of $5,747,000.

During the year 175 British vessels entered the port, with a tonnage of 117,797 tons, showing a decrease in the number of vessels as compared with last year, but an increase in the tonnage. A total of 394 vessels of all nationalities loaded during the year.

The manufacture of Sugar has not been upon a very extensive scale, the chief difficulty experienced being the unwillingness on the part of the native growers to part with their cane ; now, however, the Government has given its powerful influence in aid of the work, and great results are expected the coming year. The cultivation of Cotton is steadily on the increase, and this article bids fair to become an important item in our future commerce.

The trade in other articles of produce is about on a par with that of former years, and presents new feature. Imports of Manchester goods remain entirely in the hands of Chinese, and of the direct importations of other descriptions of merchandise, no statistics are to be obtained.

In addition to the supplies of Coal for Government use, about 3,000 tons have been brought to this market during the year, of the following descriptions :—Australian 500 tons, Formosa 1,200 tons, and English 1,300 tons. Sales have been much in excess of previous years, owing to the increase of steam traffic, and at an average retail price of $9 per ton for the first two named, and $17 for English.

The revenue from the Opium farm will amount to f.3,250,000 per annum, having been sold to the original farmer for four years. This is an excess of previous price of f.700,000. The Gambling farm has been sold for f.756,000, and the Spirit farm for f.920,000.

THE PACIFIC MAIL SUBSIDY.

Attorney-General Williams has delivered the following opinion in relation to the Pacific Mail contract, for the conveyance of an additional monthly mail between San Francisco, Japan, and China, authorised by Act of Congress, approved June 1, 1872, given to Mr. Cresswell, in August last, and just transmitted to the house by Mr. Jewell, at the request of Representative Tyner, of sub-committee on appropriations for the Post-office Department :—

Looking to the object of the Act of June 1, 1872, authorising additional monthly mail service between San Francisco, Japan, and China, and taking into consideration the fact that such additional mail services have been rendered as provided for in the said Act, I am of the opinion that it was not an essential part of the contract that the new iron steamships should be finished by October 1, 1873, if by that time it satisfactorily appeared that they would be finished within a reasonable time thereafter.

Second. On the first of October, 1873, it was well known by the Post-Office department that the Pacific Mail Steamship Company was expending large amounts of money in constructing such steamships as were required by the contract to perform the additional mail service as therein provided. But instead of notifying the company that its failure as to time would be regarded as an end to the contract, the department, it seems, afterwards treated the contract as still subsisting, and in view of that fact, and the subsequent proceedings in Congress, I do not believe it would be legal or right now, when the completed steamships have been presented for inspection, for the Government to refuse to receive them into the service under said contract, because they were not furnished by the first of October, 1873.

Third. Considering that the Act in question provides for a contract to continue ten years from the first of October, 1873, and that the primary objects of this legislation were to subserve the interests of American commerce and provide ships for the naval service of the United States in case of war, I think it would be subordinating the great ends of the statute to unimportant matters to hold that the will of Congress upon the subject was wholly defeated by the failure of the company to furnish the iron steamships within the few months of time fixed by a specification in the contract ; especially when such specification was outside of the requirements of law authorising the contract.

The committee of ways and means met at Washington on the 12th inst. to continue the Pacific Mail investigation. Gardner J. Hubbard read a telegram from Richard B. Irwin, requesting him to engage apartments for Irwin in Washington for next Monday evening, and be prepared to act as counsel for him before the ways and means committee. Also a telegram from a clerk of Irwin's, stating that Irwin was ill and asleep. The committee informed Hubbard that he could not be permitted to act directly as counsel before them, but might suggest questions from time to time to be put by members of the committee.

Rufus Hatch was sworn, and testified that he was elected a director in May, 1873, and had been a director ever since ; had no personal knowledge of the business of the company prior to May, 1873, but through an examination of the books he had knowledge of its accounts for 1872. There were some items of the accounts during that period which had not been explained to the satisfaction of the company ; these items consisted solely of payments made to Richard B. Irwin, then San Francisco agent, to the aggregate of $750,000, the original cheques for which Hatch exhibited to the committee ; these are the only cheques of the existence of which he has any knowledge that have been drawn outside of the regular business of the company, or which appear to require an explanation ; so far as the witness knows the company has no record of those cheques except on the cheque-book. There were, however, very large entries on the books of the company for several months before and after the date of these cheques. He testified to many large cheques being found on record, indicating either large stock operations or money loaned to bankers and brokers. He had no information either directly or indirectly, that the company ever expended a dollar to influence Congress, except through the newspapers. He never saw Irwin but once, and never spoke to him. Had suspected one of Irwin's vouchers because he deemed it unsatisfactory. No one had power to draw money except by order of the president of the company, and there was in the books, showing for what money was used by Irwin, and an action was taken early in 1873 to ascertain what had become of the money. Nothing has been done by the directors to cover up any matters of the company. The arrangement with Roach had no relation with the congressional subsidy, and the company, since he had been connected with it, has taken no steps whatever to influence Congress or the executive department of the Government in regard to mail subsidy, and they had no desire to conceal or keep secret from the committee any of their books, records or transactions ; the witness did not know whether or not it had been the practice of the company prior to his connection with its management to advance money to bankers or brokers to protect the price of stock.

Mr. Hatch was excused to re-appear when notified by the sub-committee, consisting of Messrs. Kasson and Beck, and to then bring with him such of the company's books as the sub-committee may designate. The investigation was then adjourned until Tuesday.

WASHINGTON, DEC. 16.—The ways and means committee assembled shortly after ten o'clock on the 16th to proceed with the Pacific Mail investigation, but Mr. Irwin was not on hand. Owing to the absence of Mr. Irwin the committee began the examination of the books of the Pacific Mail Company, which were delivered to them by Director Hatch and J. C. Merrill, the company's book-keeper. F. W. G. Bellows, formerly vice-president of the company, and T. T. Johnson, who, as treasurer *pro tempore* signed with Bellows the cheques drawn May 24, 1872, to order of R. B. Irwin, are also here ready to testify when called. It is ascertained that the books now under examination show that on the 24th of May, 1872, the sum of $650,000 was loaned by the company to a firm of New York brokers ; that on the 7th of September following the firm returned $500,000 of this loan, and that on the same day, namely, the 7th of September, President Stockwell drew $500,000 out of the bank and charged it to Oliver Eldredge and Robert Irwin, the San Francisco agents.

The ways and means sub-committee interrogated Irwin in his room about an hour to-day, the most of which was consumed in the statement, &c., made by Irwin, with a view of purging himself of contempt in failing heretofore to appear before the committee when summoned. Irwin then answered promptly all the questions put to him by the sub-committee, but when they arrived at a certain point the committee, in view of the state of Irwin's health and of other considerations, which they decline to disclose, concluded to postpone further examination until to-morrow morning. In the meantime the testimony taken to-day is to be kept strictly private. It is conjectured that the reason for this determination is that other witnesses are to be summoned.

The *New York Times* publishes the following statement of the affairs of the Pacific Mail Steamship Company :—

New York, Dec. 10, 1874.

I have examined the books of the Pacific Mail Steamship Company, in verification of their statement published under date of Sept. 17, 1874. I annex the statement, with such comments as are called for.

ASSETS.

Cash in bank [correct]	$256,146 61
Loaned on call [since collected]	100,000 00
At I. S. Morgan and Co.'s, London	70,908 00
[This varies immaterially from the books, being an estimate made up in the middle of the month.]	
Insurance on City of Guatemala	220,000 00
[This amount is included in the general valuation of the steamer. Of the amount $60,000 remains uncollected.]	
Subsidy due from United States [since collected] ...	125,000 00
Sixty thousand shares Pacific Mail Stock. [Since realised, $266,450]	280,000 00
Total	...$1,060,054 61

Due on City of Tokio	$300,000 00
[Not entered as a liability, but since paid and charged to the proper account.]	
Loan from Panama Railroad Company	500,000 00
[Still unpaid.]	
Bills payable	220,313 37
[Agreeing with the books.]	
Due in London, February 15, 1875	36,871 56
[Not yet entered—to be charged when due to profit and loss.]	
Total	$1,057,184 93

JOHN N. UNDERHILL, Examining Accountant.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, DEC. 30.

The topic of the day is the appointment of Mr. Lansberge as Governor-General of our East India Colonies, which has caused, I may say, a storm of indignation. Professor Vreede, formerly one of the thick and thin supporters of Mr. Heemskerk, the present Premier, quite agreed—according to his rather vehement articles in the *Utrechtsch Dagblad*—with the proposal to recall Mr. Loudon, but he desired that he should be replaced by a man thoroughly acquainted with colonial matters. We must not forget, he says, that the Governor has to govern twenty millions of natives, and to create harmony between the conflicting interests of the colony and of the mother country. Was it not possible to find such a man? Was it advisable to appoint a *diplomate* who knows absolutely nothing of Java affairs. He thinks not, and he is so opposed to the appointment that he urges the nation to adopt such measures as may be possible to make it void. The *Dagblad*, the leading Conservative paper, is also discontented, and would have even preferred that a Conservative *par sang* should be honoured with the post. Mr. Lansberge is certainly a most able diplomatist, but in this case he is not the right man in the right place. The *Nieuwe Rotterdamsche Courant* is more guarded in its observations. This paper states that the appointment has caused general surprise, and it fears that Mr. Loudon has been sacrificed to party-spirit, but not knowing the real motives it refrains from pronouncing judgment. The *Amsterdamsche Courant*, the fashionable Conservative paper, thinks the appointment is a good one. A *diplomate* so able as Mr. Lansberge is quite competent for the post. In England it is the rule to appoint diplomatists to such offices. Mr. Rochussen was only a *diplomate*, and he was one of our best governors-general. It is, moreover, a recommendation that the newly appointed Governor is not a party man. The *Standard*, the Anti-Revolutionary paper, criticises the appointment most sharply, and is of opinion that it will lead to the overthrow of the Cabinet. The *Nieuwe Arnhemsche Courant* is of opinion that it will be best to wait till Mr. Lansberge shows his policy before speaking against him. Messrs. Sloet van de Beele and Duymaer Van Twist were also without experience as regards Colonial matters when they were appointed Governors-General, and the Liberals are still very proud of their management. They did much for Java, whilst so-called *specialites* have done literally nothing, or if they did anything, they did it badly. These are the outlines of the opinion of the press. It is generally hoped that the Members of the First Chamber—who will meet in a few days—will ask the Minister for further elucidations, and that we shall not be obliged to wait for them till the Bill asking a credit for the expenses of the new functionary is brought into the Second Chamber. It is rather curious that no paper states that Mr. Lansberge, who, according to the *Vaderland*, will start on the 15th of February in the steamer *Voorwaarts*, of the Nederland Company, is a Moderate Ultramontane, but nevertheless it is quite certain that if he was a Protestant the opposition would not be so sharp as it is.

It is indeed somewhat curious that just at the moment when the Conservatives are in power and could do what they liked, that while they could appoint Schimmelpenninck, Wintgens, or Van Herwerden, their choice fell upon a man who is perhaps more liberal than conservative, and who was, in fact, Minister of the Foreign Department in the ministries of Fock and Van Bosse. It seems that it has been very difficult to find a man for the post. I hear that the Ministry addressed themselves firstly to Mr. Van Zuylen, our ambassador at Paris, but he declined the office, because his health was bad. Thereupon the Governor-generalship—thus the rumours run—was offered to a great railway proprietor, but when he also declined, a choice became still more difficult. There was another reason for the appointment of Mr. Van Lansberge. The ex-Minister for Foreign Affairs, Mr. Gericke Van Herwynen, wished to go to Brussels, and the man who helped a good deal to involve us in the war with Atchin, and by whose offices we concluded a treaty with England, transferring our settlements on the Coast of Africa, has certainly deserved something for his excellent services. Mr. Van Lansberge is not rich, and let me add that he is a personal friend of Mr. Van Goltstein, the Minister of the Colonial Department. It is well known that Mr. Loudon has wished for a long time to resign. He has not been very lucky, and that unfortunate Atchin war has caused him much trouble. But of course his personal honour would not permit him to make such an excuse to return to Holland before his time had expired—the less because this never happened with any Governor-General. A more potent reason had to be sought, and it was found in a difference of opinion about an administrative measure—the conversion of communal possessions to individual ones. I think that the discussion about the Agrarian Bill of 1870 did not leave the least doubt about the intention of the legislator to maintain the system of communal propriety, this being the sole means of preventing the alienation of grounds belonging to natives to European speculators. Mr. Levysohn Norman, the Secretary of the Colonial Government, was sent to the interior, in order to win the chiefs over to favour the system of individual proprietorships. And after having been interpellated thereabout the Minister stated that he had directed the Governor-General to recall the Secretary. Mr. Loudon did not agree with this measure of the Minister, and at once asked for his dismissal.

Another appointment which has created much discussion is that of Mr. N. Beets as Professor in Theology at the University of Utrecht. This gentleman is in the first place a literary man, the author of the "Camera Obscura," and therefore public opinion thinks him best fit for the *professorat*. Moreover, he is already sixty-one years old, and it is thus very doubtful whether he will be able to fulfil his duties as it ought to be done.

In the northern part of the country a demonstration is organised against our present Premier, because he has declined to grant some feet of ground belonging to the State on which a monument was to be erected in commemoration of the late Mr. Thorbecke. This silly decision of Mr. Heemskerk creates much dissatisfaction.

The Minister of the War Department has decreed that in several villages subaltern officers will be appointed to enrol young men for our army in East India. It seems very difficult to complete the contingent.

Yesterday a Society was formed at the Hague to introduce cremation instead of interment. The number of the members is 500: the subscription is fixed at f.1.50 (2s. 6d.) a year. The first business, of course, will be to obtain legal permission to introduce cremation.

There is no news of interest about shipping and commercial affairs. A sharp frost has set in.

Monetary and Commercial.

Business in the Produce Markets is generally suspended until next week. The small private trade which has been done has established no alteration in the tone of the markets, all articles remaining quiet at the prices ruling last week.

Tenders are invited by the Bank of New South Wales for a New South Wales Government Loan for £1,000,000, in 4 per cent. debentures, for £1,000, £500, and £100 each, repayable on the 1st of July, 1903. No tender will be accepted at less than £90 for every £100 debenture. The National Bank of Australasia will also receive tenders for £600,000 South Australian Government Four per Cent. Bonds, which will be allotted to the highest bidders, provided the rates offered are not below £90 for every £100 tendered for. The principal is repayable at par on the 1st of July, 1899.

It is notified that the coupons of the Bolivian Loan, due on the 1st of January, will be received for payment on and after the 28th ult. Also, that on and after the 1st of January the sum of 33⅓ per cent. will be payable in respect of the principal sum secured by the bonds of the Loan which were in October last drawn for payment on the 1st of January. It is requested that such bonds be presented through a banker.

The meeting of shareholders in the City Bank is announced for the 19th inst.

A meeting of Spanish bondholders has been held to consider the provisional agreement concluded on their behalf by Mr. Roger Eykyn with the Spanish Minister of Finance. Its terms were that the three overdue coupons should be exchanged for pagarés of the Rio Tinto Company, less 7 per cent. discount, and External Bonds for the remaining 40 per cent. Resolutions were adopted approving of the arrangement, and authorising the Council of Foreign Bondholders to proceed with its execution.

By a telegram published in another column it will be seen that the Hong Kong and Shanghai Bank has concluded negotiations for a loan to the Chinese Government. The loan is to be for $3,000,000, and issued at 95, with interest at 8 per cent. per annum. The portion of the loan to be subscribed in England is at exchange 4s. 1¼d.

The Eastern Extension, Australasia, and China Telegraph Company (Limited) announce the proposed payment of an interim dividend of 3s. per share. An interim dividend of 2s. 6d. is also about to be paid by the Eastern Telegraph Company.

The ordinary general meeting of the New York, London, and China Steam-ship Company is called for the 7th inst.

The New York papers announce that the Pacific Railroad Company have concluded for three steamers, to open a line in February between San Francisco, China, and Japan.

Mr. William M. Jamieson and William Grieve have formed a partnership as Ship and Insurance brokers in London, under the style of Jamieson, Grieve, and Co. Messrs. Westall, Galton, and Co., of Foochow, announce that the interest of Mr. R. R. Westall ceases, and Mr. W. M. Reeves has been admitted. Mr. R. R. Westall and Mr. Oliver Latham have established in London as commission merchants, under the firm of Westall and Co. Mr. G. Rehden has established in London as commission merchant.

Mr. David McLean, who has for some months been acting manager of the Hong Kong and Shanghai Bank in London, proceeds to Hong Kong by the present mail. Mr. Jackson, lately manager at Yokohama, will assume charge during Mr. McLean's absence.

The suspension is announced of Mr. Charles Sulley, manufacturer and merchant, of Dale-street, Manchester, with liabilities amounting to £8,383. A petition for liquidation has been filed. The failure of Messrs. Ranken, Dixon, and Co., East India merchants, in Liverpool, which had been rumoured for some days past, has culminated in a petition for liquidation,

Digitized by Google

which was filed in the local county court on the 23rd ult. The liabilities are estimated at £139,156, a very large portion, it is stated, being due in respect of losses on cotton. The failure of Messrs. Alexander Ross and Co., dyers of yarns, &c., Glasgow, is also announced. The liabilities are estimated at £24,000, a considerable portion of which is due to creditors in Manchester. It is expected, however, that the liquidation will be favourable.

The following announcements of mercantile changes are made :—

Owing to the death of Mr. George Tounend, the firm of Tounend, Brandon, and Co., of Mincing-lane, is dissolved, and Mr. E. T. Daniels has joined Mr. Brandon, under the title of Brandon, Daniels, and Co. ; Messrs. Arbuthnot, Latham and Co. have admitted as partners Mr. Hugh Lyttleton Arbuthnot and Mr. Herbert Robinson Arbuthnot ; the firm of Messrs. Jacob Mocatta and Co., of Mincing-lane, will be in future carried on in the names of the existing partners, Messrs. Benton and Schloss ; Messrs. Mocatta and Goldsmid, on the retirement of Mr. Frederic D. Mocatta, have admitted into partnership Mr. Abraham de M. Mocatta and Sir Hector M. Hay, Bart. ; Messrs. John Mowlem and Co., of Millbank, have introduced as partner Mr. John Mowlem Burt ; Messrs. Northcott and Sons, Rood-lane, have admitted to partnership Mr. William Stanley Northcott and Mr. Frank Northcott ; Messrs. H. Pulbrook and Co. are joined in partnership by Mr. H. H. Hyde, the firm in future being Pulbrook, Hyde, and Co. ; Messrs. William Herman and Kahn, of Paris, announce that they have admitted Mr. Leopold Kahn into their firm ; Messrs. Shepard, Rehden, and Shepard announce the retirement of Mr. Rehden, the firm consisting now of Mr. John Shepard the elder and Mr. John Shepard the younger, under the style of Shepard and Company ; Messrs. Forbes, Forbes, and Co. have admitted into partnership Mr. George Stewart Forbes and Mr. James Steven ; Messrs. Gonzalez, Byass, and Co. have taken into partnership their London manager, Mr. Robert Hunt Holdsworth ; Messrs. Grant, Chambers, and Co. have admitted as partners Mr. William Holloway Ross and Mr. George Chambers ; the business of Messrs. Grun, Nicholson, and Co. will in future be carried on by Mr. F. R. J. Grun and Mr. Herbert J. Nicholson ; the partnership of Shaw, Maxton, and Co., expiring by effluxion of time, Messrs. R. H. Shaw and P. Maxton will in future carry on the business of shipowners under the style of Shaw and Maxton ; and Messrs. R. W. Shaw, E. Williams, and W. Shaw, the business of ship and insurance brokers as Shaw, Williams, and Co.

About £22,000 in Bar Silver has been received from New York, £60,000 from the Pacific, per *Corcovado*, and £32,000 from the West Indies. The price, which was gradually receding last week, yesterday touched the lowest on record, viz., 57¼d. per oz., at which rate the amount per *Corcovado* has been sold. Mexican Dollars are quoted 56d. per oz., at which rate the market may be considered tolerably firm.

FREIGHTS AND CHARTERS.

Berth rates of freight to the Eastern ports show no change since our last report, and ready ships are rather scarce. Steam freights are dull. Homeward chartering is rather firmer.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama : 55s. weight or meast. To Hiogo : 60s. weight or meast. To Nagasaki : 65s. weight or meast. To Shanghai : 50s. weight, 40s. meast. To Hong Kong : 50s. weight, 40s. meast. To Singapore : 50s. weight, 40s. meast. To Penang : 50s. weight, 40s. meast. To Colombo : 40s. weight or meast.

Per SAILING VESSELS.—To Yokohama : 40s. weight, 35s. meast. To Hiogo : 45s. weight, 40s. meast. To Shanghai : 40s. weight, 25s. meast. To Chefoo, Tientsin, or Newchwang : 50s. weight, 45s. meast. To Hong Kong : 35s. weight, 25s. meast. To Singapore : 27s. 6d. weight, 25s. meast. To Colombo : 25s. weight or meast. To Penang : 30s. weight or meast.

The current quotations for coal, &c., are as follows :—From Wear or Tyne, per keel—To Singapore : £25. To Penang : £25, f.c. To Batavia and Sourabaya : £28. To Galle : £23.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama : 37s. To Hong Kong : 31s. To Shanghai : 35s. To Singapore : 25s. To Colombo : 23s. to 24s. To Galle : 22s. to 23s. To Manila : 25s. to 26s.

From Birkenhead, per ton.—To Hong Kong : 22s. To Shanghai. 27s. 6d. To Singapore : 19s.

CASUALTIES.

The George Walker, from Batavia, reports that on Dec. 11 she shipped a heavy sea, which washed away two boats, topgallant rail, smashed front of cabin house on deck, and had a number of sails carried away ; she also jettisoned part of her cargo.

CAIRNRYAN, DEC. 24.—The Sourabaya floating dock, which went ashore at Helensburg, Oct. 21, has been taken off and brought into mid harbour here.

SCILLY, DEC. 28.—The Howden, Ditchburn, from Singapore to Liverpool, has put in here, having lost and split sails.

DUBLIN, DEC. 23.—The P. J. Carleton is on fire in Kingston harbour, and will have to be scuttled ; later telegrams state that she was successfully scuttled, the fire extinguished, and arrangements have been made for pumping out and raising her.—Dublin Dec. 29.—The P. J. Carleton has been floated, and will be brought in here. (The P. J. Carleton cleared from Dublin Dec. 17, for Canton.)

The Buston Vale, arrived in the river from Colombo, reports that on the 29th Nov., off the island of Flores, she experienced a heavy gale ; and a succession of gales from Dec. 1 until she arrived off Dungeness ; on the 11th and 12th, in lat. about 47. long. about 10 W., was overtaken by a hurricane, and compelled to lay to under bare poles ; was struck by a monstrous sea, which stove the long boat, started stanchions, and washed overboard from the deck two boats and everything that stood in its way ; on the 13th the wind blew in furious squalls. It was afterwards found that the cargo had shifted, a good deal of plumbago coming up the pumps.

DOVER, DEC. 30.—The Satsuma (barq.), London to Japan, with a general cargo, has been assisted in here with loss of bowsprit and other damage, having been in collision in the Downs.

MISCELLANEOUS.

At PORT SAID.—Dec. 26, Prins Hendrick (str.), from Nieuwe Diep, for Java ; 28, Singapore (str.), from Glasgow, to Singapore ; 30, Colombo (str.), from London to Colombo, &c. ; Harrington (str.), from Texel to Java ; Ben Ledi, from London to Singapore, and China.

At REUNION.—Nov. 23, Duguay Trouin, Toon, from Saigon.

Telegraphic advices from Mauritius, via Aden, state that the Prinses Amalie sailed again, Dec. 5, and that the expenses occurred in discharging, warehousing, reloading, and requipment of the vessel amount to £1,400.

THERE was launched last week from the shipbuilding yard of Messrs. John Reid and Co., Port-Glasgow, a screw steamer of 1,500 tons register for the Eastern and Australian Mail Steamship Company, which was named the Bowen. The steamer is to be employed in the mail steam service between Singapore and Australia, and will have passenger accommodation for about 500 coolie emigrants.

VIOLET, PARIS.

VIOLET, PARIS.

VIOLET'S

SPECIALLY RECOMMENDED AND PATENTED

PERFUMERY,

PARIS, 225, RUE ST. DENIS (FORMERLY 317).

NOTICE.

VIOLET'S Toilet Soaps are the only Soaps which, neutralised by carbonic acid, do not contain caustic alkali in the free state, and which are, consequently, inoffensive to the skin; they are detergent, oily, softening, and are perfectly suited for the sanitary purposes of the toilet, for shaving, and for the bath.

ROYAL SOAP OF THRIDACE.

The only Soap recommended by medical celebrities for hygienic purposes and he beauty of the skin.

The creamy froth constitutes a nutritive lotion, which preserves the brightness, he freshness, and the suppleness of the skin, and increases its whiteness.

VELOUTINE SOAP.

new composition of Glycerine and Bismuth.

EMAILLINE,

A NEW PASTE DENTIFRICE.

This composition preserves the enamel of the teeth, increases their whiteness, and exercises a hygienic action on the gums, which are kept in a firm, fresh, and rosy condition.

BALM OF VIOLETS.

A nutritive melting Pomade, for preserving and improving the hair.

VIOLET TOILET WATER.

For softening, strengthening, and refreshing the skin.

FROTHY COLD CREAM.

(THE SECRET OF BEAUTY.)

For refreshing the tissues of the skin.

OIL A LA DUCHESSE.

For preserving and giving brightness and softness to the skin.

ACIDULATE OF VIOLETS.

A liquid compound of refreshing flowers.

GLYCEROLE AUX ROSES DE PROVINS.

A hygienic lotion, strengthening and refreshing, for the special use of the ladies' toilet.

POWDER OF THE FLOWERS OF CASHMERE.

INVISIBLE AND ADHERENT

For giving whiteness velvety softness, and freshness to the skin.

CREAM OF BEAUTY.

(The basis being Glycerine and Bismuth.)

Freshness, velvety softness, and youthful brightness of complexion.

This extremely delicate preparation, in which the plastic properties of bismuth are associated with the hygienic virtues of glycerine, contains, but in a still greater degree, all the essential elements of the Crême Pompadour. This composition is the most efficacious for making wrinkles disappear, and for preserving and restoring to the complexion the natural freshness of youth.

CREME POMPADOUR.

For preventing wrinkles and refreshing the face.

SERKIS DES HAREMS.

Prepared according to the Oriental formula.

TRIPLE EXTRACTS OF SCENTS.

Concentrated Perfumes for the Handkerchief.

Ess. de Bouquet—Brise de Violettes—Jockey Club—Fleurs de France—Brise de Mai.

WATER AND POWDER DENTIFRICES.

Cleanse the mouth and preserve the enamel.

PASTILLE AMBROSIAQUES.

Au Mastic de Chio.

For imparting freshness and sweetness to the breath.

GLYCERINES PARFUMEES.

Indispensable for preserving the health, beauty, and freshness of the sk

SACHETS AND SULTANES.

For linen and handkerchiefs. Oriental perfumes for apartments.

BOX OF YOUTH.

A mysterious Chest, enclosing secret talismans for beauty.

COLD CREAM OF THE FLOWERS OF CASHMERE.

A softening preparation for the complexion.

TRIPLE WATERS OF COLOGNE.

Very concentrated.

For the Toilet and the Handkerchief.

Ambrée—Musquée—Etherée.

EAU LAJEUNE,

For dyeing (without any discolouration of the skin) the hair, the beard, the eyelashes, and eyebrows, a flaxen, brown, chestnut, or black colour

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

T. W. JACKSON,
COMMISSION AGENT
SAN FRANCISCO.

NURSERY GOVERNESS.

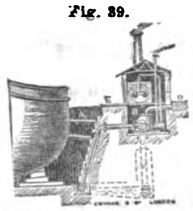
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

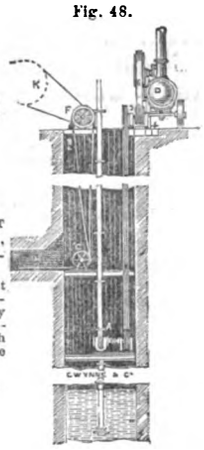
Fig. 89.



GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.

The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be ven

Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.

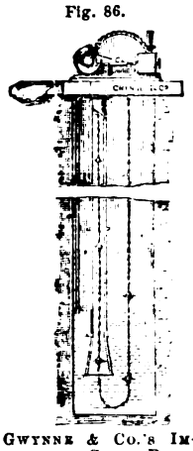
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water.

Fig. 100.

GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP.

For Hand-power adapted for ordinary wells of any depth, of most careful construction, and on the most approved system.

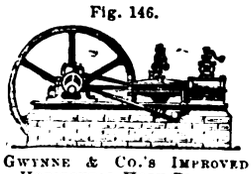
Fig. 86.



GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.

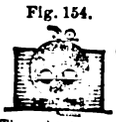


GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

With or without Expansion Gea ,for economical working.

From 4 to 100-horse power.

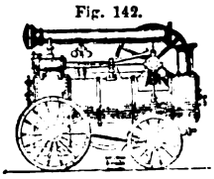
Fig. 154.



GWYNNE & CO.'S IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.

These boilers are simple and compact They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

Fig. 142.

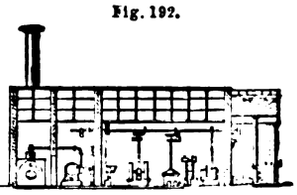


GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.

From 2½ to 30-horse power

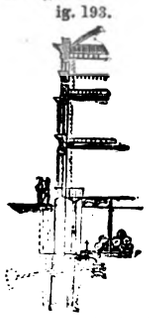
Fig. 192.



GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &c., &c.

The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.

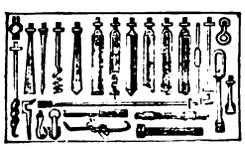


GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

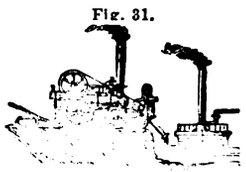


GWYNNE & CO.'S BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

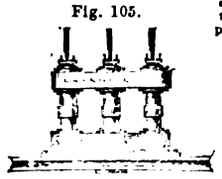
Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

OSLER'S GLASS CHANDELIERS.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

HOMŒOPATHIC CHEMISTS,

48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.
Messrs. MACTAGGART, TIDMAN, and Co., 34. Leadenhall Street.

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, on Thursday last, the 7th inst., being four days early. The next inward (P. and O.) mail, with advices Yokohama 1st, Shanghai 4th, Hong Kong 10th, Singapore 17th Dec., which is due, *via* Brindisi, on Monday next, the 18th inst., left Galle on the 25th ult., one day in advance of its due date.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Peiho*, arrived Jan. 5.—From Yokohama: Messrs. Raud, Lumley. From Shanghai: Messrs Fisher, Macleod, Zoup, Heuré, Delaplace. From Hong Kong: Messrs. Hopkins, Mitchell, Eglin, Petrie, Tuton. From Batavia: Messrs. Tolson, Devineau. From Singapore: Messrs. Linart, Morris, Hickling, Gillespie. From Galle: Mr. Ross, Mr. Dacoring.

PASSENGERS OUTWARD.

Per P. and O. steamer *Bokhara*, from Southampton, Dec. 31.—To Hong Kong: Mr. Morgan, Capt. Buller, R.N., Surg. A. H. L'Estrange, Mr. M. Pinil, Mr. H. K. Maynard, Sub.-Lieut. Luther, Mr. W. C. Johnstone. To Shanghai: Mr. W. J. Tucker. To Singapore: Mr. M. Armstrong. Mr. Paterson.

Per P. and O. steamer *Sumatra*, from Brindisi, Jan. 11.—To Yokohama: Mr. W. S. Lockhart. To Hong Kong: Mr. S. Hughes, Mr. Kofod. To Ceylon: Dr. P. Goldschnidt. To Singapore: Mr. W. Cadell.

Per P. and O. steamer *Cathay*, from Southampton, Jan. 14.—To Shanghai: Mrs. Haslewood. To Ceylon: Mr. S. le Cocq, Mr. E. Lemprien, Mrs. Gow, Mr. Chamberlain and friend. To Singapore: Rev. — Smith.

Per P. and O. steamer *Baroda*, from Venice, Jan. 22.—To Penang: Mr. Ainslie.—From Brindisi, Jan. 25.—To Hong Kong: Mr. Robslikke.

Per P. and O. steamer *Malwa*, from Southampton, Jan. 28.—To Hong Kong: Mrs. Armstrong.

Per French steamer *Hoogly*, Jan. 17.—To Yokohama: Mr. Boeke. To Hong Kong: Mr. Hillier, Mr. Duval, Mr. Lancken, Mr. Wanecke. To Shanghai: Mr. G. Rohl, Mr. E. Hunt, Mr. F. Velge, and twenty-four missionaries. To Galle: Mr. and Mrs. Canque. To Batavia: Mr. C. Winx. To Saigon: Mr. and Mrs. Harnoni.

Per French steamer *Iraouaddy*, Jan. 31.—To Shanghai: Six missionaries. To Galle: Mr. and Mrs. Gausseremburg. To Singapore: Mr. Hill.

Per French steamer *Peiho*, Feb. 14.—To Hong Kong: Mr. and Mrs. Hutchinson. To Shanghai: Mr. Marsh, Mr. and Mrs. Volsch.

Per French steamer *Meikong*, Feb. 28.—To Shanghai: Mr. M. R. Mackellar, Mr. Gordon, Mr. and Mrs. Jerdein.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The *Japan Mail* of the 21st Nov. contains the following:—

We hear that a project has been received favourably by the Government to grant a concession to a private corporation for the construction of a line of railway from Yedo into the interior. The statement requires confirmation, but may, probably, have given some colour to the report that the Horaisha has purchased or leased the Yokohama and Yedo line.

We regret to learn that the arrangements of the Government for observing the approaching Transit advance very slowly. They are in possession of excellent instruments for the purpose, and the delay in providing the requisite buildings is matter for regret. The Mexican Astronomical Commission have arranged to take their observations from the heights above Yokohama, and are erecting buildings for the purpose.

It is reported that the Horaisha Company has purchased the Takashima Colliery from the Imperial Government. A large reserve of its products is stated to be now available for sale.

The *Behar* has been sold to the Kaitakushi department for $100,000. She has been recently surveyed and found in admirable condition.

At the request of the Mikado, Sir Harry Parkes had an audience of his Majesty on Monday last, in which he expressed his warm appreciation of the eminent services rendered to the country by the British Minister in Peking, and requested Sir Harry Parkes to convey the expression of this feeling to Mr. Wade.

The premises of Messrs. Macpherson and Marshal, No. 58, Main-street, have been purchased by the Comptoir d'Escompte for banking purposes.

H.M. the Tenno received at a private audience Mons. Boisonnade, the French advocate, on the occasion of his return from Peking, where he had accompanied H.E. Okubo, as counsel on international law.

DATES TO DEC. 6.

By the *Vasco de Gama*, which arrived at San Francisco on Dec. 22, dates have been received from Yokohama to the 6th. This run in the winter months shows that the China Trans-Pacific Company did not over estimate what could be done. The following has been telegraphed to the New York papers:—

An important failure has taken place in the city of Tokio. The firm is that of Ohno and Co. They were esteemed as among the wealthiest and safest financial firms in the whole country.

The *Gazette*, in describing the peace festivities, says the streets presented an animated and brilliant appearance. The night was

Digitized by Google

bright and fine, though somewhat chilly, and nothing marred the outdoor festivities except the exceedingly muddy state of the thoroughfares. Despite this, however, the streets were crowded with sight-seers, among whom not a few foreigners were to be seen.

It is pretty well known that on the 1st of January next the Japanese Government undertakes carrying on the postal service between the United States and Japan. In the terms of the convention entered into between the two Powers, the mails between San Francisco and Yokohama, it is understood, will be conveyed as now in vessels of the Pacific Mail Steamship Company; but as it is part of the bargain that the delivery shall include Shanghai, speculation has been rife lately as to what company existent or what *in nubibus* postal department would be likely to be selected for their conveyance to Shanghai. It was rumoured that a Japanese steamship company was about to be organised on a large scale, to enter the lists with the Pacific Mail Steamship Company on that particular route, and that to them was to be allotted the duty of arranging the mails Chinaward. It was also reported that a contract had been entered into between the Government and the Pacific Mail Steamship Company for a mail service between Yokohama and Shanghai, to leave each end weekly.

CHINA.

—o—

TIENTSIN.

A letter from this port, dated 17th Nov., reports:—His Excellency Li Hung Chang, accompanied by all the civil and military officers at Tientsin, and escorted by a large body of military, repaired to a newly erected Ancestral Hall, situated about half a le to the north-west of the Governor-General's Yamen, to formally receive a tablet bearing the name of the celebrated high official Tsêng-kwo-fan (who died a few years back at Nanking, while holding the position there of Governor General of Keang-nan), on its being placed in the Hall. The tablets of Woo Tungling, lately dead, and formerly chief of the Southern Legion, and of a deceased officer named Yang, were at the same time also placed in the Ancestral Hall.

His Excellency Sun, the Customs Taoutai, on the 12th instant, notified to the Consuls that the 18th instant being the birthday of her Majesty the Empress Dowager (the mother of the Emperor), the Customs offices would on that day be closed for public business.

The steamers *Chihli* and *Taku* arrived off the Settlement, and are notified to leave to-morrow. The river is yet free from ice, but in comparison with the last three years the volume of water is less, and on that account it will more easily close up. The Chinese think we shall have a severe winter, and I am of the same opinion, from an experience of thirteen years in Tientsin. We may consequently calculate upon ice being cheap next summer.

SHANGHAI.

The present mail brings advices from this port to the 27th November; the French mail from London Oct. 9 was received on the 26th November. The following summary of news is from the *North China Herald*:—

Among the passengers by the present French mail for Europe is M. de Geofroy, the French Minister, and Madame Geofroy. As we mentioned some time ago, M. de Rochechouart has again become Charge d'Affaires at Peking. The members of the Chinese Mission to Cuba are expected by the next mail from America. The foreign gentlemen belonging to the Mission, it will be remembered, are Messrs. Macpherson, Commissioner of Customs at Hankow; Huber, Commissioner at Tientsin; and Rubery, also of the Customs Service.

M. Bismark, formerly interpreter to the German Legation, Peking, and who was one of the two interpreters present at the Imperial audience given to the Foreign Ministers on the 29th June, 1873, returned from Europe by last mail, and we understand goes to Tientsin by an early steamer, to take charge of the Consulate there. Mr. Waeber, Consul-General for Russia, has been acting for Germany during the past year.

We hear it stated on pretty good authority, although in an entirely unofficial way, that the Chinese Government have lately given indications of their willingness to dredge the Woosung Bar. It is not improbable that the recent diplomatic conjuncture at the capital has led to the settlement of this question also, but we give the report with some reserve—it is almost too good to be true. The difficulty which now presents itself to the official mind, among conflicting professional, and we may add non-professional, opinions, is what amount of risk and consequent responsibilty is involved in the undertaking. The weight of professional as well as public opinion has always been in favour of dredging, however; and if once the question escapes from the fetters of red tape, other obstacles will, let us hope, be got over with less difficulty and very much less delay.

THE CHINA-JAPAN CONVENTION.

H.B.M.'s Minister at Peking has addressed the following despatch and inclosures to W. H. Medhurst, Esq., H.B.M. Consul at Shanghai, for publication:—

Peking, 7th Nov., 1874.

Sir,—The Prince of Kung and the Tsung-li-yamen communicated officially to the Foreign Legations last evening the text of the agreement between the Governments of China and Japan, which in my despatch, No. 77, of the 1st inst., I informed you had been signed on the 31st Oct.

The matter, if not the form, of its conditions has been public property for some days, and I therefore think it desirable that you should possess them duly authenticated. The agreement, it is reasonable to hope, will close a controversy that has been continued for several months, and from further prolongation of which it was scarcely possible to anticipate anything but injury to the best interests of both the nations directly engaged in it. Our relations with both considered, I think that the British community is to be congratulated on the termination of the discussion, and I have much pleasure in authorising you to publish this despatch and its inclosures.—Your obedient servant,

THOMAS FRANCIS WADE.

W. H. Medhurst, Esq., Shanghai.

At the first meeting of the present session of the N. C. Branch of the Asiatic Society the paper read was one by Mr. T. Watters, of H.B.M.'s Consulate, "Notes on the *Miao-fa-lien-hua-ching*"—the Lotos of the Good Law. It was really an exposition of the origin and progress of the Buddhist religion, with observations on the manner in which the peculiarities of the doctrine and its superstitions and practices are exhibited in the different countries professing Buddhism, but more especially as relating to the Chinese. Mr. Wylie was called to the chair; and in the absence of the author, Mr. Kingsmill undertook the reading of the paper, a task which he ably discharged. At the close, the chairman said they ought to feel very much obliged to Mr. Watters for the labour he had undertaken. His paper was written for a minority, and it had been read to a minority; but it was, nevertheless, very reliable on the subject discussed in it. A vote of thanks to Mr. Watters was duly passed; the ordinary business had to be held over, there not being a sufficient number present to transact it. Among other matters a list of nine new members awaited confirmation of election, and there were two more names upon the proposition paper. A long list of books presented through Mr. Cordier, the hon. librarian to the Society, also lay on the table, but was not read.

Two outrages of an alarming kind have been committed in the Settlements during the week. In one case Captain Pike was struck a murderous blow by a Cantonese rowdy in Hongkew. Robbery is believed to have been the object. In the other, two Chinese policemen were brutally maltreated by a Chinese mob. Both cases were tried at the Mixed Court on Tuesday. Captain Pike's assailant got the most severe punishment the Court could inflict, three hundred blows then and there administered, and three months' cangue. Of the ten men charged with the other offence only three were sentenced, one to two hundred blows and a month's cangue, and the others to one hundred blows and a fortnight's cangue each.

The annual meeting of members of the Shanghai Rifle Club was held at the Main Guard. The first business was the election of officers for the ensuing year, the result being as follows:—Mr. Brewer, re-elected Captain; Mr. Housman, Hon. Secretary and Treasurer, in place of Mr. L. Cameron; on the Committee were placed Messrs. Dunman, Glass, and Hall.

Fire broke out in the hold of the barque *George Washington*, and though the fire brigade worked at her for some hours, the ship had to be scuttled. She had some 3,000 piculs of cotton on board, for Nagasaki. A couple of chains have already been passed under the vessel, and it was expected that she could be floated by means of pontoons, and taken over to the Pootung shore.

The C.M.S.N. steamer *Yungching* arrived in the river from Formosa. Along with the *Leeguen* and several Chinese gunboats, the *Yungching* was detained eighteen days at the Pescadores, during the passage from Chinkiang to Takow, through stress of weather. While there, Mr. Imray, the chief officer of the *Leeguen* was drowned by a boat accident on the 26th October.

Mr. Consul Medhurst has notified that the Consulate at Chinkiang has been placed under the charge of Mr. A. R. Hewlett.

FOOCHOW.

Wolves have lately been quite abundant, and exceedingly ravenous, in some parts of Hing-hwa. A number of children, and even several adults, have been eaten up by them.

The American Methodist Episcopal Mission has recently been reinforced by the arrival of Rev. D. W. Chandler and wife, and Miss Sigourney Trask, M.D., from the United States; Miss Trask has received a thorough medical education, and has had two years' practice in the hospitals of New York. She has a wide field of usefulness before her in treating Chinese women. D. W. Osgood, M.D., and Rev. J. E. Walker, of the American Board Mission, are absent on a long trip to the north-west of this province, and into the province of Kiang-si. When last heard from, they were at the prefectural city of Shau-wu. At Yong-kau they saw a large tiger, which had just been killed, and was offered for sale in the streets of the city.

The native officials are still considerably exercised over the Amoy telegraph. The Tartar General seems to be the chief ob-

Digitized by Google

structionist. We hope that the Danish Minister, backed by the Russian, American, and other Ministers, will succeed in enforcing the carrying out of the contract. The Russians are directly interested, as they have an agreement with the Chinese that whenever any other nation is permitted to construct a telegraph they shall be allowed to build one at the North. This is said to be one of the chief objections of the Peking Government against the grant of the telegraph to Amoy.

We are informed that an insurrection in the city has only been averted at the eleventh hour, by a timely concession on the part of the authorities. It appears that the Taoutai issued a proclamation, about ten days ago, prohibiting a monster Joss procession; the people became very excited, and threatened to close their shops and resist the Mandarin to the uttermost unless the procession, upon which they had set their hearts, was allowed. Troops were called out, but the people were firm, and ultimately carried their point. *Vox populi; vox Dei.*

The case of Kwo Fuh Tih *v.* Captain and Owners of the steamship *Kwang Tung* was heard at a Mixed Court, held at H.B.M.'s Consulate, Foochow, on Friday, Nov. 20. Present: H.B.M.'s Consul, H.E. the Taoutai, and Captain Ridge, s.s. *Sea Gull* (as Assessor). It was an action entered by the plaintiff—captain and owner of a junk—to recover from the defendants the sum of $3,700 as compensation for loss sustained by the plaintiff, through alleged carelessness on the part of the defendants, in running into and sinking the junk aforesaid near the island of Ockseu, in July last. The case derived peculiar interest from the fact of its being the first trial of the kind held before a Mixed Court. At the outset of the proceedings Captain Pitman, on behalf of himself and the owners, formally protested against the constitution of the Court. The protest was noted by H.B.M.'s Consul, and the case proceeded. A number of witnesses were examined, but without eliciting much important information. Ultimately the Court decided in favour of the plaintiff, with damages for $1,800, the Court opining that the steamer did not conform to established usage in neglecting to keep clear of the junk. The important fact that the solitary light carried by the junk was not visible to those on board the steamer, until they came close together, was seemingly ignored.

HONG KONG.

Our advices by the present mail extend to the 3rd December; the P. and O. mail from London 16th October was received on the 1st December. The following items of news are from the *Hong Kong Daily Press*:—

The following cases have been heard before the Supreme Court, before Mr. Justice Snowdon:—Miss Rose *v.* Dorabjee and Hong-kee. This was an action for $1,000, brought by Miss Rose, of Rose and Co., drapers and outfitters, against Messrs. Dorabjee and Hong-kee, the lessees of the Hong Kong Hotel, for damages sustained by the plaintiff on account of the roof of the premises in her occupation not being rendered waterproof by the plaintiffs. Judgment was reserved.

In the case of the Kong Hong and Whampoa Dock Company *v.* Beart, judgment was delivered by his lordship for the defendant.

The Cricket match between the officers of the 80th Regiment and the Navy officers resulted in a victory for the former, who made 187 runs in the first innings. The navy made twenty-seven in the first, and thirty-five for four wickets down in the second innings. The military band was in attendance.

Miss Jennie Nye took her benefit at the Theatre. The performance was under the patronage of Admiral Shadwell and the officers of H.M. Navy, and there was a full house. The performance commenced with *Delicate Ground*, a charming little comedy, which was charmingly rendered. Miss George, Mr. Lawrence, and Mr. Herberte were the only *dramatis personæ*. Miss George was especially at home as *Pauline*, and her efforts again and again elicited rounds of applause. Mr. Lawrence and Mr. Herberte were also happy in the conception of their characters, and the piece passed off most successfully. The burlesque of *Lurline* followed, and pleased immensely: Miss Nye as the Prince was enthusiastically received, and her acting was all that could be desired. Miss Rogers also had a part which suited her well, and to which she did full justice. Mr. Taylor as usual kept the house in continued roars of laughter. Perhaps the scene of the evening was the "boxing" between Miss Nye and Mr. Taylor, which was loudly cheered. Some of the duets by Miss Nye and Miss Rogers were very sweetly sung, and encored. The minor parts were creditably sustained. Burlesques seem to take in Hong Kong.

We regret that the attempt to move the *Alaska* has not proved successful. Preparations were duly made, and the pontoons got into their proper places in anticipation of the high tide. The water rose to a good height, but unfortunately the second pontoon on the port quarter gave way about 10.30; the others then commenced taking in water, and a large portion of the shoring on that side of the vessel gave way. The plan of operations adopted appears, from what we learn, to be a good one; but it would seem that it will require to be carried out on a larger and stronger scale to move so great a mass as the *Alaska*. We trust, however, that further attempts will be attended with satisfactory results.

The British barque *Lord Macaulay* reports, left London on 23rd June, Gravesend on the 24th, and took departure from Lizards on the 30th; had strong Westerly gales leaving the English Channel; thence to the Equator very light winds and fine weather, which was crossed in 18 West on 3rd August Had very squally and variable S.E. trades; sighted Tristan d'Acunha on the 21st; thence to the meridian of the Cape of Good Hope, which passed on 5th September, had strong S.E. winds; thence to St. Paul's, which was passed in sight on the 21st, had very variable and moderate winds. On the 25th, in 37.38 S. lat., and 96.99 E., had a violent gale from the N.E. to N.W. with very high sea; thence to Timor 14th October, mostly light winds; was becalmed fourteen days in Ombay Passage, with strong S.W. current; got through on the 28th; had very light baffling winds and weather in the Banda Sea. Passed Gillolo Passage on 6th Nov., and had variable Westerly winds; thence to the Northward of the Pelew Islands with very high cross seas; thence to the Bashee Channel fresh N.E. trades and current; sighted Pedro Branca at 10 P.M. on the 25th; thence to Hong Kong a strong gale from the North; anchored in West Lama Channel at 10 A.M. on the 26th, splitting lower fore-topsail before anchoring. Ship has made considerable water in her upper works, but is perfectly tight in the bottom. The whole passage has been the most tedious and harassing the commander says he has experienced in his twenty-one years' service as such. The amount of adverse currents he estimates at 440 miles.

SIAM.

—o—

BANGKOK.

The *Siam Weekly Advertiser*, commenting upon the labours of the American Baptist Mission, says:—

The great American Baptist Missionary Union of the United States so early as 1835 located its first missionary designed to labour for the teeming millions of China in India. In those days China was inaccessible to Protestant missionaries. They were not allowed to reside in any part of the Chinese Empire. This state of things compelled the Baptist Missionary Society of America to locate its missionaries for China, in Siam, with its mission to the Siamese, till there should be providential openings, that would allow their missionaries to visit and to settle in China with some certain prospect of being able to labour efficiently for the Chinese in their own country. Dr. Dean, the first American Baptist missionary, set apart to labour for the salvation of the Chinese, in submission to the necessities of those times was compelled to locate in Bangkok, hoping for the better times coming, when a vigorous mission to the Chinese could be established in China Proper.

The labours of the present year are remarkable; Dr. Dean has recently returned from a mission trip to the town Krok Krahk (designated by the Chinese Lenkiachu,) a fishing village at the mouth of the Tacheen river. We learn that while there he had the pleasure of baptising and receiving into the fellowship of the Church nine persons, making thus far the results of missionary labour among the Chinese for this year more memorable than any previous year since the establishment of that mission in Siam. It seems very wrong that the American Baptist Missionary Union are obliged to leave aged and veteran missionaries like Dr. Dean and his lady all alone on the field. While that Board has great reason for thankfulness that a merciful Providence gives persons of their advanced years so much physical and mental vigour, and so much earnestness and devotion to their work, the Missionary Society that sustains them must deeply regret to over-burden their advanced years and remaining energies. They should be vigorously supported with efficient co-labourers who will have time to prepare to fill effectively their places when they are called above to higher spheres of labour and service.

On the evening of Nov. 14 the German residents of Bangkok made a complimentary demonstration of respect to their talented and worthy Consul, Baron Werner von Bergen, and his lady. A party of singers assembled at the landing of the German Consulate, and serenaded the Consul and his lady, who are expected to leave this port in a few days. Consul Berner Werner von Bergen has been appointed Consul-General to Saigon.

The Siamese seem to be awake as to the importance of having telegraphic communication with the outside world. They are resolved upon establishing a telegraphic line of their own in their own territory for the benefit of their country, and they are determined that it shall be entirely under their own control, so as to avoid all complications with foreign companies and foreign Governments. The proposals of Mr. Read, of Singapore, to have the Siamese unite with a foreign telegraphic company have been rejected by the Siamese Government. All contracts for the purchase or sale of goods, for the hiring of personal service, for the hiring of elephants and horses, for the rental of land, vessels, houses, buildings, stores, floating houses or shops that are personal property are to be regarded as private contracts, and may be made between individuals, as they may judge expedient.

In case of litigation between foreigners, and Siamese subjects

Digitized by Google

before the authorities of Bankok, if the complainant seeks compensation, he must first pay down a fee of two per cent. of the amount he claims, or his case will not be entertained. If the complaint is for a criminal offence, there shall be no fee. If the complainant seeks compensation, and after the trial the suit cannot be sustained, the complainant must pay the fee which the defendant paid.

The treaty which the Siamese Embassy recently negotiated with the British Indian Empire at Calcutta necessitates the establishment of a Court in the Siamese Laosian territories for the adjudication of cases in which British and Siamese subjects are parties to a suit. His Majesty has appointed Commissioners and a suite of officers to accompany them, who are invested with judicial powers to try all such cases as they arise in the Laosian territories. These Commissioners are not to interfere in cases where only Laosians are parties to a suit. All judicial cases of this latter description are to be tried in purely Laosian Courts, by Laosian judges, and Laosian laws. The new Siamese judges are all salaried officers, and their instructions forbid the receiving of bribes in any shape from the parties to suits that may be brought before them, and will not allow them to engage in any business speculations. They must confine themselves exclusively to their judicial duties.

The Siamese Government has just issued a set of laws on the subject of contract with foreigners showing that the Governors and rulers of States tributary to Siam and of Siamese provinces cannot make public contracts with foreigners. Private parties may make personal or individual contracts. Public contracts cannot be made by governors of tributary States without the sanction and ratification of the central Government of Bangkok. All contracts to work forests, mines, to construct canals, to work fisheries, revenue monopolies, plantations, or orchards, that are not private property must be made with the sanction and subject to the ratification of the central Government at Bangkok.

There will be a public auction, by order of the special Court which tried the case of the Agricultural Minister, for the sale of all the personal effects of Ai Nut, the deposed Minister of Agriculture, Ai Nú, and Ai T'aut rut, the subaltern officers of said Minister—the defrauders of Government revenue.

H.M. the Supreme King has ordered that Ai Nú, the murderer of Chin Hái, have inflicted upon him the sentence which the judges have passed upon him according to law, and H.E. Chow Phya Surawongs Waia Watn, is to deliver the person of Ai Nú to H.E. Chow Phya Yomaraht, who must have executed upon him the sentence of the judges.

(FROM A CORRESPONDENT.)

H.M. the King of Siam, and the Associates in his Administration, have for some time been discussing reforms in their financial system, and announcing in various quarters their intention to do something else than talk. By way of showing us that they are rerlly in earnest, a vigorous effort has lately been made to inculcate among the departmental officials the necessity for uprightness in dealing with the public revenues. Alas! it was none too soon to commence these operations, and let us hope that the signal example just made in a high quarter will bear good fruit among all grades of the executive. It appears that the nobleman at the head of the Agricultural revenues has for some time past been more than suspected of mis-appropriation, and it was discovered that one of his agents, after gathering in duty to the amount of about £5,000, proposed to return only £2,000 into the Exchequer. An investigation was made, his chief at the outset assisting as one of the judges in the enquiry, but as the facts came out, the judge became a prisoner. He might have got off by making a clean breast, but this he chose not to do, and the end is that he has been degraded from the Privy Council, of which he was a member; his effects have been confiscated, and he lies a convict in irons, under a further sentence—which, let us hope he will be spared—to be branded in the forehead.

There has, besides this, been a good deal of talk lately about the proposed telegraph line which is some day to bring Siam into direct communication with Europe. A gentleman well known in Singapore has for a long time past been charged by the Siamese Government with the business of organising this affair, but of late the heads of the administration have changed their views on the subject, and are inclined to keep the telegraph wires under their own control rather than hand them over to a company to be worked. There are, indeed, several weighty reasons to be urged in defence of this change of policy In old days, if an obstructive conservative Asiatic potentate wished to prevent the realisation of any project, and yet escape public censure, the plan was to grant a concession or monopoly to some European—the least likely to carry it out—and then, while refusing a fresh grant to any other competitor, to privately throw every obstacle in the way of the selected grantee. It now appears, however, that Siam is seriously thinking about a telegraphic line, and of course their wants would be satisfied, and their objects most cheaply realised by a short line across Siamese Camboja, to connect at Saigon; but either from distrust of the French, or, as they themselves put it, and as may really be the case, from good-will to the English—with whom, as they well know, their best interests lie—the Siamese, by a majority of forty-eight out of fifty-one Privy Councillors, have voted to run wires from Bangkok to British Burmah, and also to Penang. But as to the terms of working these projected lines, they are anxious to learn a little more from the British Government before making any definite agreements. We have said above that the young King of Siam entertains an objection to granting a monopoly to a company of foreigners. His Majesty may not be aware of the fact, but he has a very good precedent on his side. Some twenty or thirty years ago a very eminent British firm obtained from Turkey a concession to lay down and work exclusively a submarine cable between two important points in Turkish territory, but the English Government insisted on the cancelling of the agreement, which the grantees strenuously resisted in vain. In the case of Siam a company of Europeans holding exclusive management of a telegraph wire would, under the existing treaties, be out of the Siamese jurisdiction. The extra-territorial rights conceded by Siam, and the fiscal restrictions imposed upon her by her agreements with Foreign Powers may be necessary, wise, and advantageous, but it must not be overlooked that if we oblige the Siamese to give up control over foreigners resident within their own boundaries, we also put obvious difficulties in their way so far as regards granting privileges to Europeans who may wish to promote the construction of telegraphs, canals, railways, or other public works.

A commission is now sitting at Bangkok to amend the native civil procedure, modifying their own laws on the basis of our own Indian Code. This also is a very timely reform. A new edict on gambling has also been passed. Most of the money lost in the gaming-booths finds its way into Chinese purses; hence, by way of encouraging a taste for this demoralising pursuit, Chinamen have hitherto had a way of enticing children to make small stakes on the tables placed invitingly along the thoroughfares. A stop has been put to this practice. No one under fifteen is henceforth allowed to gamble, and enticers are to be heavily punished.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Our advices extend to the 10th December; the French mai from London Nov. 6 arrived out on the 9th December. The following summary of news is from the *Straits Times*:—

The third Atchin expedition, which amounts, so far as we can learn, merely to a material strengthening of the force now in the country, is on its way. The *Lieut.-Gen. Kroesen* passed through from Batavia, having on board some 500 troops. The other vessels are the *Koningin Sophia* and *Prins Alexander*, one of which it is supposed has already passed through by way of Durian Straits, and the other is expected hourly, and the *Baron Mackay*, which goes *via* Padang.

By the *Sharpshooter* advices were received from the Sunghie Ujong expedition. H.M.S. *Charybdis* and *Hart* were still lying at the mouth of the Lookut River, with H.E. the Governor and all the expeditionary force on board. The forces which proceeded to the scene of the disturbance had seen nothing whatever of the insurrectionary forces, which had incontinently fled. Inchi Karrie, son of the Datu Bandar, came in and said he had been sent by the Bandar and Mahmood to treat, whereupon H.E. the Governor gave those leaders twenty-four hours to submit. At the expiration of that time it was found that they had both availed of the interval to get out of the way. They, however, stated their willingness to surrender unconditionally, but wished to do so through the Sultan of Salangore, and as it was understood they were making their way towards the Sultan with this intention, his Excellency the Governor remained at Lookut to await the result.

A young Eurasian named James Kenneth Leicester committed suicide under very painful circumstances. He had been employed for some years in the house of Messrs. Boustead and Co., and had charge of the postage stamps, of which a large number are used monthly. An examination of the postage accounts a few days ago showed a deficiency, failing to explain which satisfactorily he was dismissed from employment.

It would appear that the reports of kidnapping coolies for Deli have some foundation. A Eurasian named Peterson has, we learn, been obtaining coolies in Penang for service in Deli, and has come on to Singapore; and being charged with kidnapping coolies from Penang, a telegram was sent to this place by the Superintendent of Police there for his arrest. Inspector Barnum succeeded in arresting him yesterday afternoon, in the business part of the town, and he is now detained in custody, awaiting further information from Penang.

The French Opera Comique Company, under the direction of M. Berger Deplace, gave their first representation at the Townhall, in the presence of his Excellency the Governor and Lady Clarke and a very large audience. The success of the representation was never doubtful from the commencement. As soon as the performers appeared on the stage, it was felt by the audience that they were in the presence of artists of merit, such as are rarely seen in this part of the world. The attraction of the evening undoubtedly was the opera of world-wide celebrity,

Digitized by Google

La Fille de Madame Angot. The arrangement of the parts by the director was marked by much taste, and showed a wide knowledge of scenic effect and the requirements of the stage, while giving most of the favourite songs in the opera. The Moulin Joli was played with great taste, as was also the charming operetta *Lischen and Fritzchen*, one of Offenbach's *chefs d'œuvre*. The applause from a crowded audience filling every part of the theatre was continuous from beginning to end of the performance, each of the talented artists coming in for her and his share of approbation.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—Although fears of war had subsided the general business had not improved, and the demand for most articles was very limited. A fair business had been done in Cotton Yarn, and the market being bare of Nos. 28-32, this count had improved mostly; Nos. 38-42, best spinnings, also being saleable at higher rates. Of Shirtings only 7 lbs. were wanted, and the tendency for all other weights was somewhat easier. Business in Woollen Goods remained dull, with the exception of Plain Orleans in medium qualities, and a good current demand for Mousselines. There had been more inquiry for Metals, and suitable sizes of Bars and Nail rods were saleable.

NEWCHWANG.—Messrs. Knight and Co., in their Report of 18th Nov., say that their "Autumn trade has run its course to the end," and that "scarcity of silver has been the great drawback of the season." Stocks of Manufactured Goods, however, have been largely reduced by barter transactions, but they add in reference to Woollens, "we have never known a season here when Woollens were so absolutely unsaleable as during the past summer." At the Korean Fair high rates had been realised for some articles. Notably, Tunsin Dewhurst's Eagle 9¾ lbs. Grey Shirtings, which had brought Tls. 4.80 per piece, and Dyed Damasks that had been sold at Tls. 8.00 per piece.

HANKOW.—There was more doing in Grey Shirtings at previous rates, these being H., Tls. 1.85½ for 8¼ lbs. No. 2 Eagle, Tls. 1.72 for Double Lion, Tls. 1.69 for Lion, and Tls. 1.44 for 7 lbs. Red Pheasants. Other goods neglected.

SHANGHAI.—The only variation in the business of the week had been a sort of supernumerary auction of sound Camlets, Spanish Stripes, 7 lb. Grey Shirtings, and 60 to 64 reed White Shirtings, at which buyers had the advantage of the sellers. The sale comprised 600 pieces of Camlets—which not very long ago cost the seller from Tls. 14.25 to 14.70 per piece—at Tls. 13.25 per piece, average; 72 pieces of C.P.H. Dark Blue Spanish Stripes C.P.H. at Tl. 0.54 per yard—a decline of 2½c. per yard on the rate paid last week; 1,500 pieces of Dewhurst's Eagle 7 lb. Shirtings at Tls. 1.49, originally accepted in barter against Green Tea at Tls. 1.56 per piece; and 500 pieces 60 reed and 500 pieces 64 reed Gillam Longs Eagle Chop, at Tls. 1.74 to 1.88 per piece respectively. The northern season may now be considered closed, and the steamers now under despatch for Tientsin would probably be the last sailings for the year.

FOOCHOW.—Sales 650 pieces 7lb. T-Cloths at $1.72½ per piece. Lead $8.50 per picul to teamen.

MANILA.—After the departure of last mail a little more activity was observable in the market for Plain Staples, and values of most descriptions were stronger than they were at the commencement of the month. New arrivals of Coloured Goods were held for an advance upon late prices.

SAIGON.—The market continued dull, with but slight alterations in prices. Quotations, Grey Shirtings, 8¼ lbs., $2.20; do., 7 lbs., $1.90; T-Cloths, 6 lbs., $1.47; do., 5 lbs., $1.20; do., 4 lbs., $1.02½; White Irishes, $1.50 per piece.

EXPORTS.

TEA.

YOKOHAMA.—A moderate but steady demand had continued, settlements amounting to 5,000 piculs, in which a rather extensive purchase, about good medium grade, had been reported at $38 per picul. Arrivals rather exceeded the sales, and amounted during the interval to 6,000 piculs. Owing to conflicting telegrams the market had ruled rather unsteady, but no change had been made in quotations; fine grades were most in favour, and at the close prices were steadier and firm. Quotations:—Common, $27 to 29 per picul; good common, $31 to 34; medium, $35 to 38; good medium, $39 to 41; fine, $43 to 46; finest, $48 to 51.

SHANGHAI.—The following settlements have been made during the week:—Black, 1,174 chests, at Tls. 15 to 20. Stock, 1,350 chests. Green: Fychow and Moyune, 13,596 ½-chests, at Tls. 25½ to 37; Pingsueys, 606 ½-chests, at Tls. 30. Stock, 88,000 ½-chests. Were holders have been willing to sell cheaply, buyers have been found for Green Teas, and a fair business has been done in common kinds. Export to Great Britain to date (exclusive of lost cargoes):—

	1874-1875.		1873-1874.
Black	63,607,780 lbs.	against	56,232,263 lbs.
Green	7,150,185 „	„	7,270,530 „
	70,757,965		63,502,793

FOOCHOW.—Messrs. Westall, Galton, and Co.'s Weekly Letter says:—A small business has been transacted during the week, and settlements of Congou only amount to 6,178 chests. Purchases have been made at prices which show worse value than was obtainable during the previous week. The remaining stock is of very undesirable description. Souchong: Settlements show no change. Oolong: A slight concession is observable on some of the purchases, but prices generally are much as last quoted. Flowery Pekoe: The parcels that have changed hands are of very inferior description. Scented Teas: No transactions to report. The following are statistics to date:—The export to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 52,961,690 lbs., against 48,223,214 lbs. at same time last year. To America, 864,675 lbs., against 102,266,479 lbs. To the Colonies, 11,490,330 lbs., against 12,216,531 lbs. last year.

SILK.

YOKOHAMA.—A considerable quantity of Silk had changed hands, a portion of which is understood to be stored under advances. Arrivals had been large and stocks were further increased. Prices again showed a slight decline. Settlements from 1st July to date, 6,200 bales; against corresponding period, season 1873-4, 7,300; do., 1872-3, 7,650; do., 1871-2, 7,700; stock, 1,000 bales. Silkworms' Eggs: Total settlements, since the beginning of the season, were estimated at 1,300,000 cards, against 1,280,000 last year, at the same period. The total shipments, to date, amounted to about 1,200,000 cards. Owing to the quantity of inferior goods which had been burnt there were fewer worthless cards than usual left in the market at the end of the season. Annual White and Green were obtainable at from 25c. to 35c.

SHANGHAI.—There had been another week of inactivity in the market, the settlements not exceeding 300 bales, of which about 80 bales were market grades of Tsatlee and Haining re-reels, the balance consisting of common raw Tsatlees on joint account, at a slight reduction in rates. Holders were firm for chops and known silks, and were asking Tls. 420 per picul for Koo-fong-sing's Chop No. 3; Tls. 345 per picul for Kukee's "Chin-jan;" and Tls. 330 and Tls. 320 per picul for Blue Elephant and Red Peacock. Arrivals had again fallen off, and the unsold stock was estimated at 14,000 bales.

THE MAILS.

PRESENT INWARD MAIL.—MARSEILLES, JAN. 5.—The Messageries Maritimes steamer Peiho, with the inward French mails, from China and Japan, arrived here to-day at 4.0 A.M. She brings 91 passengers and a general cargo, including 330 bales of silk, 16,395 packages of tea, 550 packages of sundries, and specie to the value of £21,231 for London, which part of her cargo will be forwarded to its destination per company's steamer Euphrates, due in London on or about the 19th inst.

HEAVY PORTION OF LAST INWARD MAIL.—PORT SAID, JAN. 5.—The P. and O. Company's steamer Delhi, with the homeward India and China (heavy) mails, left at 1 P.M. for Southampton, where she may be expected on the 18th inst.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, JAN. 7.—The P. and O. Company's steamer Bokhara from Southampton, 31st ultimo), arrived at 8 P.M., and left at midnight on 6th inst. for Port Said. Experienced heavy weather. All well.

COMMERCIAL POSTSCRIPT.

The directors of the City Bank, at their general meeting on the 19th inst., will declare a dividend at the rate of 10 per cent. per annum, free of income-tax, and carry forward £3,900. At the corresponding period of last year the dividend was at the same rate, and £10,000 was added to the reserve fund.

At the half-yearly meeting of the General Board of Directors of the Thames and Mersey Marine Insurance Company (Limited), held in Manchester on the 8th inst., the usual dividend on account of 2s. per share, being at the rate of 10 per cent. per annum on the paid-up capital of the company, was declared free of income-tax for the half-year ended the 31st Dec. last, payable on the 18th inst.

The directors of the Lancashire Fire and Life Insurance Company have declared a dividend at the rate of 20 per cent. for the half-year ending the 31st Dec., thus making, with that paid in July last, a dividend for 1874 of 17½ per cent.

The Globe Telegraph and Trust Company (Limited) announce the payment of the following interim dividends, viz., 3s. per share on the preference shares, being at the rate of 6 per cent. per annum, and 2s. per share upon the ordinary shares, making, with the previous quarterly payments, a dividend at the rate of 5 per cent. per annum.

The Jorehaut Tea Company (Limited) have declared an interim dividend of 10 per cent., against 7 cent. at the corresponding period of last year.

The report of the Central Bank of London (Limited), to be submitted to the meeting on the 14th inst., exhibits an available total of £10,884, and recommends a dividend for the half-year at the rate of 8 per cent. per annum, free of income tax. It is also proposed to add £3,500 to the reserve fund, raising it to £20,000, and to carry forward £3,384. The current and deposit accounts represent £769,039. The dividend in the corresponding period of 1874 was likewise 8 per cent.

In anticipation of the meeting to be held on the 18th inst., the report of the Metropolitan Bank (Limited) has been issued. Including £2,369 brought forward, the net profit during the six months amounted to £6,504, out of which it is proposed to pay a dividend on the "A" or Preferred Shares at the rate of 8 per cent. per annum, free of income tax, leaving £2,487 to be carried forward. In January last year a dividend at the rate of 7 per cent. per annum was declared.

The half-yearly report of the Midland Banking Company (Limited) shows an available total of £23,195, and recommends the payment of a dividend at the rate of 10 per cent. per annum. The dividend at the corresponding period of last year was at the same rate.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CREASY—On the 12th Dec., at Hirimburé, Galle, Ceylon, the wife of E. B. Creasy, of a daughter.

DALGLIESH—On the 22nd Nov., at Shanghai, the wife of William H. Dalgliesh, of a son.

DOUGLAS—On the 31st Dec., at 5, Clifton-terrace, W., the wife of the Hon. John Douglas, Auditor-General of Ceylon, of a son.

EZEKIEL—On the 26th Dec., at 19, Porchester-terrace, W., the wife of S. Ezekiel, of a son.

GROBIEN—On the 2nd Dec., at Hong Kong, Mrs. F. Grobien, of a son.

HENDERSON—On the 21st Nov., at Shanghai, Mrs. Edward Henderson, of a son.

HOGG—On the 5th Jan., at Forest Lodge, New Wanstead, the wife of Frederick Hogg, of a son.

SILLAR—On the 27th Dec., at the Shrublands, Sydenham-park, the wife of John Charles Sillar, of a son.

STEVENSON—On the 4th Jan., at 20, Lansdowne crescent, Edinburgh, the wife of Robert Stevenson, of a son.

SWIRE—On the 6th Jan., at Richmond, Yorkshire, the wife of William Swire, of a daughter.

WATSON—On the 16th Nov., at Newchwang, the wife of Dr. Watson, of a son.

WHISH—On the 3rd Jan., at Montrose, the wife of Lieut. Albert W. Whish, Inspecting Officer of Coast Guard, of a son.

MARRIAGES.

FALCONER—INGLIS.—On the 28th Nov., at Union Church, Hong Kong, by the Rev. James Lamont, Alexander Falconer, of Hong Kong, China, to Isabella Ashworth, eldest daughter of John Inglis, of Hong Kong.

MURRAY—RYDER.—On the 21st Nov., at Trinity Church, Shanghai, George Murray, of Shanghai, to Emily Ryder.

SIMPSON—WEALE.—On the 13th Oct., at the Cathedral, Hong Kong, by the Rev. R. Hayward Kidd, M.A., Colonial Chaplain, Charles Lenox Simpson, Deputy Commissioner of Chinese Maritime Customs, Shanghai, to Isabel Huntley, daughter of the late John Weale, of London.

WATTS—EDWARDS.—On the 15th Nov., at Tientsin, by the Rev. J. Innocent, James Watts, of Taku, to Elizabeth Edwards, of Montrose, Forfarshire.

DEATHS.

ATCHISON—On the 24th Dec., at Bangkok, John S. Atchison, of Singapore.

COBB—On the 25th Nov., at Shanghai, Mr. Charles Eugene Cobb, of the Imperial Maritime Customs, a native of Camden, Maine, U.S.A., aged 29 years.

FAIRBAIRN—On the 28th Nov., at Hong Kong, James Fenton Crawford, the only son of John and Jessie Fairbairn, aged 2 years and 3 months.

GWYTHER—On the 6th Jan., at 10, St. John's-villas, Upper Holloway, Priscilla Jane, wife of George Gwyther, in the 75th year of her age.

SILLAR—On the 1st Jan., at the Shrublands, Sydenham-park, Jane Ellen, the beloved wife of John Charles Sillar, aged 25.

SMITH—On the 4th Dec., at Singapore, Mrs. Ellen Smith, widow of the late J. C. Smith, formerly Commissioner of the Court of Requests and a magistrate of police in the Colony.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Jan. 7, at London, from Shanghai, Essen (str.); at Flushing, from Batavia, William Poolman; Dec. 31, at Cadiz, from Manila, Aurrera (str.); Jan. 7, at London, from Rangoon, Annetta Gattorno; 6, at Liverpool, from Singapore, Howden; 8, at Dartmouth, from Sourabaya, G. H. Betz; at Liverpool, from Ilo Ilo, Hugh Bourne; at London, from China, &c., Galatea (str.).

DEPARTURES.—Jan. 7, from Cardiff, for Singapore, N. Boynton; 6, from Penarth, for Singapore, Ysusquiza; 5, from Texel, for Batavia, Madura (str.); from Antwerp, for Hong Kong, Anne Christine; Dec. 31, from Cadiz, for Manila, Buenaventura (str.); Jan 7, from London, for Colombo, Queensbury; 8, from London, for Colombo, &c., Duke of Argyll (str.); 6, from Newport, for Singapore, William Wilcox; from Penarth, for Manila, Glee Maiden.

LAID ON.—At London, for Singapore, &c., via Cardiff, Cawdor Castle (str.); for Yokohama and Hiogo, Duke of Abercorn.

SPOKEN.—Celestial Empire, Cardiff to Galle, Nov. 12, 4 N., 25 W.; Onsuri, of and from London, for Chefoo, Dec. 22, 37 N., 10 W.

Naval and Military.

Rear-Admiral G. T. P. Hornby, who has been gazetted one of the Lords of the Admiralty, vice Sir J. W. Tarleton, K.C.B., entered the navy in 1837, and was lieutenant of the Cleopatra, 26, at the Cape of Good Hope from June, 1844, to March, 1847; and was flag-lieutenant in the Asia, 84, in the Pacific from September, 1847, until advanced to commander, February, 8, 1850. He continued in the Asia as her second captain until the spring of 1851; was posted December 18, 1852, commanded the Tribune, 31, on the East India and China station and in the Pacific from August, 1858, until the close of 1860; the Neptune, 86, in the Mediterranean, from February, 1861, to the close of 1862; the Edgar, 71, flag-ship with the Channel Squadron, from May, 1863, until October, 1865, and was commodore and commander-in-chief on the West Coast of Africa in the Bristol, 31, from October, 1865, until February, 1868. He obtained flag-rank January 1, 1869, and from the following June until December, 1870, was in command of the first Flying Squadron, with his flag in the Liverpool, 30. He was senior officer in command of the Channel Squadron, with his flag successively in Minotaur, 36, and Agincourt, 28, from September, 1871, until October, 1874.

The alterations in the Navy List this quarter are neither numerous nor important. Two vessels have during the past three months been paid off—the Basilisk, 5 guns, 400-horse power, from Australia, and the Cadmus, 17 guns, 480-horse power, from China. Two vessels have been commissioned:—The Daring, 4 guns, 120-horse power, for the Pacific; and the Egeria, 4 guns, 120-horse power, for China. Eight vessels are under orders for home:—The Avon, 4 guns, 120-horse power, from China; the Boxer, 4 guns, 120-horse power, from the Pacific; the Cameleon, 7 guns, 200-horse power, from the Pacific; the Elk, 4 guns, 120-horse power, from China; the Fawn, 5 guns, 100-horse power, from the Pacific; the Iron Duke, 14 guns, 800-horse power, from China; the Reindeer, 7 guns, 200-horse power, from the Pacific; and the Scout, 17 guns, 400-horse power, from the Pacific. It will thus be seen that no less than five vessels are now under orders for home from the Pacific, and three from China.

The undermentioned vessels are under orders to return home from their respective stations to be paid off and put out of commission:—Avon, 4, double screw composite gun-vessel, Commander A. T. Powlett, from China; Boxer, 4, double screw composite gun-vessel, Lieut. Commanding William Collins, from the Pacific; Chameleon, 7, steam sloop, Commander A. J. Kennedy, from the same station; Elk, 4, double screw composite gun-vessel, Commander Robert H. Harris, from China; Fawn, 5, screw sloop, Commander J. A. Wetherall, from the Pacific; Iron Duke, 14, double screw iron armour-plated ship, the flag-ship of Rear-Admiral Sir C. F. A. Shadwell, K.C.B., Capt. William Arthur, from China; Reindeer, 7, steam sloop, Commander C. V. Anson, and the Scout, 17, screw corvette, Capt. R. P. Cator, both from the Pacific.

The first two of the 38-ton guns issued to the Royal Navy for service have been shipped at the Royal Arsenal, Woolwich, on board the War Department steamship Lord Panmure, for conveyance to Portsmouth, whence they will be transferred to Her Majesty's armour-plated turret-ship Thunderer, now fitting out at that port. It being considered unwise, if not unsafe, to trust the ordinary cranes to lift such enormous weights, the guns were taken down to the east wharf of the Royal Arsenal, and successfully lifted into the vessel's hold by the great shears without difficulty, and they are now stowed side by side, fore and aft, occupying nearly the entire length of the main hold.

The powerful iron armour-plated ship Kaiser, built for the German Government by Messrs. Samuda, Brothers, on the Thames, has arrived at Chatham Dockyard, and has been taken into the great repairing basin, where her bottom will be recleaned and some other work done to her. Captain Hassenstein, in command of the frigate, and a number of other officers, have joined her at Chatham, and the Admiralty have directed that every facility is to be afforded them in entering and leaving the yard.

The Admiralty have ordered that a smoke cap, by means of which a man may breathe when working in dense smoke or poisonous vapours, shall be added to the carpenter's establishment of every ship in the Royal Navy above a corvette, while two are to be supplied to every dockyard and naval depot at home and abroad, except the depots where coal only is stored. The smoke cap is to be kept ready for use at a moment's notice.

A circular has been sent out from Whitehall, addressed to the mayors of boroughs and to the authorities of the county police, calling attention to an apparent supineness on the part of the police in regard to the apprehension of deserters from the army and navy, of which the number continues to be considerable. The Home-office desires to urge the importance of the subject upon the police.

Captain Gough, R.N., who so highly distinguished himself at the siege of Sebastopol when attached to the Royal Naval Brigade, and who for some years has been at the head of the Emigration Department in Londonderry, has, in part recognition of his services, been removed to Liverpool, where he will succeed Captain Mackenzie, R.N., who has been appointed to the office held by the late Admiral Schomberg at Milford Haven.

The Teazer, double-screw composite gun-vessel, 584 tons, 489-horse power, which a few months since returned from the China station, and which now forms one of the ships of the Medway Steam Reserve at Chatham Dockyard, has been ordered to be brought forward for commission with all despatch. The Teazer will probably rejoin the China squadron.

The Brazilian ironclad Independenzia has arrived at Woolwich from Millwall, and will be moored off the Royal Arsenal until there is a tide suitable for docking her in Woolwich Dockyard, which will probably be to-day or to-morrow. She will remain in the hands of the builders, Messrs. Dudgeon and Son, until her completion.

George Madin, formerly sergeant in the 33rd Foot, who served in the actions of Quatre Bras and Waterloo, has just died at Nottingham, at the advanced age of eighty-four years. The deceased was one of the soldiers who were discharged when the army was reduced, and, as he had not completed his term, no pension was granted him.

The authorities are building two more blocks of model lodgings for soldiers at Woolwich, representing twenty houses. Each house will contain two rooms, and each room will be occupied by one family. The size of the rooms is about twelve feet by fifteen feet, and there are various conveniences attacehd to the blocks.

It is announced that an official history of the Ashantee Campaign will be published. It is not yet finally determined to whom the task shall be confided, but it will probably be entrusted to two well-known officers who distinguished themselves in the war.

Major T. H. Pitt, R.A., has been selected to fill the appointment of one of the garrison instructors at Dublin. He served in the Crimean campaign from June, 1855, including the siege and fall of Sebastopol (medal with clasp, and Turkish medal).

The demise of Colonel Milward, C.B., creates a vacancy among the Queen's Aides-de-Camp, besides leaving open the post of Superintendent of the Royal Laboratory, Woolwich.

The King of Portugal has paid a visit to the Channel squadron. The ships were dressed and the yards manned, and his Majesty was received with a Royal salute.

The Nymphe, 9, screw sloop, 1,574 tons, 2,172-horse power, Capt. F. J. Suttie, has been commissioned at Sheerness for the Australian station.

Miscellaneous.

CHINA AND JAPAN.

A letter in the *Bund*, of Berlin, says that although the difficulty between China and Japan is settled, the Chinese Government still continues its armaments; it never had any serious intention of making war on Japan, and its military preparations evidently had an entirely different object. Europeans are still regarded in China with unmitigated hostility, and if the Government were to forbid them access to the country it would at once become immensely popular with all classes of its subjects. The Chinese who are well disposed towards foreigners, though they have considerable influence at Court, are in a small minority, and would be quite incapable of restraining the popular passions if once they were let loose. The Emperor now proposes to contract a loan, and it is remarkable that he has had recourse to the foreign Consuls with the object of raising the money in Europe. It is said that the negotiations are advancing favourably, and that some English and French banking-houses have expressed their readiness to undertake the loan. What security is to be offered to them does not appear, but the correspondent of the *Bund* thinks it certain that the greater part of the amount will be applied to warlike purposes. The fleet especially is to be enlarged and improved. The Emperor has issued orders for the construction of ten new ironclads, but the Chinese treasury is at present incapable of providing the necessary funds for this purpose. Cannon and other war material have been ordered of the firm of Krupp, in Essen. A German vessel, the *Essen*, has arrived at Shanghai with a number of cast-steel guns, mitrailleuses, and arms for the infantry. The correspondent adds that the Japanese Government is also making great efforts to improve its armaments, which are even inferior to those of China. Five thousand Martini rifles have been ordered of a house at Birmingham, which supplies the Mikado with war material as the firm of Krupp does the Emperor of China.

CHINESE BIRDS IN THE ZOOLOGICAL GARDENS.

In the course of an interesting article in the *Daily News* of January 6th, entitled "A Winter Visit to the Zoological Gardens," Mr. Frank Buckland, the well-known naturalist, observes:—

As regards the birds the losses have been few, if any. Sportsmen will be interested to know which birds are hardy and which are not. The beautiful Crossoptilon from Northern China, the pheasant who wears lovely whiskers each side of his eyes, does not mind the cold at all, coming from a naturally cold climate. This bird is very tame, and promised some time ago to become a farm-yard bird: but having bred to the third generation they generally die off. Mr. Bartlett thinks the reason of this is, in their native home they migrate and change food at different times of the year. Lady Amherst's pheasants also do well, being hardy. They come from Northern China. This bird crosses freely with the gold pheasant, producing a bird of amazing beauty:

Digitized by Google

and, unlike hybrids or mules, the offspring are as fertile as their parents. By this beautiful cross, therefore, a new race of the most beautiful pheasants in the world has been produced. There is a very beautiful and interesting bird, in excellent health—it is Stanley's jungle fowl; its home is Ceylon. These birds are worth £50 per pair. A collector, who did not know the value of them, procured seven of them alive at Trincomalee; not knowing the value he had them cooked for dinner—rather an expensive feed, three and a half pairs of fowls at the price of £175. One would have supposed that this bird coming from Ceylon would require heat, but they belong to the mountains, which are cold and damp. There are only three species of white storks known in the world—the European, the Japanese, and the South American. These are all represented in the Gardens. The Japanese stork is of a white colour, while the other two have got dirty with the London smoke.

BURNING OF THE STEAMER "JAPAN."—The following particulars of this disaster are taken from the *New York Tribune*:—The crew was made up of Chinese, Americans, and Europeans. There were eight cabin passengers, five of whom were bound for Yokohama, Japan, and the other three for Hong Kong, China. The latter three persons were named F. W. Crocker, P. M. Tindell, and Mary Slott. There were 442 steerage passengers, of whom 424 were Chinese. The *Japan* cleared from San Francisco with 973 tons of freight, the greater part being flour, but it is not yet known how large a part of this cargo may have been discharged at Yokohama. All the steerage passengers, it is known, had taken passage for Hong Kong. In addition to passengers and freight the *Japan* took out $350,000 in treasure, and the United States mails for Japan and Eastern Asia. Yokohama was reached in safety December 10, after a run of twenty-five days across the Pacific, and the five passengers referred to above, together with a large amount of freight, were discharged at this port. Despatches received by the company in this city announced all on board as well, and the vessel in good order. After the usual delay at Yokohama, the *Japan* set out for Hong Kong, six days' sail to the south-west. A part of the route is by the inland Sea of Japan, but the last four days of the voyage are through the more dangerous waters of the Chinese coast. In the trip the Chinese coast is generally made some distance to the north of Hong Kong, the rest of the course being laid close to the coast. At the time of the disaster the vessel had passed Swatow, and was not far from 140 miles from Hong Kong. The *Japan* was a three-masted barque-rigged vessel, built by William H. H. Webb, at Greenpoint, L.I., and was 362 feet in length, 50 feet in width, 31 feet in depth, and 20 feet in draught. Her frame was built of white oak, with galvanised iron fastenings, and iron strapped on the frames; pattern old style; her engines being constructed with a walking beam. The steamer was technically three-decked, and had a tonnage, full measurement, of 4,352 tons, of which 1,450 tons were used up by coal bunkers, and 2,100 devoted to freight. The cabin accommodated 150 passengers, and 1,200 steerage passengers could be stowed between decks, though she never carried this number. She was rated as A 1½, but was very slow, not making more than six or eight knots an hour. She was worth at the time of her loss about $150,000, for which amount she is insured in English and French companies. She was one of five ships built by the company in 1867, at an aggregate cost of $6,000,000, to ply on the China and Japan branch of the service. Only two of these steamers are now running. These are the *Great Republic* and the *China*.

CAPTAIN GIACOMO MERELLO, of the Genoa Rubattino Company, has published a pamphlet in which he expounds at length the details of a new route from Bombay to Aden during the south-west monsoon months. Instead of following the course to the south, laid down in Taylor's chart of the Arabian Sea, Merello turned his vessel's head northward, and by tacking got within 100 miles of the Arabian Coast, from whence he made direct for Aden, and arrived thither in ten days' time. This he claims as a great discovery, inasmuch as it is only forty-five miles longer than the direct line, whereas the southern route is 485 miles longer. But as a matter of fact, the route adverted to has been known and often followed during the last fifteen years by the Peninsular and Oriental Company's steamers. It is not invariably adhered to, however, as the greater force of the monsoon in those more northern latitudes means a larger consumption of coal, more wear and tear to the vessel, and slower progress. Were these points more fully considered in Captain Merello's pamphlet, the advantages of his route would not appear so striking.

YOUNG JAPAN IN AMERICA.—A Japanese boy, about twelve years old, turned up a few weeks ago at a Milwaukee police station. His history, when it came out, showed that he had been at one time in the employ of the Rev. Mr. Newman, of Waukesha, who was a missionary to Japan, and who lately returned home. The Japanese boy became so much attached to his master that he secreted himself on the steamer which brought the missionary to America, and, finally discovering himself, was taken under Mr. Newman's charge. A short residence in the United States suited the young Jap., and when his patron proposed to return to his missionary field the boy, in order to study more thoroughly American institutions, concluded to run away. Hence it came that the youth finally brought up in Milwaukee, and subsequently in a police station. He is a resolute, manly little fellow, and full of hope, though not speaking English "belly wellee." His name is Catt, and it is safe to say that, whatever may happen to him, he is tolerably certain to fall on his feet.

MARINE DISASTERS.—To the Editor of the *London and China Telegraph*. Sir,—I have read with much interest the article in your last issue, headed "Marine Disasters, &c., in 1874," and especially that portion with more immediate reference to the trade with the Far East. You must have inadvertently fallen into an error by not having included the *Antenor* and *Agamemnon* in your list of serious accidents—having some ships in the same not worse off than they were, and others having had much less serious accidents. I might not have noticed the omissions had you not mentioned the immunity from any serious accidents to the Ocean Steamship Company, which, although better off than some of their neighbours, has not been so free from accidents as put forth by you.—Yours faithfully, A CONSTANT READER.

PACIFIC MAIL COMPANY.

The Committee on Ways and Means will soon transfer the Pacific Mail investigation to New York, where material and evidence will be more accessible for the examination of some of the allegations. The books of the Pacific Mail Company will receive particular attention, and New York witnesses will be heard with less expense and delay than if the committee remained here. Irwin was not able to-day, so his physicians say, to be taken before the House. It is now somewhat doubtful if a quorum will be in the city to-morrow, as leave of absence has been to-day granted fifty members, and many left without leave last night. In case he cannot be brought before the House, he will not, of course, have to answer till the 5th of next month. It makes comparatively little difference, so far as the purposes of the investigation are concerned, what course is now taken with Irwin, as he has told the committee all he will. He is already making his arrangements to live under duress the remainder of the session. The committee must look to other witnesses for further developments, and there is no want of names of persons to subpœna. The Pacific Mail people have pretty much given up the hope of the continuance of the subsidy, though they would probably not make such an admission publicly.

DEC. 23.—Irwin was not well enough to-day to be taken before the bar of the House. The adjournment of Congress, therefore, leaves him in the custody of the Serjeant-at-Arms, who will be responsible for his safe-keeping. He will remain at his hotel under guard, as he has been ever since he came here, although there is probably not the slightest intention on his part to escape. The committee will pursue the investigation to the furthest limit. There seems to be considerable doubt of the committee gaining any advantage by going to New York.

A meeting of the full committee was called to-day to hear the testimony of Mr. Parsons, but he was absent, by reason of the death of a relative. His friends represent him as anxious to testify, and say he will swear he had only $2,000 or $3,000, which he received from Stockwell for usual proper legal services.

The Ways and Means Committee this morning adopted the following order:—

Ordered,—That a sub-committee consisting of Mr. Burchard, Chairman, and Messrs. Kasson, Beck, Niblack, Wood, and Dawes, and such other members of the committee as may be able to attend, are hereby authorised to proceed to New York City to take testimony in the matter of the Pacific Mail Steamship Company's subsidy, under the resolution of the House of Representatives, in the following words:—

Resolved,—That the Committee of Ways and Means, in prosecuting the pending investigation into the expenditure of money in procuring the passage of the subsidy for the Pacific Mail Steamship Company, may hold sessions either by full committee or by sub-committee in the city of New York, with the same powers as those now exercised by the committee in such investigation in the city of Washington.

The following is the concluding portion of the testimony before the committee on ways and means of James D. Smith, a director of the Pacific Mail Steamship Company, at the time the subsidy question was pending before Congress, extracted from the official report:—

By Mr. Kasson—After the subsidy measure passed was there no communication made to the executive committee or board of expenses by the agency at Washington? *A.* There never was any.

Q. By Mr. Stockwell—Or any one else? *A.* Never, sir. It never was mentioned to the board at all, and I did not hear of it until a good many months afterwards.

Q. You never heard of any voucher among the papers presented to any officer of the company, touching the agency disbursements connected with Washington? *A.* I never did, sir.

Q. By Mr. Kelley—When was your attention first called to this subject of the alleged expenditure for the procurement of the subsidy? *A.* I cannot state the exact time, but it was months after we were discussing with some of the largest stockholders what we should better do with it, and the first I ever knew of the matter I heard of it publicly on the street, that there had been a large amount expended, and I went to look into it, and it became a question before the board that somebody should look into it and see who was accountable for it. I forget the exact date, but the resolution would show.

Q. State the question that arose among you. *A.* Well, it came out upon the street that Mr. Stockwell had spent very large amounts of the company's money in some way in obtaining the subsidy, but the date I can't now recollect.

Q. About what date? *A.* About eight or nine months, I think,—a good while afterwards, any way.

Q. Well, what was the question that arose among you? Was it as to how the money had been expended, or what? *A.* I think that the first shape it took was to refer the facts to the counsel of the company to see what we should do to hold whoever had spent the money to a legal account, so that we should proceed in a regular, orderly, and legitimate manner.

Q. Then the sum total claimed to have been expended in that way was a surprise to the board of directors? *A.* Utterly and entirely so to every man of them. I have talked to every man of them, and there was not one of them that ever dreamed of it.

CEYLON.

(DAILY TELEGRAPH.)

There are two points in the next year's official programme of Mr. Gregory which have especially led us to notice his address to the Council, because they illustrate that great branch of good government—forethought for the future. In his rapid visits of inspection during the time when famine was anticipated his Excellency witnessed for himself those vast regions of the island which have fallen out of cultivation and become void of people, because the mighty works of the old Buddhist Sovereigns have been so neglected. The ancient Monarchs of Kandy were "every inch" Kings, so far as irrigation was concerned. They knew that their subjects depended upon paddy, that paddy depended upon water, and that water depended upon bunds and tanks; they accordingly dug tanks and built bunds, which in the heyday of Cingalese prosperity must have been monuments worthy to compare with anything that the Romans ever constructed. Even the ruins of their noble labours are still stupendous, and when they were perfect, the rains, augmented by the abundant forests, were preserved in scores of such artificial lakes, thence to be distributed during the dry season, so that whole districts were kept green and fruitful. In those days the population became immense, and produced so much foodstuffs that Southern India was largely fed from Manaar and Trincomalee; nor can it be doubted that, with the restoration of some only of the principal tanks, Ceylon will not merely cease to import paddy from Bengal, but once again export rice and similar crops. To this important duty Mr. Gregory is earnestly devoting himself. He has, however, done better than reconstruct some of the grand old waterworks—he has got the Cingalese to understand and help him. By avoiding the blunder too often perpetrated in India of coupling the new irrigation scheme with a fresh tax, his Excellency has induced the villages to work with him, and we read already of thirty-seven ancient tanks thus cleaned and repaired. If the system goes on as well as it begins, Mr. Gregory calculates that he will have from 120 to 150 tanks set in order per annum, thirty or forty of which can be provided with sluices by the Government; and at this rate the fields so long dry will soon be once more watered. The pearls fished up upon Aripo bank are not so valuable in India and Ceylon as those natural diamonds of the rain and dew drops which for all these many years have been suffered to run to waste. It is true that to build the Royal Waterworks anew is not the same thing as repeopling the deserted land and recultivating the barren fields and forests. But population will certainly come where water runs. Southern India and Bengal are overcharged with people, who will flock into the island as the rice-growth once more extends; and, indeed, already the influx of Malabar and Madras coolies is only limited by the supply of paddy in the colony. Huts and villages grow out of Eastern soil as if magic seed had been sown there wherever a new supply of water is afforded; the population will be forthcoming as soon as the irrigation is ready.

But there is another thing to restore before we can hope to bring Ceylon back to her old glories of fertility. Mr. Gregory has found this out too. He has seen how shamefully the natives and the planters together have abused the free forest rights and timber licences which had been too long granted; and by a stern and timely ukase, he has put a stop to this wanton destruction of the Cingalese woodlands. The address says: "It is an unpleasant statement to make, but the truth must be told, that Ceylon is almost denuded of its most valuable timber in all accessible places, and that but little is left elsewhere. It is now the unanimous view of the Government Agents and of the Foresters that no more licences to fell in the reserved forests should be given. The Government coincide in this opinion, and no felling licences will be issued for the future in such forests. The Forester will supervise the cutting of the timber he is likely to dispose of, and will have it removed to depots where it will be sold in open market at upset prices. No replanting of the reserved forests will be attempted; it would be impossible to undertake such a gigantic work, except at an enormons expense, and with every probability of failure. Nature must be left to repair the ravages of man, and it will be the duty of the Forester each year to go over a certain fresh tract of reserved forest, and clear all valuable saplings within it from the pressure of the adjacent jungle. Once above the low thick scrub, they will be able to take care of themselves, and in half a century the island will come into the inheritance of large tracts stocked with valuable timber." This sagacious step has saved the island, we believe; for not only timber supply, but climate, health, and agriculture had been sacrificed to the insane extirpation of timber trees. It has long been the custom, under a suicidal system known as *chena*, to burn off whole tracts of excellent young and old trees, in order to obtain a single year's crop upon the ashes. After this was reaped, low scrub and rank jungle took the place of the timber, breeding malaria, obstructing ventilation, and diminishing the rainfall. The waste of natural wealth in this way was vast, but the damage done to the island by "rushing" *chena* crops has been too great to measure. It was, in truth, the goose and the golden eggs over again on a scale of universal lunacy and avarice; but though previous rulers saw the magnitude of the evil, Mr. Gregory has been the first to stop it abruptly. Only let this most sensible law be well enforced, and in less than the fifty years named in his address, Ceylon will get back the splendid forest trees of which neglect and cupidity have robbed her, and, with the shade and drainage which they impart, she will further gain back her population and her rich spreading crops, with that climate which used to make her wooded uplands the theme of joyous hymns. Further, Mr. Gregory is planting the teak tree in the fair island, and encouraging tea, cocoa, cardamoms, black pepper, and vanilla, besides the cinnamon, chinchona, and coffee already so successful. This, to our minds, is the way in which a tropical colony should be managed, and there is, indeed, many a disforested land near and far which might usefully take a leaf from Mr. Gregory's book. In Ceylon, where the powers of nature are so quick, the good result of the forest law will soon be witnessed, and all the pearls of Ormuz added to those of Aripo would not prove half so profitable as this one piece of sagacity added to beneficence.

THE SURPLUS CHINESE FUND.

(NEW YORK TIMES.)

There is one omission in the President's Message—now nearly forgotten—which is rather remarkable, and to which we hesitate to call attention, lest in the possible improvidence (to use a mild word) of the next three months there may be, in technical phrase, "dilapidation." The Message refers to Oriental matters twice. In our judgment the President generalises too much when he affirms that all the Chinese male immigrants to this country are coolies, and all the women prostitutes; but we shall not quarrel with him on this head, happily remote from us in every relation. He refers quite in detail to the Japanese indemnity, and evidently favours the honest policy of restoration; but not a word as to the surplus Chinese fund, which has been accumulating in the hands of successive Secretaries of State for the last fourteen years. Its story is not a new one, and has this interest, that the duty we deduce from the facts of the case is precisely the reverse of that we urge as to Japan. The Shanghai Convention of 1858 provided for the liquidation of all claims of citizens of the United States, and the Chinese agreed to pay, by the issue of debentures, receivable for duties on imports, the sum of five hundred thousand taels, equivalent to seven hundred and fifty thousand dollars. The American Minister estimated the claims at a larger figure, but proposed in the event of there remaining a balance after the adjudication of the claims to refund it. To this the Chinese peremptorily objected. They wished to make a clean thing of it, to reduce the amount to as low a figure as possible and to have no future reclamations of any sort. The amount was finally determined at seven hundred and fifty thousand dollars, the American negotiator taking no little risk, the nominal amount of his countrymen's claims exceeding a million. The debentures were issued and realised, and it is noteworthy that this created no charge on the Imperial Treasury, but was chargeable on the custom-houses where duties on American and other foreign imposts were collected. A commission of American citizens adjudicated the claims and ascertained the amount to be less than four hundred thousand dollars, leaving a balance in hand of rather over three hundred thousand dollars. For a long time this amount was retained in China, on perfect security, paying a high rate of interest. In one of his many freaks Mr. Seward ordered it to be remitted to this country. It is now invested in Government loans in the name of the Secretary of State, and with its accumulation amounts to a very large sum—not far, we should imagine, from seven hundred thousand dollars. It is not in the Treasury, though why it has not been transferred there it is not easy to say. It is clearly and equitably our property. If the adjudicated claims had exceeded the amount paid the loss would have been ours. There have been from time to time feeble suggestions as to what should be done with this surplus. One of Mr. Sumner's crotchets was (buried, we sincerely trust, in his grave) to return it to the Chinese. This would do no good; nor would the Chinese, in their intense and characteristic distrust, touch a penny of it. Another is to use it as the endowment of a missionary (Protestant, of course,) college at Peking—than which a huger and more fruitless job, a job, too, at the antipodes—cannot well be imagined. A far more reasonable plan is to apply it to commercial purposes—as it was from trade the fund was created—lighthouses and lightboats, of which there is, or recently was, but one from Hong Kong to Asiatic Russia. Our inclination is to take the simple course of turning it over into the Treasury, first taking care that all honest mercantile claims anterior to the treaty should be liquidated in full. The fewer of these outside trust funds there are the better.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, JAN. 5.

Although the German Parliament is still making holiday, but will meet for the despatch of business in a few days, lively negotiations have been going on all the time between the Parliamentary Committee and the Bundesrath on the subject of the conversion of the Bank of Prussia into a National German Bank, and as the Government are now fully convinced that public feeling is very decidedly in favour of the measure, and that it is most desirable to settle the question with as little delay as possible, concessions have been made on both sides to come to an amicable understanding, and pass the Bill during the short remainder of the Session, which is not expected to last more than a fortnight longer, after which the Prussian Chambers will meet, as their consent to any alteration in the constitution of the Bank of Prussia—which is partly a State institution and its affairs administered by officials appointed by the Prussian Government—is absolutely required by law. As the case now stands, it is proposed to reorganise the Bank as a private institution, and the capital—120 millions of reichsmarks, just double what it has hitherto been—to be raised in shares subscribed for by private capitalists, but to be managed as heretofore by Government employés. There appears, however, to be an important item in the arrangement still to be settled, as the Committee of Twenty-one require the appointment of a Board of Control to be nominated by the shareholders, with a consultative voice in fixing the rate of interest and other matters affecting the prosperity of the country, of which, from their practical knowledge of financial and commercial concerns, they are better able to give a practical and decisive opinion than mere bureaucrats, however gifted and experienced they may be.

After much delay and many difficulties that had to be encountered and surmounted, chiefly from the inexperience of the 120 workmen employed, our new Mint of Hamburg is now in working order, and commenced operations before Christmas by striking off a number of gold ten-mark pieces, which are annually required at this season of the

Digitized by Google

year by bankers, merchants, and other principals as presents to their clerks, book-keepers and others in their employ. The coins show very creditable workmanship; and are strictly in accordance with the new Currency Act, so that they will pass all over Germany at their full nominal value. On the obverse side is the Hamburg coat of arms—the castle with three towers in a shield supported by two rampant lions—and on the reverse the same legend as the coins made at the other German mints. The Mint mark is the letter I.

The new coinage came into general use on New Year's Day all over Germany, with the exception of Bavaria and Wurtemberg, which States have elected to postpone the innovation for a year longer, and this is much to be deplored, as it tends to mislead foreigners and induce them incorrectly to believe that the unity of Germany is, after all, not so perfect as it pretends to be. Great confusion and misunderstandings follow as a natural consequence, and the price of everything has risen in consequence. In all cases where the Governments have the right of control, they have altered their tariff of charges in accordance with stipulations of the law; but amongst the public generally great battles are fought daily between buyers and sellers, and, I need scarcely add, are always decided in favour of the latter. The tramway and the omnibus companies here, which last year carried more than six millions of passengers, have taken advantage of the absence of Government control to raise their fares fifteen to twenty per cent. Public-houses, shopkeepers, and refreshment rooms charge now still higher prices for their commodities, and there is a general cry out, and the people believe they are imposed on. But all this is very natural, and was to be expected. By-and-by things will all find their level.

At the special general meeting of the shareholders of the Anglo-Deutsche Bank of Hamburg the questions at issue were disposed of very quietly and in a satisfactory manner by a compromise involving concessions on both sides. The report of the directors was much more favourable than was expected. Having been printed and distributed a month ago, and being a very lengthy document—I gave your readers a summary of its contents in a former letter—the report was taken as read. In the absence of the Chairman of the Court of Administration, Senator Eiffe, from illness, the meeting was presided over by Herr Nissen, whilst Dr. Max Cohen (one of the directors) gave some explanation of the present state of the affairs of the bank, from which it appears that the paper-mills in Holstein and the great brewery at Wiesbaden are now able to stand on their own legs, and require no further support from their parent bank. The prospects for the future success of the coal-mines in Hungary have greatly improved; but to complete the improvement it will be needful to make a short line of railway to connect the works with the Hungarian State Railways, and this is now being done. The bank has now wound up its connection with the other contractors for the Egyptian loan, and is now interested in that business only to the extent of 100,000 thalers. The sale of the building plots of land at Berlin has already commenced, and favourable results were obtained; it will be continued from time to time as opportunity offers, without attempting to force sales. As the directors and the shareholders can have but one and the same interest in promoting the prosperity of the Bank, the learned doctor hoped that all internal dissensions would be laid aside and avoided for the future, and the meeting would show the public by their unanimous vote in favour of the motions proposed by the Board, that they had broken with the past, and would work together in harmony for the credit of the Bank and promotion of their mutual interests, (Applause.) The chief points of the motion were: 1, to pass the accounts for 1873 and relieve the directors of their responsibility; 2, to reduce the company's capital from 10,000,000 thalers (with 80 per cent. paid up) to sixteen million reichsmarks, and for this purpose to authorise the directors at the expiration of the period allowed by Art. 245 and 248 of the German Commercial Code, to exchange two of the present interim receipts of the first issue of 100 thalers per paid up share for one new share of 400 reichsmarks, and ten provisional shares of the second issue (with 60 per cent. paid up) for three new shares of 400 marks each; and 3, property of the value of 16,000,000 marks to be selected by the board out of the assets of the Bank and reserved as the effective capital of the institution, and 800,000 marks, selected in the same manner, to be returned in cash to the shareholders, at the rate of twenty marks per share, on their application for the new shares; the remaining surplus to be added to the clear profits of the present year and swell the dividend that may then be declared. After a short debate a division ensued, when the motions were all passed, nearly unanimously—the first by 7,287 to 67 votes, and the second and third by 7,361 to 30 votes. The value of the shares has risen since the meeting; previously they were quoted at 44 per cent. for the first issue and 66 per cent. for the second emission, the present quotations being 47 per cent. and 68 per cent. respectively.

The Telegraphic department of the "Borsenhalle" gives notice of the receipt of a telegram dated Singapore, December 29, addressed "Caesar, Hamburg," and invites the person it is intended for to call at their office and claim it.

We learn from Copenhagen that on New Year's Day, simultaneously with the introduction of the new Danish currency, a general reduction of twenty per cent. in the charge for telegrams has taken place.

COMMERCIAL AND SHIPPING.

The only arrival from the Far East is the Hamburg Company's steamer Olympia, which has brought a full cargo of Teas from Foochow and Shanghai, with a few trifles from Singapore. Though the frost has been severe for the last fortnight the navigation of the Elbe has not been actually interrupted, steamers having arrived and left every day, thanks in a great measure to the steam ice-breaker, which performs its duty and keeps the fairwater clear of ice with the greatest facility. For the last two days we have here a dead thaw.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.

AMSTERDAM, JAN. 6.

The storm of indignation caused by the appointment of Mr. Van Lansberge as Governor-General of our East India colonies has for the moment abated. Professor Vreede continues to attack the Ministry, and is doing all he can to induce the King to annul the appointment and to give the vacant seat at Buitenzorg to Mr. Keuchenius, an idea which finds little favour amongst the Liberals, who prefer even the Catholic *diplomate* to the anti-revolutionary lawyer. The dismissal of Mr. Loudon has had already a most important consequence, that is if the rumour is correct which states that General Verspyck would cease to object to his being appointed Commander-in-Chief of the army in our East India colonies, and that the appointment will be gazetted shortly. It seems that the Cabinet has arrived at the conviction that it has become necessary to operate against the Atchinese with more energy than has hitherto been displayed. The English residents in the Straits Settlements have complained much of the losses they have sustained by the fact that the coasts of Atchin are blockaded. Till now the English Cabinet had not taken much notice of these murmurings, but notice has at last been given that things cannot be allowed to remain as they are. Though I cannot guarantee its truth, I have reason to believe that the report is well-founded. I need not add that General Verspyck will adopt quite a different policy to that of General Van Swieten, and he will give the Atchinese "hard nuts to crack." In fact, he is just the man to continue our policy of "blood and iron" in that part of the East Indian Archipelago. You will remember that this same General declined to accept the command while Mr. Loudon remained Governor-General. As I stated in my last letter, Mr. Van Lansberge will start by the steamer *Voorwaarts* about the 15th of February. Lieutenant-colonel C. M. J. W. Rynen has been appointed his adjutant. We are, of course, anxiously waiting for the re-assembling of the First Chamber, the Minister of the Colonial Department having stated in his reply to the section report—which in general was very friendly towards the Cabinet—that he is ready to furnish all information with reference to the dismissal of Mr. Loudon.

I regret to state that our eminent author, Mr. Potgieter, is very seriously ill from bronchitis. It is feared that the result will be fatal.

Mgr. J. Heykamp, who was elected Archbishop of our Old Catholics, has not yet decided whether he will accept the appointment.

Mr. Heemskerk, our Premier, has made a *fiasco* by declining to grant a few feet of States territory in the Hague, which was asked for in order to erect a monument to commemorate our illustrious statesman, Mr. Thorbecke. In several towns of our northern provinces meetings have been held to protest against the Minister's decision, and addresses will be forwarded to the King requesting his Majesty to annul the same. The small town of Zwolle, the birth-place of Mr. Thorbecke, claims the honour of erecting the statue there.

The action of the Ministry in sending subaltern officers over the country to enrol volunteers for our East India army is severely criticised by the Liberal papers. It is a scandal, the *Arnhemsche Courant* says, and the want of soldiers must be very great to justify such an extreme measure. During the year 1874 there were despatched from Harderwyk to Java 1,818 subaltern officers and soldiers. Amongst them were 1,165 Dutchmen, 137 Germans, 251 Swiss, 177 Belgians, 76 Frenchmen, &c. In a few days a detachment of marines will leave Nieuwe Diep for Java.

Statistics have been published about the voyages of the several steamers plying between Holland and Java during the year 1874. Forty-eight steamers left our harbours, and fifty-eight left Java for Holland.

The King has declined to accept the silver *cadeau* which the Dutch children intended to offer him, in commemoration of the 12th of May, 1874. He is quite content with the model in plaster, and proposes to the committee to add the sum in cash to the fund for invalids.

In the course of this month General Van Swieten will be presented with a gold cup, which is something more substantial after the many addresses which have been forwarded to him, and to which the poor General has had the trouble to answer.

The Rev. E. C. Segers of Leyden has accepted the appointment of Director of the Seminary in the neighbourhood of Batavia.

On the 28th of December the inauguration of the monument on the grave of the late Mr. P. H. B. Motké took place at Thorn.

I regret to record the death of the ex-Minister of the Naval Department, Mr. A. J. de Smit van den Broecke; he died on the first of January.

The old fortress of Grave, on the frontiers of Germany, is shortly to be dismantled.

In our commercial circles the usual dulness attendant upon this period of the year prevails. The traders are occupied with making up their balances. At the Bourse the Spanish *coup d'état* caused much business and enormous transactions in Spanish Bonds at rapidly advancing prices. Perhaps the investors are of opinion that the youthful King knows how to pacify his kingdom, and how to make payments out of an empty treasury. From official statistics I perceive that in the course of last year the prices of the shares of the East India Trading Bank went up 11 per cent., those of the Steamship Company Nederland 25 per cent.: and those of the Dutch India Railway Company 20 per cent. The prices of dividends of the Trading Company went down to f.22. The project to establish here a Dutch American Bank with a capital of 10 millions has not been successful.

SHIPPING.

ARRIVALS.—Jan. 1, at Texel, from Batavia, Java (str.); 2, at Texel, from Batavia, Johannes.

Monetary and Commercial.

Tenders for £550,000 in bills on India were received on the 6th inst. at the Bank of England. The amounts allotted were—To Calcutta, £364,200; to Bombay, £171,200; to Madras, £14,600; all at an average rate of 1s. 10⅛d. Tenders on all Presidencies at 1s. 10⅛d. will receive about 8 per cent. These results show an improved demand for means of remittance to the East.

The Manchester market has been opened after the holidays with a steadier tone, and though in neither goods nor yarns have offers been put forward to more than a very moderate extent, the diminished receipts of cotton and more activity in Liverpool have imparted a firmer feeling, and without any marked improvement in the demand prices have ruled slightly against buyers.

The applications for the Chinese Government Eight per Cent. Loan—at the London office of the Hong Kong and Shanghai Bank from their constituents—we believe are in excess of the amount which is likely to be allotted to English holders. The Loan has not been publicly announced for subscription, and it is uncertain if it will be introduced on the London Stock Exchange.

The tenders for the New South Wales Government Loan for £1,000,000 were opened on the 5th inst. at the Bank of New South Wales. The amount tendered for at and above the minimum price was £565,800, leaving a balance of £434,200, which has since been applied for. The tenders for £600,000 South Australian Government Securities Four per Cent. Bonds were opened on the 6th inst. at the National Bank of Australasia. The amount applied for at and above the minimum was £38,800. It was announced that the balance will be kept open for application until the 15th inst., at the minimum price of 90, unless previously disposed of.

The Union Bank of London, at the half-yearly meeting to be held on the 13th inst., will declare a dividend at the usual rate of 15 per cent. per annum, carrying forward a balance of £32,000 for appropriation at the end of the financial year in July next. At the corresponding period of 1874 a dividend at the same rate and a bonus of 2½ per cent. were notified, and £20,851 was carried forward.

The directors of the London and Westminster Bank have resolved to declare, at the annual meeting, a dividend of 11 per cent. for the half-year ended the 31st of December, making 21 per cent. for the year on the paid-up capital of £2,000,000. The rest or surplus fund will then amount to about £1,014,000. At the corresponding period of last year a dividend of 12 per cent. was announced, and £20,000 carried forward.

At the ensuing general meeting of the Alliance Bank (Limited) the directors will recommend a dividend for the half-year at the rate of £8 per cent. per annum, and an addition of £10,000 to the reserve fund, which will then stand at £180,000. The dividend at the corresponding period of last year was at the same rate, but £12,500 was added to the reserve fund and £11,000 carried forward.

The directors of the London Joint-Stock Bank have resolved to declare a dividend and bonus together amounting to £1 13s. per share, equivalent to 11 per cent. for the half-year ended 31st December, making, with 10 per cent. paid in July last, 21 per cent. for the year. Last year the dividend was 22½ per cent.

At the meeting of shareholders of the Imperial Bank, the directors will propose a dividend at the rate of 8 per cent. per annum, free of income-tax, and the transfer of £10,000 to the reserve fund. A dividend at the same rate was proposed for the corresponding period of last year, and £5,000 was carried to the reserve fund.

The directors of the Union Bank of Australia have resolved upon a dividend of £1 15s. per share and a bonus of 5s., being together at the rate of 16 per cent. per annum, against £1 15s. per share, or 7 per cent. for the half-year, at the corresponding period of last year.

The directors of the North and South Wales Bank have declared a dividend of 10s. and a bonus of 10s. per share.

The Bank of South Australia announce the payment of a dividend for the half-year, at the rate of 10 per cent. per annum, on the 15th instant.

The report of the Standard Discount Company (Limited) has been issued. Including £5,637 brought forward, the accounts show an available balance of £19,397, out of which it is proposed to declare a dividend at the rate of 12 per cent. per annum, free of income tax, for the six months ending December.

The directors of the Universal Marine Insurance Company (Limited), at their board meeting held on the 7th, agreed to recommend a dividend of 10 per cent. for the year 1874. The annual meeting will be held at the Cannon-street Hotel, on February 4th, at two P.M.

The directors of the Western and Brazilian Telegraph Company have declared an interim dividend of 5s. per share for the quarter ending Dec. 31, 1874.

The Great Northern Telegraph Company's traffic receipts, for the month of December, were for 1874, f.294,338; 1873, f.287,356. The total traffic receipts from 1st January to 31st December, were—1874, f.4,427,890; 1873, f.3,352,542. The traffic receipts of the Eastern Extension, Australasia, and China Telegraph Company (Limited), for the month of December last, amounted to £18,172, against £20,400 at the corresponding period of 1873; and the Eastern Telegraph Company's for the same period amounted to £31,725, against £35,238 in 1873.

In another column we notice an article from *The Times* on Manchester Wares; in addition to this we hear that Sam Mendel and other firms are effecting considerable alterations in their establishments, and curtailing their business with China and Japan

An elaborate table of statistics, giving the stocks, imports, and deliveries of silk from the year 1830 up to the present time, has been issued by Messrs. Durant and Co.

We hear that the Borneo Company have recived favourable reports on the specimens of Lingga coal supplied to the engineers of the P. and O. Company at Singapore. The engineers sent out are now exploring, and will shortly report results.

Telegrams have been received announcing the stoppage of the Ohno Banking Company in Japan, with liabilities of $1,000,000. This bank was well-known amongst foreigners, and it is feared losses will be sustained.

The Bar Silver by the West India steamer has been sold at 57¼d. per oz., but the rate has since advanced to 57½d. per oz., and the market is firm at that quotation. The Mexican Dollars by the West India steamer were sold at 56d. per oz., but the market has since become firmer, owing to an increased demand for China, and 56¼d. was obtained for a few by American steamers.

COFFEE LEAF DISEASE.

THE coffee industry of Java is of such great importance, both to that island and the parent country, that we feel justified in offering a few remarks on what has proved a very serious matter in Brazil, Ceylon, and Southern India, and may, we know not when or how, visit the coffee estates of Java; we allude to the coffee leaf disease, the *Hemileia vestatrix* of botanists. This pest was first observed in Ceylon about a dozen years ago, but its ravages, although serious in results, were so limited in extent, that little attention was paid to it at the time, and for some years afterwards it was mentioned as something scarcely worthy of notice. It was not until a fresh, a more vigorous, and a more extended outbreak of the disease took place in several of the coffee districts of Ceylon in 1870 and 1871 that the matter engaged the serious consideration of planters, and was finally brought under the notice of the Planters' Association. It has since those dates been ascertained beyond question, that although the pest does not usually kill the trees attacked, it destroys much of their vitality, denudes them of their leaves, and proves detrimental to the quantity and quality of the after crops. This pest is a species of fungus, and makes its appearance chiefly on the leaves in the shape of rusty orange-coloured spots, at first being of a palish green, deepening and changing to rusty colour as the fungoid development progresses. It was at first supposed to be an inherent constitutional disease, diffused through the sap of the plant; but careful microscopical examinations have shown the fallacy of this view, and it is now beyond a doubt that the fungus is communicated from one plant to the other by means of its spores, which have been shown capable of being absorbed into the stomata of the more tender leaves. This being the case, there is, of course, no limit to its propagation, so long as there are any fresh coffee trees to be attacked by it. It has been ascertained that trees recovering for a time from its attacks have been again subjected to a fresh outbreak of the disease. It is beyond question also that old and impoverished trees suffer more from its attacks than young and healthy trees, and that a course of manuring by stall refuse helps the suffering trees through their troubles. The matter is regarded so seriously by the local authorities that, acting on their suggestion, the Foreign-office have caused circulars to be issued to all British Consuls in coffee-producing countries, calling their attention to the symptoms of this pest, and requesting information in regard to its appearance in any of those countries. In this way information will in all probability be obtained from Brazil, where coffee plantations suffered from the attacks of this disease some years ago, but where it is, we believe, no longer a cause of alarm. The use of sulphur on the leaves of the plant has been suggested, but this can hardly be practicable to any large extent, and we are rather inclined to hope for relief in another direction. Mr. THWAITES, the director of the Botanical Gardens in Ceylon, in his official report to the local government on this subject, says:—

"Upon a careful inspection of the spots of orange-coloured "spores, it may be observed that on most of them a mi- "nute red maggot is feeding on the spores. Sometimes "these little maggots are very numerous, and it could be "wished they were still more so, and that thus the fungus "spores might be altogether consumed, and the propaga- "tion of this terrible pest arrested." It would seem, therefore, that coffee planters must look to the entomologist rather than to the botanist for aid against the foe; and this reminds us that last year there was in Paris a Congress of Entomologists, who exhibited every description of enemy of fruit trees, as well as of such insects as preyed upon those enemies, and it might be well if our Government turned to that quarter for information. At any rate, our friends in Java will do well to keep a watchful eye upon any appearance of rust spots on their coffee trees.

THE JAPANESE GOVERNMENT AND THE MINT.

FROM the comparatively short notice given by the Japanese Government of its intention not to renew the Oriental Bank Corporation contract with the English officials, it is most probable that it will make some compromise with regard to the working management of the Mint. If the Government wishes to continue its issue of a coinage which is to be considered trustworthy by foreigners it must retain its foreign staff at nearly its present strength, but it is showing a total disregard for the requirements of foreign trade if it determines to dispense with a great part of the Minting machinery and appliances. Any change in the management of the Mint will be attended with loss of credit, while the Japanese people will have their confidence in the coinage weakened considerably by the knowledge that foreign superintendence has been dispensed with. As the plant of the Mint is of the quality required for the production of a standard gold and silver coinage, it is much more expensive than would be necessary for subsidiary silver and copper coins, and if used only for the production of such pieces, as it must be in the hands of Japanese, it will represent a much lower value than its cost. No doubt the Japanese could conduct a Mint for local currency on a much more economical scale than their present stately and efficient establishment, and it is to be regretted that the enterprise was entered upon without a due consideration of its permanent value. Allowing that the termination of the English contract has been brought about through motives of economy, it is nevertheless a very short-sighted policy, and is evidence of a want of judgment on the part of the Japanese Government, which will in all probability be productive of evil results.

HINDOOISM AND BUDDHISM.

A RATHER curious discussion has been going on in the Ceylon newspapers in reference to the blending of certain portions of Hindoo worship with the Buddhism of Ceylon. The question was originally raised in connection with the grants of certain tracts of land made by various native sovereigns of Ceylon for the support of temples for Hindoo worship. It is maintained by certain persons that these lands should be sequestered, and their proceeds devoted to educational purposes, as not falling within the meaning of the Sinhalese religion which the British Government undertook to protect and maintain in its convention with the Kandian chiefs in 1815, when the Central Provinces were ceded to it. One of the local papers, the *Observer*, goes so far as to assert that Hinduism is neither more nor less than devil worship; a statement which is ridiculed by Professor CHILDERS in a letter to that journal, who terms it "a stupendous misnomer." According to one statement put forward by certain petitioners, and which we believe to be a correct view, the Malabar Kings of Kandy, though professing Buddhism as a matter of policy, "gradually built "temples to their favourite gods, and endowed those tem- "ples with rich and extensive domains." Alluding to this statement, the *Ceylon Times* says this version is incorrect, "for there is historic evidence to show that Dewale "worship was in existence as a part of Budd- "hism long before the era of the Malabar invasion. "In fact, it seems much more probable that Budd- "hism was engrafted upon Dewale worship, and that "this amalgamation was tolerated, if not recognised, by "the earlier Sinhalese monarchs." The editor then proceeds to say that the like amalgamation occurred in India, and that, therefore, he must come to the conclusion "that "Dewale worship is not incompatible with the worship of

Digitized by Google

"Buddha, and that it is not an innovation upon the re-"ligion originally established by the Sinhalese monarchs." There appears to be a little confusion of ideas in what is here put forward. In the first place, what is the religion originally established by the Sinhalese monarchs? Unless we have read Singalese history in vain, Buddhism was introduced after the invasion of Ceylon by WIJAYO; it can scarcely be said to have been established by the Singalese kings; they and their people were converted by Buddhist teachers, and adopted the religion as their faith, but that Dewale worship existed as a part of Buddhism from the earliest times is most assuredly historically incorrect. The memorialists may be asking too much in their petition, but we cannot help believing that their statement of the case is tolerably correct, though we fail to see how that can warrant them in asking government to divert the amount of tax levied on the Dewale lands to the purpose of founding a high school of education, in which oriental literature may form a prominent subject of study, a very desirable object, but not to be attained by setting aside solemn conventions.

THE recent appointment of Mr. J. GARDNER AUSTIN as Acting Governor of Hong Kong during the absence of Governor KENNEDY, has given rise to considerable dissatisfaction. It has hitherto been the practice for the General in command of the troops to assume the Acting Governorship, and Major-General COLBORNE very naturally feels aggrieved that this rule has been departed from. It certainly is unfortunate that on this particular occasion the custom has been ignored, for there is no doubt that General COLBORNE is more suited to the appointmen than Mr. AUSTIN. We quite agree, however, with the policy adopted by Lord CARNARVON with regard to the appointment, as we consider that it is desirable that the post should be filled by a civilian. But this should have been indicated to General COLBORNE in England. If we remember rightly, he accepted the post hurriedly, to suit the convenience of Government, and this entitled him to more consideration. We hear also that a portion of the emoluments enjoyed by General COLBORNE'S predecessors has been cut off, so that altogether he has been most unjustly treated. Of the policy pursued by Lord CARNARVON there is another instance just recorded at Melbourne, where Sir GEORGE BOWEN has appointed the Chief Justice interim Governor during his absence.

THE accounts which have appeared in our last few issues with reference to what has been very properly called the "Pacific Mail Scandal" are not calculated to convey favourable impressions of a high state of political or commercial morality across the Atlantic. While admitting that our own moral tone is not quite so high as it should be, we venture to affirm that the state of things which has brought about the Pacific Mail investigation could not exist in England. The statements made as to the manner in which the subsidy was obtained call for a thorough and searching examination into the truth, and now that the scene of the inquiry is to be New York we may expect that this inquiry will be made. It is all important that we should know whether Mr. IRWIN is as black as he is painted by interested parties, or whether powerful rivals are doing all in their power to crush the Company, that they may organise another undertaking out of its ruins.

CONSIDERABLE anxiety exists as to the European passengers who were on board the Pacific Mail Company's steamer *Japan* when the calamity happened to her which resulted in so much loss of life. It has been reported that Mr. HERBERT PRAED, M.P., and several English gentlemen were on board at the time of her destruction, but it will relieve the anxiety of their friends when we state, that as Mr. PRAED and his fellow travellers were bound for Shanghai, and the *Japan* did not call at that port, they were not among her passengers. The *Japan* had landed her passengers, mails, &c., at Yokohama, and was on her way to Hong Kong when burnt—about 100 miles off.

IN another column will be found a correspondence between Mr. MUNDY and Lord DERBY, on the question of a claim on the Chinese Government for losses incurred by the *Spark* tragedy. We fear there is but little chance of obtaining any satisfaction from that quarter, but we are of opinion that a claim exists against the owners for insufficient protection on board. The crew of the steamer were quite inadequate to cope with any rising amongst the Chinese passengers, and the owners are quite aware that they are liable to do this, and jeopardise the lives of all on board. Protective measures should have been adopted to meet this contingency.

A CORRESPONDENT of *The Times* at Yokohama sends an account of the manner in which the settlement of the Formosa difficulty is regarded in Japan. The Japanese are, it is stated, extremely well pleased with the terms of the settlement, for war would have been considered as a great calamity with nearly all classes of the community. *The Times* of the 4th publishes an extract from a private letter from Ningpo, dated the 20th October, in which some interesting details of missionary work in China are given. On the 7th inst. extracts appear from a second letter, dated from Hankow.

HIS EXCELLENCY YOSHIDA KYONARI has been received by the President at Washington as the Envoy Extraordinary and Minister Plenipotentiary of his Majesty the Emperor of JAPAN. The new Minister to London, it is expected, will shortly be presented to Her MAJESTY.

Literature.

The History of Japan. Vol. II. 1865—1871. Completing the work. By F. O. ADAMS, F.R.G.S., formerly H.B.M.'s Chargé d'Affaires and Secretary of Legation at Yedo. London: Henry S. King and Co. 1875.

The first volume of this work, which we noticed some eight months ago, brought the history of Japan down to the close of 1864, at which period one of the persons concerned in the murder of Major Baldwin and Lieut. Bird had been arrested; and the opening chapter of this volume describes the retributive proceedings in that sad affair. During the year 1865 the Shôgun's Government determined to pay an indemnity rather than open Shimonoseki to foreigners, and after considerable difficulty the Emperor's sanction to the treaties with foreign Powers was procured on condition that Hiogo should not be opened to trade. In the following year the Shôgun Iyémochi died, and the war with Chôshiu was brought to an end. On Jan. 6, 1867, Keiki (Hitotsŭbashi), the head of the Tokugawa family, reluctantly accepted the office of Shôgun, and three or four weeks afterwards the Mikado died, and was succeeded by his son, under whose auspices such vast changes have been inaugurated in Japan. Mr. Adams gives interesting details of the events of this year, and the most notable, as foreshadowing coming changes, is the letter from the ex-Prince of Tosa to the Shôgun, in which he observes:—"It appears to me that although the government and penal laws have been administered by the military class ever since the Middle Ages, yet since the arrival of foreigners we have been squabbling amongst ourselves, and much public discussion has been excited. . . The cause of this lies in the fact that the administration proceeds from two centres, and because the Empire's ears and eyes are turned in two directions. The march of events has brought about a revolution, and the old system can no longer obstinately be persevered in. You should restore the governing power into the hands of the Sovereign, &c." This advice he accepted on Nov. 9, but he afterwards changed his mind, with the consequences that are well known to all our readers. The years 1868 and 1869 were probably the most important and eventful through which the Japanese Empire has ever passed, and they have left an indelible mark in the annals of the country. In a brief notice like the present it would be impossible to trace out in detail the course of events, and we therefore content ourselves with quoting Mr. Adams' concise statement of their results. "The year 1868," he says, "was for Japan a year of eventful changes; the Shôgunate was destroyed, the governing power was restored to the Mikado, and after a civil war of some months' duration the Imperial arms had triumphed, and his Majesty was installed before the end of the year in the castle at Yedo. In 1869 the work of reconstruction was fairly commenced, the daimios offered up the lists of their possessions and men to the Sovereign; their very name, as well as that of the Court nobles or kugés, was abolished, and they became governors of their former principalities under his Majesty. This was the commencement of the attempt to consolidate the Empire into one strong central Government, with the Mikado, who had emerged from his obscurity and isolation, as the one visible head." During these two years Mr. Adams duly chronicles the opening of Hiogo, Osaka, Niigata, and Yedo, and also the visit of H.R.H. the Duke of Edinburgh. The year

Digitized by Google

1870 was not marked by such startling events as its immediate predecessors; peace prevailed, and it was evident that great changes were coming over the nation. The Japanese, says our author, were beginning to cast their old skin; they were discarding Chinese learning, and the civilisation which they had mostly borrowed from their neighbours, and, with their quick, volatile natures, they were becoming attracted to the civilisation of their foreign allies; even the Mikado himself was affected by the changes. In 1871 much work was done towards the consolidation of the new order of things; the Japanese left for foreign countries in considerable numbers, in order to study their manners and customs; an officially-inspired newspaper was established at Yedo, under the name of *Shimbun Zusshi*; and important changes were effected in the internal administration of the Empire. During this year a very noteworthy pamphlet appeared, advocating Christianity, and an Embassy under Iwakura was despatched to the United States and Europe. Its main object is believed to have been to obtain from the Treaty Powers the abolition of the extra-territorial rights of foreigners, and in that it naturally failed, for Japan is not yet sufficiently civilised to merit that concession. She is only just emerging from the feudal system, and hitherto the only real law has been the sword. Of civil law, adds Mr. Adams, there is little, and the criminal procedure has been tainted with cruelty and rendered infamous by the application of torture. In support of his view he cites several instances, which, we think, incontestably prove that the Japanese are not yet fit to be trusted with any control over the persons and property of foreigners. Our author, who is undoubtedly a good authority on the subject, considers that too much indiscriminate praise has been lavished on the Japanese for their wild eagerness to adopt the civilisation and customs of the West, and in conclusion he gives them very sensible advice, in the words of the Italian proverb, "*Chi va piano va sano.*" Rome, they must remember, was not built in a day.

Mr. Adams gives us a good map of Japan (excepting Yezo) divided into *ken*, and a useful glossary of Japanese terms. He also supplements his work with three papers on Education, on Morality and Decency, and on Geography, the first of which is taken from the columns of the *Japan Mail*, and the last from a paper read by Mr. Satow before the Japan Branch of the Asiatic Society in March, 1873. To that gentleman he is again, as in the first volume, under considerable obligations for valuable aid and assistance, and he has also drawn freely, perhaps too freely, on the *Kinsé Shiriaku* and our Japan contemporaries. In concluding our notice of this volume we thank Mr. Adams for his "History of Japan," from the perusal of which we can safely affirm that we have derived both profit and pleasure.

The *Geographical Magazine* contains a remarkable account of the journey of the Chinese traveller Chang Te-Hui from Peking to the summer residence of the Prince Kublai in Western Mongolia, in the year A.D. 1248. It is translated from the Russian version of F. Palladius by Eugene Schuyler. The papers on the "Survey of Lake Tanganyika" and the "Mineral Wealth of Central Asia as bearing on Russian Progress" are very interesting. The January number is quite up to the usual standard.

The *Gentleman's Magazine* begins the year with two new tales, one of which, "Dear Lady Disdain," is from the pen of Justin M'Carthy, and the other, "Al Lyn Sahib," is by Frank Percival. Mr. Archibald Forbes contributes a paper on "The Lucknow of To-Day," and there is a very useful chapter on "Municipal Reform for London." The brief memoir of Tom Hood by Mr. Lucy is not the least interesting feature of the number, which is a very excellent one.

The *Anti-Slavery Reporter* for January contains correspondence from the directors of the British Indian Steam Navigation Company upon the subject of the Zanzibar slave trade; from the Secretary of the British and Foreign Anti-Slavery Society upon the Red Sea slave trade; from Earl Derby on the Macao coolie trade; and from the Foreign-office on the treaty between China and Peru.

The January number of *Art* contains some excellent illustrations,—the "Courtyard of the Dilligence," by J. G. Vibert, "Portrait Bust of the late J. H. Foley, R.A.," and "Beggared," by Mrs. F. A. Hopkins, being all beautifully executed. The Art notes and gossip are as entertaining as usual.

CHINESE PIRATES.—THE "SPARK" TRAGEDY.

—o—

The Times publishes the following correspondence between Lord Derby and Mr. Mundy on the subject of the *Spark* Tragedy:—

MY LORD,—I shall most probably not be presuming on the truth in saying that your Lordship has received some account, official or otherwise, of the recent piratical outrage on the Canton River. As I personally have the misfortune to be most materially concerned in that occurrence, your Lordship will, I hope, excuse me trespassing on your valuable time. My reasons for so doing I will here endeavour to state with the greatest brevity that the facts will admit of. In the fray that ensued on board the *Spark* I was so desperately wounded that I do not exaggerate in saying that my recovery is miraculous; but although I have to a great extent recovered from those wounds, my nervous system received such a shock that the doctors have interdicted my return to China for ever. May I explain to your Lordship what that verdict means to me? I was specially educated and specially trained from my earliest childhood for a career as a Chinese tea merchant. I started on that career with a sufficiently brilliant prospect. The one moment life appeared to me in its most glowing colours and almost in the next moment it became a blank. And why? Because travelling in a country with which we are on friendly terms I fell into the hands of men, outcasts from all law. With blighted hopes and impaired health, I have returned to my native land—my whole career ruined, and no other prospect before me. I have, indeed, had some slight hope revived in me on being told that I have one chance left, which lies in my nationality. I have been told that England does not permit the weakest and most insignificant of her subjects to be touched with impunity. I have been told that as I was assaulted in Chinese waters by Chinese subjects that Government is responsible to me for the actions of her subjects, and for this object and with this hope I appeal to your Lordship for that assistance and aid in the furtherance of any just claim that I believe I am entitled to. I make this appeal with the more confidence as I am convinced that the honour and safety of any British subject could not be placed in hands more zealous for his welfare than in those of your Lordship.—I have the honour to be your Lordship's most obedient humble servant. W. W. MUNDY.

The Right Hon. the Earl of Derby.

SIR,—I am directed by the Earl of Derby to acknowledge the receipt of your letter of the 27th ult., requesting his lordship's assistance in preferring a claim on your behalf against the Chinese Government on account of the injuries sustained by you in the piratical attack on the *Spark*, and I am to state to you that while his Lordship regrets to learn that those injuries have had so disastrous an effect on your prospects in life, and sympathises with you on the suffering which you underwent, he does not feel justified in asking the Chinese Government to compensate you for acts perpetrated in their waters by malefactors whom they appear to have taken all the means in their power to detect and punish.—I am, Sir, your most obedient humble servant,

W. W. Mundy, Esq. TENTERDEN.

MY LORD.—You will not be surprised at my protesting against your decision to decline my application for assistance in prosecuting a claim against the Chinese Government, as that decision must exercise a most unfavourable influence on my chances of success. May I presume to ask your Lordship to reconsider it for the following reasons:—Your Lordship, while kindly sympathising with me in my misfortune, states that as the Chinese Government did everything in their power—after the outrage, I add—to capture and punish the malefactors, you consider that those endeavours were sufficient to exonerate them from any further liability. If this were a question with a civilised Power, with a Power who it was generally recognised used every effort and took every precaution that whatsoever travelled in her territory should do so in perfect safety, I grant that such steps would be the only satisfaction that could be demanded at her hands. But this is a case totally dissimilar. The most ardent admirer of Chinese institutions must confess that they are somewhat antagonistic to civilisation. It is a notorious fact that in no country with which Englishmen have so many commercial relations as they have with China is locomotion, or even habitation, attended with more difficulty or danger. After the last war things did, indeed, improve; but for years acts of piracy have been of frequent occurrence on the Canton River,—of late so much so that, at the request of the English merchants, the Admiralty were about to station a gunboat in the river for the protection of our commerce. The Chinese Government, I submit, showed clearly no right to be treated as a civilised Power by neglecting to take any precaution whatever to put a stop to these disgraceful occurrences. The *Spark* outrage only differed from the ordinary piracy in the bloodshed and the fact of an Englishman being wounded. Then, indeed, the Chinese officials awoke to a sense of their responsibility and sent out an edict requiring the capture of the pirates, who, of course, were caught and punished with death. But, my lord, I assert that the Chinese Government's liability did not cease with this *ex post facto* awakening of conscience—may I not say awakening of apprehension?—and that, as they wilfully neglected, and have done so for years, to take any measures that would have rendered the perpetration of such a crime impossible, they are liable for all the consequences resulting from their want of foresight and from their disregard of international obligations. The Japanese Government, which certainly can be favourably compared with the Chinese, the other day paid a heavy indemnity to an Englishman wounded in the streets of Yokohama, although it was proved that the would-be assassin was a maniac. Of course, he was also executed; but your Lordship's argument in my case, if applied to his, would be that the Japanese were not responsible. For these reasons, I appeal to your Lordship to re-consider your decision; and I am content to rest my claim on its legal merits. I should regret more than I can find words to convey being compelled to appeal to public opinion to judge my cause; but, my Lord, if your decision be unalterable, what other alternative shall I have left?—I have the honour to be your Lordship's most obedient humble servant,

The Right Hon. the Earl of Derby. W. W. MUNDY.

With reference to the above correspondence *The Times* print the subjoined leading article:—

On the 22nd of last August the Canton River was the scene of a terrible outrage. A small steamer, with a mixed crew, under the command of an American captain, conveying goods and passengers from Canton to Macao, was attacked and boarded by Chinese pirates; the vessel was plundered, and all who had attempted to defend her were killed or disabled by their assailants. It does not appear in the narrative of the occurrence that any resistance was offered by the majority of the crew or passengers. The captain and one or two of the ship's officers did all in their power, and they were joined heartily by the only European passenger on board. But they were soon overcome by superior numbers; and the pirates, having thus made good their footing, took possession of the vessel, collected all the booty they could lay

Digitized by Google

their hands on, and retreated with it on board a friendly junk, leaving the steamer with her helm broken and for every reason unable to follow them in their flight. We are not aware whether any claims for damages have been advanced against the Chinese Government by the owners of the plundered vessel or by the injured members of her crew. A very striking description of the one-sided conflict has made the solitary European passenger, Mr. W. W. Mundy, an English merchant, who seems to have fought as bravely as any, well-known already to our readers. Mr. Mundy, who was certainly one of the chief sufferers, has requested the aid of our Foreign Secretary to compel the payment to him of an indemnity. He remains still so disabled from the effect of the wounds he received last August that he has no prospect of being able to go on with his business. His career as a merchant is at an end, and it is by no fault of his own that it has been thus abruptly terminated. The outrage of, which he complains was committed in open day, on Chinese waters, on a highway of commerce regularly traversed both by native and foreign vessels, and under circumstances which seem to argue very great remissness or neglect of duty on the part of the Chinese authorities. He looks, therefore, to the Chinese Government to give him reparation for the unlawful acts of their own subjects; and his demand, it must be admitted, is very far from being unprecedented. Larger claims have before now been made with much less reason to justify them, and the existence of piracy on the Chinese coasts can be so directly traced to the want of due measures of repression that the Government may itself be held answerable for evil deeds which it has done so little to discourage. Lord Derby, however, has declined to aid Mr. Mundy in his claim, on the ground that the Chinese Government has since the event done all it could to detect and punish the offenders, and has thus discharged sufficiently its obligations as a friendly Power. The injured man, however, is not satisfied with this refusal or with the reasons assigned for it, and he has therefore appealed in our columns to the judgment of his countrymen against the adverse decision of the Foreign Secretary.

It may be as well, before we express any opinion of our own, to see what arguments could be employed by the Chinese Government in support of its own irresponsibility. It would have, we may be sure, a good deal more to say for itself than Lord Derby has urged on its behalf. "We are sincerely sorry for what has happened," would, we could imagine, be the words of the advocate of the Celestial Empire, "and we shall have the utmost pleasure in inflicting proper punishment for it, if we can succeed in tracing out the offenders. Every man shall be bastinadoed to death, or impaled or tortured out of existence in any manner you may suggest, though we may be permitted to doubt whether you can enlighten the ingenuity of our prison authorities on these points. Certainly there has been no complicity on our part. Thus much, indeed, you do not even venture to allege. On the contrary, the acts by which you have suffered were in direct defiance of our laws and in spite of such efforts as we have made to prevent them; though we must, of course, admit that these have not been sufficient. Our own people, in fact, are even more frequently than yourselves the sufferers by these outrages, and it is not within our power to extend to them or to others as effectual a protection as we could wish. This piracy, too, which seems to be the present ground of your complaint, has been very much assisted by your own former policy. You have tied our hands in a thousand ways, have done much to prevent us from bringing offenders to justice, and have even extended a protection to them of which they have not been slow to avail themselves. We might not under any circumstances have been able to maintain everywhere in our vast dominions an absolutely efficient police, but we have been checked and thwarted by yourselves in such endeavours as we have made, and if you now suffer from the absence of native law, you suffer from a state of things for which you are very largely answerable. We must add, too, that we really did not invite your presence or volunteer you a safe-conduct on the Canton River, or any other spot within our presumed jurisdiction. You have pushed yourselves in not only unasked, but directly contrary to our wishes, and you have done so with a full knowledge beforehand of the dangers to which you would be exposing yourselves. You come here, not for our benefit, but for your own, and you must take your chance in what way the uncertain venture may turn out. We should like also to ask whether you are ready to assume for yourselves the responsibility you attempt to force upon us. We admit freely our own shortcomings, and make the best defence we can for them. But are there no faults of the kind in your own country? Are the open streets of your great cities much safer than our open waters? And if they are not, to whose neglect must it be ascribed; and do you recognise the duty of making pecuniary compensation for the consequences? Suppose one of our people had been almost kicked to death in England, as we hear your people sometimes are. Should we hear anything of the obligation incumbent on you of making due provision for the sufferer? And yet in truth the case would be a much stronger one than you can bring forward against us. A Chinese subject in England would be compelled to submit wholly to the laws of the country, while you refuse to be bound by any rules we can impose, and claim a protection from us for which you render us no corresponding obedience. You have, we well know, your fits of generosity sometimes, though we have yet not been fortunate enough to meet you while they are upon you. You might, in the case we are supposing, do something by private subscription, though we do not hear, by-the-bye, that you have yet done so in at least one case in which it might fairly have been expected. But as for a demand on the public exchequer in payment of indemnity to a Chinese subject who had been wounded or robbed by Englishmen, you well know that you would never for an instant hear of it, but would leave the victim, in your own convincing phraseology, to take his remedy at law—a remedy of which, if he were wise, he would not be very forward to avail himself. If you insist on an indemnity, we shall, of course, pay it, for we know too well the consequences of refusing your demands. But as for the justice of the case, we are sure that upon a review of the whole evidence the decision would be against you, in the opinion at least of any unbiassed neutral to whose judgment it might be submitted."

Now, we must allow in all candour that there is not one of these arguments to which in itself any exception could be fairly taken. They are a statement of facts sufficient certainly to show that the case for compensation is not as clearly and undoubtedly just as some of our readers might at first sight suppose it to be. Rather the question is a most difficult one, since in whatever way it may be settled we must be careful neither to admit a bad precedent to our own loss nor to establish bad law in order to meet a single individual hardship. It is clear that if we were dealing with a civilised Government we should have no standing ground whatever, and should resist any similar claim which might be urged against us. Nor when an uncivilised Power is concerned is the matter very different. It is pretty well recognised that it is at their own peril our subjects remove themselves from our own immediate protection, whatever may be the motives that lead them forth. Whether it be the legitimate pursuit of commerce or the desire to benefit others, it must still be followed at the risk of those who leave us, and the danger must be taken into account beforehand. If we do in any case more than we promise—if we make now and then an exception to our rule of non-interference, it is not taken to give our people at large any general right to expect the same favour. We may have no scruple in doing all we can to protect our countrymen or to punish their assailants in any quarter of the globe, but our efforts in this direction are limited by convenience, and it would be in the highest degree undesirable to recognise the universal duty of protecting British merchants or missionaries in every new position into which they may be pleased to thrust themselves. But for all that we are inclined to think that our Government, if it should finally consent to interfere in support of Mr. Mundy's claim, would be adopting no novel policy nor a course which would appear to the Chinese Government violent or unjust. China, it must be remembered, though not a civilised Power, is yet very far indeed from barbarous. She has a regular Government, with which we have entered into permanent relations and have made Treaties, and with which, therefore, we can deal as the representative of the whole people. Though such a State cannot claim the full immunity which the great nations of Europe extend by courtesy to each other, neither, on the other hand, can it evade responsibility on the same grounds as a tribe of savages whom it is almost impossible for us to reach, and with whom it would be useless to attempt to hold any diplomatic intercourse. There is no reasonable doubt that the Chinese Local Governments have been very much to blame for their practical sanction of piracy; and though they may fairly retort upon us that we have ourselves done much to encourage the practice of which we now complain, yet all this is so entirely a thing of the past that it affords no excuse whatever to the Chinese for their present systematic neglect of duty. It is to the interest of themselves that their rulers should be forced to be more vigilant, and we may reasonably demand that those who have virtually refused to put down piracy shall be held responsible for its consequences.

MANCHESTER WARES.

The Times, in a lament over the degeneracy of the Manchester trade, has the following:—In the "good old days"—that is, using the word "good" in the sense of something large, settled, and comfortable—there was, as a general rule, one class of middlemen between the Lancashire manufacturers and the exporters, as also between the manufacturers and the importers of the raw material. One class we may call it, though divided by locality and circumstances into two—the merchants at Manchester, and the Manchester warehousemen in London. We remember it being repeatedly stated that ships freighted with immense and valuable cargoes of Manchester goods left this country for India, China, and the Colonies, having on board men who went out on the speculation of buying the goods under their feet at the port of consignment and bringing them home again. The long-established houses reaped their full share of the immense facilities which steam and electricity have lately given to the world. They were in possession, they were ready for the new harvest; they had their organisation, their connections, their knowledge and experience. This *régime* of big people has held its ground with obstinacy, and is only slowly yielding it to inferior, but persistent and irresistible successors. The whales, the tritons, and other monsters of the Manchester deep are one by one disappearing from the Exchange, and the minnows are taking their place. It is a crowd of brokers, commission agents, servants, and the motley representatives, not now of two great classes of buyers and sellers, but of every kind of person who has to do with the Manchester trade. As everybody can now find a broker or an agent ready to do everything he may want, so by the proper use of this agency everybody can be everything, and that at no very great cost or risk. The charges for brokerage are now so reduced as no longer to deter from a speculation promising only a very moderate profit. Thus the whole trade, in every part and stage, is thrown open to everybody, and resolved into the very atoms of the commercial system. One result, we are told, is that the ordinary profits are reduced to the lowest, and are only to be obtained by the closest calculation, extending to every ingredient of manufacture and every element in the process of production, collection, and transmission. No doubt this is likely enough to ensue from unlimited competition by people with hardly so much as a character at stake. But the complaint of great frauds in the manufacture and making-up of Manchester goods, only discoverable at the foreign port, is a very old story. It dates further back than the opening of the market and the irruption of small people. Any time this century there have been scandalous reports of the flimsy, dressed-up, shiny rubbish supplied to the West Indian, South American, and even East Indian markets. No doubt, however, the smaller the man, the smaller his means and agencies, the smaller his professional acquaintance with the subject, and the smaller his hopes of gains, the greater will be the chance, not to say certainty, of a very worthless result so far as the unhappy consumer is concerned.

ARTICLES OF IMPORT.

The Produce Markets re-opened on the 4th inst., after the Christmas recess, with the same quiet tone prevalent at the close of last year, and most of the leading articles remain in a languid and drooping state. Tea and Silk are quiet. Sugar is dull, especially fine qualities, brown being steady. A further slight advance in Coffee has been lost at the close, and an uncertain feeling prevails. Rice has continued in good request, and prices are again higher. Extensive supplies were brought forward at the auctions of Spices, &c., yesterday, and a general flatness prevailed; both Black and White Pepper declined nearly ¼d. per lb. Other articles show no alteration.

TEA.

Since the holidays a considerable amount of Tea has beenoffered by private contract, but business has only been on a moderate scale, prices showing but little alteration. Sales have been chiefly in fair to good medium black-leaf Congous from 1s. 1½d. to 1s. 5d. Kaisow kinds remain as before. New-made Congous have been dull of sale. Oolongs and Souchongs show no alteration. Scented Teas: Canton Pekoes and Orange Pekoes have been freely offered, but only the finer kinds have met with much attention, common to medium being very difficult to move. In Foochow kinds but little has been done. Green Teas remain dull of sale; a public sale of 6,234 packages took place on the 6th inst., chiefly Canton Scented Teas, which sold at the previous low rates. Stock and known supply, 6th Jan.:—

	1874. lbs.	1875. lbs.
United Kingdom stock, 1st Jan.	96,700,000 ...	86,000,000
Arrivals since	5,225,000 ...	16,191,000
Afloat to latest telegram, 24th Dec. ...	24,428,000 ...	26,341,000
Indian tea do. do. to mail...	1,697,000 ...	2,510,000
	128,050,000 ...	131,042,000
Average monthly delivery from 1st Jan. to 31st Dec., 1873 and 1874	13,811,333 ...	14,127,466

With reference to the condition of the market during the past year Messrs. Arthur Capel and Co.'s Circular says:—The statistics of the year again show some considerable changes—the chief features being the falling off in Imports of nearly 6,000,000 lbs., the increase in home consumption of about 5,500,000 lbs., and a falling off in Exports of about 2,250,000 lbs., the stock showing the large decrease of 11,250,000 lbs. The quantity afloat on the other hand is larger, owing to the very early closing of the season in China. The result of the season's operations so far has on the whole not been good, for although in many instances there have been fair profits realised, yet the losses on Canton Teas early in the season, especially Scented Capers, also on Green Teas, have more than neutralised them. The market has been wonderfully steady during the year, in face of so large and early an export from China, and the trade and exporters have absorbed so large a portion of the supplies that importers have been enabled to hold the balance of their stocks with great firmness, and as the total exports from China and India for the season will not much more than equal our deliveries, there is reason to look for a fair business for the remainder of the season. The quality of the Black-leaf Congous of the first crop was on the whole about equal to that of the previous year, some of the finest Ning Chows being of a very superior quality, and realising extreme prices for export. The second crop was hardly equal to last year, but the third crop proved much as before. Foo Chow kinds showed no improvement on last year, but owing to moderate prices on this side they found a ready sale. Pak Lin kinds were inferior, both in leaf and quality, but exporters took them readily at gradually hardening prices. The early arrivals of Canton District Congou were decidedly below the average of previous years, both in make and flavour, and resulted unfavourably; the supply of common to fair has been large, and prices have ruled at a low figure. Souchongs have been much the same as the previous year, very few really fine Teas now coming to hand. Oolongs: The Formosa kinds have been inferior to last year, the Kokew kinds much as before; they have been dull of sale throughout.

Messrs. Shepard and Co.'s Annual Circular says the course of the Tea market the past year has been uneventful, save in consequences of the Adulteration Act; there is the usual satisfactory increase in deliveries for home consumption; exports exhibit a small decrease, which is partly due to the depression of trade in the United States, and lower prices in New York than in the London market for Green Teas. Home demand has continued on good to fine qualities of Congou, which have supported a fair and pretty steady range of prices, the policy of buyers being more and more against holding heavy stocks. There was a brief speculative demand for useful to medium kinds in April, when some 30,000 packages were settled, but though the immediate effect was to advance prices ½d. to 1d. per lb., the bulk of these Teas were subsequently cleared off at about 2d. discount. A reduced supply of black leaf dust, and red leaf dust, siftings, and broken leaf, caused an important advance in these descriptions; it is, however, a fact that common and useful grades of Congou, more especially red leafs, contain an excessive proportion of dust and broken leaf this seaaon. Exporters secured, we may say, the entire supply of extra and curio fine Ningchow Congous, 1874-5 import—purchases estimated at 8,000 half-chests, at 2s. 8d. to 3s. 3d. per lb.—prices wholly beyond the reach of buyers for home use. Packling Congous also in favour with shippers, closing rates showing 3d. recovery from the lowest point of depression. Canton Scented Teas, and all Greens, with the exception of finest Moyune district, sold at irregular and very depressed prices throughout the year; the risk attending their sale, through fear of prosecutions under the Adulteration of Food Act, causing ruinously low rates to prevail; in the past six months, however, there has been a cessation of vexatious prosecutions, and the passing of this Act is matter for congratulation to the public at large, who have benefited by its operation. The continued depression in value of average Greens is due in some measure to low prices in the New York market. Auction sales without reserve have been more generally availed of, especially in the case of Greens and Canton Scenteds; they undoubtedly interfere with business by private sale, but it is a moot point which system is most conducive to the Merchant's interest. The Canal route has absorbed rather over three-fourths of the season's supply from China; it is increasingly popular, as Teas are received in better and safer condition; further, it is noticeable the last two seasons, that when Indian Teas arrive in quantity and prices become settled, demand for China Congous over 1s. 9d. to 1s. 10d. per lb. slackens. The season is thought to have been an unsatisfactory one to importers, and that merchants are fortunate who have escaped loss, notwithstanding a very low and favourable rate of exchange on this country; if so, the result is due to too high cost in China rather than to low prices on this side. With the increasing competition in business; it would seem as if merchants, in a general way, can only operate on chance of a mere commission, the old scale profits on produce being utterly impracticable nowadays. Quality of Black-leaf, season 1874-75—some exceptionally fine Ningchows, which made very high prices, other grades hardly up to an average, many useful to medium Teas showing extra dust and broken leaf. Oonfa kind, though rough and mixed in leaf, has proved specially marketable. Red-leaf or Kaisow: Medium to finest Teas, good in quality and liked by the Trade; grades from 1s. 4d. to 1s. 8d. have hardened the last few months, stocks being light; common to fair grades, much mixed with dust, and prices under last year's. Packlings much as previous season, but owing to a strong export demand the last quarter, prices experienced a sharp advance; the loss of the Canton, with a considerable quantity of first crop leaf, assisting the advance. Chingwo district Teas preferable to last year's and to this season Packlings, so a range of 3d. per lb. over the currencies of 1873.

SILK.

The current prices of China Silk are 12s. 3d. to 13s. for common to good No. 5, 15s. 6d. for Blue Elephant, 16s. 6d. for Ku Kee Chin Jan, and 19s. to 19s. 6d. for best chop No. 3, or from 2s. to 3s. under the quotations on 1st January, 1874. Taysaams are in less enquiry at 11s. to 15s. for Kahing common to best, and 10s. 6d. to 11s. for 9-12 Moss. There is an excess of common qualities over good Silk as compared with this time last year. The total stock of China Silk is 30,703 bales, against 28,223 on 1st January, 1874. Canton Silk: Stocks are small; 5,123 bales, against 8,074, and expected supplies for the remainder of the season also small; quotations are hardly current at 11s. 6d. for market No. 4 Tsatlees, and 17s. for best curio Loong Kongs; it is remarkable that no good or fine Tsatlees have arrived this season. This Silk is much affected at all times by the prices ruling for the lower descriptions of Taysaams, and to some extent also by common Tsatlees. The present values of Canton Silk are about 1s. over the lowest moment last August. Japan Silk is very seriously interfered with by the abundant crops of medium and common European Silks, and the more so, as the quality is decidedly inferior; prices are unsettled. Stocks are 5,520 bales, against 6,787 last year. Deliveries 1st to 6th inst., inclusive:—China, 603 bales; Canton, 76 bales; Japan, 233 bales; total, 912 bales.

Messrs. Durant and Co.'s Circular says:—In our annual statement of stock imports and deliveries of Silk the figures approximate so closely in their aggregates to those of last year as to be almost curiously identical. The importations show a diminution of only 1 per cent., the increase in China Silk being sufficient to counterbalance the deficiency in other classes, while the deliveries show a diminution of something less than 3 per cent. Then again the stock, supplemented as it was by the heavy arrivals of last month, comes within 5 per cent. of the stock of last year. It may be interesting to know that the arrivals of China Silk will be very small in the next month, the settlements both for England and the Continent having, as reported by telegraph, almost ceased during November and the early part of December. Such is the result of the year 1874 of which we might fairly write in the very words in which we wrote of its predecessor 1873 as "trying and unsatisfactory, not to say disastrous almost beyond precedent." For the depreciation has been almost as great, speaking generally 20 to 25 per cent., and the uncertainty as to the future scarcely less decided. But there is this great difference—we finished the year 1873 with a general feeling of depression, we commence 1875 with a general feeling of hopefulness and a fair amount of confidence—itself a large element in producing a favourable result. Confidence that prices must really have reached the lowest, although there is no reason to doubt a continued abundant supply of the raw material such as will tax all existing mills and looms to the utmost to work up, and hopefulness that the theory of low prices never failing to produce extended consumption will be realised in the present instance. It is true that thus far there is little evidence of this increased consumption having actually commenced, but there are symptoms that it is approaching. The course of prices during the first eight months of the year was almost continually downward; one little exception there was in the month of March, when speculation appeared for a short time, and an improvement of 1s. was established, but that soon vanished, and prices again continued to fall till the end of August, and the first arrivals of new Silk found us at our lowest point—fully 20 to 25 per cent. under the prices of January. In October we had a rally of 1s. to 2s., but a large portion of this was again lost in November and the early part of December. Dealers and throwsters have suffered severely—continually forced sales by auction without reserve, and yet still leaving large accumulation to be realised. Manufacturers may have escaped loss as in 1873, but can scarcely have done well. All through the year the demand for their goods was very limited, and the largely increased importations from the Continent, showing that America was again a very limited customer, must have exposed them to a severe competition. On the other hand, they have managed to relieve them-

Digitized by Google

selves to some extent by an increased export, showing that in some things at least and in some markets they can compete successfully with the foreigner.

Messrs. Kilburn, Kershaw and Co.'s Circular says the past year has seen a further gradual decline in the value of Silk, and brought with it only one or two spasmodic movements favourable to sellers; the turning point in the downward movement came somewhat unexpectedly at the end of August, after probably the most depressed month ever known in the Silk trade. Prices had then reached such a low point, that even with general gloom as to the future of demand, a few operators stepped in, and the institution at that time, on a somewhat important scale, of Public Sales "without reserve," brought together a large attendance of buyers, both home and foreign, and established the low rates previously ruling; this was the very lowest moment, and, as we said before, the turning point, for considerable business resulted during the months of September and October, and at the end of the latter month another series of "without reserve" Public Sales passed off with great success at a general recovery of 2s. upon China Tsatlees; during these two months the total transactions were of great magnitude, manufacturers having bought very largely, and speculators also operating with much confidence; quiet then set in, and has since continued, prices easing somewhat under the absence of general enquiry; however, a slight improvement in demand has again begun to show itself, and prices are decidedly more in sellers' favour than they were a month ago. The new year opens surely with a fair prospect before it; for prices are so low that it is impossible to believe but that they must materially bring about more real consumption, although, as the experience of the past year has shown, this is not to be obtained all at once, and it is, we think, only prudent and wise to expect improvement by easy stages only. As regards stocks and general supplies of Silk they are certainly large, but still less than they were this time last year. China Silk, however, is in heavy supply as compared with other Asiatic Silks, and stock large; still with the small quantity afloat and the expectation of moderate arrivals to the end of the season, it is within reasonable and manageable compass, and a steady improvement in consumption would soon begin to relieve it. Manufacturers, with rare exceptions, are full at work, both at home and abroad, and there is generally a more confident feeling as to the future; the one thing wanted after all is an increased consumption, which can alone come from a return of fashion, and more universal demand for silk goods. It now remains to be seen when this improvement will show itself in a marked form, but with Silk at its present prices, and the ability of manufacturers to supply the various markets of the world with cheap goods, it is not improbable that the movement is not very far off.

Messrs. Waithman, Hogg, and Co.'s Circular remarks:—The year under review, although not so disastrous as its predecessor, must have been a very unsatisfactory one to nearly all engaged in the Silk trade; prices have undergone another serious decline, but without, to any extent, stimulating consumption, and the greatly-increased direct shipments to the Continent have materially interfered with our export trade. There have latterly not been wanting some indications of a change in fashion, favourable to Silk manufacturers, but the effect of this can only be felt in the future. To importers and dealers the year just closed must have resulted in heavy loss, owing to the great fall that has taken place in prices, but manufacturers are supposed to have had a profitable year, the fall in goods not being in proportion to that in Silk. Throwsters lost heavily by their old stocks, although latterly no doubt they have reaped some benefit from the extremely low cost of the raw material.

COFFEE.

The improved tone noticed in our last report was prolonged during the holidays, and a further recovery of 2s. per cwt. was established for Plantation Ceylon, and 1s. to 1s. 6d. for ordinary kinds. At the re-opening of the market on the 4th inst. this advance was about sustained, but the arrival of steamers from Ceylon in rapid succession has since depressed the market, and larger supplies brought to auction have gone off flatly at declining prices. The closing quotations of Plantation are 4s. 6d. lower than on the 4th, and therefore 2s. 6d. below those given before the holidays. Native being in small supply has been less depressed, and although not maintaining the intermediate advance, prices are not lower than a fortnight ago. Foreign kinds are depressed.

Closing prices are as follow: Plantation Ceylon: triage 78s. 6d. to 89s., small grey to coloury 89s. 6d. to 95s., low middling 96s. to 97s., low middling coloury 97s. 6d. to 106s., good middling to good bold coloury and new crop 101s. to 104s., pea-berry 116s. to 121s. 6d.; Native, bold 90s. to 93s., pea-berry 102s. 6d., low garblings 25s. Among the sales of other East Indian kinds have been 2,500 bags pale and greenish Manila at 85s. to 86s., and 100 bags Bonthyne Singapore at 84s.

SUGAR.

During the holidays a dull tone prevailed, and with little inquiry only a restricted business occurred. Since the re-opening of the market on the 4th instant refiners have shown little disposition to buy, and only moderate sales have been made, brown qualities at firm rates, medium kinds at barely the previous value, whilst strong sorts are quite neglected. There has been rather more inquiry for low brown speculative kinds at firm prices. Floating cargoes of Java are unusually numerous, and prices have declined about 6d.; other sorts are also dull of sale. For Penang there has been only a limited enquiry, and in auction 507 baskets date sort bought in at 17s. to 18s. Small sales of Manila have been effected at the previous value. About 6,500 bags unclayed llo at 17s., sun-dried ditto at 19s. to 20s. 3d. Three floating cargoes of Java have been sold, viz., the Elizabeth Ann 3,020 baskets No. 14½, at 26s. for Bristol; the Amadine, 3,430 baskets No 14½, at 25s. 9d. for Bristol; the Trident, 2,210 baskets No. 17 to 17½ at 26s. 6d.

COCOANUT OIL.—Although business in Cocoanut has been limited, the market has been firm at £44 for fine Cochin, and 30 tons of Ceylon in pipes have been sold at £38, and some since at £37 15s.

CUTCH.—The market has been quiet, and only moderate sales are reported at about 30s. for fine Pegue.

CANTHARIDES.—2 cases China sold at 3s. 2d.

CAMPHOR.—62 tubs damaged Japan sold, 1st class sea-damaged 73s. to 74s., 2nd class 72s., oil damaged 61s.

CHINA ROOT.—Nine bales have been sold at 22s. 6d.

CHINA PRESERVES.—At auction a supply of 950 cases 30 casks Ginger met a fair demand, and 300 cases and the casks sold at about former rates, at 6¼d. to 7d. and 6d. to 6¼d. respectively. Of 20 cases 4 casks dry ditto the cases sold at 7¼d. to 7½d. 150 cases Chow Chow and 100 cases Cumquats were withdrawn.

GALLS.—No business has transpired in China or Japan.

GAMBIER.—A very quiet tone has prevailed, and only a small business has been done at about previous rates.

HEMP.—The market for Manila is quiet, and only a small private business has been effected during the past week, at previous rates. Small supplies at auction yesterday attracted little attention, and were bought in.

JAPAN WAX.—No business done.

MUSK.—Of 54 caddies Tonquin offered 29 caddies sold, good even shaped pods with a few slightly skinny at 41s. 6d. to 42s. 6d., mixed shaped 2nd pile at 18s. to 19s., wet pickings 26s. Of 60 caddies Yunan 28 caddies sold, mixed to fair partly hard 31s. to 34s., damp and broken 21s. to 25s., wet pickings 26s., 6 tins grain bought in at 55s. per oz.

PEPPER.—*Black:* The market has been very dull, with only scanty private sales, the closing prices of 6¼d. for Singapore, and 5 15-16d. to 6d. for Penang show a decline of ⅛d. and 1-16d. respectively. The supply at auction Thursday amounted to 4,018 bags, but with little disposition to buy, although holders were more willing to meet the market at some concession; only about 1,500 bags found buyers. Of 429 bags good West Coast Penang 100 bags sold, sound at 6d. Of 2,337 bags Singapore 1,200 bags sold, fair to good at 6⅛d. to 6¼d., common grey at 6d.; 790 bags Siam bought in at 6¼d. to 6⅜d., 165 bags Rhio at 6d., and 17 bags Borneo at 6¼d., 170 bags Saigon sold without reserve at 6⅛d. to 6¼d. *White:* The market is depressed by large supplies brought to auction, which were only partially disposed of at a decline of ¼d. to ⅜d. per lb.: of 1,908 bags Singapore only about 250 bags sold, fair to good fair at 8¼d. to 8½d., the remainder bought in at 8½d. to 8⅝d., also 35 bags Penang at 8⅜d.

RICE.—A good demand has been prolonged throughout, and prices have shown a further upward tendency. Floating cargoes of old Burmah have been sold at fully previous rates to a further advance of 3d. per cwt. Bengal has also been in more demand for arrival at prices not previously obtainable. On the spot soft grain kinds have been in request at an advance of 3d. to 4½d. per cwt., but only small sales of either Bengal or Madras have taken place. There is less disposition to operate in new Burmah, and prices are rather lower. On the spot white Bengal has been sold at 11s. to 11s. 4½d., old Ballam at 11s. 6d., Madras at 9s. to 9s. 3d., Rangoon at 9s. to 9s. 4½d., and Necransie at 9s.

RHUBARB.—Of 98 packages China offered 52 packages sold, fair bold a little mixed at 2s. 11d., good middling 1s. 5d. to 1s. 6d., very ordinary to ordinary at 3d. to 9d.

SPICES.—*Cloves:* No sales of East India. *Cinnamon:* Of 46 bales Ceylon offered 6 bales sold, ordinary first sort at 2s. 1d., second 1s. 7d., the remainder bought in, first 3s. 2d., second 2s. 10d., third 2s. 4d., fourth 1s. 9d. *Nutmegs:* A moderate supply went off slowly at about previous rates, 13 cases 22 boxes Penang chiefly sold, average 78 and 79 nuts to the lb. at 3s. 8d., 112's at 2s. 10d. to 2s. 11d., 152's at 2s. 6d., limed 132 to 124's at 2s. 3d. to 2s. 5d., defective 1s. 3d., 47 bags Java partly sold, 90's at 3s. 4d., 4 boxes Ceylon sold at 2s. 1d. to 2s. 9d. *Mace:* 5 cases Penang sold at firmer rates, middling mouldy and wormy at 3s. 3d. to 3s. 4d., damaged 2s. 8d., pickings 2s., 1 case Ceylon at 2s. 5d.

STRAW PLAIT.—At auction 99 bales China of fresh import were mostly bought in.

STICKLAC continues quiet, but prices are steady; a small quantity of middling Siam having been sold at £5 2s. 6d. per cwt.

SAGO.—At the auctions Thursday 1,606 bags went off languidly, and only 500 bags were disposed of at about former rates; good small at 18s., middling grey at 16s. 6d., medium at 17s., good large at 17s. 6d. to 18s., the rest bought in, small at 18s. 6d. to 19s., large 17s. 6d., medium at 17s. *Flour:* 1,836 bags Singapore met no offers, and were all bought in at 14s. 6d. or withdrawn. Privately 500 bags have been sold at about 14s.

TAPIOCA.—The large quantity of 2,645 bags, chiefly of recent import, at auction met a slow demand, but prices were maintained. Of 1,710 bags fine white Penang, about 600 bags sold at 2¼d. Of 935 bags Singapore, about 400 bags sold, middling dull at 2d., good 2¼d., fine white 2⅜d. to 2½d., the remainder bought in, old 2d., middling to good 2¼d. to 2½d. *Pearl*, of 461 bags offered 288 bags dull to good medium sold at 21s. to 23s., the remainder good small bought in at 22s. *Flour*, 374 bags fresh Penang bought in at 2⅜d.

TIN.—A steady business has continued, and prices show a further slight advance. Closing quotations are:—Straits on the spot £96 to £96 10s., afloat £95, Banca £102, Billiton £96 per ton.

Phaeton (British barque), from Java, for Cork.

AT MAURITIUS.—From Singapore, Perthshire, Macassar.

OFF MAURITIUS.—Nov. 21, Angela P., from Bassein, for Falmouth.

CASUALTIES.

The Lucknow, Phease, London to Colombo, with a general cargo, put into Falmouth Jan. 5, leaky in topsides.

The Nuovo Abele, Java to Channel, is reported lost off the Coast of Africa, by the Cape mail; also the Verulam, from Penang.

The Eastern Star, which left July 13 for Singapore has not been reported, and fears are entertained for her safety.

THE Eastern and Australian Company's steamer *Normanby* arrived at Singapore from Brisbane on the 6th inst.

IT appears that American shipping is slowly but steadily recovering from the depression caused, or at least aggravated, by the civil war. The total tonnage of United States vessels is 4,800,652 tons, being an increase over 1873 of 104,626 tons. The canal boat tonnage, which amounts to 133,065 tons, is not included in these statistics. The tonnage of vessels built during the fiscal year ending June 30, 1874, was 432,725, which exceeded that of the preceding year by over 70,000, and is more than the tonnage built during any year since 1855. In the four months ending Nov. 10 official numbers were awarded by the Bureau of Statistics to nearly 700 vessels, the carrying capacity of which amounted to 169,654 tons. Of these 213 (nearly one-third) were new seagoing vessels, varying from 100 to 5,000 tons burden, and having an aggregate tonnage of more than 120,000 tons.

VIOLET, PARIS.

VIOLET, PARIS.

VIOLET'S

SPECIALLY RECOMMENDED AND PATENTED

PERFUMERY,

PARIS, 225, RUE ST. DENIS (FORMERLY 317).

NOTICE.

VIOLET'S Toilet Soaps are the only Soaps which, neutralised by carbonic acid, do not contain caustic alkali in the free state, and which are, consequently, inoffensive to the skin; they are detergent, oily, softening, and are perfectly suited for the sanitary purposes of the toilet, for shaving, and for the bath.

ROYAL SOAP OF THRIDACE.

The only Soap recommended by medical celebrities for hygienic purposes and he beauty of the skin.

The creamy froth constitutes a nutritive lotion, which preserves the brightness, he freshness, and the suppleness of the skin, and increases its whiteness.

VELOUTINE SOAP.

new composition of Glycerine and Bismuth.

EMAILLINE,

A NEW PASTE DENTIFRICE.

This composition preserves the enamel of the teeth, increases their whiteness, and exercises a hygienic action on the gums, which are kept in a firm, fresh, and rosy condition.

BALM OF VIOLETS.

A nutritive melting Pomade, for preserving and improving the hair.

VIOLET TOILET WATER.

For softening, strengthening, and refreshing the skin.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

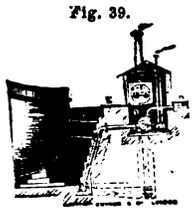
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

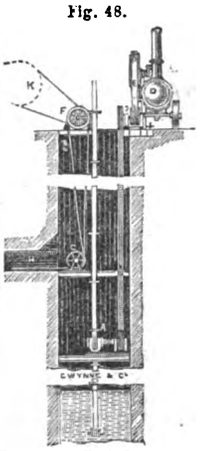
Fig. 39.



GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.

The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be ven

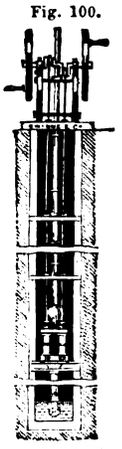
Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.

Fixed in a deep well, mine, or co.-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water.

Fig. 100.



GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,

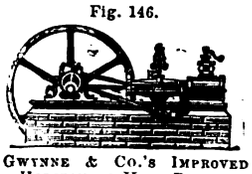
For Hand-power adapted for ordinary wells of any depth, of most careful construction, and on the most approved system.

Fig. 86.

GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These Pumps work without valve or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

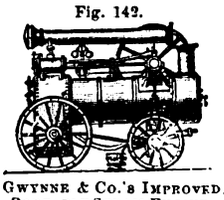
With or without Expansion Gea ,for economical working.
From 4 to 100-horse power.

Fig. 154.

GWYNNE & CO.'S IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.

These boilers are simple and compact They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

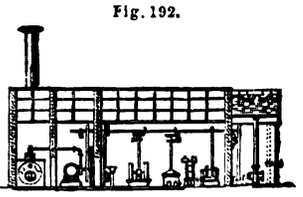
Fig. 142.



GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

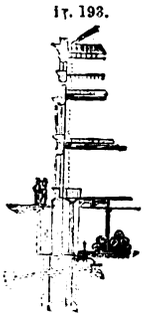
Fig. 192.



GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &C., &C.

The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.

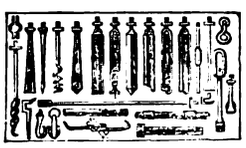


GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

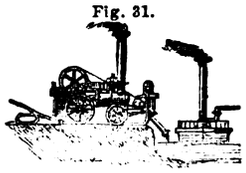


GWYNNE & CO.'S BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number very much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

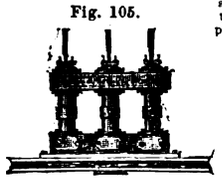
Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

* By Pacific mail *via* San Francisco.

THE MAILS, &c.

The P. and O. mail, bringing the above advices, was delivered, *via* Brindisi, on Saturday last, the 16th inst., being two days early. The Pacific mail from Yokohama, 6th Dec., reached London *via* San Francisco, on the 13th inst. The next inward (French) mail, with advices Yokohama 8th, Shanghai 11th, Hong Kong 17th, Singapore 24th Dec., which is due, *via* Marseilles, on Monday next, the 25th inst., left Suez on the 12th, three days in advance of its due date, and may be expected in London on Thursday or Friday next.

List of Passengers.

PASSENGERS INWARD.

Per steamer *Glaucus* (Holt's Line), arrived in London, Jan. 17.—From Hong Kong: Capt. Smith, Mr. G. F. Rotton. From Singapore: Mrs. and Misses (2) Gottleib, Mr. Mrs. and Misses (2) Benjamin.

By this mail to Brindisi, per P. and O. steamer *Malta*, arrived Jan. 13.—From Yokohama: Lieut. W. W. Wetheliffe, Mr. Panteleo, Mr. Francesco. From Hong Kong: Capt. Nares, R.N., Lieut. Aldrich, R.N. From Singapore: Capt. McKenzie. To Venice—From Shanghai: Miss C. Rothbert.

To Southampton, per P. and O. steamer *Peshawur*, expected to arrive Jan. 25.—From Shanghai: Mr. and Mrs. Croft. From Hong Kong: Capt. Parkin, R.N., Commander B. H. Bax, Lieut. T. T. Covey, Mr. S. N. Roe, Dr. W. B. Bennett, and five second-class passengers.

PASSENGERS OUTWARD.

Per French steamer *Hoogly*, Jan. 17.—To Yokohama: Mr. Lippman. To Hong Kong: Mr. Bessard, Mr. Hillier, Mr. Duval, Mr. Lancken, Mr. Wanecke, Dr. and Mrs. Clonth. To Shanghai: Mr. G. Rohl, Mr. E. Hunt, Mr. Lepper, and twenty-four missionaries. To Galle: Mr. Hamilton, Mr. and Mrs. Cangue. To Singapore: Messrs. Vidal, Mr. F. Velge. To Batavia: Mr. C. Winz, Mr. Randorf, Mr. Macleod. To Saigon: Mr. and Mrs. Harmonic, Mr. Opstelten, Mr. Boutinere, Mrs. Jouvet.

Per French steamer *Iraouaddy*, Jan. 31.—To Shanghai: Six missionaries. To Galle: Mr. and Mrs. Gausseremburg. To Saigon: Mr. Galles. To Singapore: Mr. Hill, Mr. Royds.

Per French steamer *Peiho*, Feb. 14.—To Hong Kong: Mr. and Mrs. Hutchinson. To Shanghai: Mr. Marsh, Mr. and Mrs. Volsch.

Per French steamer *Meikong*, Feb. 28.—To Shanghai: Mr. M. R. Mackellar, Mr. Gordon, Mr. and Mrs. Jerdein.

Per P. and O. steamer *Cathay*, from Southampton, Jan. 14.—To Shanghai: Mrs. Haslewood. To Ceylon: Mr. C. Latham, Mr. P. Tetley, Mr. S. le Cocq, Mr. E. Lemprien, Mrs. Gow, Mr. Chamberlain and friend. To Singapore: Rev. — Smith.

Per P. and O. steamer *Baroda*, from Venice, Jan. 22.—To Penang: Mr. Ainslie.—From Brindisi, Jan. 25.—To Hong Kong: Mr. Robslikke.

Per P. and O. steamer *Malwa*, from Southampton, Jan. 28.—To Hong Kong: Mrs. Armstrong, Mr. and Mrs. S. G. Bird.

Per P. and O. steamer *Nizam*, from Brindisi, Feb 8.—To Singapore: Mr. Miller.

Per P. and O. steamer *Peshawur*, from Southampton, Feb. 25.—To Yokohama: Mr. and Mrs. Troup.

Per steamer *Patroclus* (Holt's line), from Liverpool, Jan. 14.—To Penang: Mr. and Mrs. Bradford, Mrs. Hewick. To Hong Kong: Mr. E. Bois. To Shanghai: Mr. Geo. Mitchell.

Per steamer *Lotus*, from London, Jan. 14.—For Singapore: Messrs. W. Langdon, Hugh Marshead, J. M. Donovan (electricians), and C. S. Kent.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present French mail brings advices from this port to the 1st Dec.; and by the Pacific mail we have news five days later, viz., to the 6th Dec.; the P. and O. mail from London, Oct. 2, arrived out on the 20th Nov., and the following French mail of Oct. 9 was received on the 29th Nov. The following summary of news is from the *Japan Herald*:—

The interval has been almost entirely devoted to holiday making, causing a scarcity of political news, and an utter stagnation of business. On the 23rd Nov. the Japanese celebrated a religious *fête*, and on the 27th Okubo arrived from China, the day itself and both the preceding and succeeding one being kept as holidays. The return of Okubo and suite was signalled by salutes fired by the ships in harbour and the fort at Kanagawa. The following are the names and ranks of Okubo and his accompanying suite:—Okubo, Benritaishin; Tani, Rigugun Shosho; Ota, Titsudo Gon no Kami; Kanai, Gon sho Naishi; Tanaka, Rihugun Daijio; Hishijima, Rikugun Daijio; Kawabe, Rikugun Shosho; Fukuzaki, Rikugun Shosho; Hirakawa Takaye, 9th class of Customs; Kawamura Masa, 10th class, Home Department; Kanaji Fudatada, 13th class, Army Department; Honda Masaichiro, 2nd class Togai, Army Department; Horikir Atstada, 2nd class Togai, Army Department, and two servants. Okubo was received by a number of high officials from Yedo, and by the principal officers of this Ken. The day was devoted to public rejoicing. Every house was decorated with flags, lanterns, and flowers. The streets were filled with holiday makers in their best attire, and ornamental *dasshi*, perambulating conjurors, and open air theatres contributed to the amusement of the populace. In the evening the Town Hall was illuminated with devices in gas, and the streets were lit with rows of lanterns,

Digitized by Google

Much, however, as the nation at large may exult at the settlement which has been arrived at, the samurai do not seem to be overjoyed at the prospects of peace, and one of our contemporaries has stated that there is a rumour that they have demanded that Okubo should commit *hara-kiri*, the alternative being an insurrection. Probably the rumours of the attempted opening of Korea by the Japanese to foreign trade are set afloat with a view of pacifying these *enfants terribles* of the country. We have as yet no intelligence of the arrival of any of the troops on their return from Formosa, except another steamer full of invalids who have succumbed to jungle fever.

The next contemplated move on the part of the Government is a mission to Korea, to ask the Koreans to conclude a treaty of friendship and commerce, after the manner of the Western nations, and to stipulate for the opening of certain ports to external trade. This will bring things to a point; either guarantees for peace will be obtained, or war may result. We have too little information at present, and that unreliable, with respect to the alleged change of policy towards Japan—said now to be of a wholly pacific character—to be enabled to prognosticate the probable result of the Japanese mission. But it would certainly seem to be a little odd if Japan should insist upon performing upon Korea the same sort of opening process which the earlier Treaty Powers forced upon herself, very much to her discomfiture and chagrin. However, if the Japanese are not imitative, they are nothing, and they may as well undertake the task of opening Korea as any other nation; it would have to be done sooner or later. It is the only country which now remains in the isolation of its barbarism, that (favoured by exceptional circumstances) has been permitted to hold at defiance the ships of other nations that have entered its waters for the purpose of opening up political or trading relations with it. It is Japan's nearest neighbour, and it is therefore more especially incumbent on her that she should understand her relations with it. Up to this time the Japanese have shrunk from undertaking a war with Korea, but encouraged by their success over the Boutans (though they were a mere handful of savages, unarmed with modern weapons of war), and anxious to distinguish themselves, and to find employment for the troublesome energies of the southern samurai, the Japanese, in the event of their overtures being rejected, may take a sanguine view of the situation, and regard the subjection of that peninsula as a possible achievement by them; but as an initiatory step, the olive branch of peace is to be waved, and upon the sort of reception and treatment the Mikado's envoy meets with, peace or war will ultimately eventuate.

We hear that just prior to the settlement of the difference between China and Japan the Koreans despatched a special embassy to Peking with the object, it is supposed, of offering assistance to China in the event of her engaging in a war with Japan. This move on the part of the Korean Government rather belies the assurances lately hazarded of the pacific attitude which it has been stated the Koreans were disposed to assume towards the Japanese. Now, however, that the Koreans have learnt how China has been induced to humble herself towards Japan, perhaps the Koreans may deem it politic to follow suit.

In the Finance Department they have been making up the accounts for that costly folly—the Formosan Expedition, and it appears that very nearly ten millions of dollars have been expended from first to last (inclusive of Mr. Le Gendre's salary), less the three-quarters of a million which China has engaged to refund, subject to a payment of 100,000 taels to the surviving families of the massacred Lew Chewans. Of the total expenditure, less than one-half remains in the shape of transports, arms, and miscellaneous supplies deemed essential for the prosecution of the campaign. Altogether, it would be within bounds to say that the sum spent for which there is nothing whatever to see is more than six millions of dollars. The Formosan outlay will make a rather ugly item in the year's balance-sheet, but if the figures be manipulated with the ordinary dexterity, the usual surplus can nevertheless be maintained—on paper.

The principal topic of conversation, in both native and foreign mercantile circles, is the failure of Ono's Bank. This and Mitsui's were esteemed the two richest banks in Japan, and its failure, with liabilities which are variously stated at from four to eight millions of dollars, has given a great blow to Japanese mercantile credit, and it is said that several of the native houses engaged in silk speculations are compromised by the failure. The failure of the Ono Bank, and the fall in the price of rice (the latter consequent upon the termination of the difference with China), have caused something like a commercial panic in the Capital. One heavy holder of rice, who could read English, happening to be in Yokohama when the telegram was published announcing the arrangement come to with China, immediately posted to Yedo, and by employing a number of agents succeeded in selling off his entire stock at a few cents under the then prevailing price; in the course of the same day the buyers, very much to their disgust, heard that peace was assured, and that they had consequently bought at a loss. Some commercial houses in Yokohama are said to be interested in the Ono Bank's failure, having advanced money for the purchases of native produce, which has not come to hand, nor under existing circumstances likely to do so. It is believed, however, that foreigners will not ultimately lose by the bank's failure, as it is thought that the Government will deem it politic to meet the amount due to foreign creditors. This, however, remains to be seen.

On the 27th November the premises of Messrs. Busch, Schraub, and Co. were entered by thieves, and about $200 worth of goods successfully carried off. The stolen articles consist of a piece of cloth, some silk umbrellas, a meerschaum pipe, towels, and sundry other articles. An entrance was gained by forcing the back door of the store. A long naked native sword was found lying on the office floor; the scabbard was found close by, showing that the weapon had been drawn and held ready for use in case resistance had been met with. The thieves attempted to open a safe containing money and valuables with the key of another which is used in the office merely to hold the books and papers of the firm, but, of course, without success, the safes being different kinds.

The attempted agitation in favour of municipal government has been abandoned, the committee who charged themselves with taking the preliminary steps finding that the majority of the residents did not take sufficient interest in the matter to reply to a notice circulated enquiring whether they were in favour of, or opposed to the proposed change.

The case of Miller *v.* Adamson, Bell and Co., in which plaintiff (a stevedore) claimed the sum of $365.90 for discharging cargo ex *Braemar Castle*, and to which defendants put in a counter-claim for goods supposed to be stolen by the coolies employed by plaintiff, was tried on the 25th Nov., in H.B.M.'s Provincial Court, when a verdict was given for plaintiff.

A foot paper chase came off on the 27th Nov. The course was a very stiff one, and owing to the nature of the ground there was much difficulty in finding the paper, consequently many of the competitors were thrown out and forced to retire. Mr. A. Dare made a dead heat with his brother, and it has been decided to run it over again. Messrs. Hamilton, J. J. Dare, and A. H. Dare will be the hares.

The grand review in the neighbourhood of Tokio, which could not take place owing to the inclemency of the weather, has been further postposed to a day to be hereafter fixed—possibly until after some of the troops shall have returned from Formosa.

Mayesima, the Postmaster-General, and Mr. Bryan have left here in the *Golden Age*, to make the necessary arrangements for carrying the new postal treaty into force at Kobe and Nagasaki.

The annual meeting of the Yokohama Rifle Association was celebrated on the 24th and 25th November, and the autumn meeting of the Société Suisse de Tir on the 29th.

Baron De Schaeffer, the newly appointed Austrian Minister to this Court, arrived *viâ* San Francisco by the last Pacific Mail steamer.

The erection of lamp-posts is being actively proceeded with throughout the streets of the foreign settlement.

A trial, in H.B.M.'s Court, for sending an unseaworthy ship to sea, has ended in favour of defendants.

The anniversary dinner in honour of St. Andrew's Day took place on the 30th Nov.

HIOGO-OSAKA.

We have advices extending to the 2nd December; the P. and O. mail from London Oct. 2 was received on the 28th Nov. The following items of intelligence are from the *Hiogo News*:—

The case of Shimada Iwakitchi *v.* E. C. Kirby and Co., which was tried at H.B.M.'s Consulate on the 12th Nov., is one of considerable importance to the mercantile community, and the defendants deserve the thanks of every foreign merchant in Kobe and Osaka for the persistence with which they have resisted the plaintiff's claim. The latter brought an action to recover 124 yen for boat hire in transporting 3,854 cases of kerosine oil and 301, 815½ catties of pig iron from Kobe to Osaka, and the defendants pleaded that not only was a number of the pigs of iron missing, but also a quantity of the oil, which had evidently been abstracted from the tins by means of certain triangular shaped holes, such ae would be produced by stabbing the cans with a knife, and upon this, and collateral evidence as to the weights of the iron when it was delivered to the plaintiff's men and when it arrived at Osaka, judgment was given for the defendants. But previous to the hearing of this case at the British Consulate there had been a trial, connected with the same matter, at the Hiogo Saibansho, at which the position of the parties concerned was reversed, and the owners of the goods sued the carrier for short delivery. We need not enter upon the reasons which the native judge gave for his decision; suffice to say they were by no means calculated to reconcile those foreigners who heard them to the abrogation of those extra-teritorial clauses which are so obnoxious to Japanese statesmen. Failing to obtain redress from the Native Court, Messrs. Kirby and Co. refused to pay the carrier's claim for boat hire, hoping thereby to obtain compensation in this somewhat indirect manner for their losses. Confident of the justice of their case, they were nothing loth to leave the question of freight to the decision of a British Court.

Koda Iyemon, a Harima man, was beheaded on the 18th Nov.

Digitized by Google

He was sentenced in 1871 to three years' hard labour, but was allowed to get off with a fine because his parents were old. He afterwards, in company with three other men, all armed with swords or bludgeons, forcibly entered four houses in Hiogo, stealing therefrom 127 yen; he was twenty-eight years old. Another criminal named Yasu Jiro, a native of Mimasaka and thirty years of age, was executed in the same manner on the same day. He had, in company with two others, stolen clothes and money to the amount of twenty three yen from a house in Miki in the province of Harima. He afterwards joined with two other thieves, and by force of arms stole from three houses in Innaumura property to the value of eighty-six yen.

There has been a fire of some importance at Osaka. It broke out in a large temple in the Karahori, not very far from the old hospital, and it was not got under until the building was destroyed. The temple was used as a temporary barracks for some soldiers belonging to the Osaka garrison, and it is rumoured that the fire originated with the ignition of some gunpowder. It is said that a priest who was attached to the temple was dangerously burnt, through trying to rescue a favourite idol from the flames.

A public meeting is to be held at the Municipal-hall, Osaka, in order to arrange for the organisation of a fire brigade. All foreign residents of that port are invited to attend.

NAGASAKI.

Our advices from this port extend to the 27th November. The following items of intelligence are from the *Rising Sun*:—

On the 17th Nov. the Japanese fleet, consisting of the flagship *Riujho-kan*, the ram *Adzuma-kan*, and the two gunboats *Woonyo-kan* and *Moshin-kan*, left this port for the capital. The Russian corvette *Bogatyr*, 10 guns, 2,209 tons, Captain Schafroff, arrived from Kobe on the 23rd Nov. The Russian flagship *Askold*, and gunboats *Sobol* and *Vsadnik* will leave for Shanghai next week. The *Bogatyr* will remain here for the present.

On the 22nd Nov. the Japanese steamer *Madras* arrived here from Formosa. Among the Japanese gentry who came in her we noticed Okubo and suite, and the guns from the fort and Russian flagship *Askold* acknowledged their presence as soon as they landed. The *Madras* brought a great number of sick troops; many of them appeared to be very ill, and their sunken eyes and hollow cheeks told plainly the ravages fever had already committed. Had not the Formosan question been settled amicably unquestionably Japan would have lost many more of the veterans through fever as well as the sword, and taking this into consideration we think Okubo has acted very wisely indeed by accepting even so small an indemnity as Tls. 500,000. Okubo and his staff embarked again on the 23rd Nov. for the capital.

On the 15th Nov. the *Takasago-maru* arrived from Formosa, bringing 250 sick troops, ten of whom died on the passage. She also brought some large guns and about 1,100 rifles. We understand she leaves again shortly, which will in all probability be her last trip to Formosa. The Japanese steamer *Muriel* is expected from Formosa shortly, with more sick troops.

The French ironclad *Montcalm*, flagship of the China and Japan station, left here on the 24th Nov. for Saigon, where she will receive Admiral Krantz on board. Some of our readers will doubtless recollect the Admiral being appointed acting Governor of Saigon, during the absence of the Governor, some time ago. We understand the Admiral has been relieved, and will resume the command of the French fleet.

We hear the Takasima Coal Mine has been sold to an European firm in Shanghai, and believe it is Messrs. Jardine, Matheson and Co. Mr. T. B. Glover, it is said, will re-assume charge of the Mine on 1st January.

A subscription list has been round, to raise the funds necessary to repair the Episcopal Church. The amount subscribed is about $600.

On the 23rd Nov. this place was visited by a slight thunderstorm and very heavy rain, which lasted some time.

Mr. Soulier's Grand Circus will arrive here soon from Hiogo. It will be the first circus that has ever been in Nagasaki.

CHINA.

—o—

CHEFOO.

A correspondent of the *North China Herald* writes from this port as follows:—

A storm arose on the night of Nov. 22, and continued most of the following day, surpassing in severity anything known at Chefoo since its occupation by foreigners. Many of the foreign vessels in the harbour dragged their anchors. Two of them, the *Otto* and the *Handy*, were driven on the beach; neither of them were seriously injured, but the latter lies bedded in about six feet of sand, and the prospect of getting her afloat again is not very promising. The cargo and houseboats of several of the foreigners also came to grief.

A number of large native vessels were stranded. Two of them were broken, and their cargoes of wheat, beans, and rice taken possession of by the wreckers, and carried off, together with everything they could lay hands on. Thirty or forty small boats and sampans were lost. Two Chinese are known to have been drowned, and others are missing.

Winter seems to have set in in good earnest. The streams are frozen over and the ground covered with snow.

KIUKIANG.

The following account of an anti-missionary *emeute* which has occurred at this port has been forwarded to the *Shanghai Budget* by the Rev. V. C. Hart:—

In the early part of 1873 the Rev. H. H. Hall, of this mission, attempted to establish an out-station at Shui Ch'ang Hsien, twenty-five miles west of Kiukiang; and so far succeeded as to rent and repair a good sized building upon one of the main streets. A quantity of books and a complete set of chapel furniture were placed in the building, and everything seemed to favour a perfect success, when three of the leading men, called in the local dialect *Shen K'in*, "gentry," stirred up the people to drive away the assistant (native) preacher, which being accomplished, they then destroyed the books and furniture. Mr. Hall paid the *Hsien* (District Magistrate) a visit, requesting his assistance to ferret out the offenders, and take measures to have the chapel given over to us in the same condition as it was in previous to the riot. While in the yamen, a hired mob beset the place, and the officer accompanied him to the city temple, where he was considered safe, though the mob watched for him outside. Afterwards, during the night, he escaped. Owing to the illness of Mr. Hall, and his almost immediate return thereafter to America, an immediate settlement of the matter was not pressed for at the time. During the present year the Revs. Stritmatter and Hykes sent on their native preacher to Shui-Ch'ang to secure a suitable building. He had no difficulty in finding one, closed the bargain, and sent us word to come and see it, and take formal possession. On the 29th of October Messrs. Cook, Hykes, and the writer examined the building, and being satisfied with the contract made by our assistant, we paid a half-year's rent, gave orders as to repairs, &c., and, leaving a man with the native preacher to sell books, took our departure. The day after our departure the preacher and assistant were driven out by the "gentry," and threatened with death if they dared to return. Messrs. Stritmatter and Hykes at once proceeded to the Yamên. Arriving there they sent in their cards, which were immediately returned with the answer that his Worship was dining, and could not see them. A large crowd was gathering, and showed anything but peaceful symptoms. The Hsien retained their assistant and their cards for full three hours before he gave them an answer. During this time the rabble had entered the Court (the outer doors being thrown open), and broke in the lattice-work of the room in which they were sitting, making use of the worst epithets.

No sooner had they entered the K'ah-t'ang than the front doors of the Yamên were again thrown open and the rioters rushed in, crowded into the room where Messrs. Stritmatter and Hykes were, and made use of the vilest language. The Che-hsien was asked to issue a proclamation to the people, but he refused. They asked him if he would give an escort to their boat; he replied that he would, and would go himself with them. As the violence of the people became more apparent every moment, they accepted his proposal. Taking their native preacher between them, they started, but no sooner had they reached the street than the pent-up rage of the mob broke out in the wildest fury. The Hsien went but a few steps and returned, and a portion of the escort left with him. The people, while in the main street, merely used their fists and feet, pounding and kicking the three strangers, but, as soon as they reached the dilapidated wall, the rabble commenced to hurl bricks, on which the single remaining man of the escort ran away, his lantern being smashed. The preacher was dragged from between the foreigners and cruelly beaten in a side street. For over one fourth of a mile the mob followed them, between the wall and a canal, and pelted them with bricks without cessation. Mr. Hykes was hit several times on the head and back. Mr. Stritmatter received a cut on his head that bled so profusely that it drenched his shirt. Accidentally they ran into the canal and struggled for the opposite shore, while the friends of law and good order held up lanterns for their companions to pelt them with bricks as they were swimming across. It was now dark and cold, and they wandered about for two hours before they found their boat.

Upon their return to Kiukiang the matter was promptly placed before the American Vice-Consul. Up to the present date we have no intelligence how the case is receiving treatment. We can but hope, for the safety of all foreigners in this part of China, that it will be pressed with firmness.

SHANGHAI.

The present mail brings advices from this port to the 4th December; no later mail from London had been received. The following summary of news is from the *North China Herald*:—

There is no public news of interest to report by this mail. The local event which has attracted most attention has been the anniversary of St. Andrew, which was celebrated with the annual dinner, at the Club, on the 30th Nov., by between forty and fifty members of the St. Andrew's Society and a large number of guests. The dinner *menu* included not only the honoured and savoury "chieftain of the pudding race," but numerous other dishes dear to Scottish palates, and a collection of viands besides which would have made the venerable mother of Scottish cookery, Mistress Margaret Dodds, of the Cleikum Inn, St. Roman's, hold up her housewifely hands in amazement. The toast list which succeeded the dinner was spoken to with great humour and ability by the various gentlemen to whom the discussion of its elements was assigned, and was interspersed with songs appropriate to the subjects or to the character of the meeting, which

Digitized by Google

was one of the best ever held under the auspices of the Society, and was brought to a close shortly after the "wee short 'oor," with "Auld Lang Syne."

A numerous audience assembled on the 1st Dec., in the Masonic-hall, to listen to a lecture on "California," by George F. Seward, Esq., United States Consul General, being the first of a series of eight to be given during the present winter, under the auspices of the Shanghai Temperance Society. Mr. Blethen, president of the society, occupied the chair. The lecturer touched discursively upon the magnificent scenery for which the State of California is famous, its climate, minerals, agricultural and horticultural products: its rapid increase in population, educational and social institutions generally, its railways, &c. The lecture was couched in language at once forcible, picturesque, and graceful, and was frequently applauded. At the close a cordial vote of thanks to Mr. Seward was proposed by Mr. Medhurst, H.B.M.'s Consul, seconded by Dr. MacGowan, and carried with acclamation.

The Shanghai Gymnasium Athletic Sports were held on the Cricket Ground on the 30th November. The programme contained fourteen events, and the number of entries for each, rising as high in some instances as nineteen and twenty, gave the best guarantee for good contests. Through the courtesy of Captain Kraft the splendid band of the United States flagship *Hartford* was on the ground, and as the weather was most favourable there was altogether a very successful meeting.

The lower office of the Harbour Master's Department has now been transferred from the hulk *Ngapuhi* to the premises of the late firm of Messrs. Morrice, Behncke, and Co., at Pootung, the Customs having purchased property there suited to their requirements. The *Ngapuhi* has been sold to Chinese, we believe, and is to be broken up.

The barque *George Washington*, while being towed on the 27th Nov. towards the Pootung shore, took the ground when a little more than half-way across, just clear of the fairway. A further attempt was made to get her beyond the shipping next morning, three tug-boats being called into requisition; but their combined efforts were of no avail, and about noon one of the chain slings parted, carrying away the spar it was attached to, which necessitated the slacking up of the remaining chains. The sunken vessel is now lying across the river, and will have to be re-slung, an operation which will take some two or three days in her present position.

A few days since the steamer *Mongol*, while swinging to the ebb tide, took the ground with her stern, and the current swung her bow down the river, dragging both anchors home. The steamer fell athwart the hawse of the U.S.S. *Ashuelot*, carrying away the latter's bowsprit, figure-head, &c., starboard cutters and davits, and damaging the rails for some distance. The *Ashuelot* veered away her cables, but the starboard one being foul of the *Mongol's* anchor, had to be slipped at forty-five fathoms, having first been buoyed. Several cargo boats laden with cotton and other freight were alongside the *Mongol* at the time of the collision, and we regret to hear that a Chinese boatman on board one of them was crushed to death, while several others received severe bruises. One man was taken on board the *Ashuelot* and attended to by the doctor. Several of the cargo-boat men were also knocked overboard by the force of the collision, but they were soon picked up, none the worse for the ducking. We hear that the captain of the *Mongol* went on board the *Ashuelot*, and acknowledging the responsibility of his vessel for the consequences of the accident, expressed his willingness to settle all claims for damage. The *Mongol* after lying across the stream for some two or three hours was towed into mid-channel upon the first of the flood tide, with the assistance of the tugs *Fokelin* and *Sampson*. She then proceeded down river, having sustained no damage to herself from the collision.

We hear that the case of Carter and Co. *v.* Dee-say, which was heard in appeal by the Taoutai and H.B.M. Consul on the 6th of June last, has been settled by arbitration. A resort to this course was, we believe, suggested by Mr. Medhurst, as the Taoutai and he were entirely opposed in their judgments on the case. The Taoutai agreed, and each side selected two merchants, the Chinamen, curiously enough, choosing Englishmen to represent their interests. The result was a decision of the nature of a compromise, the verdict being also a perfectly unanimous one. We are unable to give particulars, but the fact that such a settlement has been arrived at shows that H.B.M. Consul has done well to suggest giving this method of adjustment a trial before adopting the last recourse of reference to Peking, which turned out so unsatisfactorily in the Tate and Hawes case.

A case remarkable for several reasons has been heard before Sir Edward Hornby, chief judge, sitting as magistrate in the lower court. Captain Douglas Scott, of the British ship *Laju*, charged his chief officer, C. C. Zimmerman, with desertion, and endeavoured to prove his allegation by means of multitudinous entries in his official log-book, regarding the accused's incompetency to perform the duty he had undertaken, and also as to his behaviour. It turned out that Zimmerman had been shipped at Newcastle, N.S.W., in place of the former chief officer, who was discharged in the colonies, and that he had no Board of Trade certificate as chief officer, though he had a Danish certificate. The captain had not formally disrated him, but claimed that he had virtually done so by an entry in the log-book. Sir Edmund Hornby told the captain that such an entry was not alone sufficient. The accused swore that at the time he was said to have deserted the vessel he went ashore because the captain told him to go, but that he slept on board each night from the 17th to the 20th Nov., and that he afterwards lodged at the Sailors' Home. He had been in communication with H.B.M.'s Consul since the 20th, and on the 27th went on board H.M.S. *Modeste* to be examined as to his competency. Sir Edmund, after hearing both sides and putting some very searching questions, characterised the charge as iniquitous and trumped up, and endorsed the captain's official log to that effect, also telling him that he had rendered himself liable to an action for false imprisonment.

A case of considerable interest and importance to charterers and shipowners, arising out of the loss of the *Lucerne*, has been tried before Sir Edmund Hornby. The Chinese charterer claimed the return of $500, money advanced under the charter, because a clause in the charter-party specially provided that, should the vessel be unable to reach Newchwang the charter should be cancelled, and the advance returned. The defendant, master of the ship, contended that the clause did not refer to ordinary dangers of the sea, by which the vessel was actually lost, but to the possibility of her not reaching Newchwang in time to load before the ice set in. His lordship reserved judgment, which has since been given for the defendant.

Any mistrust likely to be engendered among intending up-country excursionists by the account of the untoward experience of a shooting party given in our columns last week will be much lessened by the knowledge that H.M. Consul, Mr. Medhurst, is earnestly endeavouring to insure against the recurrence of such unpleasant incidents. Foreseeing a possibility that mischances such as befel the party in question were not unlikely to happen to sportsmen this season, Mr. Medhurst, we understand, took the opportunity, when at Chinkiang, at the end of last month, to urge the Taoutai there to issue proclamations prohibiting any molestation of foreigners who might be shooting in the district. Since the occurrence which has been reported, Mr. Medhurst has requested Mr. Hewlett, interpreter-in-charge at Chinkiang, to repeat the requisition, and see it carried into effect as far as possible.

At the meeting of the French Municipal Council on the 20th November an arrangement between the delegates of the two Councils as to the materials of demolition of Yang-king-pang bridge No. 2 was approved—each paying half the sum claimed by the contractor. The secretary was directed to communicate to the other Municipal Council the plans of an iron bridge to span the creek instead of the present No. 1. The question of vagrant dogs was taken up, but in the absence of a common understanding between the Chinese and the two Municipal authorities, the Council could only request their chief of police to instruct his men as far as possible to cause these pests to disappear. It was resolved to erect an iron railing, at a cost of about Tls. 300, between bridges Nos. 1 and 2 on the Yang-king pang bund. The other business was of a routine character.

A Chinaman has been charged at the Mixed Court with being concerned in attempting to steal about six tons of coal. The robbery was planned in a very ingenious way. Three lighters were engaged taking coal from the Naval Yard to H.M.S. *Frolic*, and when the work was finished a man from each lighter went on board the ship to receive payment. It was, however, noticed that the quantity hoisted from the lighters seemed less than ought to have been received, and enquiry was of course ordered. The three Chinamen, quickly understanding how matters were, hastened over the side of the *Frolic*. Two of them succeeded in getting into a sampan, which was rowed speedily away and got to shore before a boat's crew could be mustered in pursuit. The third Chinaman was not so fortunate. As he was going down the side of the ship, Lieutenant Davis had just time enough to seize hold of him, and drag him on board again. An investigation of the lighters was then made, and in every part of them where pilfer could be stowed was found a quantity of coal, altogether amounting to about seven tons! The Chinese magistrate remanded the prisoner, to give time for the apprehension of the two runaways, who it has been ascertained have gone to Ningpo.

The native community have been much interested lately in a romantic case of abduction. A Chinese General who had achieved distinction in the suppression of the Mahomedan rebellion in Yunan was passing through Shanghai on his way to have an audience at the capital, when he somehow had an opportunity of seeing a Celestial beauty of whose graces he became at once enamoured. The young lady was already betrothed, and the happy event of her marriage was within a few days of being consummated; but on his return from Peking the amorous general took steps to wrest the prize from the bridegroom expectant. By a liberal use of money he seems to have secured instruments ready enough to work his will. The maternal guardian of the young lady yielded to the influence of sycee, and gave the gallant suitor a preference over the gentleman who, by the sacredness of Chinese betrothal, had the right to the young lady's hand. A *tepao* who had been a detective in the Municipal service, and had become rich by blackmailing among the large class of unprotected

Digitized by Google

Chinese females who live in the foreign Settlements, was bought by the general, and he it is said again tampered with one or more other detectives, whose eyes and mouths it was desirable to have closed. On the 11th of the last Chinese moon, about 7.30 P.M., a carriage started from Wuhu-road, after some evidences of agitation and excitement which were witnessed by the neighbours. An hour afterwards the young lady left the carriage by the banks of the creek at Trefancha corner, and was handed into a boat which at once set out for Soochow. It is said, however, that the gallant General has regretted his ardent haste, paid handsomely for his trifling with the lady's feelings and his breach of Chinese etiquette, and given the betrothed an opportunity of recovering his *fiancée*. In the interests of the public service, a strict investigation is being made into the matter as far as the detectives are concerned.

There has been a fall of snow at Hankow to the extent of nearly three inches, and the races have been put off in consequence.

The father of the territorial Taoutai at Tientsin died on the 16th Nov., which obliged Ting Show-chang, the Taoutai, to retire from office. On the following day, by direction of the Governor-General Li Hung-chang, he handed over his seal of office to Woo Chan-chin, superintendent of the Imperial arsenal, and, since the death of Woo Tung-ling, the head of the Southern Legion at Tientsin. Woo is an Anhwuy man, and since he came to the province of Chili he has always been well spoken of.

The *Shanghai Budget and News Letter* prints the subjoined items of intelligence :—

It is with extreme regret we have to state that the Settlement has been supplied with another of the many warnings we have to be cautious in the use of firearms. A young gentleman in one of our leading hongs, while lounging about his room preparatory to dressing, took up a revolver and began to examine it. His "boy" in the next room heard the click of the weapon, as the chambers revolved. Presently he heard a shot, and, running in, found his master insensible on the floor. A shot had entered his brow and lodged about the brain. Medical aid was at once obtained ; but, on examination, it was found that trepanning afforded the only chance of saving life. All that can be said at present is that he is still alive.

The steamer *Paris*, lately from Hong Kong, has been sold to the China Merchants' S.N. Company, who have duly taken over the property, though she still flies the British flag. It is understood that after one trip to Hong Kong and Canton she will be transferred to the Chinese flag. Her crew has been sent home in the steamer *Deucalion*. We hear that the sum paid for the *Paris* was £32,000 sterling.

Sir Edmund Hornby has decided that the charter-party of the *Lucerne* did not call for a refund of the $500 advance money, seeing that her non-performance of the charter was not owing to the cause contemplated by that document.

General Raaslof, the Danish Ambassador to Peking, who arrived by the French mail on the 26th Nov., left on the 27th for Chefoo.

The first of a course of Winter Lectures has been delivered in the reading room of the Ningpo Book Club, by Mr. Lay, of the I.M. Customs. The chair was filled by H.M.'s Consul, Mr. Forrest, who in a few appropriate words, introduced the speaker of the evening.

The lecturer, without further preliminaries, announced as his subject the *San-Kwoh-Chih*, or "History of the Three States," a book which he said was one of the "four wonderful books" of Chinese literature. The interesting book he was to introduce purported to record the events that took place during the period between the overthrow of the Han Dynasty, A.D. 190, and the establishment of the Eastern ysin, A.D. 317, which, from the variety of characters which appeared on the stage, and the frequent and great changes that took place, was one of the most interesting periods of Chinese history. The *San-Kwoh-Chih* could not be regarded as authentic history, but rather as a historical romance, like "Ivanhoe," or "Joseph II. and his Court." Unlike the novels of Western authors, who compel their readers to follow them through many pages of their books before the interest of the story begins, the book before us introduces almost in the opening pages "deeds of broil and battle," cruel murders, tender episodes of love, &c., and continues, till the close of the volume, the recital of events that grow in interest as they advance. The speaker then proceeded to give from the mass of material at his disposal, and with which he showed great familiarity, such selections as he thought would instruct and amuse his audience. In going over the events a second time, the lecturer became so interested in some of the characters he was describing as almost to forget the fact that he was standing before an audience in a public hall, and now and then gave way to such audible expression of his delight, as one indulges in the seclusion of one's own study, or in the unrestrained intercourse of friends. This spontaneous irrepresible feeling of appreciation on the part of the speaker communicated itself to the audience, who responded in such hearty tones that neither the presence of the ladies nor the official gravity of the chairman could restrain them.

The course of lectures thus inaugurated, under the auspices of the Ningpo Book Club, is to be continued at intervals of two weeks during the winter. The next lecture of the course will be delivered by Rev. A. E. Moule, whose subject has not been made public.

HONG KONG.

Our advices by the present mail extend to the 10th December ; the French mail from London 23rd October was received on the 4th December. The following items of news are from the *China Mail* :—

The restrictive powers vested in the Colonial-office over the Government of this colony in all matters connected with land are not always exercised in a way that tends to public edification. Kowloong is a pretty fair example of the way in which enterprises which might result in an unlooked-for development of property are kept back by this policy, the concessions already made having only been obtained on the strong representations of H.E. the Governor. It seems that a most praiseworthy intention on the part of the naval authorities has been in like manner frustrated by the home officials. Some time since Admiral Shadwell obtained from Sir Arthur Kennedy the promise of a piece of ground on the hill near and to the south of Mount Shadwell, whereupon to erect an auxiliary naval hospital. The ground is absolutely useless for business or dwelling purposes, so far as the most experienced colonist can foresee, and the Colonial Government met the Admiral's views in a most liberal and sensible manner. The site was marked out by the Surveying-General and surveyed by his assistants, with a view to a perpetual lease being granted, when it is suddenly announced that the Colony cannot alienate any more land, and that the Admiralty cannot be permitted to build. It seems a pity that, when something which would tend both to the good of the naval service and of the neighbourhood has been, with the full consent of the local Government, fairly initiated, red tape should step in to render it abortive. We can perfectly well understand that no very friendly feeling exists towards the naval and military departments in the matter of land tenure, in view of the obstructiveness more than once manifested when colonial improvements were desirable. But when the local Government sees no objection, its judgment might be accepted as sufficient.

We learn that the result of the military examination at Peking resulted in the nomination of the following candidates, as *Chwang Yuan*, *Pang Yen*, *Tan Hwa*, and *Chuan Lu* respectively :—Chang Fung Min,a native of Honan ; Chaou Jui Yuen, also a native of Honan; Chow Chi Pang, a native of Chihli ; and Leu Yuen Hwai, also a native of Chihli. Thus the highest honours of the examination were carried away by men of Honan and Chihli.

Commenting upon the action of the Government in refusing a commission of inquiry into the conduct of the captain superintendent of police during the typhoon, which has now become historical, the *Straits Times* says :—"Truly the people of Hong Kong are unfortunate with respect to officialdom, and would do well to follow our own example, and secure a little influence in England, whereby their grievances might be represented direct at once to the Secretary of State, with some hope of redress. Such an influence would doubtless, at all events, secure them a little more consideration from their own officials."

There was an alarm of fire on the 30th Nov. at about one P.M. The Volunteer Fire Brigade turned out instantly, and was soon at the scene of the fire, which had broken out in a cook house at the Artillery Barracks, and was soon extinguished. The Government Fire Engine arrived opposite the City Hall, on its way to the fire, just at the time that the others were passing the building on their return. This might have been owing to some confusion in the bell ringing. As matters turned out, it was immaterial.

Mr. G. Glasse came up on the 28th before the Chief Justice to pass his last examination in bankruptcy. As the accounts filed by him did not appear to be in order, the examination was postponed for a fortnight.

We learn that the Chinese steamer *Fung-po* came here from Formosa to take on board a few large guns that had been brought here by a steamer from England. She will convey them to Formosa to mount in the fort which the Chinese Government are building at Anping.

The *August Leffler* met with an accident to her screw, in Saigon, after loading for Singapore, in consequence of which she had partially to unload and go into dock. This detained her for several days.

We are informed by the agents of the O.S.S. Company that the s.s. *Deucalion*, which left Shanghai on the morning of the 2nd December, was detained at the Woosung bar until the morning of the 6th.

Among the passengers arrived by the Messageries Maritimes steamer *Sindh* are :—Dr. Burdon, the Bishop of Victoria, Kong Hong, and Mrs. Burdon, and his Excellency Lobo d'Avila, the new Governor of Macao, with his family and suite.

The vacant space in the rear of the German Club is being built upon, and passers-by may see a process in operation familiar enough in the early days of the colony, but rather infrequent now. The granite to be used in the building is being hewn from the foundations and dressed on the spot, thus, we should imagine, saving the architect no little expense. This suggests whether the present facilities for conveying to the shore what thirty years ago was described as the only "export" of the island could not be profitably increased, to the benefit of the exchequer. We know all about the cheapness of coolie labour, but it certainly

Digitized by Google

seems that when heavy weights have to be moved in large quantities a tramway or slide would have the advantage. Some of the principal quarries are situated on the Pokfoolum road, and the construction of a serviceable slide to the beach would be simple and comparatively inexpensive. Were any such facilities for shipment to be found at the spots in question, the value of the quarries would, surely, be greatly increased, and they would command a proportionally higher rental. There is, if we are rightly informed, yet room for a considerable development of the stone trade--especially to Canton; but the possibility never seems to have attracted the attention of the Government. Those who suggest the idea may of course be wrong, but it seems worth noticing.

The third performance of the series by the Portuguese amateurs came off on the 5th inst., and was a great success. By special request "Lucrecia Borgia" was repeated, and was played with even more taste than on the previous occasion. The next piece was the laughable farce "Os dois Inseparaveis," which kept the house in a continuous roar of laughter from its commencement until the fall of the curtain. The abridged translation of the pieces distributed to visitors assisted to a great extent those unacquainted with the language in their comprehension of the plays. The attendance was a fair one. Amongst those who honoured the performance with their presence were H.E. Senhor Lobo d'Avila, the new Governor of Macao, family and suite. The performance was much enlivened by the attendance of the band of the Portuguese gunboat *Tejo*, which filled up the intervals with some good selections.

The opening yacht race of the season was sailed on the 3rd December by the following yachts belonging to the Yacht Club :—*Naiad*, *Wave*, *Aura*, and *Loiterer*. The start was made shortly after ten o'clock, and *Naiad* almost immediately took the lead, and was never afterwards caught, although *Wave* hunted her pretty closely during the first and second rounds. *Aura*, for some unexplained reason, gave up after completing the first lap, and *Loiterer*, finding her chance in a beat dead to windward against the cutters but very small, hauled down her racing flag at Green Island on the second round, leaving the two cutters to fight it out. *Wave* made a good show in the beat up to the mark boat, but *Naiad* got away from her in the run down to Cow-e-chow, and rounded that mark nearly five minutes ahead; and although the little one sailed fast she was "out of it," and, barring accidents, it was the *Naiad's* race. In the beat up the last time *Naiad* whipped *Wave* unmistakably, and rounded the winning mark at 4.26.35, *Wave* passing at 4.36.40. *Naiad* having to allow a minute and a-half for tonnage, won with 8 minutes 35 seconds to spare. The course as sailed was nearly fifty miles, and the time was very fair, considering the strong tide against the yachts in the beat to windward.

The third annual Hong Kong Flower Show will be held on Friday and Saturday, the 19th and 20th February next. The prizes will be 1st for plants in pots from $3 to cents 50; for cut flowers from $2 to cents 50; for vegetables from $4 to cents 25; for fruit from $2 to $1. These prizes are rather less in amount than those of former meetings, owing to the funds at the disposal of the committee not being in a very flourishing condition.

The traffic on the Pacific Line from China is increasing so rapidly that it is very probable that before long the Company will be compelled to despatch three vessels per month instead of two, as at present, in order to accommodate it. A dispute is pending between the Pacific Mail Steamship Company and the Central Pacific Railroad Company, owing to which the former company send their teas to New York *via* Panama instead of overland. The Railroad Company have sent an agent to England to endeavour to start a line of steamships on the China route in opposition to the P. M. S. Company.

Monsieur Giquel left Foochow for Takao to confer with Commissioner Shen Pao-Chen in regard to the contemplated works at the arsenal, also to superintend the mounting of the big guns, recently received from Europe, on the newly-erected batteries in the neighbourhood of Takao, and the Pescadores. We are informed that M. Segonzac, the sub-director, will shortly return from Formosa to take charge of the arsenal during the director's absence.

The police and lighting rate for 1875 is fixed at 7¾ per cent. for the town and 5 per cent. for outlying villages. The fire brigade rate ¾ per cent. These rates, as regards houses in Victoria, will be levied exclusive of a lighting rate of 1½ per cent. under section 12 of Ordinance, and a water rate of 2 per cent. per annum.

The *Daily Press* has the following on silk :—

The recent rise and subsequent collapse in the silk market, consequent upon the state of the market at home, forms a striking example of the altered state of trade in the present day as compared with what it was in the earlier days before the introduction of the telegraph, and of the steamers *via* the Suez Canal. At present the markets here are in the main ruled by the markets at home, instead of as formerly the latter being chiefly dependent upon the former. Under the old state of things the most important element to keep in view was the probable export; at present, the main fact which influences the markets here is the probable consumption. The supply likely to come forward in the course of a season still continues no doubt to be a matter demanding attention, but the merchant has now to work rather upon the immediate effect of the reported probable export from time to time than upon the ultimate effects which will be produced by the actual fact. Trade, both export and import, has in fact become a much shorter and sharper business than it was in olden times; and it has now come to a pass when the rule here as in other places must be "small profits and quick returns." The functions which, according to old ideas, were especially those of the merchant, can scarcely find scope in the present days of rapid intercommunication. The merchant can no longer make use of special sources of information and base his transactions upon nice calculations of the probable future course of markets, but has to be up and doing, ready to avail himself instantly of any change which may spring up, and to complete his operations before some new set of circumstances arise which may entirely alter the aspect of affairs. The sources of profit are thus considerably curtailed, and it may be taken as certain that the large profits of olden days are altogether a thing of the past. There can now be no shipments showing a margin of profit as compared with the prices last advised from home.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 17th Dec.; the P. and O. mail from London Nov. 13 arrived out on the 14th Dec. We take the following items of intelligence from the *Straits Times*:—

The Legislative Council has resumed its sittings, and held two meetings during the fortnight, viz, on the 11th and the 15th Dec. At the first meeting the Hon. Thomas Scott brought up the motion of which he had given previous notice, against the dual appointment of the Assistant Colonial Secretary and Clerk of Councils, which he supported by urging the importance and amount of work in the Colonial Secretary's department, rendering it necessary that one superior officer should be always in attendance at the office, whereas under the present arrangement both the officers were obliged to attend the Council. He was supported by the Hon. Dr. Little, and some discussion ensued, in which it was made pretty clear that, as matters stand, there was no lack of work in the Colonial Secretary's department, and the question was broached of appointing a second Assistant Colonial Secretary, to meet the increasing requirements of the office. It is remarkable that no one suggested the reduction of the work by the abolition of useless and unprofitable formal routine, which necessitates the despatch of half-a-dozen or more letters, in respect of perhaps a simple note of half-a-dozen lines. On the assurance by H.E. the Governor that the matter would receive the careful consideration of Government, the motion was withdrawn. At the meeting on the 15th, during the consideration of the estimates, some discussion arose on the question of increasing the salary of the Attorney-General to £1,500 per annum, in commutation of the fees hitherto received from the Maharajah of Johore and the Opium Farmer, which have recently been the subject of an inquiry before the Executive Council. The unofficial members preferred that the law officers of the Government, and especially the recently-appointed Crown Solicitor, should not be permitted to engage in private practice at all; the point was not, however, pressed, and the item was tacitly allowed to stand.

The expedition to Sunghie Ujong, though it will doubtless exert a good influence in preventing future complications like that which called for its despatch, has nevertheless not been so successful as was expected--the Datu Bandar, with Rajah Mahmood, having, during negotiations for surrender, evacuated their positions during the night, and escaped into the jungle. It appears that, believing they could thus obtain more favourable terms, they had determined upon submission to the Sultan of Salangore. The Sultan, however, denied them refuge, whereupon they asked him to intercede with this Government in their behalf. The deserted stockades were taken possession of by the Government forces, who found on entering that they had been looted by the Chinese miners, three head men of whom were, we hear, fined $3,000 each for their complicity in the disturbances. The troops and the police will be maintained at Sunghie Ujong for some time. The Governor returned in H.M.S. *Hart* on the 7th Dec., and the *Charybdis* returned to this port on the 12th. We regret to learn that during a skirmish which occurred while reconnoitring one of the Bandar's stockades, a petty officer of H.M.S. *Charybdis* received a shot in the back, from the effects of which he died on board on the 10th Dec., the ball having lodged in the spine.

The long pending appointments to the Residencies of the Malay States have at last been gazetted. Mr. J. W. W. Birch, late our Colonial Secretary, is appointed Resident at Perak, with Captain Speedy as Assistant Resident at Laroot; Mr. F. A. Swettenham as Resident at Salangore, with Captain Tatham, R.A., as Assistant Resident at Shunghie Ujong. Mr. Birch's place as Colonial Secretary is filled by the appointment of Mr. Braddell,

Digitized by Google

late Attorney General; Mr. Phillippo, Puisne Judge, becomes Attorney General, and Mr. R. C. Woods has accepted the vacant Judgeship.

A new and most unprecedented attempt to depreciate the currency is now being made by Chinese shopkeepers, a large portion of whom refuse to receive Mexican dollars of the old coinage—now no matter how bright or full in weight they may be—unless at a discount of from 5 to 10 per cent. How widespread this movement has already become may be inferred from the fact that some of the large Chinese shops, even those in close proximity to the Square, refuse to receive this dollar at all. Owing to the immense number of dollars of the old coinage now in circulation here, it is of course impossible to humour the shopkeepers in their whim without suddenly throwing out of circulation about half the bullion in the place, or submitting to a ruinous discount to enrich a small coterie who set up a law for themselves at the expense of the community. This pretended aversion to the old dollar is the more inexplicable, inasmuch as they have not only been in use here for many years, but the shopkeepers know perfectly well that they have only to take them to any of the banks or to any European merchant's office to pass them at their full value. Therefore, we can but characterise the refusal to accept them as an endeavour to inflict a wholesale swindle, that should be peremptorily checked at the outset, lest it entail not only great inconvenience but serious loss upon the community at large.

Considerable excitement has been awakened among the Chinese community by reports of the kidnapping of coolies for service in Deli, Sumatra. As usual, the reports were greatly exaggerated, but a case which occurred in midday in Market-street, where an attempt to drag off a coolie was frustrated and one of the assailants arrested, led to a revival of the stories and the posting of an inflammatory placard, accusing the police of complicity with the kidnappers; and during the excitement attendant on the trial of the case in the police-court, a mob broke into several houses and liberated all the coolies therein confined. The excitement was, however, allayed so soon as the Chinese became convinced that the Government would lend no countenance to the employment of illegal means by the coolie employers or their agents. With respect to the coolie question a petition has been sent in to Government by the European merchants and bankers, praying that the proposed immigration law may not be further proceeded with, as its tendency would be to check the immigration of labourers, whereas the only danger to which they are exposed lies in their engagement for service outside the colony under false pretences, which might be easily guarded against by supervision over their engagement and shipment for those places.

The third Dutch expedition to Atchin, consisting of two battalions of troops, has passed through the Straits. We have as yet received no advices of their movements, but presume offensive operations will be at once resumed.

H.M.S. *Charybdis* left on the 15th Dec. for Labuan, for the purpose of bringing over Governor Bulwer.

PENANG.

Our advices extend to the 19th December; the P. and O. mail from London 13th Nov. arrived out on the 12th Dec. The *Penang Gazette* contains the following items of news:—

Rumour says that the Government has entered into a most unseemly controversy with one of its officers. It would appear that Dr. Veitch, the Colonial Surgeon here, also holds the office of Health Officer of the Port, in which latter capacity he has to visit vessels which enter the harbour with the quarantine flag flying, and give them clean bills of health or otherwise, according to the state of health on board; on their leaving and in consideration of these services he has been in the habit of receiving a fee of $10 from such vessels as he grants bills to. The Government, or rather the medical department, has become alive to the fact that the levying of these fees is illegal, and Dr. Veitch has been called upon to repay the fees which he has received during his term of office in Penang.

The Governor in Council has issued an order directing that the magistrate of police of Province Wellesley, or in his absence the assistant collector of land revenue there, may cancel stamps. This will be a great boon to the inhabitants on the other side of the water, who have hitherto had to cross over to Penang when they wished to get any stamps cancelled.

At the annual Municipal election Mr. Foo Tye Sin was elected to the vacant seat *vice* Mr. John Allan, whose term of office expires at the end of this month. We congratulate our Chinese fellow townsmen on their having secured such an able representative as Mr. Tye Sin to attend to their interests.

The Criminal Sessions is still dragging itself slowly along. The special jurors have been engaged in investigating a case of fabricating false evidence. There are yet eight more cases for them to try, besides two for the petty jury.

The captain of the Netherlands-India Company's steamer *Sunda* has been arrested on a charge of kidnapping. He has been bailed to the extent of $10,000 to appear before the Magistrate's Court on Jan. 15. As the kidnapped men are supposed to be at Deli we understand the Dutch authorities have been applied to by our Government to send them here, in order to appear against the captain. We of course reserve all comment on the case pending the trial.

We are glad to find that the services of two competent Tamil interpreters have been obtained in Ceylon for this colony.

We understand that it is Sir Andrew Clarke's intention to leave Singapore for Penang about the first week in January.

From Atchin we hear of heavy rains, and floods on the 3rd and 4th Dec., the water rising four feet six inches above ordinary levels. By the 9th, however, these floods had subsided. All the Dutch sick are sent to Java, and reinforcements amounting to about 1,500 men have just reached Colonel Pel from Batavia and Samarang. The health of the troops continues satisfactory.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—The interval had been the dullest for many months. The native festivities in celebration of the peaceful solution of the Formosan difficulty, and the failure of a large native banker, coupled with minor financial troubles amongst Japanese, had all contributed to increase the general dulness, and the only real demand for any goods had been for 28-32 Yarn, which was quite out of stock, and some enquiry for low qualities Nos. 16-24. There had not been any considerable business in metals, but suitable sizes of Bars and Rods had realised full quotations.

HANKOW.—Extreme quietude had continued. Grey Shirtings had been dealt in to some extent, but business in other goods had been of a retail character.

FOOCHOW.—No business had been done. Lead was quoted $8.50 to Teamen.

HONG KONG.—The arrivals during the interval, besides the mail steamers, had been the s.s. Formosa, Kjobenhavn, Crocus, Achilles, and Glenlyon, and ship Windhover, bringing full supplies of manufactured goods for this market and the North. There had occurred one of the dullest fortnights which had been known in the Import trade. So little had been done that quotations were quite nominal. The demand from the country districts had ceased entirely, and stocks in both first and second hands were accumulating, whilst supplies showed no signs of diminishing.

CANTON.—Lead: 200 pigs of LB or soft brand description had been sold at $8.45 to $8.50, which quotation, however, at the close was nominal, as there were neither sellers nor buyers. In consequence of the foregoing, WB was nominally worth $8.50 to $8.60 per picul. Quicksilver had a decided downward tendency, the current value being about $230 to $231 per picul.

BATAVIA.—The market continued extremely depressed, especially for English goods, most of which were lower in value, and the only articles saleable to any extent were Dutch 6/4 Madapollams, Calicots, and White Shirtings, prices of which were without alteration.

SINGAPORE.—The arrivals with general cargoes had been the Angostura from Hamburg, and steamers Yrurac bat and Ajax from Liverpool. The demand had been quiet during the fortnight, and sales had been on a moderate scale only. Prices showed little change.

PENANG.—Throughout the last fortnight the demand for Grey Staples had been exceedingly limited, and transactions had been on a very retail scale. Prices generally were unchanged, but in some instances had gone in favour of buyers.

EXPORTS.

TEA.

YOKOHAMA.—Owing to continued unfavourable advices from New York, the market had become very quiet, settlements for the fortnight hardly reaching 3,000 piculs. Irregular prices had been paid, and quotations were nominal. There appeared to be no decided pressure to sell, and no serious decline was quoted, although the lower grades could be bought on easier terms. The stocks were considerable, about 15,000 piculs.

HIOGO-OSAKA.—There had been very little business done, and late advices from America had probably had a depressing effect on the market. Settlements had amounted to 1,300 piculs, and stocks were about 3,000 piculs. Total settlements for the season to date had been 43,250 piculs, against the corresponding period of last year, 24,000 piculs. The market was weak at the close and quotations were nominal.

HANKOW.—Settlements, 1,516 chests; shipments on native account, nil. The Export of Hankow district Teas to November 28, 1874, 54,009,353 lbs.; ditto, 1873, 54,350,047; decrease, 1874, 350,694 lbs.

KIUKIANG.—No local business. Arrivals very small, and all forwarded to Shanghai on native account. Export from the commencement of season to Nov. 25, 1874, 21,800,117 lbs.; ditto, 1873, 19,765,937 lbs.; increase, 1874, 2,034,180 lbs.

SHANGHAI.—Black: The settlements had been small, and called for no special remark. The stock remained about the same; settlements for the fortnight are 1,200 chests; stock, 2,000 chests. Green: Arrivals from the country had nearly kept pace with the rather slack demand. English buyers had been the principal operators, the disparity which still existed between prices here and New York values deterring most American purchasers from acting. Prices were rather easier, a decline of about one tael all round having taken place. The following were about the prices paid:—For Country Tea, Tls. 22½ to 37 per picul; Pingsuey, Tls. 23½ to 30 per picul; settlements, 25,295 half-chests; re-shipments, 566 half-chests; stock, 89,735 half-chests.

Digitized by Google

FOOCHOW.—Messrs. Westall, Galton and Co.'s Weekly Letter says :—Only a trifling business has passed on our market, and settlements in Congou have only amounted to 4,559 chests. Congou : Without any material alteration to quote, settlements may be said to have gone slightly in favour of buyers. Souchong : No change to notice. Oolong : Settlements show no change on late purchases. Flowery Pekoe and Scented Teas : No transactions. The exports to Great Britain, the Continent of Europe, and the Cape of Good Hope amounts to 54,816,439 lbs., against 49,359,914 lbs. at the same time last year. To America, 1,629,232 lbs., against 2,266,479 lbs. To the Colonies, 11,868,907 lbs., against 12,216,531 lbs. last year.

AMOY.—Only some 5,000 half-chests Oolongs had been settled during the fortnight. Prices showed little alteration, but the market closed weak. Stocks, 16,555 half-chests, the purchase of which would close the season. Quotations are :—Fair cargo, $15 to 16 ; good cargo, $19 to 20 ; Superior, $21 to 22 ; Fine, $23 to 24.

CANTON.—Transactions during the fortnight had been limited, neither foreigners nor holders of raw leaf showing any disposition for business. The reason assigned for this is that there was but little true Tea on offer ; of Scented Orange Pekoe some 1,000 boxes only could be procured, and of Scented Caper less than 10,000 boxes. Congous : The year's yield was drawing to a close, although shipments continued to go forward from Macao pretty freely. Sales with prices are summarised as follows :—Scented Caper, 2,000 boxes at Tls. 13 to 22½ per picul ; Scented Orange Pekoe, 4,000 boxes at Tls. 15 to 23 per picul.

SILK.

YOKOHAMA.—The tenor of home news had discouraged buyers, and settlements had been on a limited scale. This, coupled with a want of money, had induced some of the dealers to offer their produce at lower prices, and the market was weak at about $20 decline. Stocks had increased. Settlements, from 1st July to date, 6,500 bales ; against corresponding period, season 1873-4, 8,600 bales ; 1872-3, 8,300 ; 1871-2, 9,000 bales ; stock, 1,300 bales. Silkworms' eggs.—The season had closed, and total settlements were estimated at about 1,300,000 cards. The exact figures of the total export will be reported next mail.

SHANGHAI.—Only trifling transactions had taken place, and buying had been confined to a few hands. Previous to the French mail of the 26th Nov., about 400 bales were taken, included in which were 50 bales Koo-fong-sing's Chop at Tls. 420 for No. 3, 30 bales Kukee's "Chin Jan" and "Kinhock" at Tls. 342½ and 312½ respectively, and 50 to 100 bales of Re-reels for the American market, besides several lots of Yellow Silks, and other sorts, taken principally on joint account with the Chinese. The market had since shown no improvement, and the bulk of the sales reported were said to be on joint account. Settlements for the fortnight, Chinas, 600 bales. Total settlements since 1st June, 54,500 bales ; against 1873-4, 44,700 bales ; 1872-3, 44,800 bales. Comparative unsold stock 1874, 13,500 bales ; 1873, 5,000 bales ; 1872, 4,500.

CANTON.—Messrs. Deacon and Co.'s Report says :—The position of this market has undergone but little change during the past two weeks, and quotations for almost all descriptions of staple are unaltered. No. 4 Tsatlee of "Kowkong district" has fetched $340 per picul, and there is no indication of a decline in rates. The demand has been of a moderate nature. For French mail only 70 bales were taken, and subsequently 240 bales have been added to settlements. It is said that no seventh yield will be forthcoming this season, and consequently a curtailed export may be anticipated. Arrivals are hardly worthy of notice, and about 1,500 bales are said to remain in the country. Loongkongs : Finest description only has been wanted ; a few bales called "Curio" have been bought at $445 per picul. Long-reels : Settlements for India are put down at 140 piculs and 50 bales. Re-reels have been in more active demand of late, and 500 boxes are reported settled. Waste : 300 to 400 bales of No. 2 quality have been purchased. Stock is computed at 700 bales Tsatlee, 150 bales Loong-kong, 100 bales Cumchuck and Lacklow, 100 bales Kow-kong, and 300 to 400 bales of inferior kinds.

The Java Company's steamer Madeira sailed yesterday for Batavia, Samarang, and Sourabaya, via the Suez Canal, carrying the Dutch mails, seventy-five passengers, and a full cargo. PADANG, JAN. 5.—The Netherlands Steamship Company's steamer Princess Amalia, from Southampton, 23rd Nov., arrived here yesterday.

LATEST TELEGRAMS.

CENTRAL ASIA.

(TIMES TELEGRAM.)

BERLIN, JAN. 13.—A strong Afghan force has been stationed at Herat to secure the obedience of Yakoob Khan. Yakoob Ameer of Kashgar has again sent Seit Mogascher Yakoob to Constantinople to tighten his relations with the Sultan, whose suzerainty over all Mahommedan Tartars he apparently acknowledges.

THE WAR IN ATCHIN.

THE HAGUE, JAN. 14.—The Government have received the following despatch, dated Atchin, the 9th inst. The troops have captured nine fortifications at Longbattah. The Dutch loss was twenty-one killed and 65 wounded, while that of the enemy was 171 killed. The squadron left on the 2nd inst. for the West Coast. A portion of Pedir has offered its submission.

COMMERCIAL POSTSCRIPT.

The prospectus has been issued—and will be found in full in our advertising columns—of the West of England Fire-Clay Bitumen and Chymical Company, capital £200,000, in five pound shares. The Company was first started in 1871, and a portion of the capital—£112,700—was then subscribed. The list of directors includes the name of Mr. H. N. Lay.

At a meeting of the creditors of Messrs. Rankin and Co., East India merchants, Liverpool, a statement was submitted showing liabilities provable against the estate estimated at about £50,000, with assets (consisting chiefly of estimated surpluses on produce pledged to Indian banks) of about £5,000, showing an estimated dividend of about 2s. in the pound. A resolution was passed to liquidate the estate by arrangement. It is stated that the deficiency is attributable to speculation in cotton and rice and to bad debts.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BAKER—On the 3rd Jan., at Lonsdale House, East Moulsey, Surrey, the wife of George Baker, of a son.

BERGAU—On the 1st Dec., at Kobe, the wife of J. Berg u, of a son.

COBBOLD—On the 5th Jan., at Ipswich, the wife of J. P. Cobbold, M.P., of a son.

COMRIE—On the 11th Dec., at Penang, the wife of David Comrie, of a son.

DE THIERSANT—On the 3rd Dec., at Hong Kong, the wife of Monsieur Dabry de Thiersant, of a son.

GROBIEN—On the 2nd Dec., at Hong Kong, Mrs. F. Grobien, of a son.

GUTTERRES—On the 29th Nov., at Shanghai, Mrs. E. B. Gutterres, of a daughter.

HOLWILL—On the 1st Dec., at Shanghai, the wife of Ernest T. Holwill, of a son.

HUTCHINSON—On the 3rd Dec., at Hong Kong, the wife of the Rev. A. B. Hutchinson, of a daughter.

MANGER—On the 26th Nov., at Hong Kong, Mrs. Alfred Manger, of a daughter.

MOSS—On the 30th Nov., at Yokohama, the wife of Charles D. Moss, of a daughter.

PELL—On the 1st Dec., at Singapore, the wife of Bennett Pell, manager of Eastern Extension Telegraph Company, of a son.

PLUNKET—On the 6th Jan., at Government House, Londonderry, the wife of the Hon. Arthur C. C. Plunket, prematurely, of a son.

RALLI—On the 6th Jan., at 18, Hyde-park-square, the wife of John A. Ralli, of a son.

WALTER—On the 26th Nov., at Kobe, the wife of John Walter, of a son.

MARRIAGES.

AFFOURTIT—BURKE.—On the 8th Dec., 1874, at H.B.M.'s Consulate General, Bangkok, Siam, by W. H. Newman, H.B.M.'s Consul General, assisted by Rev. S. R. House, M.D., Frederick Charles Affourtit, to Miss Mary Ann Margaret Burke.

DE RUIZ—AMOS.—On the 7th Jan., at the Catholic Church, St. James's, Spanish-place, by the Rev. I. Grant, S.J., Enrique Rojas de Ruiz, of Valentia, in Spain, to Nathalie Celia Mary, eldest daughter of T. J. Amos, and granddaughter of the late Sir Richard Ottley, formerly Chief Justice of Ceylon.

FALCONER—INGLIS.—On the 28th Nov., at Union Church, Hong Kong, by the Rev. James Lamont, Alexander Falconer, of Hong Kong, to Isabella Ashworth, eldest daughter of John Inglis, of Hong Kong.

Digitized by Google

M'DONALD—BOAG.—On the 12th Jan., by the Rev. Neil Brodie, Wm. M'Donald, of Yokohama, Japan, to Margaret Jessie, eldest daughter of John Boag, Cowglen House, Renfrewshire, Scotland. No cards.

TAVARES—MARIA.—On the 28th Nov., at St. Joseph's Church, Shanghai, by the Rev Father Desjacques, Pedro J. Tavares to Estephania Maria, of Shanghai.

WALSH—STEPHENS.—On the 14th Jan., at the parish church of Finchley, by the Rev. J. Greaves, B.A., Charles Frederick Walsh, of Hiogo, Japan, to Martha, eldest daughter of the late Henry Stephens, M.R.C.S., of Grove House, Finchley, Middlesex. No cards.

DEATHS.

ARMISTEAD—On the 10th Jan., at Addison place, Brixton-road, Alfred Armistead, aged 31, son of Thomas Armistead, of Scarborough, lately returned from China.

CAZENEUVE—On the 22nd Nov., at Nanlye-hamma, Iwamaye Ken, Japan, Simon Cazeneuve, lieutenant of artillery and Knight of the Legion of Honour.

CLEVERLY—On the 7th Jan., at Frantz Hall, York Town, Surrey, Mary, the beloved wife of Charles St. George Cleverly, late Surveyor-General of Hong Kong, aged 56 years.

LITCHFIELD—On the 8th Jan., at Portsmouth, William Litchfield, *The Times* correspondent, aged 54 years.

MAPPIN—On the 11th Jan., at Wharncliffe House, Clapham-park, Edward Mappin, of the firm of Mappin Brothers, of London and Sheffield, in the 65th year of his age.

MONOD—On the 29th Nov., at Yedo Charles Louis Monod, aged 31 years.

NOEL—On the 24th Nov., at Kobe, L'Abbé A. Noel, of Crépiat, France, aged 30 years.

SMITH—On the 4th Dec., at Singapore, Mrs. Ellen Smith, widow of the late J. C. Smith, formerly Commissioner of the Court of Requests and a magistrate of police in the colony.

SMITH—On the 29th Dec., at Craighouse, Buxburn, Aberdeen, Isabel Finlay, wife of James Smith, Imperial Customs, China.

THE TOTAL ECLIPSE OF THE SUN.

SIAM.

We are informed that the President of the Royal Society has received an intimation that Her Majesty's Government are prepared to grant £1,000 to secure observations of the total eclipse of the Sun in April next. According to Mr. Hind, this eclipse will give better opportunities for the observation of totality than are likely to be again offered before the close of the present century. Even if, therefore, it were not the duty of astronomers to do all in their power to secure records of all total eclipses, there is abundant reason why the approaching one should not be neglected. We believe that the course taken by the Government will give general satisfaction, the more so as the Royal Society and private observers are coming forward with money and instruments in aid of the modest sum granted from the national fund.

The world of science also is to be congratulated on the fact that the Expedition will be organised and controlled by a strong Committee of the Royal Society. Astronomical inquiries are now becoming so many-sided that the attempts of any one man, however eminent, to deal with them single-handed are most likely to end in disaster; in fact, the successful application of spectroscopes, polariscopes, and cameras to telescopes requires very special knowledge and a long practical apprenticeship, while the work to be done depends upon physical rather than astronomical considerations.

Our contemporary *Nature* prints the following important and interesting memorandum, by Mr. Hind, on the circumstances of the present eclipse and of the other important ones which occur during the present century:—

Although the course of the central line in this eclipse is mainly a sea track, yet in its passage from the Nicobar Islands, in the Bay of Bengal, to Siam, better opportunities for the observation of totality will be afforded than are likely to be again offered before the close of the present century.

Adopting the elements of the "Nautical Almanac," in which the place and hourly motions of the moon are derived from Hansen's Tables, I find the following points upon the central line:—

Greenwich Mean Time. H. M. S.		Longitude, East. Deg. Min.		Latitude, North. Deg. Min.		Sun's Altitude. Deg. Min.
19 8 0	...	92 36·9	...	7 34·2	...	71 8
19 14 0	...	94 20·2	...	9 1·6	...	67 51
19 23 0	...	97 9·5	...	11 10·4	...	62 38
19 26 0	...	98 9·9	...	11 52·7	...	60 51
19 28 30	...	99 2·5	...	12 27·3	...	59 18
19 32 0	...	100 19·7	...	13 15·9	...	57 6

If we lay down these points on the Admiralty charts of the Bay of Bengal and the Province of Tenasserim (British Burmah), we find the central line passing a little north of Kaikul, in the Island of Camorta, Nicobars; and, on making a direct calculation for Kaikul, totality is found to commence at 1h. 21m. 38s. local mean time, and to continue 4m. 27s., the sun being at an altitude of about 70 deg. I take the position of Kaikul, 6h. 13m. 31s. E. 8deg. 11·8min. N. The central eclipse, passing from the Nicobars, traverses Bentinck Island, where the maximum duration of totality is 4m. 17s., and runs between Mergui and Tenasserim, rather nearer to the former place than to the latter. By direct calculations I find—Totality begins at Mergui at 2h. 0m. 6s. local time; duration, 4h. 6s.; sun's altitude, 61 deg. Totality begins at Tenasserim at 2h. 2m. 7s. local time; duration, 3m. 57s.; sun's altitude, 60 deg. Nearly midway between the above places, or where a "conical peak" is marked on the Admiralty chart, the total eclipse continues 4m. 14s.

Bangkok (Siam) will be found to lie rather north of the central line. The circumstance of the eclipse at this point are as follows—long. 6h. 42m. 6s. E.; lat. 13 deg. 42m. 5s. N.

The partial eclipse begins at 0h. 51m. 6s. mean time at Bangkok, 134 deg. from the north point towards the west, and 168 deg. from the vertex eastward for direct image, the sun at an altitude of 76 deg. The total eclipse begins at 2h. 13m. 7s., and continues 3m. 54s., the sun about 57 deg. high, and the partial phase ends at 3h. 33m.

The invitation extended to British and other astronomers by the King of Siam to observe this interesting and important phenomenon within his dominions may be expected to bring together a number of competent observers in the vicinity of Bangkok; and in selecting localities for astronomical stations it must be very desirable to be enabled to form some idea of the extent of error to which the predicted track of the central line may be subject. On this account I have made a further direct calculation for the Siamese capital, taking the moon's position from the American Ephemeris, in which the tables of Professor Peirce are employed. With elements thus modified, the partial phase is found to commence at 0h. 50m. 42s., or 24 seconds only earlier than by Hansen's tables; totality begins at 2h. 13m. 32s., and continues 3m. 59s. Generally I may remark that between the longitudes of the Nicobars and Siam the track of central line by the American tables has about five minutes greater latitude than that given by Hansen's tables.

It has been stated above that the eclipse of next April may probably be the most favourable for observation that can happen during the present century. In the eclipse of 1878, July 29, the duration of totality is shorter, and the same is the case in the eclipses of 1882, 1887, 1900, &c. In the eclipse of 1886, August 29, the only easily accessible and favourable station appears to be the island of Grenada, in the West Indies, where the duration of total eclipse is 3m. 15s., commencing at 7h. 10m. A.M. local time, with the sun at an altitude of 20 deg.; thence the course of the central line is over the North and South Atlantic Oceans, to a point on the African coast north of St. Philip de Benguela. In the eclipse of 1892, April 26, the central line appears to have a sea-track through nearly its whole extent, if indeed, it touches land at any point, which requires a more precise computation than I have yet made to determine. The eclipse of 1893, April 16, is the only one that can compare favourably, as regards length of totality and track, with that of the present year; at a point in the vicinity of Ceara, in Brazil, the duration of total eclipse is 4m. 44s., with the sun at an altitude of 76 deg.

If, as is hoped, the Indian authorities also detail parties to observe the eclipse, as they have done on several former occasions—when the results obtained have been of important service to science, and have strengthened the respect in which the Indian Government is held by the native population, who are greatly given to astronomy—we may hope for three strong stations to the west of the Malayan Peninsula, and one to the east of it.

The French Government will be represented by Dr. Janssen, most probably at Hué, and it is probable that Professor Young may represent the United States at some station on the eclipse track.

The Royal Society's arrangements are being pushed forward with the utmost vigour, as the expedition must leave this country at the beginning of next month. It will proceed to India or Singapore by the vessels of the Peninsular and Oriental Company, which, as in 1871, is generously making some sacrifices to enable a larger number of observers to take part in the work. The siderostats to be employed are now being constructed by all the force at the command of Messrs. Cooke and Sons, of York, who have in some respects improved upon the original model.

THE TROUBLES IN SIAM.

The *Daily Telegraph* has the following on the Siam troubles, in its usual style:—

Serious news has come to hand from "the kingdom of the white elephant." The two Monarchs who reign there simultaneously have fallen out, and one of them is at this hour a refugee in the British Consulate. We are far from thinking that this intelligence will affect the funds, or interfere with any British digestion. Some time ago, when a corvette of Her Majesty's navy was cruising in the Eastern Seas, a boat-load of Princes came on board to inspect the vessel. The Commander presently noticed some confusion forward, and inquired the cause from an old quartermaster. "Oh, sir," said the indifferent Briton, "it's only one of them there Kings has tumbled down the fore-hatch and broke his neck." The tidings that one of "them there Kings" of Siam has got to loggerheads with his Royal brother will hardly rouse more interest here than the old sailor felt; but the Royal Astronomical Society, at any rate, will be concerned at the report. Only a few days back an invitation came from one or other of these Siamese Sovereigns, extending a most Royal welcome to any *savants* who might wish to repair to Bangkok to study the total eclipse of the sun, which will be visible early in April. The astronomers were to have all expenses paid, to live like fighting cocks—which is saying everything that can be said in Siam, where cock-fighting is a passion—and to be the guests of the King. The question now is which King invited them: was it Chau Fa Chula Longkorn, or was it Kromamum Bawarawichai Chau? The royal astronomers will look back to their letter of invitation with much anxiety to see which of these long names was appended; if the first, all may yet be well, for he is the winning card—the King of Trumps in the present game; if the second, it is the unfortunate fugitive. These Siamese twins of Royalty, whom the political knife has severed, are very different in authority. The first is the real Sovereign; the second is a nominal Ruler only, although he has command of the army. Considering that everybody of age in Siam is bound by law to military service, this ought to confer great power. But there are so many exemptions, and the country is so amphibious, that the force does not amount to much, and consists principally of elephants. Whatever it was, the "King Number Two" has disbanded it—the telegram says—rather than fight against "King Number One," which would, indeed, have been a grave step, seeing that "Number One" is considered and called a god, and supposed to be immeasurably above the very highest and noblest of human beings. Armed with this supernatural authority, the Number One King in Siam often initiates his reign by abolishing all the laws, and writing out an entirely new set; but this change, which would be so embarrassing in most countries, does not put out

Digitized by Google

the Siamese, because nobody knows and nobody cares what laws exist. An attempt to comprehend the system of Government in Siam ends in bewilderment like that which is felt about the two Queens in "Alice's Wonderland." The main facts are—the bamboo, which is used by every high official with great energy, and the will of the Number One King, for Chau Fa Chula is the real Ruler, and under him the Stick.

What to do with this refugee King must be a puzzle to Sir Andrew Clarke and the Foreign-office. It is evident that trouble is feared, for Her Majesty's gunboat *Thistle* has been sent to Bangkok to protect British interests. And it is eminently probable that the *Rex Primus* will insist that we shall choose between surrendering the *Rex Secundus* for decapitation, or losing our commercial privileges in the Meinam. If it were only the other one who had fled to us we might do anything; but our King is of the wrong suit. It will be a great pity if the invitation to study the solar eclipse falls through in consequence of this quarrel between their Majesties; not only because Bangkok is the best spot for observations, but also on account of the interest to be derived from a visit to Siam. It is one of the oddest, laziest, and cheapest kingdoms in the world, and as yet but little known. Life is an easy dream in a realm where, for eighteenpence, you can buy a hundredweight of rice, and where the finest fruits of the earth grow in such profusion that the pigs are fed on mangoes and pine-apples. The sleepy population, who have imported the Chinese to work and trade and manufacture for them, can go everywhere by water, so thoroughly has Nature provided abounding streams, rivers, and canals. They can make a house in a summer morning with bamboo and nina-palm, and the climate is so soft that a handkerchief or kitchen-towel is enough for them to wear.

(DAILY NEWS.)

The Siamese Kings have accomplished, apparently with success, that operation which we used to be told might have proved fatal to the Siamese twins—they have effected a separation. The two Kings quarrelled, and the First King getting the better, the Second declined to appeal to arms, disbanded his forces, and took refuge in the British Consulate. The two Kings of Siam are not twin and equal powers like the famous Sovereigns of Brentford, or some of the Roman Emperors, in cases where two brothers agreed to go share and share alike in the business of government. Nor are they like Ferdinand and Isabella of Spain, or the "Archdukes" of the later days of Spanish rule over the Netherlands. The Second King, in fact, is only a kind of first subject, who has indeed, a little Court and Ministers, and an army of his own, and is exempt from the duty of prostrating himself before the First King, but cannot make any application of the State revenues without the permission of his chief. Perhaps the system of government may be described as a good deal like that which prevailed in Japan down to the recent revolution from which so many remarkable results have already sprung. It is not improbable that out of the present quarrel in Siam and the flight of the Second King to the protection of the British flag a complete readjustment of the somewhat cumbrous system may arise. In a romance politely supposed to be descriptive of Eastern life, and which was almost a classic in the days of our grandfathers, a difficulty arose between two Eastern potentates, brothers if we remember rightly, who were trying to accomplish the difficult feat of ruling by divided and equal authority. Naturally they quarrelled. Thereupon one had a vision, in the course of which a voice declared to him that "divided sway the power that reigns alone abhors, and gives to"—we have forgotten the name of the dreaming Prince—"the throne." The other, however, declined to believe in the genuineness of this celestial proclamation, and the consequences were perplexed and disastrous. The Second King in Siam has apparently accepted the voice of destiny with a wiser submission.

THE PRESBYTERIAN MISSION TO THE FAR EAST.

At the last meeting of the English Presbyterian Mission held in the College-hall, Queen's-square, the Clerk read a letter from the Rev. Mr. Dale, resigning his charge at Singapore on account of the serious illness of his wife, who was ordered to England. He stated that he much regretted this step, but was compelled to do so; but that he intended to remain until a successor was appointed, which he hoped would be by the end of April of this year. A letter was also read from the congregation, in which a committee was named to obtain a suitable successor to Mr. Dale. The Rev. Dr. Fraser moved that Mr. Dale's resignation be accepted, and that his connection with the Presbytery continue till end of April. Dr. Fraser bore testimony to what Mr. Dale had done, and his prospects for the future. This was seconded by Mr. H. M. Matheson, and agreed to.

The Rev. Dr. Dykes reported on behalf of the committee appointed to consider the propriety of the ordination of a catechist in connection with the Singapore Mission, that, taking all the circumstances into consideration, it would be unwise to do so at present.

BRITISH RULE IN CEYLON.—In the course of the interview between the King of the Fiji Islands and Sir Hercules Robinson relative to the cession of the Islands to the British Crown, the following conversation, according to the *Melbourne Argus*, took place:—Sir Hercules Robinson: As I have been given to understand that some apprehension is felt that the operation of British laws upon a native population might be harsh, I wish to explain to you that there is not so much difficulty in the government of natives by Europeans as you might imagine. I was seven years in Ceylon, the native population of which island amounts to 3,000,000. [When this was translated, Cakobau expressed great astonishment, and remarked that that was twenty times the population of Fiji.] In some respects the natives of Ceylon are much behind the Fijians in civilisation, particularly in that very few of them are Christians. In appearance and dress many of the Ceylon natives are very like Fijians. It was found that these natives of Ceylon could communicate their discontents and wishes to the Government through their chiefs, so that all evils were promptly remedied, and the people were happy and content to live under British rule. Indeed, after about eighty years of British rule, it is preferred by the native population to native rule. In the same way, the Fijian people could communicate their wants through their chiefs, and the system would work as well as in Ceylon.—The King: I am very much interested to hear about Ceylon. As to the harsh operation of the English law, peace and rest is what we want. These are our riches. No riches are to be compared with these in the opinion of our chiefs. Tumult and disquiet are poverty. Of course, in order to produce fruit, labour will be required, but such labour, under favourable conditions of government, will tend to the peace and prosperity of the people. Any Fijian chief who refuses to cede cannot have much wisdom. If matters remain as they are, Fiji will become like a piece of drift wood on the sea, to be picked up by the first passer-by.

THE *New York Times*, in commenting upon the new Japanese Minister at Washington, whose presentation we have previously noticed, says:—The new Minister Plenipotentiary from Niphon, "Mr." Yoshida, is getting installed in the Reeside House, at the corner of M and Twenty-fourth streets. Educated at Rutgers College, New Jersey, and for some years a resident in Old and New England, he speaks English fluently, and will not, consequently, be humbugged as his predecessors, Mori and Yano, have been. His wife is about three and twenty years of age, slender, almond-eyed, and graceful, with a wealth of hair, very black and coarse. She brought a wardrobe made by an English *modiste* at Yedo, with rolls of brocades, silks, and crapes, which have excited much admiration among those who have seen them. These are to be made up as wanted, *à la mode*, and a suit of *café-au-lait* heavy silk is now being made here, with black velvet trimming, to be worn at the President's New Year's reception, with a black velvet bonnet, the plume of which will match the colour of the silk.

DURING the last two seasons a Russian expedition has been exploring in the extreme north of Siberia, about the vicinity of the lower Tunguska and Olenek rivers. This region was a virgin field for research. It lies some distance to the west of the country visited by Middendorf, and the natural features have been hitherto shown on maps in the vaguest fashion. Messrs. Chekanofsky and Mulier, two Russians of scientific attainments, have now travelled northward along the water-parting of the Tunguska and Olenek, and have made several important geographical discoveries, besides fixing several points. Their report was dated July 2, and they had not then reached the shores of the Arctic Ocean; but there is every prospect of their having had time to do so since, and so making a highly interesting journey, for our sole knowledge of this portion of the coast-line of Siberia is derived from the uncertain accounts of the surveyors despatched by the Empress Catherine to map out that limit of her dominions.

A CORRESPONDENT of *The Times*, writing from St. Petersburg, says:—From the Far East we hear that the Chinese rebels who had threatened to attack the Russian possessions on the Amoor River had actually crossed the frontier, and had reached the settlement of Shkolovaia, north of Vladivostok, in the Oussooree district, but that they were attacked by the troops the Government had lately assembled, and that the result was, naturally, the dispersion of the undisciplined Chinese bands. As irruptions of this kind from the Chinese territories can hardly conduce to the rapid colonisation of the magnificent Amoor country by peaceful settlers, it is probable that the Chinese Government will be advised to pay some attention to the good Government of this part of Manchooria.

A MEETING of the Anglo-Oriental Society for the Suppression of the Opium Trade will be held to-morrow (19th inst.), at the "Friends' Meeting-house," Bishopsgate-street, from six to seven P.M. A circular issued by the Society says:—"Our object is to urge that the British Government should entirely disconnect itself from and discourage the opium traffic, at the same time restoring to the Chinese Government perfect independence of action to deal with opium in any way it may please." An executive committee has already been formed, and many persons have given their names for a general council to take measures to bring the subject before the public and impress upon the Government the necessity of remedial legislation.

THE well-known travelling Special Artist of the *Illustrated London News*, Mr. William Simpson, is to give four lectures, in the Corporation Galleries at Glasgow, at the request of the trustees of the local Academy for the Fine Arts. He will discuss the history of ancient Egyptian, Assyrian, Greek, Hindoo, Buddhist, Mohammedan, Chinese, and Japanese art, having studied their monuments all over the East, from the Nile and the Bosphorous to the Ganges and Upper Indus, and thence to Peking and Yedo.

IT is stated that Sir Edward Creasy, the historian, who has been for some time at home on leave, is about to resign the appointment of Chief Justice of Ceylon, which he has held for more than fourteen years. It is said that the precarious state of his health would render a return to Ceylon in all likelihood fatal. Sir Edward's post is worth £2,500, and will be in the gift of the Earl of Carnarvon.

WE learn by telegram that Vice-Admiral Sir Charles Shadwell, K.C.B., has left Hong Kong in his flagship Iron Duke, Captain Arthur, *en route* for Singapore, to meet his successor in command of the China squadron, Vice-Admiral Ryder.

A PAPER was read at the Royal United Service Institution on Friday on the subject of "Proposed Alterations in the Annual Musketry Practice," by Captain C. K. Brooke, Brigade-Major at Hong Kong.

A MEETING of the Tower District Church Missionary Association will be held (D.V.) at the New Corn Exchange Hotel, Mark-lane, to-day. The Rev. George Ensor, Missionary from Japan, will give an address.

WE are glad to announce that from inquiries we are informed the Countess of Carnarvon is improving, and that danger may be considered as past.

THE Fly, composite gun-vessel, Commander John Bruce, arrived at Port Said on the 1st instant, on her passage to China, *via* the Suez Canal.

LONDON: MONDAY, JAN. 18, 1875.

CONSULAR REPORTS ON THE TRADE OF JAPAN.

The Reports from Her Majesty's Consuls in Japan for the year 1873 have been issued.

YEDO

Mr. Vice-Consul Dohmen, in his report, says :—

In carrying out the Consular instructions relative to annual reports on trade, commerce, and navigation, I can only say generally that this Vice-Consular district offers little or no information in this respect which can be of any practical use, either to Her Majesty's Government, or to the mercantile community.

As explained in a former report, the port of Yedo not being open to foreign trade, all foreign goods for, and all exports to foreign countries from, this market have to pass through the Custom-house of Yokohama, and are included, therefore, in the trade returns of the Consular district of Kanagawa. Hence no reliable statistics of the local transactions between foreign and native merchants are obtainable here. Moreover, there is no foreign trade of any consequence carried on here. The few foreign merchants who, on the opening of the city to foreign trade, have tried the experiment of opening establishments at this place, have found it to be an unremunerative speculation, and have, with the exception of two (non-English) firms, withdrawn from this market.

The expectations that were at one time entertained that the railway between Yedo and Yokohama would effect an improvement in the direct trade with the capital, have not been realised ; on the contrary, the little trade that was done previous to the opening of the railway, has since been transferred to Yokohama. This is explained by the circumstance that, owing to the great convenience and cheapness of travelling between the two places, the native merchant of Yedo now makes all his purchases of foreign goods at Yokohama, where he finds a great variety of articles, and, probably, cheaper prices than on the spot. The consequence is that the foreign Settlement of Yedo has become literally deserted.

But while direct foreign trade has diminished, the number of foreign residents has been steadily on the increase for the last four years. A reference to the register of the Vice-Consulate shows the number of British residents to have been three in 1871, 48 in 1872, and 115 in 1873, while for this year it already amounts to 154.

I have nothing new to report with regard to public works of this district. It is true that a small portion of the town is being rapidly transformed into a semi-European quarter, but it is not contemplated by the instructions that I should report on such matters. I should, however, have liked to furnish some details respecting the movements of the Japanese steamers plying between Yedo and the principal ports along the coast of Japan, as also about the operations of the two or three native banks that have of late been established here ; but the information which a foreigner is able to obtain on all matters of commerce and industry from native sources is so incomplete and unreliable that it would serve no good purpose were I to record the result of my inquiries on these subjects. Moreover, foreign merchants take little or no interest in such native enterprises ; hitherto, Japanese steamers, as well as Japanese banking establishments, are intended only for the accommodation of the natives themselves.

YOKOHAMA.

The import figures for 1873 are $19,535,758, and the export figures $15,095,218, giving a total of $34,630,976, being $523,040 in excess of 1873.

In imports—Cotton manufactures exhibit a decrease of $1,460,742 ; woollens, a decrease of $1,928,274 ; mixed cottons and woollens, an increase of $1,188,701 ; arms and ammunition, an increase of $126,791 ; metals, an increase of $251,171 ; miscellaneous (foreign), an increase of $1,221,485 ; miscellaneous (local), an increase of $73,501.

In exports—Silk shows a decrease of $127,844 ; silkworm-egg-cards, an increase of $1,111,573 ; tea, an increase of $278,316 ; copper, an increase of $236,423 ; miscellaneous, an increase of $24,785.

The export of silk for the year 1873 shows 11,869 piculs 48 catties, valued at $7,050,656, against 10,252 piculs, valued at $7,158,500, exported in 1872.

The year opened unfavourably for exporters. Highly discouraging news from the home markets and the unwillingness of Japanese silk dealers to accept any reduction on the high closing prices of December, almost put a stop to business.

Mr. Consul Robertson remarks :—

The close of 1872 showed a considerable increase in the consumption of many kinds of goods, especially cotton and woollen mixtures, which, for the most part, were readily saleable at a fair profit. On the supposition that this demand would not only continue, but probably increase, orders for more goods were sent home, which proved, however, to be far in excess of the requirements of the country. The increase in the stock of French mousselines, consequent upon the excessive importation, has been latterly a serious loss to importers. While on this subject I cannot help mentioning that the French and German manufacturers seem to be running English manufacturers very hard in the production of certain goods specially adapted for this market. The clever and careful way in which patterns are imitated is an example well worthy of attention. The present position of the import trade of this port is far from healthy, and were it not that there are so few channels open for the employment of capital in other directions, I feel certain that many of our merchants would be glad to relinquish this branch of the trade altogether, except on commission for others. The keen competition here, the facilities afforded by banks, the easy system of financing at home, the want of sufficiently large enough markets to take off the enormous production of Lancashire and Yorkshire all militate against the import trade being a successful one. Moreover, by means of the telegraph, though still in imperfect working order, goods, for which there is any demand, or of which the stock is small, can be sent for and laid down in three-and-a-half to four months, thus at once counteracting any benefit which in former days might have accrued in consequence of the length of the voyage attendant upon sailing ships. Indeed it is not necessary to go to Europe for supplies, as on the least margin of profit being shown China is only too ready to supply Yokohama with any goods she may have suitable for this market, Hong Kong answering any demand for yarn, whilst Shanghai soon responds to any inquiry for shirtings.

On the subject of silkworm egg cards, he says :—

There were exported in 1873 1,409,537 cards, valued at $3,032,360, against 1,280,525 cards, valued at $1,920,787, exported in 1872. I am inclined to think, however, that the valuation placed by me on the export for 1872 was too low, namely, $1 50-80 per card, and that $2 40-00 would have been a fairer valuation, thus giving $3,073,260 as the value of the export for that year.

The tea exported in 1873 amounted to 11,339,446 lbs., valued at $3,339,941, against, exported in 1872, 11,663,333 lbs., valued at $3,061,625.

In 1873 eighty-seven British vessels, with a tonnage of 75,176 tons, all with cargoes, entered the port, against eighty-eight vessels with a tonnage of 59,811 tons, entering in 1872. The increase in entries with cargo tonnage for the past year is 16,879 tons over 1872, but with numerically one ship less. The clearances in 1873 amounted to thirty-six vessels, with a tonnage of 31,419 tons, against fifty-seven vessels with a tonnage of 39,893 tons clearing in 1872. All the clearances in 1873 were with cargo, while of the clearances for 1872, fifty-five ships, with a tonnage of 38,475 tons, were with cargoes, the remainder clearing in ballast. There is a decrease, therefore, for the past year total under the clearances, of twenty-one vessels, with a tonnage of 8,474 tons, and of those with cargoes of nineteen vessels, with a tonnage of 7,056 tons as compared with 1872.

HAKODADI.

There is an increase in the foreign tonnage figures for this year, attributable to the Pacific mail steamships visiting this port not only more regularly but more frequently than last year, very nearly one-half of the ships' total being Pacific mail steamers.

There is a decrease in the imports this year of £46,409, owing to the natives having imported so largely in their own vessels. The exports show a decrease also, the figures showing a falling off of £19,541. This is to be accounted for by the fact that the natives export on their own account both in their own and foreign vessels.

Mr. Consul Eusden makes the following remarks in his report :—

But poor progress has been made towards the colonisation of this island, started five years ago. I hear of no more arrivals of colonists. A new road has been made from Hakodadi to Mow, and from Moruran to Tatsporo, the new capital of this island, but there are rumours now that this latter is to be given up, as it is found to be inconvenient and inaccessible in winter, on account of the bad state of the roads.

Postal communication with Yedo has been considerably improved, and is performed pretty regularly in ten days between the two places, a small steamer communicating with Awamai three times a week, each time taking over and bringing back numbers of Japanese, who, I am informed, come over here in the first instance to purchase foreign goods, which are to be found in every shop, some of which deal in nothing but foreign imports.

It has always been surmised there was gold in this island, but the spot was unknown, and it was strenuously denied by the officials. A visitor to Hakodadi, on his way to Tagholin, *vid* this island, has told me that he came across a party, consisting of four Japanese and five Ainos, busy washing gold on Government account. This was at Tofui, in the Tokeby or Biro district, about 160 ri from here on the eastern coast. The gold is found in the sea-sand all along the beach for miles, which is covered with thick layers of this black oriferous sand. The simple process consists in taking up a small basket of sand, washing its contents by the seaside, and collecting the gold, which is prevented from running off by a small sieve at the bottom of such basket. The said gentleman saw specimens of gold taken at different places, all being equally fine and rich samples. The Ainos ride over these fields of treasure, little knowing what they are trampling under foot.

Digitized by Google

HIOGO AND OSAKA.

The value of the total trade of the port of Hiogo in foreign vessels, excluding treasure, was £1,773,664; while that of Osaka was £273,226. The total number of vessels entered and cleared amounted to 300, representing a tonnage of 417,068 tons.

We find the following remarks on Hiogo :—

A good building for the Municipal Hall and offices, with police-station, small prison, and permanent sheds for fire-engines and water-carts have been erected in a central part of the foreign settlement. As no assistance could be obtained from the Governor to secure for the settlement a supply of pure water from the waterfall without our consenting that this should become an unreasonable speculation of some natives, it was decided that five large covered wells should be sunk in the most convenient parts of the settlement. These have been satisfactorily completed, and each of them can freely supply two powerful fire-engines, working simultaneously.

Trees and grass have greatly improved the appearance of our bund, and our small but fine park is now kept in perfect order. The public garden would also have been laid out long ago had it not been for the characteristic and patient perseverance with which Japanese study and insist upon all possible means which they think will eventually free them from carrying into effect obligations originally contracted. But this is not to be wondered at if we consider that the Convention respecting the right of foreigners to lease land within certain limits at this port like natives has for years past successfully been treated as a dead letter by the Japanese Government.

The Municipal Council has contracted for the lighting of the Settlement with gas from the works of an English company, which are being rapidly erected. Some fine dwelling-houses and godowns were erected last year, and building still continues on the foreign Settlement. The rapid increase of the native town is astonishing. Fairly drained and wide streets, at right angles, now divide the Kobe part of the town into large blocks, where many houses in foreign style are erected. On the hill slopes behind the town and Settlement comparatively good roads have also been made on a cheap principle, which will consequently prove expensive owing to constant repairs. But this appears to be the rule for Government works in Japan, the exception being those for which foreign skill and advice have been accepted.

A patent slip for ships up to 1,000 tons is being constructed under the superintendence of a French engineer, for the Government, quite adjacent to their foundry on the west side of the Kobe Bay, which has for some time been in good working order.

Of Osaka, Mr. Consul Gower says :—

The population, according to the census taken in 1872, is set down at 530,885 inhabitants; there is also a large fluctuating population. There are in Osaka 1,380 Buddhist temples, and 530 Shintô shrines. The neighbouring city of Kiôto returns 567,334 inhabitants, with 3,514 Buddhist temples, and 2,413 Shintô shrines. The bridges in Osaka are stated to number 1,251, and annually cost large sums to keep them in repair. Osaka possesses a large arsenal, where all kinds of guns are cast, and gun-carriages and appurtenances manufactured.

Osaka contains seventy-two primary schools, one college, and one academy, which are attended by about 10,000 pupils. The college and academy are under the direction of six English teachers. There is also a school for girls under the care of a foreign instructress.

The garrison of Osaka usually comprises eight battalions of foot soldiers (640 men and 100 officers form a battalion), also two companies of artillery. Some regiments of cavalry are sometimes quartered here.

I may mention, as an interesting fact, that Divine service, in the Japanese language, is daily performed in the neat little church belonging to the American Missionary Society. It is well attended by the natives, and the responses are given by them from translations into Japanese of the Book of Common Prayer.

NAGASAKI.

The value of imports amounts to $1,626,775, against $1,856,549 of the previous year, showing a decrease of $129,774.

With regard to exports, tea shows a heavy falling off, which may be accounted for by the fact that at the commencement of the year stocks of the previous season's tea still unsold were smaller than usual, the bulk of the purchases of 1872 having been made earlier than is often the case. Shipments during the first portion of the year under review were therefore necessarily limited, and the bareness of the market here, and favourable advices from home, caused higher prices to rule. The native dealers here, anticipating that equally good or better rates would be obtainable for the new crop, made their contracts with the producers upon a high basis, so that when the new leaf came to market, the offers of foreign buyers, based upon a depressed state of things in London and New York, were much below the expectations of the native holders.

Tobacco shows a falling off in the year's export of $228,998, the export for 1872 amounting to $374,108, while that for the past year is only $145,110. Somewhat similar causes to those above-named may be adduced to account for the large deficiency. At the commencement of the year stocks of old leaf were but small, and the heavy shipments of 1872 not having arrived in sufficient quantity to overstock the London market, prices there had not yet experienced the serious decline which eventually took place.

Writing about coal, Mr. Consul Flowers says :—

I need not remark that one of the principal articles of trade in Nagasaki is coal, and it is a pity to see so many of the mines in the vicinity of this port still remain undeveloped.

The Takashima mine has not falsified the predictions made of her producing qualities. A large increase has taken place in the production of coal, from 41,300 tons in 1872 to 82,460 in 1873.

Should the Takashima mine ever get exhausted, the supply can be kept up from other mines in the neighbourhood.

The Island of Koyaki, at the mouth of this harbour, contains many seams of coal, which for a great many years have been worked intermittently by Japanese from the outcrops by inclined drifts. The coal was carried up on men's backs in baskets, and the water was raised by means of bamboo pumps, or water-wheels, when in great quantity. There is one seam at Koyaki of very good bituminous coal of five feet, another of seven feet thick, besides minor seams. Several of the mines on this island have been abandoned during the past year, on account of not having proper appliances to work them. The coal having been all got from some distance from the outcrop, the raising of water, and the maintenance of ventilation, by the Japanese method, being too difficult and expensive, the output from these mines must steadily decrease, and ultimately disappear, unless some improved European system of working is adopted.

270 British vessels have entered and cleared during 1873, of a tonnage of 109,853 tons, against 211 vessels of 72,458 tons in 1872, which shows an increase of 59 vessels, of 37,395 tons, in favour of last year. The preponderance of this shipping has been engaged in the coal trade, preference being given to steamers for light freight. The total amount of tonnage, British and foreign, entered and cleared, has been 561,155 tons, against 477,376 tons of the previous year, showing an increase of 53,779 tons.

SIAM.

The Report of Consul-General Knox at Bangkok for the year 1873 has been issued. It contains a carefully tabulated statement of the shipping, import, and export returns, and is accompanied by the following remarks :—

Three very unfavourable seasons—the first caused by an excess, the other two by a scarcity, of rain, have had a very injurious effect on the commerce of this country. There is a decrease in the amounts of rice and sugar exported during the last year when compared with the amounts exported in 1871-72. This comparison will not, however, show what has really been the loss sustained by this country, for I have every reason to believe that a considerably larger area of land was put under cultivation in order to produce the crops of rice and sugar for 1873 than was the case in previous years. But though the rice-crop in most of the districts in which it is grown is certainly not a third of what was expected, yet owing to the very great excess of production over what is required for consumption in the country the people appear to have ample stores of food. It is also believed that the loss sustained even by the poorer cultivators is not such as to compel them to sell their buffaloes and cattle, and that they will therefore be able to retain them for the production of future crops.

The teak exported is in excess of previous years, though the want of rain allowed but a very small portion of what was ready on the banks to be floated out by the various creeks which lead into the Menam. There is, therefore, every probability that we shall see a large quantity of this valuable timber brought down to Bangkok during the rainy season of this year. There has also been a larger amount of teel seed exported than has been the case in previous years. This country appears to have many facilities for its production, and as the demand in Europe increases with every year it may become a valuable article of export.

The import trade also shows a serious diminution in almost every article. This must always be the case when the crops in Siam are bad, as the people are too poor to pay for such articles as they require except with the produce of their last crop. The shipping returns show that about one-half of both imports and exports were carried in British vessels, which far exceeded in number those of any other foreign nation.

As the Siamese Government continue to issue a coin unique as to its value, and as it is also well known that it has been very much debased of late years, it cannot be used except in this country. A new mint is now in the course of being erected, and we are promised a coin which shall be up to a certain standard. Unless, however, this Government exercises a more complete supervision over the officers employed in their mint than has hithorto been the case, either in this or any other public business, no improvement can be expected.

A BERLIN correspondent says that the report of Mr MAERTENS, Silk Inspector of Shanghai, has been made public by the German Government. Mr. MAERTENS states that the consumption of raw silk in Germany, especially in the Rhenish districts, is so considerable that a direct trade would be unquestionably beneficial, and recommends that henceforth the London market may be evaded. There is a line of steamers plying direct between Hamburg and China, by which the goods could be forwarded at easy rates, and there are German bankers in China, by whose intervention money transactions may be effected. In addition to this recommendation, Mr. MAERTENS suggests the importation of German spinning machinery into China and the establishment of German spinning works on the spot.

HIS MAJESTY the King of SIAM has forwarded letters to the Royal Astronomical and the Royal Societies inviting them to send out astronomers to observe the total eclipse of the sun on the 5th of April next. His MAJESTY has expressed his intention to consider the visitors as his private guests, and he will provide for their entertainment and transport. The Royal Society has appointed a committee to consider the question of securing observations on the eclipse.

THE PACIFIC MAIL COMPANY.

(BOSTON ADVERTISER.)

The Pacific Mail steamship enterprise is in a fair way to suffer unmerited discredit on account of the scandalous misconduct of some of its past managers—just coming to light. The Stockwell Government, under which the matters now under investigation arose, is no longer in power, and the real guilty persons cannot be reached by any penalties it is in the power of Congress to inflict. Besides, the prospect of obtaining any trustworthy information as to the disposition made of the enormous sums paid by the company and expended by Irwin, ostensibly to influence Congress, has almost disappeared. The natural inference is that the money was used directly as a corruption fund, and that the reticence of the witness comes from his anxiety to shield those who yielded to the seductions of his full purse; but it is not the only inference permissible. Men sometimes refuse to testify when their evidence would criminate themselves, and one is quite as much justified in the supposition that Irwin embezzled the whole sum entrusted to him, as in a suspicion that it was divided among representatives and senators. If Irwin has anything discreditable to himself to conceal, his tactics must be confessed to be very shrewdly conceived.

Whatever view may be taken of this affair of the contumacious witness,—and at present nobody is entitled to put forth any theory with confidence,—the course of the corporation, which was the prime offender, can only be characterised as most disgraceful. There could be no legitimate use for three quarters of a million dollars in procuring legislation. The sum appropriated and expended must have been intended as a corruption fund, into whatever hands it may have been placed. The act of the company was an audacious and unpardonable insult to Congress, whether the subsidy was obtained with or without the help of money. We are told that the Pacific Mail Company is the only great steamship line flying the American flag. That is true, and for that reason there was the less necessity for the use of an immense corruption fund in Washington, and the less reason for believing that it was used as such by the lobby charged with the expenditure. It is the misfortune of the company and its great enterprise that it was ever allowed to pass into the control of speculators, whose theory of business and of legislation is that every man has his price. That has been the rock upon which many fortunes have gone to wreck.

The losses of the Pacific line in the last three years have been compared by a disconsolate stockholder to a succession of defeats in battle. The prosperity of the company was almost uninterrupted down to the end of the administration of Allen McLane, about November, 1871. The internal affairs of the company were admirably, economically and honestly administered, and its dealings with other corporations and individuals were such as to keep it out of difficulties and injurious competition; but the moment the chief operations of the company passed from the ocean to the boisterous seas of Wall-street, and fell into the hands of "stock-gamblers," everything was changed. The old officers and the old agents were put out, and new seamen, new captains and new agents, all in harmony with the new order of things, were appointed. No one can say that they have not made a brilliant run of it, for the ocean is illuminated with their burning ships, and Wall-street is astonished by the magnificence of the stock operations of its officers and managing directors.

Nine noble vessels of the line in all have been lost—the *San Francisco*, the *Golden City* and the *Golden Gate* previous to 1871. The later record runs as follows:—In 1872 the *Bienville*, chartered by the company, was burned at sea during her passage from New York toward Aspinwall, and nineteen lives were lost. A week later the *America* was burned in Yokohama harbour, and two months subsequently the *Guatemala* was wrecked on the Mexican coast, twenty-three persons perishing. In the November following the *Sacramento* was lost on a reef off the Lower California coast. Last July the *City of Guatemala* was stranded on the Bahamas. The *Alaska* still remains ashore near Aberdeen, Hong Kong, whither she was driven in the typhoon of last August, and now we have advices to the effect that the *Japan* has been burned off the coast of Niphon. This latest calamity took place last Thursday, when the vessel was sixty miles from the port of Yokohama, and many lives were lost. The *Japan* was one of the old-fashioned side-wheel wooden steamers, and a craft of very considerable tonnage. Her place was to have been supplied by the *City of Peking*, now on her way to San Francisco.

THE PACIFIC MAIL INVESTIGATION.

The inquiry into the Pacific Mail scandal was resumed at New York on 28th December. Mr. Cole, president of the American Exchange Bank, was the first witness examined in reference to the deposits made by Mr. Irwin in the bank. He testified that on the 29th of May last two strangers entered the American Exchange Bank, and one of them presented a cheque for $115,000, signed by Colonel Irwin. He asked the presenter of the cheque what his name was, but this he refused to disclose. The amount was paid and the parties left, followed by a messenger, who saw them enter the Park Bank. On sending to the Park Bank, Mr. Cole found that the man who drew the cheque from the American Exchange Bank gave his name as King, and stated that he was postmaster of the House of Representatives at Washington. Another sum of $275,000 was drawn from the Marine Bank on a cheque sent for the amount on the same day; of the $390,000 paid on that day, $99,000 was paid by certified cheques, and the remainder in notes.

This occurred in May, 1872. The sums Mr. Irwin deposited to that date were only small sums, ranging from $1,000 to $4,000. On the 27th May three sums, viz., $100,000, $100,000, and $125,000, were drawn by different persons on certified cheques made payable to bearer and signed by Mr. Irwin. The large deposit of $735,000 was made on the 25th May. The two men who came for money on the 29th May appeared to know each other very well. Witness thought he could easily recognise King, but could not identify the other person. At the time of this large deposit by Irwin witness ascertained that the sum was deposited in cheques of the Pacific Mail Company. About one year after Mr. King had drawn the first sum of money from the American Exchange Bank he called again to draw another cheque, which was not so large in amount; did not remember the sum named in the cheque; did not know whether Mr. King had been at the bank lately. Witness submitted the account of Irwin with the American Exchange Bank and left it with the committee.

THE EX-POSTMASTER KING INVOLVED.

Beaumont Clare, assistant cashier of the same bank, testified that he had a distinct recollection of a large sum being deposited by Irwin, after having a brief conversation with Mr. Cole. The deposit remained in the bank two days, when the three first cheques were presented. The day after the two strangers called and presented the two cheques for the larger sum and were questioned as to the establishment of their identity. They went in to see Mr. Cole, who said it was necessary that they should be identified, as they had paid money before on forged cheques, and did not wish to be caught again. The man who was followed to the Park Bank left then and came to the Equitable building, at the corner of Cedar and Broadway, where he entered the elevator and was lost sight of. Witness went down to the cashier of the Park Bank and ascertained that the man who drew the money was William S. King, postmaster of the House of Representatives; the cashier of the Park Bank was J. L. Worth; saw the gentleman who drew the $115,000 cheque about a year afterward; he was recognised by witness, who said he remembered him addressed as Mr. King; witness described Mr. King as a medium sized man, wearing bushy side-whiskers; thought Irwin was in the city at the time; did not know if Irwin drew any cheques; no effort was made to ascertain by the authorities of the bank if Irwin was in the city; the book-keepers in the bank were rotatory and were changed every six months or so.

The evidence connecting ex-Postmaster King, member elect of the next House of Representatives, with the Pacific Mail transactions, has created renewed excitement at Washington on the subject. King testified last year before the same committee, in the most positive terms, that he had received no money, and disbursed none to influence the passage of the Pacific Mail subsidy. His testimony is so fully contradicted by the statements made to the committee in New York that people in Washington cannot understand how King can defend himself against the charge of perjury. The present Congress has no power to deal with him, but the next House, it is thought, must surely expel him, if the law spares him for its action. Various guesses are made as to the identity of the person who was with King and received the $275,000 cheque, but no satisfactory suggestion is made.

When the committee met after adjournment the books of the Pacific Mail Company were produced.

Samuel J. Harriott, banker and broker, and a member of the banking firm of Harriott and Noyes, testified that he had been five years in the business; knew Stockwell, but not Irwin; during the year 1872 he had bought and sold stock of the Pacific Mail Company and Panama Railroad for him. A cheque numbered 2,365 was handed him to recognise, which he failed to do. The cheque was dated May 24, 1872. On that date witness received no stock from the Pacific Mail Company. After referring to his books witness stated that on the 21st of May, 1872, there was an entry of $228,756.98 for 4,700 shares of Pacific Mail to the credit of A. B. Stockwell. No other sum from either Irwin or Stockwell was received from the 21st of May to the 4th of June, inclusive. On the 15th of May the firm delivered 5,000 shares of Pacific Mail stock, for which they received $433,602.50 in cheques from the company. These were all the transactions which occurred with the firm in the month of May. Witness did not know Irwin at all. Never sold stocks for the Pacific Mail individually, but only for Stockwell. On the 9th of September, same year, Stockwell deposited a cheque on the National Bank of Commonwealth for $500,000. This cheque was dated September 7. The cheque was indorsed on its face A. B. Stockwell and Harriott and Noyes. On examining his books witness stated that the entry on September 9 was Pacific Mail Steamship Company exchanged $500,000. Mr. Stockwell had for this a cheque from the firm on the Continental Bank for $507,547.95. The account closed for that year on the 2nd of November, 1872. On the 15th of May, 1872, the highest market price of Pacific Mail stock was 85⅝; 21st of May, 83½; 24th of May, 81¼; 27th of May, 77½; 31st of May, 75; and 15th of June, 69.

The committee retired into a private session to examine the books of the firm of Harriott and Noyes with regard to the accounts of other parties with the firm. After the session had been declared open, the examination was continued.

The witness was told by Mr. Hatch that on the 4th of May, 1872, a cheque for $650,000 had been deposited with the firm by R. B. Irwin, but this witness said that it was not deposited, and was not entered on their books. On the 15th of May a cheque of the company, credited to Mr. Stockwell for stock valued at $483,612.50 was deposited. On the 21st of May a cheque for $228,275.83, and another for $1,515 were deposited, both for 4,700 shares of Pacific Mail stock. On the same date cheques were received from Mr. Markham to the amount of $831,250 for stock.

Horace E. Merrill was sworn, and testified to the authenticity and correctness of a statement made by him, showing the highest and lowest quotations of Pacific Mail stock, from the 15th of May to the 15th of June, 1872.

Mr. Delamater, cashier of the Marine National Bank, testified that he had held that position since 1861. Being asked with reference to two strangers who were followed to his bank by Mr. Clark, witness desired to refresh his memory from the books of the bank and was allowed to appear at a future time for examination.

J. G. Worth, cashier of the Park National Bank since 1863, testified that he knew Mr. King, but was not very intimate with him; had learned from the note-teller that King had taken out notes on deposit amounting to $115,000 or thereabouts, in May, 1872.

Thomas Ellis, note-teller of the Park National Bank, testified that on May 30 he received from Mr. King $112,500, to be used as follows: $40,000 to be placed in St. Paul Bank, Minneapolis, Minnesota; $15,000 to pay a note about to reach maturity; $1,000 to be placed to the credit of St. Paul Bank of Minnesota, and had also issued six certificates of deposit at his instance, amounting in the aggregate to $56,459.17, issued to the order of William S. King.

Miscellaneous.

—o—

THE FORMOSA DIFFICULTY.

A correspondent of the *New York Herald*, writing from Yedo, upon the subject of the settlement of the Formosa difficulty, says :—The news of the successful termination of the conferences in Peking has been welcomed throughout Japan with the liveliest satisfaction. The prospect of war was never attractive, except to a certain small and irresponsible class, which had neither opportunity nor inclination to estimate the possible consequence of so grave an event. Among the higher officers of the Government, as well as the people at large, there was always an earnest desire to avoid an actual conflict, but at the same time a rigid determination to maintain in the firmest manner the position assumed at the outset of the Formosa difficulties, and to vindicate the just claims of Japan at whatever hazard of peril or sacrifice. Thus, while the negotiations of the Commissioners in China were all directed toward a pacific solution of the questions at issue, the energies of the authorities at home were applied to preparing the most thorough means of meeting the issue in case hostilities could not be honourably averted. The inhabitants of every degree, including the Emperor and his family, the nobles and the mass of the people, offered voluntary contributions to the extent of their ability for the support of the administration in the contemplated crisis. Large bodies of citizens enrolled themselves, without solicitation or suggestion, as volunteer troops, and urgently petitioned for the acceptance of their services in the field. Throughout the entire progress of affairs there were many who looked to no other result than that which has happily arrived, and these, perhaps, find the most genuine satisfaction of all in the existing condition of things. But among the whole people there is hardly a voice of discontent, either with the final arrangement or the means by which it was secured.

The *Hour* says :—Of course, there are the Chinese and the Japanese views of the treaty ; but in any case it is an unquestionable triumph for the younger, more vigorous, and more enlightened nation, Japan. It is true that Okubo has recognised the complete sovereignty of China over the rich and beautiful island of Formosa, a sovereignty which both geographical reasons and prior occupation would naturally give to that empire. But in return the Chinese admit the crucial point in the contention, which is that rights correspond to duties, and that sovereignty can never be coupled with a disclaimer of responsibility. Moreover, they agree to pay a sum of money to the Japanese Government. The amount is inadequate, and to save the pride of the Peking mandarins it has been left doubtful whether the money is meant to be a kind of indemnity in the proper sense of the word—that is a refund ing of the expenses of the Japanese expedition, or whether it is only a compensation to the families of the murdered seamen—or a mere equivalent for the Japanese outlay in house-building and road-making in Formosa. Still, the fact remains that, whether the Chinese *amende* be sufficient or not, it is a manifest confession of error made by a stiff-necked and absurdly arrogant Power ; and with the Chinese a confession of error means not so much an act of sincere repentance as a discovery of military and naval weakness. China has always affected to despise Japan as a *parvenu*, and as a mere borrower from the Celestial Empire in religion and literature. To the starched diplomatists of Peking the recent action of Japan must have seemed like political blasphemy, and there are, therefore, only two explanations of the late humiliation of the Imperial Government. The cardinal reason is that, so far from advancing, China has, if anything, retrograded within the last twenty years, whereas Japan is making daily preparations for its future incorporation into the charmed circle of civilised nations. Japan has broken the neck of feudal despotism, and done it, some may think strangely, by the aid of a theocracy. It has never been crushed by the leaden weight of Confucian pedantry and materialism, and is now able, in virtue of its internal administration—which, though far from perfect, is much better than that of China—and from its strength at sea and in the field, to cope with and even to dictate terms to the Imperial Government. The secondary cause of the pacific attitude of China is believed to be the jealousy which the Peking Court feel towards the head of the Executive, Li-Hung-Chang. This powerful Mayor of the Palace is Chinese in blood, and therefore no friend of the Tartar dynasty. Had he headed the war party, it is possible that China might have attained a signal victory over Japan, but it was feared that in the moment of his triumph he might stir up a rebellion, and turn his sword against his Tartar master. Hence, it is rumoured, the young Emperor elected to yield to the demands of a foreign Power rather than risk an insurrection fostered by his own nominal servants and subjects.

The *Pall Mall* has the following upon the settlement of the Formosa difficulty :—The quarrel between the two nearest relations of the Sun and Moon has at last come to an end without any exchange of blows, save such as the savage aborigines of Formosa received and well deserved at the hands of the Japanese. And so far the end of it is satisfactory. The principals and the mediator have each come out as well as the circumstances would admit. To the latter especially, who as Her Majesty's Envoy made his good offices acceptable to both parties, great praise is justly due : not so much, perhaps, for the actual terms secured as for the service he rendered by extricating both the Chinese and Japanese from an embarrassing and untenable position, and one which without such aid might have proved a source of international difficulties with other Powers. Mr. Wade, by his intervention and its results, has shown that the British representative at Peking had the confidence not only of the Tsungli Yamen at Peking, but also of the Japanese Plenipotentiary, or nothing useful could have been effected. As to the exact terms of the compromise finally accepted, the Japanese come out with flying colours, and the Chinese have gained release from a troublesome contest for which they were in no degree prepared. The chief danger now is that the Japanese will not be sufficiently thankful for their escape with honour and credit out of an ill-judged expedition, which might have cost them both in life and money far more than they contemplated, and have ended in national defeat and humiliation. We hope it may not be so, and that they will in future be more cautious and better inclined to follow the first part of Polonius's advice, and "beware of entrance to a quarrel ;" the latter portion of his counsel they have sufficiently shown their readiness to adopt, and have proved its wisdom.

THE SUEZ CANAL.

Baron de Lesseps has addressed a letter to the French Minister of Foreign Affairs, of which the following is an extract :—

"M. le Ministre,—We have learnt that the Commission instituted at Constantinople with the object of drawing up a scheme of judicial organisation in Egypt has just terminated its labours. The company of the Suez Canal from the beginning assisted the Khedive in his endeavour to establish in his country the Tribunals intended to judge the disputes between natives and Europeans. Just as this matter was on the point of being settled, the Administrative Council of the Suez Canal begged that I would make known to your Excellency their hope that the adhesion of France would consecrate the solution proposed by the Commission of Constantinople. In transmitting to you the expression of these sentiments, I think it my duty, M. le Ministre, to recall to you summarily our motives for desiring that the negotiations conducted by the Egyptian Government may have a favourable issue. The new judicial organisation is intended to regulate the dealings of natives and Europeans, dealings which could not be foreseen at a time when the Europeans, who were in small numbers, lived apart and did not take part in the active life of the country. French establishments were only to be seen at certain points and in certain parts of the Empire. Every acquisition of real property was forbidden to Europeans. They were separated from the population which surrounded them by the most absolute lines of demarcation. They had their quarters, their laws, and distinct judges. At present, Egypt, under the enlightened rule of Ismail Pasha, has resolutely entered upon the path of progress, and it asks Europe to help it to persevere in it. The European population, which in 1836 did not exceed 3,000, is at this moment 200,000 strong. Considerable amounts of French capital have been invested, especially in the Suez Canal undertaking ; Europeans have the right of possessing real property, and the Suez Society is working on ground on which towns are rising. From this new order of things has come the need of a serious and uniform code of laws completing the capitulations, while respecting and maintaining the guarantees of individual security and liberty already enjoyed by Europeans. The actual state of the distribution of justice in Egypt has become incompatible with the conditions of internal order, of the security of property, the development and harmony of all legitimate interests, either national or foreign, which exist in this country. The insufficiency of local tribunals on one side, the multiplicity of Consular jurisdictions on the other, create every day the most grievous difficulties. It is after this had been understood by the different Powers that a Commission assembled at Constantinople. In sanctioning the result of the labours of this Commission, France, after having had the glory of protecting by the capitulations the commerce of the Western Empire, will also have the honour of favouring the development of this commerce by the institution of laws protecting all rights, and encouraging the Egyptian Government to give its assistance to the fusion of interests which had hitherto been in opposition. From several points of view the Suez Company will be the first to feel the benefit of the projected judicial organisation. The Universal Company of the Suez Maritime Canal being Egyptian, it is ruled by the laws and usages of the country. With regard, however, to its constitution as a society and the dealings of its members, it is, in virtue of a special Convention, regulated by the laws which in France regulate anonymous societies. It is understood that all disputes of this kind shall be judged by arbitration, with an appeal to the Imperial Court of Paris. Disputes in Egypt between the company and private persons, to whatever nationality they may belong, shall be judged by the local Tribunals according to the forms consecrated by the laws and usages of the country, and disputes arising between the Egyptian Government and the company will be also submitted to the local Tribunals and judged according to the laws of the country."

LOSSES OF LIFE AT SEA.

A correspondent on this subject writes us :—After reading over Mr. Macdonald's narrative of the burning of the emigrant ship *Cospatrick* and the sufferings of himself and the *few* survivors out of over 400 souls, I cannot but think that the Board of Trade ought to subject our emigrant vessels to a more stringent survey than they at present undergo before being allowed to clear from the port of London or any other port in Great Britain. Mr. Macdonald states

"That on leaving Gravesend there would be a pail of water in each boat, also that in his boat there was one and a half oars and in that of the mate's two."—

Now Sir, I think, that if these boats had been well equipped and stowed, as all emigrant ships should be, to my ideas, this would not have ben the case. And this leads me to ask the following questions :—

Viz.—What are the Board of Trade rules regarding the equipment of emigrant vessels, and is there a special surveyor to see that these rules are complied with before the vessel is allowed to clear and leave port ? If not, one should at once be appointed, and his survey report should be handed in to the Board of Trade and approved of by that body before she could possibly get her clearance. I would also suggest that in addition to her boats, an emigrant ship should also carry a light raft, constructed of cork stuffed into painted canvas egg-shaped sacks, about twenty feet in length and three or four in diameter, in the centre. The breadth I must leave to those who fit the vessel, as it would be according to the space there was to carry it. I have seen such rafts on board the American mail steamers, and came to the conclusion they would be very serviceable in the event of fire. If this is the case and it has been complied with, I presume the surveyor's report will be produced at the official inquiry, which will of course be held on this sad affair, *i.e.*, the loss of life by the burning of the *Cospatrick*.

In my opinion every emigrant vessel should be compelled to carry as many good boats as she can safely hoist at her davits, stow, and carry, and that each should be equipped as under :—A mast and lug-sail complete, a small ensign attached to the after leach of the sail, six or more (according to size) oars, one boat-hook, one grapnel, two painters, one

Digitized by Google

bailer, *i.e.*, a pail, one axe, one musket and ammunition, binnacle and compass complete, fitted into one of the after thwarts, two kegs or beakers of water, not less than eight gallons each; some packets of patent food; tholes or rowlocks, of course; a box of matches, a little spare rope, rope-yarns, &c.

Legal.

COURT OF QUEEN'S BENCH.

SASSOON V. HARRIS AND OTHERS (UNDERWRITERS).

This was a heavy insurance case—an insurance by Sassoon and Company, of London, Bombay, Hong Kong, and Shanghai, of £30,000 upon opium shipped for Hong Kong and Ningpo. The facts were fully set forth in our issue of the 18th ult. The plaintiff claimed as for a total loss to recover the £30,000, but the underwriters resisted the claim on the ground that the policy only extended to Hong Kong and was satisfied when the goods were discharged there; whereas the plaintiff insisted that it extended to the ultimate destination of the opium at Ningpo, that being "a port in China, not north of Shanghai." There was another point of importance as to the stamp on the policy; it being a single stamp, whereas, it was insisted that there ought to have been as many stamps as there were native growers interested in the shipment. The verdict was taken for the plaintiffs, subject to both these points.

Mr. Benjamin, Q.C., moved, on the part of the underwriters, to set aside the verdict on both these points. As to the first, the main point, as to the duration or extent of the insurance—Mr. Justice Blackburn observed that there was nothing in the policy to limit the insurance to Hong Kong. On the contrary, the policy was for "any port not north of Shanghai." And if the ultimate shipment to Ningpo (which was such a port) was in accordance with the general intention of the plaintiffs at the time of the insurance, the policy seemed sufficient to cover it. However, no doubt the question was one fit for discussion, and as to that point the Court granted a rule *nisi*. On the other point, as to the stamp, an instance was taken by way of illustration. A person, not a member of the firm, was interested in twenty-five chests of opium and was actually charged with a proportionate share of the charges for insurance to Shanghai, including a proportion of the stamp. There were eight or nine similar instances of parties thus interested in portions of the opium. The plaintiffs, nevertheless, claimed to recover, as being interested in the whole; whereas it was insisted they were not. But it was urged, on the other hand, that the plaintiffs had a "lien" on the whole of the opium for their charges and advances, and so were sufficiently interested to enable them to recover on the policy. It appeared, however, that in 108 chests the plaintiffs were not interested; in 101 chests the shipments were on joint accounts with others; and only seventy-eight belonged entirely to the plaintiffs. And it was contended on the evidence that the charges and advances had been repaid, so that the plaintiffs had not even a lien, and that the policy was void on this ground, having only a single stamp, the last Stamp Act (30 Victoria) requiring stamp duty to be paid in such cases on every fractional part of every sum of £100 insured on any separate interest. The Court, on this point also, granted a rule *nisi*, thinking the point required consideration.

Mr. Justice Blackburn, however, observed that it was for the underwriters to consider whether it was worth while, with reference to their reputation, to insist on such an objection to defeat the insurance. When he was at the Bar he had a great deal of business of this kind, and the offices used to be anxious not to take such objections, because they lost, they said, more in reputation, and consequently in business, than they would gain by the objection.

Naval and Military.

Captain F. W. Staples, of the 80th Regiment, now serving in Hong Kong, having retired on half-pay, Lieutenant H. J. Brown is to be promoted to the command of the company.

We have a piece of good news for those who served in the Nassau during the last commission on the China station, when she was engaged in operations against the pirates of the Sulu Seas; and, although two years and a half is perhaps a long time to wait for any substantial recognition of such good service, all concerned will agree that, provided it does arrive, it will be thoroughly welcome. It is proposed to distribute £2,000 among such of the officers and men who took part in the destruction of nearly a score of piratical prahus and the town of Crang-Crang, on the coast of Sulu, in 1872. As there was no loot out of which prize-money would be realised, the Treasury will have to award a special grant to the amount named as pirate bounty, and since the number of men engaged was not large, there will be a nice little sum due to each class. Those having friends on foreign service who were in the Nassau in May, 1872, should make them acquainted with this piece of intelligence, so that there may be no needless delay in forwarding claims to the Accountant-General as soon as the intended distribution is advertised.

The *United Service Gazette* says:—It is with pleasure that we are enabled to announce that the Lords Commissioners of Her Majesty's Treasury have consented to an alteration of the fixed value at which the dollar is issued in China and the Straits Settlements. The present rate fixed by regulation is four shillings and threepence, but it is well known that for some time past the real value has been considerably less. What, we believe, is now asked for is, that the simple market value of the dollar be ascertained in London, and the value in Hong Kong and Singapore fixed at the same amount. We are assured that this will give more than a penny in every dollar, and possibly nearly twopence, a sum that will make an appreciable difference in the emoluments of all officers and men there stationed.

The following officers who last served in China have received appointments as under:—Sub-Lieutenant W. H. Callwell (in the Cadmus, from 1871 to 1874), to the Lord Warden, flagship in the Mediterranean; Chief Engineer J. T. Harris (in the Salamis, from 1872 to 1874), to the Sapphire, corvette, Devonport; and Engineer Ivie A. Couper (in the Princess Charlotte, from 1870 to 1874), to the Revenge, flag-ship, at Queenstown.

Officers and men of the Cadmus, some of whom saw four years' service in her on the China station, will be glad to hear that the report of inspection on paying off was considered most satisfactory by the Admiralty, who have been pleased to express the same to Captain Whyte, and to remark that the high state of efficiency and the condition of the ship reflect great credit upon her late first lieutenant—A. G. M'Kechnie.

It is notified that the Princess Charlotte, 12, Capt. John E. Parish, receiving ship at Hong Kong, which has been replaced by the Victor Emanuel, is ordered to be sold at China, and her officers and crew will return to England.

Mr. Robert Carrington has been appointed chief Civil Assistant to the Indian Marine Surveying Expedition.

The death of Lieutenant E. H. B. O'Geran, of the 80th Regiment, at the age of twenty-nine, is announced.

Captain J. R. Hogg, of the Royal Engineers, lately serving in Ceylon, has been ordered to St. Helena.

Telegrams announce that the Challenger has left Hong Kong in continuation of her cruise.

Literature.

In his *History of India, from the Earliest Times to the Present*, Mr. L. J. Trotter has added a valuable contribution to our Indian literature. Written at the request of and published under the direction of the Society for Promoting Christian Knowledge, the work has been conceived and executed with the purpose of affording an outline of Indian history, and it serves the purpose admirably. To those who have hitherto found the study of Indian history an arduous one we commend this volume. The complications with regard to the various forms of native government and dynasties, which seem to have developed with the growth of English supremacy in India, and which have hitherto puzzled the European student, are rendered more intelligible in the work before us, and the book is at once comprehensive and comprehensible. It is likely to be more popular, and is certainly more useful, than some of the productions of more ambitious writers. It is particularly suited to homes where the Sabbath is respected.

Trubner's Monthly Record states that "'Confucius and his Religion' has recently found an exponent rather out of the common way in the person of Wong Chin Foo, a Chinese political refugee. This gentleman delivered his discourse in the Parker Memorial Hall, Boston, U.S.A. He stated that Confucius was regarded by many Chinese and others as the Supreme Being, but he was only looked upon as a holy teacher by the educated. . . . . Mr. Wong Chin Foo traced Confucius from his birth, 2,300 years ago, to his arrival at years of maturity, and told how he proselyted the rich rather than the poor, stating that at one time he had as many as 500 mandarins as disciples and students of his doctrines. His teachings, the lecturer explained, involved five great principles, Gravity, Propriety, Sincerity, Virtue, and Filial Piety."

Mr. Robert B. Shaw, H.B.M.'s Resident at Kashgar, according to the same periodical, is printing, under the sanction of the Indian Government, a sketch of the Grammar of Eastern Turki as spoken in Kashgar and Yarkand, together with a Vocabulary containing about 3,000 words and some prose examples, being extracts from an old Turki book obtained from one of the Mussulman shrines near Kashgar. This book professes to give the history of the introduction of Islam into Kashgaria in the 10th century, and of the lives and wars of the early Muhammadan kings of that country before the time of Changiz-Khan. . . . No grammar of the Eastern Turkistan language has yet been published in Europe, the nearest approach being two works by Professor Vambery.

Messrs. Maull and Co., of Piccadilly and Cheapside, have published photographs in three sizes of several members of the International Congress of Orientalists. Among the more prominent names are those of the Duke of Argyll, Sir George Balfour, Sir John Davis, K.C.B., Professor R. K. Douglas, Rev. Joseph Edkins, Sir Bartle Frere, K.C.B., Rev. James Legge, D.D., and Lord Lawrence, G.C.B., G.C.S.I.

The 27th edition of *Who's Who*, published by Bailly and Co., Cornhill, is not merely a reproduction of previous issues, subject to the yearly alteration, but it contains a list of the London School Board, which has never been given before. The Almanack maintains its character, and the volume altogether is most essential for reference.

Among the papers read at the last meeting of the American Oriental Society at New York were the following:—"On Recent Revolutions in Japan," by Mr. Griffis; and "On the Distinction of the Noun and Verb in the Japanese Language," by Mr. Van Name.

We hear that M. Jules Mohl, Professor of Oriental Languages at the College of France, has been appointed an officer of the Legion of Honour.

Monetary and Commercial.

With reference to the Chinese Government Loan, the Hong Kong and Shanghai Bank in London has issued a circular, stating that applications are being received from the public in China for the Bonds at the exchange of 4s. 1½d. per dollar, payable, 1 per cent. on application, 4 per cent. on allotment, and the remaining 90 per cent. ten days after allotment. Applications are to be received in London upon payment of the equivalent to the above in sterling at the exchange of 4s. 2d. per dollar, being the current rate for telegraphic transfer of money to Hong Kong. The total cost per £100 Bond to the London applicants will therefore be £96 8s. 11d., being the equivalent of $462.94, at 4s. 2d. per dollar, equal to a difference of nearly one and a half per cent. upon the cost. The Bonds will be in sterling, and the principal and interest will be payable in London in the same currency. Interest will commence in Hong Kong from the date of payment of the last instalment, and in London from about the corresponding mail date.

Messrs. J. Henry Schroder and Co. announce that the half-yearly interest on the Imperial Government of Japan Customs Loan, due 1st proximo, will be paid on that or any succeeding day at their counting-house.

At a meeting of the creditors of Mr. J. C. Baldwin, of Cullum-street, a partner in the firm of Macgregor and Co., Hong Kong, whose failure we reported last month, it was agreed that a committee of investigation should be formed, to ascertain how the goods consigned and bought under special lien had been handled. According to present accounts, it appears that neither goods nor proceeds are forthcoming, and that matters are further complicated by the local banks having granted loans on a part of the goods virtually hypothecated to the Manchester firms. A portion of the London debts arise out of speculative transactions in rice. The meeting was stormy, and creditors intend to punish, so far as possible, any delinquencies or irregularities of the partners in dealing with their goods.

From the tabulated statement issued by Messrs. Pixley and Abell, we learn that the import of bullion into London during the year 1874 as compared with 1873 was as follows :—1874, gold £20,497,810, silver £11,797,994, total £32,295,804 ; 1873, gold £22,655,210, silver £12,302,220, total £34,957,430. The export from London has been as follows :—1874, gold £13,667,868, silver £12,385,438, total £26,053,306 ; 1873, gold £20,768,640, silver £10,255,500, total £31,024,140.

The report of the directors of the Manchester and County Bank (Limited) states that the directors propose to add £15,000 to the reserve fund, which would thus be raised to £345,000, and to pay a dividend at the rate of 15 per cent. per annum.

The report of the General Credit and Discount Company for the past year has been issued. It states that there is a balance of profit of £211,600 6s. 9d., and the directors propose to pay a dividend at the rate of 10 per cent., to place £40,000 to the reserve fund, bringing up its total to £200,000, or £1 per share, and to carry forward to the next account £21,600.

An interim dividend of 5 per cent. has been declared by the United Discount Corporation. The sum of £10,000 is to be placed to the reserve fund, and £1,919 3s. 2d. carried forward to the next account.

The directors of the International Financial Society announce a dividend of 5s. per share free of income-tax, equivalent to five per cent. per annum. The net profits for the year 1874 were £51,851 13s. 6d., out of which £10,000 is carried to reserve, making it £70,000.

The directors of the National Discount Company will, at the meeting of shareholders on the 20th inst., propose a dividend at the rate of 13 per cent. per annum, free of income-tax.

At the meeting of the Ocean Marine Insurance Company, to be held on the 2nd proximo, the directors will recommend a dividend of 5s. per share.

The directors of the British and Foreign Marine Insurance Company (Limited) have decided to pay a further dividend of 2s. per share and a bonus of 4s. per share, both free of income-tax, making a distribution for the year of 15 per cent.

The directors of the London and Provincial Marine Insurance Company will pay interest for the half-year ending the 31st December last at the usual rate of 10 per cent. per annum.

At the annual meeting of the shareholders in the Norwich Union Fire Office, a dividend of £20 on every paid up share of £30 was declared. This is at the rate of 66 per cent. per annum.

By a decision recently given in the Bombay Court of Small Causes the worth or effect of a bill of lading has become so questionable that our Supreme Courts must be invited to settle the matter in an authoritative form one way or another. A Liverpool firm shipped on board the s.s. *Parsee* thirty iron plates, amongst other goods, consigned to a native merchant. The plates were specially marked, and the weight was duly recorded in the bill of lading, which was signed by a gentleman who, it may be at once explained, is shipping clerk to the charterers, and who holds the authority and request of Captain Harrison, of the *Parsee*, written on stamped paper, to sign bills of lading. The steamship arrived at Bombay in due course, and thirty plates were delivered to the consignee, one of them being of the weight, and bearing the mark set forth in the bill of lading, whilst twenty-nine not only bore a different mark, but were about half the size and weight, and of a description never imported into the Bombay market. The consignee had paid the draft drawn against the consignment, and as the plates were of no use to him he brought an action against Captain Harrison to recover their value. The defence set up was the unusual one that the captain could not be held responsible, inasmuch as he had not himself signed the bill of lading, and the Judge gave effect to this contention by non-suiting the plaintiff. It is not to be wondered at that grave dissatisfaction exists at Bombay in connection with the decision, and that the Chambers of Commerce in this country have been asked to ventilate the subject, so that it may receive attention in the proper quarter. If the Judge, who is a native gentleman, is wrong in his law, there is every reason why the judgment should be reversed without delay, for it may lead to any amount of circumvention and fraud ; and if he is right, the law cannot be altered too soon, not only because it is ridiculous in itself, but because it is systematically evaded.

The proposed Liverpool Cotton Association has failed to secure the adhesion of the Cotton Brokers' Association, the latter body having decided at a meeting to hold aloof from the new Association. The brokers say further that they consider that their code of rules, which has been drawn up with great care, and after consultation with the representatives of the various importing, exporting, and spinning interests, has met all cases of difficulty well, but they will nevertheless be willing to receive any suggestion for their alteration.

Owing to an increased demand and comparative absence of supplies, the market for Bar Silver has improved, and some transactions have taken place at 57⅝d. per oz. Mexican Dollars have been in slightly better demand, and for those which were ready for shipment to China yesterday 56½d. per oz. was obtained. The average price of Mexican Dollars for the past year, 1874, was 56 15-16d. per oz.

The bullion per P. and O. steamer *Cathay*, from Southampton Jan. 14, was in gold to Galle, £320 ; in silver to Singapore, £82,600 ; to Shanghai, £5,365. Total in gold, £320 ; in silver, £87,965.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for December have just been issued, and show the declared value of our exportations in the month to have been £17,830,148, against £19,147,506 in 1873, and £20,516,253 in 1872 ; and in the year £239,436,207, against £255,073,336 in 1873, and £256,257,347 in 1872. The chief features of the accounts are similar to those of the past few months, viz., a fair increase in some of the chief articles exported, accompanied by a corresponding decline in the values. There is an augmentation in the quantity of cotton imported in the month of 270,000 bales, and the increase on the year amounts to about 2½ per cent. The percentage of decrease of value of the imports in December compared with December, 1873, is nearly 13½, and with December, 1872, about 2. The decrease in the export value of the month is nearly 7 per cent. as compared with last year.

The following is an extract from these Returns of the figures which refer to our Export trade with China and the Far East :—

COTTON YARN.

To		For the Month ended 31st Dec. 1872.	1873.	1874.

ARTICLES OF IMPORT.

TEA.

The market during the past few days has ruled quiet, business being contracted, for, as the bulk of late imports leave unfavourable results at the scale of offers made by the trade, holders are content to await until the pressure of the late heavy supplies are moved off. Looking at the class of Tea lately to hand per steamers from Shanghai, the yield of season 1874-5 must be finished, and to next July supplies will have to be drawn from the stock now on hand. The export trade, which for some time past to the Continent has been inactive, is likely to show a great revival, stocks of Common Congou in Russia being much reduced. Scented Caper, of which the market is liberally supplied of the good common to medium kinds, realises low prices; of fine quality there is a marked scarcity, and it would sell at remunerative rates. Green: The improvement advised of the New York market has, so far, produced little or no effect here, arrivals being in excess of wants, at far too high cost in China. The quality of Ping Suey kinds lately to hand show a great falling off, even as compared with last year; Moyune and Fychow kinds are of average quality. Indian tea is firm, with large offerings.

Messrs. Arthur Capel and Co.'s Circular says:—The quantity of tea offered in the market has been very large, and more than buyers could taste properly, the arrivals being very heavy. Congous.—Red-leaf kinds—Siftings: The stalky kinds have sold about ½d. per lb. lower, the dark even kinds at former prices. Broken-leaf kinds remain much as before. Fair to good common, free from dust, have been saleable from 11½d. to 1s. 0½d. per lb. Common to fair Saryune kinds have sold to some extent from 11d. to 1s. 1d. per lb. Fair Kaisows from 1s. 1d. to 1s. 3d. show no change. Good medium to fine from 1s. 4d. to 1s. 8d. have been enquired for. In finest there have been no sales. Pak-Lin kinds: The commoner kinds in boxes have sold lower, but good to fine remain firm. Black-leaf kinds: Common from 10½d. to 1s. have been dull of sale at rather easier rates. Fair to good medium have been taken from 1s. 1d. to 1s. 5d. per lb., being about previous prices. Good from 1s. 6d. to 1s. 8d. have also sold without alteration. In the finer kinds transactions have been small. New-make kinds have not been readily saleable, but prices show no change. In Oolongs there has been rather more business done at fully previous prices. Souchongs: Common to fair have been difficult of sale; good qualities have sold about 1d. per lb. lower. Scented Teas: Canton Capers have been difficult to move by private contract: at public auction the prices obtained were on the low scale previously established, say from 11½d. to 1s. 2d. per lb. for common to good quality. Orange Pekoes have sold better than Capers, but prices show no improvement. Foochow Capers remain difficult of sale, fair kinds ruling very low. Orange Pekoes: Common to fair have been difficult of sale, good to fine in moderate request, but without change in prices. Green Teas: The market remains dull, and sales still chiefly made at public auction. There have been a few purchases for export, prices coming rather higher from America. Prices show but little change, but medium Moyune Young Hysons have sold rather higher.

In the Public Sales 3,936 packages were sold without reserve on the 11th inst., and of 7,350 packages printed for the 12th inst. 6,577 packages were sold without reserve. The deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	2,586,778	2,233,273
Coastwise	854,800	849,305
Exports	296,825	507,327
Total delivered	3,738,403	3,589,905

SILK.

The market is firm in tone and prices fully supported, but since the announcement of the public sales to be held on the 19th inst. and following days, when a certain quantity of Silk will be sold without reserve, there has been a restriction of business, the trade preferring to wait for the auctions. Deliveries are very satisfactory, being from 1st to 14th inst., 1,819 China, 151 Canton, 451 Japan, and 71 Bengal. Total 2,492 bales.

Messrs. Arles Dufour, remarking upon the silk trade of 1874, in their Circular, say:—The striking feature of the year under review is that, in spite of an almost constant activity in transactions, a considerable and nearly uninterrupted decline in prices has taken place, varying from 12 to 30 per cent. according to descriptions. This state of things was chiefly due to a larger production of silk goods than required by consumption, and a further increase in the supplies of raw materials. With regard to the future they say, prospects of the future in general are now certainly more favourable than a year ago. Stocks of raw materials are still very large; but under the combined influence of low prices and better quality, consumption of silk goods can scarcely fail to go on increasing. The comparative deliveries of European and Asiatic Silks through the conditioning house in 1873 and 1874 were as follows:—1873: European Silks, total kilos. 1,703,700; Asiatic Silks, total kilos. 1,378,000. 1874: European Silk, kilos. 2,012,918; Asiatic Silk, kilos. 1,882,975.

COFFEE.—An improved demand has been exhibited, and the auctions have gone off with a brisk competition, at a rise of 1s. 6d. to 2s. per cwt. on the week. Plantation Ceylon has sold, fine bold at 106s. to 110s. 6d., middling to good at 100s. to 104s., low middling to middling greyish at 95s. to 99s., small at 92s. to 95s., peas at 117s. to 121s. 6d., triage at 91s. to 92s. 6d. Native has sold at 93s. to 95s. for bold, 86s. for good ordinary, 77s. to 81s. 6d. for small.

COTTON.—The market has been very firm, with a good business doing, especially in Tinnivelly cotton. Quotations:—Tinnivelly, 5¼d. to 5⅜d.; Western Madras, 4⅞d. to 5⅛d.; Salem, 5⅜d.; Tinnivelly, 5⅜d., landing, for good fair; Western Madras, 5⅛d., for good fair, landing.

CIGARS.—At public sale, 14 cases Manila sold at 5s. 3d. to 5s. 6d.; 9 cases ditto damaged at 3s. 3d. and 3s. 6d.

CHINA PRESERVES.—Of 50 casks and 400 cases Ginger offered a small part sold at 5¾d. to 6¼d. per lb.

GUMS.—At the auctions of 92 cases Singapore Damar offered 26 cases sold, yellowish chiefly small at 58s. 6d. Of 893 cases Manila Copal the bulk was bought in, hard at 29s. 6d. to 32s., a few lots selling at 23s. to 25s. for rough dark and 19s. for coaty blocky; 257 bags Singapore Copal bought in, sifted at 37s. 6d. and unsifted at 25s.

GAMBIER.—A small business is doing at 26s. 6d. per cwt.

GALLS.—232 cases China were bought in at 59s. per cwt.

PEPPER.—*Black*: The market is flat, the auctions barely supporting late values. 120 bags Penang sold at 5⅞d. to 5¾d.; of 1,867 bags Singapore about half sold, at 6d. to 6¼d. for fair; 212 bags Saigon were bought in. *White* has further declined ¼d. per lb. Of 1,367 bags offered 900 bags sold, good Singapore at 8¼d. to 8⅜d., and greyish at 8⅛d. to 8¼d. per lb.

RICE.—The tone of the market is firm, and 1,000 tons of new crop, February-April shipment, have been sold at 8s. 9d. Rangoon, 8s. 6d. Necransie.

SUGAR.—There has been a slight improvement in the market, and some business has been done in East India kinds. On the 11th inst. 3,000 bags common clayed Manila sold at 19s., and 7,000 bags low Java syrups, ex a recent auction at 16s. 3d. On the 12th 3,000 bags Java syrups at 16s. 3d., about 700 bags date Penang at 17s. 6d. per cwt., and 800 bags superior sun-dried Manila at 20s. 6d. to 21s. On the 13th 4,500 bags low Java syrups at 16s. 6d., and afloat, the cargo of Java, per Vigilant, 508 tons, No. 15 at 26s. 3d. for U.K. On the 14th by private contract 800 bags superior sun-dried Ilo Ilo Manila at 20s. 6d. At public sale a parcel of 10,798 bags old landed cane China was bought in above value, at 19s. 6d. per cwt.

SPICES.—*Cinnamon*: No business done. *Cloves*: The market is quiet, and without quotable change; 5 cases Penang were bought in at 2s. 3d. for good bright. *Mace* has brought firm prices, and 50 packages sold, out of 96 packages offered, good reddish pale at 3s. 3d. to 3s. 4d., fair red at 3s., dark and darkish red at 2s. 7d. to 2s. 10d., ordinary and chips at 1s. 10d. *Nutmegs*: The sales have offered a fairly large assortment. For the better qualities there was a good competition, and rates were firm, but inferior and small sorts went rather cheaper, Of 252 packages Eastern, 185 packages sold, brown, average 65 nuts to the lb., at 4s. 3d., 71's at 3s. 9d., 75's and 76's at 3s. 8d. to 3s. 9d., 78's at 3s. 8d., 105's to 106's at 2s. 10d. to 2s. 11d., 115's at 2s. 10d., 125's at 2s. 9d., 144's at 2s. 5d., 160's at 2s. 4d.; limed, 124's at 2s. 7d., 126's at 2s. 6d. to 2s. 7d., 138's at 2s. 2d. to 2s. 3d., and 175's at 1s. 10d. per lb.

SAGO.—963 bags offered and 560 bags sold, fair small at 17s. to 17s. 6d., and large at 17s. 6d.: fine small bought in at 18s. 6d., and 300 bags Singapore Flour at 14s. 6d. per cwt.

STICKLAC.—Of 258 boxes Siam offered 76 sold at £5 2s. 6d. for good free; 5 cases at £5 5s., and 5 bags ordinary woody at 85s. to 87s. per cwt.

SAPANWOOD.—7½ tons Ceylon sold at £14 7s. 6d.; 20 tons Siam at £12 7s. 6d. to £12 15s.

TOBACCO.—At public sale 125 bales Japan sold at 6¾d. to 7½d.: 39 bales ditto country damaged at 5d. and 5¼d.; 59 bales China at 4¾d. and 7d.; 21 bales Carmen at 6½d. and 9d.; 1 bale Giron at 1s.; 3 bales Manila not sold.

TIN.—Straits Tin declined to £93 10s., but has since recovered to £94 10s., at which it remains firm. Banca is quoted £102, Billiton £96 per ton.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

A falling off in the demand for Cotton in Liverpool on the 9th inst. had a quietening effect on this market, and confirmed the inactivity of business usual at the close of the week. With a subsequent better tone of the Liverpool market a firmer feeling prevailed, and business progressed to a fair extent at full prices. The firm tone is fully maintained at the close, producers of both Yarns and Goods adhering steadily to their demands for full prices, and the business has been diffused through almost all departments to a moderate extent on the whole. The general tone of the market is stronger.

SUBSCRIPTIONS ARE INVITED FOR 17,460 SHARES, OF £5 EACH,

OF

THE WEST OF ENGLAND FIRE CLAY, BITUMEN, AND CHYMICAL COMPANY

(LIMITED).

CAPITAL, £200,000, in 40,000 SHARES of £5 EACH.

Of which Shares to the amount of £112,700 have been already allotted amongst 327 Shareholders. Half-yearly Interest at the rate of 10 per cent. per annum has been paid since the establishment of the Company in December 1871.

PAYMENTS.—£1 per Share on Application; £1 per Share on Allotment; further calls at three months' notice as required.

DIRECTORS.

HORATIO NELSON LAY, Esq., C.B., 8 and 9, Queen-street-place, E.C., *Chairman*.
Major W. H. COLLINS, R.E., F.R.A.S., Chatham, Junior United Service Club.
AUGUSTUS FRERE, Esq., Architect, 22, Henrietta-street, Covent-garden.
J. RAMSAY L'AMY, Esq., Director of the Henry Rifled Barrel Company.
H. MUSGRAVE MUSGRAVE, Esq., Director of the Langham Hotel Company.
SAMUEL SAUNDERS, Esq. (late of Messrs. Briggs and Co., Alexandria), Upper Norwood.

Auditors—Messrs. TURQUAND, YOUNGS, and Co.
Bankers—THE NATIONAL PROVINCIAL BANK OF ENGLAND AND ITS BRANCHES.
Solicitors—Messrs. W. TATHAM and SON, 17, Old Broad-street, E.C.
Works—GREENHILL AND CALSTOCK, CORNWALL; SUNDERLAND WHARF, LONDON.
Secretary—BENJAMIN ROE, Esq.
Registered Office—8, OLD JEWRY, LONDON, E.C.

The chemical treatment of Pyrites, with a view to the extraction of Sulphur, Copper, Silver, and Gold, has of late years become an important and remunerative industry. Upwards of 500,000 tons of this mineral are annually imported into this country from Spain and elsewhere, and supplied to the vitriol makers, who, after burning off the sulphur, dispose of the calcined residues to factories where the metals they contain are extracted by "wet methods." According to the last volume of Hunt's *Mineral Statistics* (p. 67), there are twenty firms engaged in this business, and during 1873 they dealt with 323,910 tons of burnt pyrites.

The Tharsis Copper and Sulphur Company, which treated 126,000 tons of burnt pyrites in 1873, may be cited as an instance of the commercial success that attends such undertakings. Their £10 Shares now stand at £26, and the dividends declared have occasionally reached 40 per cent. per annum.

The principal business of the West of England Company consists in the adaptation of the above mentioned chemical treatment to the various metallic ores of Devon and Cornwall, and more especially to what is termed "Arsenical pyrites," a mineral which occurs in abundance in the immediate vicinity of the Company's Works.

The respective values of ordinary Spanish pyrites, and of the Arsenical pyrites found on the properties belonging to the West of England Company may be seen from the following table:—

Analysis of Spanish Pyrites as given in Phillip's *Metallurgy* (1874), pp. 429, 681.		Value of substances contained in each ton of mineral.
Copper	3·20	£2 8 0
Arsenic	0·47	0 1 0
Iron	43·55	0 14 6
Sulphur	49·00	1 8 7
Silver	(18-20 oz.)	0 2 11
Gold	(3 grs.)	0 0 7
Silica, &c.	3·78	—
	100·00	£4 15 7

Analysis of Arsenical Pyrites from West of England Company, as certified by Messrs. Johnson and Sons, Assayers to the Bank of England.		Value of substances contained in each ton of mineral.
Copper	3·82	£2 17 3
Tin	·08	0 1 6
Arsenic	30·66	3 1 4
Iron	29·52	0 9 10
Sulphur	18·10	0 10 6
Silver	·000153 (5½ oz.)	1 2 3
Gold	·0000013 (1 dwt.)	0 3 9
Silica, &c.	17·00	—
	100·00	£3 6 5

The raw material of the Company is thus far more valuable than the pyrites imported from Spain; and the cost of treatment being practically the same, the profits of the Company must be proportionately higher.

It should be pointed out that no mining operation, in the sense of a speculative search for the raw material, is requisite; the pyrites lies exposed to view, and all that is needed is to quarry it and bring it to surface.

Upwards of 500 tons of Arsenical pyrites per month are now being treated for arsenic, copper, and silver only, at a total cost of under £3 per ton, which on the above assay values of the three metals in question shows a profit of £4 per ton.

The present issue of Capital is for the purpose of enabling the Company's Works to be completed to an extent which shall admit of the treatment of 1,500 tons monthly, and of the extraction of *all* the valuable substances contained in the ore. If this be done, a further profit of £1 per ton can be realised, and the total nett revenue from the pyrites department would not be less than £90,000 yearly, which, *were one-half even to be written off for reserves and contingencies*, would leave a dividend of 22 per cent. per annum upon the total Capital of the Company.

The Company is also extensively engaged in the manufacture of fire-bricks, tiles, lumps, &c., from large deposits of decomposed granite and elvan, found on two of its estates. Already 3,500,000 bricks, &c., have been made and sold, and have established a reputation in the market for their first-class quality.

Tin-smelting works have just been completed, as in the extraction of the Arsenical pyrites a large quantity of tinstone is raised, which recent trials have shown to be richer than the average of ores usually treated for tin.

The Estates and Works of the Company are as follows:—

1. The Greenhill Arsenic, Smelting, Chymical, and Fire-Brick Works, comprising an area of about eighteen acres of freehold land, and connected by two miles of railway with the shipping port of Calstock, on the River Tamar, above Plymouth.
2. The Hingston Down Estate, comprising twenty acres of copyhold land on Hingston Down in the parish of Calstock, with an extensive deposit of Fire-Clay thereon.
3. The Calstock Fire-Brick Works, comprising an area of about five acres of freehold land in the town of Calstock.
4. The Wheal Newton Mineral Estate situate about three miles from the Greenhill Works, containing very large deposits of Arsenical pyrites mixed with copper, tin, and silver ores, already proved to the extent of over 100,000 tons, and fully provided with working machinery, plant, buildings, &c.
5. Sunderland Wharf, Rotherhithe, on the Thames.

The total cost of the above Freehold and Copyhold Estates and Works, including buildings, plant, machinery, &c., existing at the time of purchase, has amounted to £110,000, of which £14,045 has been paid in cash, £50,000 is represented by fully paid Shares, £20,000 by Debentures, and £25,955 has been allowed to remain as a charge at 5 per cent. interest, redeemable by quarterly instalments.

Between 300 and 400 Shareholders have joined the Company, many of whom have from time to time personally visited the Works, and have subsequently increased their holdings; and the Directors have every confidence in recommending the Shares of the Company as a sound and profitable investment, and one which will bear the strictest scrutiny.

Applications for Shares must be made on the accompanying Form, which, together with the deposit, should be forwarded to the Bankers or the Secretary of the Company.

SCHEDULE OF CONTRACTS ENTERED INTO BY THE COMPANY.

1. An Agreement, dated the 20th day of December, 1871, and made between Stephen Henry Emmens of the one part, and William Camp Crane, on behalf of the Company, of the other part.

2. Two Agreements, dated the 24th day of January, 1872, and the 27th day of November, 1874, respectively, and made between Stephen Henry Emmens of the one part, and the Company of the other part.

3. The only other Contracts are Trade Contracts entered into in the usual course of a manufacturing business, as to which the fullest information will be given to any intending subscriber, by whom also the Balance Sheets of the Company can be inspected.

APPLICATION FOR SHARES.

To the Directors of the West of England Fire-Clay, Bitumen, and Chymical Company, Limited.

GENTLEMEN,—Having paid you the Sum of £ , being a Deposit of £1 per Share on Shares in "The West of England Fire-Clay, Bitumen, and Chymical Company, Limited," I hereby request you to allot me that number of Shares. And I agree to accept the same or any less number, and I authorise you to place my name on the Register of Members of the Company in respect thereof.

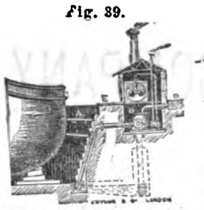
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

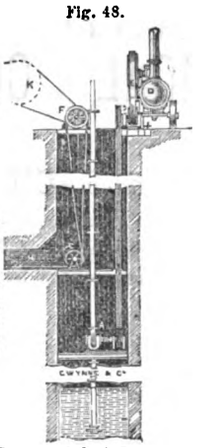
Fig. 39.



GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.

The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be ven

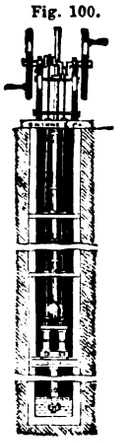
Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.

Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water.

Fig. 100.



GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,

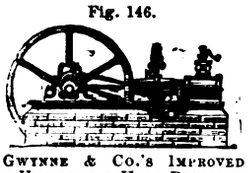
For Hand-power adapted for ordinary wells of any depth, of most careful construction, and on the most approved system.

Fig. 86.

GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

With or without Expansion Gear, for economical working.
From 4 to 100-horse power.

Fig. 154.

GWYNNE & CO. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.

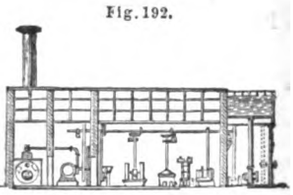
These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

Fig. 142.

GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

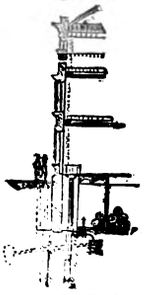
Fig. 192.



GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &C., &C.

The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.

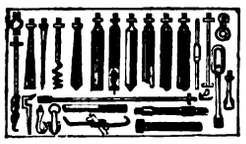


GWYNNE & CO'S IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

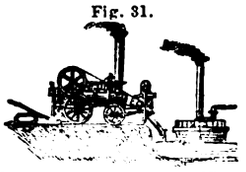


GWYNNE & CO.'S BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

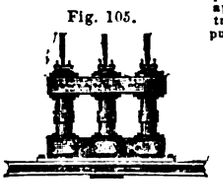
Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

THE CHINA AND JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China, Japan, the Straits Settlements, &c. Orders for Furniture, Stores, Books, and Personal Requirements of every description promptly executed, either by Overland Route or Clipper Sailing Vessels. The articles in all cases are carefully selected by persons who have had personal experience of the wants of residents in China and Japan. Orders should be accompanied either by a remittance, or a reference for payment in London. All communications to be addressed, and remittances made payable, to

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

MacEWEN, FRICKEL, & Co.,

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

HOMŒOPATHIC CHEMISTS,

48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

THE AGRA BANK (Limited).

Established in 1833.

CAPITAL, £1,000,000.

Head Office:—NICHOLAS-LANE, LOMBARD-STREET, LONDON.

Branches in Edinburgh, Calcutta, Bombay, Madras Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

Current accounts are kept at the Head Office on the terms customary with London Bankers, and interest allowed when the credit balance does not fall below £100.

Deposits received for fixed periods on the following terms, viz.:—At 5 per cent. per annum, subject to twelve months' notice of withdrawal. PEKING.

In the Peking *Gazette* of the 24th Nov. we find a short Imperial Decree announcing that the Envoys of Japan and the United States, having through the Tsung-le-yamun respectfully requested that the Emperor would be pleased to grant them an audience, his Majesty had, on that day, signified his pleasure to receive them. In a decree in the *Gazette* of the 28th mention is made that his Majesty had, on that day, given audiences at the Tsze Kwang Ko, the Foreign Audience Hall; and from what I have since learned, I presumed that this short announcement had reference to the audiences of their Excellencies Mr. Avery and Mr. Yanigawara.

In the *Gazette* of the 27th is an edict announcing that, owing to Ting Chow-chang, the Territorial Taoutai at Tientsin, having gone into mourning for his father's death, his Majesty had appointed Woo Tsan-ching in his stead. Woo Tsan-ching, about two years back, succeeded Shin Paou-king as superintendent of the Imperial Arsenal at Tientsin, and on the death of Woo Yun-tseih, the chief of the Southern Legion, about two months ago, became chief of that *corps d'armée*. The *Gazette* of the 27th Nov. has also a decree appointing an official at Peking named Le Chaou-tang to be Customs Taoutai at Tientsin. Since the previous incumbent, Chen-kui, ceased to hold office, on the 15th of June last, Sun Sze-ta has held the acting appointment. The Customs Taoutai, I should mention, is the official with whom the Consuls transact nearly all their international business, and not the Territorial Taoutai, with whom they scarcely ever come into contact on business. The post of Customs Taoutai at Tientsin, the port of the metropolis, is for another reason an important one in the eyes of the Tsung-le-yamun. The Envoys of foreign nations for the first time making a treaty with China come to Tientsin to negotiate it, and do so with the Governor-General of Chihli in his position of High Commissioner for the North of China. The Customs Taoutai, on his side, has in general the arranging of all the details of the treaties. In this way the Customs Taoutai comes into relation with the Envoys of foreign nations, and I have no doubt from time to time privately reports to the Tsung-le-yamun on their character and manner of conducting international affairs; so that, when they appear at the Tsung-le-yamun, the chiefs of that bureau are already pretty well posted. It may be for this reason that the Tsung-le-yamun apparently consider it their business to select the official who is to fill the post; on both occasions the persons selected have come from the capital.

TIENTSIN.

A correspondent writes:—Mr. Bismark, appointed Consul for Germany at Tientsin, has arrived there from Europe. During the past eighteen months Mr. Waeber, Consul-General for

Digitized by Google

Russia at Tientsin, has besides been acting as German Consul.—M. Roquette, Secretary of the French Legation, and other gentlemen of that Legation, have left for Shanghai.—The eldest son of the Viceroy, Li Hung-chang, got married on the 30th.—The captains of the various steamers running to Tientsin have just testified their satisfaction with the way in which Mr. J. Macdonald, of the Customs service, has kept the river fairway clear, by presenting him, through Mr. Twinem, the Acting Commissioner, with a valuable silver cup. Mr. Macdonald has also lent his services in settling the trifling collisions which have occurred between junks and steamers, and by his watchfulness has done much to diminish the risk and the gravity of these occurrences, as well as to facilitate the navigation of the river by steamers.—A destructive fire occurred on 30th Nov., in the native city, but the amount of damage was unknown when the last steamer left Tientsin.

SHANGHAI.

The present mail brings advices from this port to the 11th December; the P. and O. mail from London October 16 was received on the 6th December, and the following French mail of October 23 arrived out on the 10th December. The following summary of news is from the *North China Herald*:—

We hear from Peking that the U.S. Minister, the Hon. B. P. Avery, and the Japanese Minister, H. E. Mr. Yanigawara, were to have audience of the Emperor on the 29th ult.—Professor Watson, of the Transit of Venus Expedition, delivered a lecture upon that event on the 23rd ult. The lecture was listened to by a considerable audience of foreigners and Chinese students. Professor Young was to follow with a lecture on Spectrum Analysis, to bedelivered on the 30th ult.

Some months ago quantities of goods sent up the Yangtsze under transit pass by several firms in Hankow, and destined for the great marts of Szechuen, were detained at the Kweichau barriers above the Wushan gorge, where the river crosses the frontier of the province. The transit passes were totally disregarded, and demands for the usual barrier squeezes were made. These demands were resisted, but resistance only brought delay and loss, as the high provincial officials, so far from disavowing the acts of their subordinates, and apologising for a gross breach of Treaty rights, issued proclamations, we are told, supporting their illegal claims. Not only were the native boats, in which the goods were being forwarded, prevented from proceeding, but in some cases the boatmen and supercargoes were seized and beaten, in order to force them to make false declarations as to the ownership of the goods. Representations were, of course, made by the firms interested to their Consuls, and by the latter to their Ministers, with the result, we believe, that the release of the property and those in charge of it was ordered from Peking.

The Russian corvette *Ascold*, flying the Admiral's flag, came up from Woosung on Monday, and was received with salutes from the U.S.S. *Hartford* and H.M.S. *Modeste*. We hear that Captain F. T. Thomson, commanding H.B.M. corvette *Modeste*, has accepted an offer to succeed Captain George S. Nares in the command of H.B.M. corvette *Challenger*, now employed on particular service as surveying and discovery ship. It is not yet known who will be Captain Thomson's successor, but it is thought probable that Commander John L. Way, of the flagship *Iron Duke*, will receive the appointment and consequent promotion. The winter station of H.B.M. gun-vessel *Frolic*, Commander C. E. Buckle, has been unexpectedly changed. She was originally ordered to sail for Japan on the 12th inst., but is now ordered to the East Indies, and will probably finish her commission on that station. She will, however, remain at Hong Kong during the time necessary to refit. It is stated that the gunvessel *Rocket* is ordered to China to replace the *Frolic*.

As a result of the survey held on the ship *Conqueror*, on the 7th, it was decided that all her cargo should be taken out and placed in the godowns of Hunt's Wharf, so that it might there be thoroughly inspected, for the satisfaction of all concerned, prior to reshipment.

Unabated efforts to raise the sunken barque *George Washington* (which was scuttled to save her from being burnt, and after being partly raised sank again in mid-river) are still being made, under the superintendence of Mr. C. P. Blethen, with the assistance of the Tug and Lighter Company.

The yachts entered for the adjourned Corinthian race, which was re-fixed for Saturday, were prevented from starting by a sailing letter from the Commodore, who, it appears, was of opinion that the wind was again unfavourable for racing. The event has now been definitely postponed till next spring.

We are glad to observe that our Municipal Council have sanctioned Mr. Thorndike's proposal to erect a foot bridge across the Soochow Creek at the north end of Szechuen-road. It will be twelve feet wide, of the same elevation above the water of the Creek as the new Honan Road Bridge; and any one who has observed the constant ferrying across of Chinese that prevails at the point indicated, and has had personal experience of the awkwardness of getting into and out of the ferry-boats, will be able to form some idea of the boon Mr. Thorndike is about to confer on the community. With characteristic promptitude Mr. Thorndike has already commenced piling, and we may hope to avail ourselves of the new bridge to do part of our New Year's-day visiting.

HONG KONG.

Our advices by the present mail extend to the 17th December; the P. and O. mail from London 30th October was received on the 10th December. The following items of news are from the *Hong Kong Daily Press*:—

The seventh annual report of the German Foundling House in Hong Kong states:—The Rev. Pastor Klitzke acknowledges the receipt of donations to the extent of $1,180 from the German and other foreign residents here and at Canton. The number of children in the institution is about the same as last year. The sanitary condition has been less favourable during the past year, owing to dengue fever, which carried off several of the weaker children. Among those indebted to the benevolent instruction of the Foundling House is a blind girl, who plays the harmonium and has mastered the German Bible in raised characters. This girl also instructs other blind inmates in reading and music. Eight of the girls have during the past year been married to respectable Chinese Christians. The report points out that the expenditure, which ordinarily averages over $5,000, has been increased by damage done to the premises by the typhoon, and an appeal, which we doubt not will be heartily responded to, is made for continued contributions to this benevolent and useful institution.

Mr. Small, the passenger on board the steamship *Brisbane*, who died on the night of the 15th at sea, is the well-known author of the Hong Kong Lyrics, namely, the "Unlucky old Deucher," &c.

The H. K. and W. Dock Co.'s hulk *Celestial* was towed round from Aberdeen, bringing with her several large spars. She was moored on the west side of the *Leonor*, and the dismasted Portuguese barque *Cecilia* was moored on the east side. The spars for windlasses were laid across both vessels, and preparations made with the chains to lift the sunken steamer.

There was a very good attendance at the midday performance of Smith's Acrobatic Troupe, and the children were greatly delighted at the feats of the De Castro family. This evening the performance is to be for the benefit of the De Castros, under the patronage of Vice-Admiral Sir C. Shadwell and Commodore Parish. There will be an entire change of programme, and several interesting feats are announced. We are confident that this fact, combined with the well-deserved popularity of Mr. and Madame De Castro and their wonderful children, will secure a bumper house.

The Rev. Dr. Burdon, the new Bishop of Victoria, has been installed in the Cathedral. He was received at the principal entrance and conducted to his stall in the chancel by a procession consisting of the Rev. R. H. Kidd, the Colonial Chaplain, the Revs. W. H. Baynes, and A. B. Hutchinson, the Rev. Lo-Sam-Yuen (a deacon), the Registrar of the diocese, the Choir, and Verger. The letters commendatory from the Archbishop of Canterbury were read out by the Colonial Chaplain, and the Right Rev. Prelate preached a sermon, and administered the Holy Communion at the conclusion of the service.

The following account, duly certified, of the average amount of bank notes in circulation in Hong Kong, during the month ending 30th November, 1874, is, published in Saturday's *Gazette*:—

Banks.	Average Amount.
Oriental Bank Corporation	$521,416
Chartered Mercantile Bank of India, London, and China	732,499
Chartered Bank of India, Australia, and China...	492,706
Hong Kong and Shanghai Banking Corporation	1,641,256
Total	$3,387,877

In the Supreme Court, before Sir John Smale and a Common Jury, the case of Tigno *v.* Tuna was tried. The claim was for $5,100 on a promissory note. From the opening statement of Mr. Hayllar, it appeared that the money was lent on a promissory note, and that the debt was acknowledged before the Chief Justice at Macao. Mr. Hayllar understood the defence to be that the money was lent for the collection of certain coolies, and that they had been got, but had run away at Macao. This fact, however, was denied by the plaintiff *in toto*, and Mr. Hayllar was prepared to prove that the sum was actually lent to the defendant, and that it had no reference whatever to the coolie trade.

The first witness examined for the plaintiff was Pedro Couto, who stated that he was out of employ, and did not belong to any particular profession. He had been in the employ of the plaintiff. He recognised the signature on the promissory note as that of the defendant, and saw the $5,100 paid. He saw also the repayment, and the reloan of $2,100 in 1873. Caitano J. de Gracia was also examined. He proved that he had heard the defendant admit the debt of $5,100; the same was reduced to writing in a book, and was signed by the defendant in the presence of Mr. Da Costa, a notary public, and the Judge's clerk. The case was then adjourned for some witnesses who were expected from Macao to be examined. After the adjournment, the witnesses from Macao not being forthcoming, the case for the plaintiff was brought to a close.

Digitized by Google

The Attorney General then opened the case for the defendant. He contended that the money was never lent to the defendant, but that it was given to him for the purpose of getting coolies for the plaintiff. The question was whether the defendant was the plaintiff's agent in the matter, and whether the money was given to him in that capacity. If it was ruled that it was not, he would submit that the transaction was not one the Court could take cognisance of, it being tainted with illegality. The defence was that a servant of the defendant named Martins received $3,100 to proceed to Chinchew to procure coolies, and that the $2,100 was given to the defendant on a similar mission. The coolies were got, but they subsequently returned to Amoy. Mr. Bramston contended that the money given to the defendant had been applied by him for the purpose it was intended. The defendant was then examined. He stated that he was a native of Chinchew, and that he had been nineteen years in Peru. He used to get coolies for the plaintiff, and the sum of $2,000 was given to him to get coolies from Chinchew. He got forty-two, and brought them to Macao, but they left afterwards for their native place. He had had very large dealings with the plaintiff. He did not recognise the promissory note, the signature on which was not his. Being examined by the Attorney General, he said that of the $5,100 the plaintiff gave him in 1873, $2,000 were spent in the purchase of a junk, and the plaintiff consented to it. Afterwards there was a dispute between himself and the plaintiff as to the ownership of the junk.

His Lordship summed up by putting to the jury as men of business to consider whether the conversion of $2,100 of the entire sum to the purchase of a junk instead of applying it to the purpose of getting coolies as originally intended was not an act of indebtedness to the plaintiff. In answer to the Court, the counsel for both parties consented to abide by a verdict for the $2,100 only, whatever that verdict might be. The balance of $3,000 was left out of the question altogether. His Lordship then read through the whole evidence, commenting on it as he proceeded.

While the jurors were deliberating on their verdict, Mr. Hayllar withdrew the cause, but assigned no reason for this extraordinary proceeding. Thus a case which occupied the Court and jury for five days was brought to an untimely end.

TOTAL LOSS OF THE STEAMER "MONGOL."

We much regret to have to record the total loss of the above steamer, Captain Flamank, which left for Yokohama. She started about 10.30. A.M., with a pilot on board, and had fine weather. The pilot left her just outside the Ly-ee-moon Pass at 11.30. At a quarter to twelve, when they were in the vicinity of the Nine Pins, the second officer (Mr. Fry) was on the bridge along with the captain, who told him that there would be a rock ahead, and asked him to go down and look on the chart to see if he could discover its position. The second officer went down as requested, but could not discover it, and came up and told the captain so. The captain then told him to keep well off the island, and he went down to examine the chart himself. He returned to the bridge soon afterwards, and said he could not discover the rock, and only saw an island which would be above water. He then altered the ship's course a little more towards the land, and five minutes afterwards she struck. The captain then at once gave orders to sound the pumps, and they found that the ship was making water. Believing that the steamer was resting upon the rock, orders were given to back the engines, with a view to getting her off, but it was discovered that she had gone right over the rock. The second officer then ordered the man at the wheel to turn the ship's head round and make for the shore. The water by this time was reported gaining on the ship forward; and seeing that it was useless to proceed, orders were given to stop the engines, and attempts were made to get the boats out. The captain and second officer then left the bridge. The mate and the surgeon were looking after the captain's wife, who was an invalid. Two boats were lowered, and a number of the crew made off in them; in fact, they were filled before they reached the water. Those remaining on board tried to get another boat down, but the water was gaining so much forwards and the vessel sinking so rapidly, that it was impossible. The second officer, seeing that all was over, jumped overboard and swam from the ship. Immediately afterwards the vessel went down, the captain, his wife, and several others being lost with her. While the second officer was in the water the bodies of the captain's wife, and of the chief officer were floating close to him. As the vessel was sinking a violent explosion took place from the water coming in contact with the boilers. The boats which made off were away some little distance, and after a time came back and picked up the second and third officers, a fireman, and a Chinaman, who were all struggling in the water close together. The vessel at the time she struck was going about nine knots an hour, with a strong monsoon, and a heavy swell against her. So sudden was the sad catastrophe that she sank within five minutes after she struck. The two boats were taken in tow by a junk, and arrived here about five o'clock this afternoon. The *Mongol* was a new vessel, built on the Clyde last year, and was one of the new fleet of the New York, London, and China Steamship Company (Limited). She had a crew in all of fifty-two, of whom fifteen have been lost. The names of those drowned are as follows:—Captain John Flamank, Mrs. Flamank, W. H. Gawthorpe, chief officer; W. F. Ring, fourth officer; — Campbell, second engineer; J. Smith, fourth engineer; J. Gentle, boilermaker; — Smith, carpenter; — Jewell, second steward; S. Bevis, mess steward; — Ludlow, fireman; — Murdock, ditto; — Lewis, ditto; — Frankenstone, and Stone, sailors; two Chinese.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 24th Dec.; the French mail from London Nov. 20 arrived out on the 22nd Dec. We take the following items of intelligence from the *Straits Times*:—

The annual examination of the pupils of the Christian Brothers' School was held at that institution on Friday evening, before a large assemblage of patrons and friends of the school. The examination was admirably conducted, and the pupils showed great proficiency in their studies. On Saturday evening they gave a public entertainment in the large hall of the school, which was attended by his Excellency the Governor, Sir Andrew Clarke, and a very large and select audience. The exercises consisted of singing and amusing dialogues, in which the pupils acquitted themselves most creditably. The members of the Philharmonic Society assisted by giving some excellent selections of music, which were sung with taste and spirit. Towards the close of the entertainment the prizes were distributed to the successful competitors at the examination, the recipient of the first prize being honoured by its presentation from the hands of H.E. Sir Andrew Clarke. After the conclusion of the exercises, a large and bountiful Christmas tree was lighted up on the platform, the presents being given to the juvenile holders of tickets previously distributed throughout the audience, after which "God Save the Queen" was spiritedly sung by a choir of the pupils, assisted by members of the Philharmonic Society, when the visitors dispersed, highly pleased with the success and ability of the pupils.

The recent expedition to Sunghie Ujong, though at one time believed by many to have been failure, has not been without effect, as is sufficiently evidenced by the arrival of the Datu Bandar and Rajah Mahmood at Singapore on Saturday, in the B.I.S.N. steamer *Moulmein*, under the guardianship of Captain Dunlop. These leaders, against whom the expedition was directed, had, as was stated, gone to the Sultan of Salangore, to whom they surrendered, and through the influence of Mr. Swettenham have come down to Singapore to negotiate a peace with his Excellency the Governor.

From the *Government Gazette* we learn that the following appointments have been made:—

Khoo Toh to be Chinese Headman in the Dinding territory and islands.

Mohamed Ariff to be Punghuloo of the Dinding territory on the mainland.

Mohamed Akib to be Punghuloo of the Dinding islands.

The leave of absence granted to Sir William Hackett, Judge of Penang, has been extended for three months from the 17th January next, and that of Mr. C. B. Waller has been also extended three months on medical certificate.

On the debate as to official salaries the *Straits Times* says:—Of all the unofficial members present Mr. Shelford would appear to have been the only one who was acute enough to have suspected that the increase of salary in this case meant something more than was apparent on the face of it, and is intended to have future consequences which may be more surprising than palatable to the public. According to his statement there would appear to be an organised combination among our high officials for taking advantage of the presence of a popular and liberal-minded Governor to obtain an increase of their salaries. That is how we understand his proposal to defer the consideration of the Attorney-General's case until the Council could have before them the petition said to have been sent in to the Governor by the officials asking for an advance. Probably the other unofficials were unaware of this little fact, and this may account for the easy and inconsiderate way in which they consented to the vote. Apart from this, however, we consider the vote indefensible on the plain ground that the old salary of £1,000 with private practice is amply sufficient, and quite on a par, to say the least, with the pay attached to the office in other colonies. In Hong Kong, which in its circumstances is exactly similar in every way to Singapore, the Attorney-General gets £1,000 a year, with private practice; the present holder of the office previously held a similar position in Queensland on £1,000 a year, without private practice, we presume. Ceylon, with a population of over two millions and a revenue of a million sterling, pays a Queen's Advocate £1,500 a year, without practice. In Mauritius, with a population of three to four hundred thousand, and a revenue of about six hundred thousand pounds sterling, the Procureur and Advocate-General gets £1,350, without practice. The colony of South Australia pays only £1,000, New Zealand £1,200, New South Wales, £1,500, Victoria £1,714, the Cape £1,200, Jamaica £740, West Australia £500, while the Minister of Justice and Attorney-General for the whole Dominion of Canada receives just £1,250. Can, we ask, the duties of the Attorney-General of the Straits Settlements compare in arduousness and difficulty to those of the occupants of the same post in any of the above colonies, except, perhaps, Kong Kong.

Digitized by Google

Commercial Report.

(For dates see first page.)

IMPORTS.

CHEFOO.—Messrs. Wilson, Cornabé, and Co. report as follows :—Our last Circular was issued on the 4th ult., and we now beg to continue our report from that date. Cotton Goods have been dull of sale, and prices have, if anything, had a downward tendency. The importations of Grey Shirtings and T-Cloths from Shanghai lately have been on rather a limited scale ; so, should any demand spring up, rates will likely advance a little. Drills are saleable in small lots, while in Spots and Brocades there will be no business done till spring. Metals.—Iron has been neglected, while the demand for Lead has been rather active, and the value has improved.

SHANGHAI.—The week had been scarcely so lifeless as the preceding one, and the various transactions recorded, although very insignificant in extent, tended to show that prices generally had not suffered much by the long prevailing inactivity. For instance, Collie's Lion and Bale and Mendal's Pillar chop Grey Shirtings had commanded Tls. 1.75 per piece, and "Green Lion" had been sold at Tls. 1.83 per piece, free of brokerage—which was close on Tls. 1.84 to the trade. Moreover, Dewhurst's Eagle H.A. had realised Tls. 1.88, and their Taeping Eagle —best—was still quotable at Tls. 1.92 per piece. 7-lbs. Red Pheasants being in special demand, had advanced from Tls. 1.43, less brokerage, to Tls. 1.47 nett, within the week, and the few in stock had been held for Tls. 1.50 per piece. The value of high-classed 64 reed White Shirtings had also been more than maintained, and Tls. 1.50 had been paid for a few Ewo Green Dragon 7-lbs. Mexican T-Cloths. Some Jeans had changed hands at reasonable rates, and the last auction sale of Camlets showed signs of improvement. The better description of 7-lbs., and more especially the Red Pheasants, were destined for Japan ; the 8¼-lbs. for Chinkiang, Ningpo and the Shanghai surroundings; the T-Cloths and Jeans for Hankow, and the Long Ells for the Soochow districts.

MANILA.—A considerable amount of business had been transacted in the markets for Plain Staples during the fortnight, but owing to continued large arrivals of these, values had not advanced. Coloured goods were in fair demand, and suitable parcels had been disposed of at good prices.

EXPORTS.

TEA.

SHANGHAI.—The following settlements had been reported during the week :—Black : 1,522 chests at Tls. 14½ to 18 ; stock, 1,300 chests. Green : Fychow and Moyune, 11,868 ½-chests, at Tls. 26½ to 34½ ; Pingsueys, 972 ½-chests, at Tls. 18 to 21½ ; stock, 97,900 ½-chests. Quotations generally remained unchanged. Export to Great Britain (exclusive of lost cargoes) :—

	1874-1875.		1873-1874.
Black	64,560,811 lbs.	against	56,829,888 lbs.
Green	8,316,090 „	„	7,637,303 „
	72,876,901		64,467,191

FOOCHOW, AMOY, and CANTON.—The market at these ports had been quiet, and nothing of importance had transpired.

SILK.

SHANGHAI.—London telegrams and Lyons advices continued gloomy. On this side about 1,200 bales had been settled ; of these fully half (600 bales Gold Lion Chop) were said to have been taken by a Continental buyer on joint account ; 100 bales Yah-kee Chop Tsatlees had been bought on similar terms for France, and about 300 bales of Re-reels had found purchasers for America. Prices in certain cases were somewhat lower than last quoted, but were still considerably above home values. Very few known silks had been bought, but the following were mentioned as amongst the settlements :—Yah-kee Chop, Nos. 3, 3½, and 4 Tsatlees, Tls. 405 per picul for No. 3 ; Gold Lion, No. 1 (lower Nos. in proportion), Tls. 375 per picul ; Ku-kee's, Chin Jan, and Kin Hock, Tls. 340 and 310 per picul ; Pagoda, No. 2, Tls. 322½ per picul. For Koo-fong-sing's Chop No. 3 Tsatlee Tls. 410 were asked, and Tls. 310 and 312½ for Red Peacock, without finding buyers. Arrivals during the week had been trivial, and the unsold stock was reduced to 12,000 to 12,500 bales. A good demand had existed for silks suitable for the American market, and fully 300 bales of Re-reels had been settled. The limited stocks of silks required, and the eagerness of buyers, had checked the downward tendency, and closing quotations were fully Tls. 20 to 30 per picul above the lowest point seen in September.

LATEST TELEGRAMS.

THE CHINESE LOAN.

HONG KONG, JAN. 18.—The Chinese Imperial Loan, contracted with the Hong Kong and Shanghai Banking Corporation, has met with great success. The applications from all quarters amount to 20,131 bonds of £100 each, or nearly seven times the number offered to public subscription.

THE HEALTH OF THE EMPEROR OF CHINA.

SHANGHAI, JAN. 20.—Rumours are current here that the health of the Emperor is in a critical condition.

POLITICAL RUPTURE IN SIAM.

(TIMES' TELEGRAM.)

PARIS, JAN. 22.—The *Mémorial Diplomatique* states that a serious conflict having arisen between the two Kings of Siam, Germany has asked England temporarily to protect its subjects, and English ships have accordingly been directed, if necessary, to watch over German interests until the middle of February, when two German ships, the *Ariadne* and the *Hertha*, will arrive at Bangkok.

ARRIVALS.

At SHANGHAI.—From London, Dec. 3, Formosa ; 7, Omba ; Jan. 18, Sarpedon (str.), Star of Jamaica ; 19, Fleurs Castle (str.), Peri.

At HONG KONG.—From Liverpool, Dec. 15, Menelaus (str.); from London, Dec. 16, Brisbane (str.).

At MANILA.—From San Francisco, Nov. 29, Clara Bell.

At SAIGON.—From Bordeaux, Dec. 19, Ango.

At SINGAPORE.—From Cardiff, Dec. 19, Andreas Rickmers ; from the Clyde, Jan. 19, Singapore : from London, Jan. 19, Nankin (str.).

At PADANG.—From Niewe Diep, Jan. 16, Prins Hendrik (str.).

DEPARTURES.

From SHANGHAI.—For London, Dec. 2, Sylvia (str.) ; for New York, 5, Mikado ; 16, Caroline (cleared) ; for London, 16, Mathilda Atheling (cleared).

From HONG KONG.—For New York, Dec. 12, Beemah ; for Hamburg, 13, Therese.

From MANILA.—For New York, via Cebu, Dec. 2, Henry S. Sandford.

From SAIGON.—None.

From SINGAPORE.—For Boston, Dec. 22, China.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Jan. 21, at London, from Colombo, Alfred the Great ; from Bassein, Elina ; from Rangoon, Amarapoora (str.) ; off Deal, from Hong Kong, Melbrek ; at New York, from Yokohama, Samuel G. Reed ; 22, at London, from Bassein, Africano ; 20, at Havre, from Rangoon, Regina Margherita ; 23, off Deal, from Ceylon, Chacma ; from China, Thyatira.

DEPARTURES.—Jan. 21, from London, for Nicolajefsk, &c., Rowena ; for Singapore, China, &c., Hong Kong (str.) ; from Sunderland, for Anjer, J. Vinicombe ; 22, from London, for Shanghai, Conquest ; 22, from Shields, for Java, Henrick ; 21, from Newcastle, for Singapore, Pons Aolii ; 22, from London, for Singapore and Manila, Emiliano (str.).

LAID ON.—At Liverpool, for Penang, Singapore, Hong Kong, and Shanghai, Nestor (str.).

SPOKEN.—Seafield, London to Colombo, Dec. 19, 21 S., 29 W. ; J. B. P. S. (Ger. barque), Amsterdam to Padang, Dec. 20, 20 S., 30 W. ; Panama (N. Ger.), Cardiff to Hong Kong, Dec. 21, 19 S., 30 W. ; Mutlah, Tyne to Singapore, Dec. 21, 19 S., 30 W. ; H. W. T. Puls, Penang to London, Jan. 1, 13 N., 35 W. ; Hindostan, London to Penang, Dec. 3, 14 S., 32 W. ; J. Q. R. H. (Woodlark), Shanghai to London, Oct. 30, 2 S., 108 E.; Stanley, Sunderland to Singapore, Nov. 26, 23 S., 29 W.; Q.C.D.R. (Dora barq.), Newport to Singapore, Dec. 6, 19 S., 30 W.; L.W.S.T. (Peru), Cardiff to Singapore, Dec. 4, 14 S., 30 W.; Gleam, London to Penang, Dec. 4, 14 S., 30 W.

MISCELLANEOUS.—Deal, Jan. 21.—The Kashgar (barque), Russell, which arrived in the Downs 19, from Middlesboro, for Hiogo, with loss of boats, &c., has left in tow for the river, reported leaky.

CASUALTIES.—Plymouth, Jan. 22.—The Royal Sovereign, Weir, from Swansea to the Philippines, has put in here leaky in topsides. Swansea.—The Eleanor Batters (str.), from Cardiff to Shanghai, has put back to Mumbles roads with machinery disabled. Sourabaya, Jan. 22.—The Batavia (barq.), of and from Amsterdam, for this port and Macassar, was aground on the Madura coast, but got off without assistance ; she will discharge part of her cargo here for survey and repairs. Lisbon, Jan 15.—The Jonge Cornelius (Dut. barq.), from Cardiff to Batavia, put in here, Jan. 11th, with slight damage to rigging. Batavia, Jan. 22.—The Leila, from New York to this port, with petroleum, has stranded off Anjer, and will become a total wreck; part of cargo will be saved.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ANTROBUS—On the 19th Jan., at 16, Grosvenor-crescent, the wife of R. C. Antrobus of a daughter.

BULLER—On the 14th Jan., at The Vineyard, Totnes, Devon, the wife of Capt. Alexander Buller, R.N., H.M.S. *Modeste*, of a son.

CAMPBELL—On the 23rd Dec., at Ceylon, the wife of Major Sir John Campbell, Bart., R.A., of a daughter.

HITCHCOCK—On the 4th Jan., at No. 1,603, Lucas-place, St. Louis, Missouri, U.S.A., the wife of Ethan A. Hitchcock, late of China, of a daughter.

HOLBERTON—On the 18th Jan., at Hampton, Middlesex, the wife of Vaughan Holberton, of a daughter.

LOWDER—On the 8th Dec., at Shanghai, the wife of G. G. Lowder, Imperial Customs, of a son.

MCLEAN—On the 17th Jan., at Villa Massingy, Carabacel, Nice, the wife of N McLean, of a son.

STRONG—On the 26th Dec., at Tanglin, the wife of Capt. Strong, 1-10th Regiment, of a son.

TURTON—On the 19th Jan., at Pulham S. Mary Magdalene, Norfolk, the wife of Commander Ralph L. Turton, H.M.S. *Egeria*, China station, of a son.

MARRIAGES.

HILL—MCCLELLAND.—On the 14th Jan., at St. Stephen's Church, Bayswater, by the Rev. William Campbell, assisted by the Rev. Edwin Price, James Henry George, eldest son of the late James Matthew Hill, of Chumparum, Bengal, to Agnes Murdoch, youngest daughter of James McClelland, of 32, Pembridge-square, Bayswater, London.

MURRAY—INGLIS.—On the 12th Dec., at the Union Church, Hong Kong, by the Rev. James Lamont, Presbyterian Minister, John Murray, surgeon, Army Medical Department, to May Smithers, daughter of John Inglis.

DEATHS.

BRIMFIELD—On the 19th Jan., at New Cross, Walter Horace Brimfield, R.N., aged 36, after four days' arrival from the Pacific, from impaired constitution contracted on foreign service, deeply lamented.

LAMB—On the 19th Jan., at Muscovy-court, Tower-hill, John Lamb, in his 77th year.

MAITLAND—On the 22nd Dec., at Alexandra House, Cinnamon-gardens, Colombo, Mary, the beloved wife of John Maitland.

RUSSELL—On the 18th Jan., at Aberdeen, N.B., James Russell, of Aden, aged 77.

CUSTOMS REPORT ON THE TRADE OF CHINA.

The *Customs Gazette* for the quarter ending September, 1874, supplies the following statistics of the trade at the various ports as compared with the corresponding period in 1873 :—

NEWCHWANG.—The tonnage figures, both entered and cleared, are rather higher, being 34,192, against 29,230 for the corresponding period of last year. The imports of cotton goods are higher than in 1873 ; metals are also in advance, while native sundries are higher. The exports are nearly all higher. The revenue shows a decrease.

CHEFOO.—The tonnage figures, both entered and cleared, show a decrease. The import of cotton goods is lower, as is native sundries and metals. Exports show a considerable falling off as compared with 1873. The revenue is Tls. 72,747.9.9.0, against 68,145.2.0.8 in 1873.

TIENTSIN.—The tonnage figures, both entered and cleared, are rather higher. The imports of cotton goods have increased considerably ; those of native sundries are also in advance. The exports are lower. The revenue figures are Tls. 118,354.5.8.4, against 112,785,0.1.2 for the corresponding period of last year.

HANKOW.—The tonnage figures, both entered and cleared, are higher than in 1873. The import of cotton goods is slightly lower, as are also metals and native sundries. The exports are nearly all lower. The revenue figures are, Tls. 569,042.1.7.8, against 523,203.8.8.8 last year.

KIUKIANG.—The tonnage, entered and cleared, has increased. The imports are higher. The exports have gone up. The revenue figures are, Tls. 275,354.9.5.2, against 183,014.2.0.9.

CHINKIANG.—The tonnage figures, both entered and cleared, are higher. The imports of cotton goods show an increase ; metals and native sundries are also higher. The exports are nearly all higher. The revenue figures are Tls. 58,956.7.2.4, against 45,046.7.6.7 in 1873.

SHANGHAI.—The tonnage this quarter, both entered and cleared, is rather higher than in the corresponding period of last year. The imports of cotton goods, metals, and native sundries nearly all show an increase. The exports are nearly all higher than in 1873. The revenue figures have increased, being Tls. 940,487.7.3.3, against 843,847,4.7.7 last year.

NINGPO.—The tonnage, both entered and cleared, have both slightly increased. The imports of cotton goods, metals, and native sundries are all lower than in 1873. There is no material change in the export figures. The revenue is Tls. 320,185.5.1.5, against 290,437.3.6.4.

FOOCHOW.—The tonnage figures entered are lower than in 1873, cleared 56,092, against 53,827 last year. The imports of cotton goods and metals are lower ; native sundries have slightly increased. The exports are lower than last year, as is the revenue, the figures being Tls. 828,659.1.1.5, against 847,344.9.8.7 for the corresponding period last year.

TAMSUI (FORMOSA).—The tonnage figures, both entered and cleared, are lower. The imports are about equal. The exports are lower than in 1873. The revenue figures are Tls. 36,528.0.0.9, against 47,524.4.2.4 last year.

TAKOW (FORMOSA).—The tonnage figures are higher. The imports are lower than last year. The exports have increased. The revenue is in excess of last year.

AMOY.—The tonnage figures, entered and cleared, are higher. The imports are less than in 1873. The exports are in advance. The revenue figures are, Tls. 163,661.4.3.1, against 151,691.6.7.4 last year.

SWATOW.—The tonnage is higher. The imports are slightly altered, also the exports. The figures of the revenue are, Tls. 169,734.6.4.5, against 158,769.8.5.5 last year.

CANTON.—The tonnage figures, entered and cleared, are less than in 1873. The imports are also lower. The exports are not altered to any extent. The revenue is Tls. 264,731.9.2.3, against 329,932.2.8.0 for the same period last year.

Miscellaneous.

—o—

THE WESTERN CHINA ROUTE.

At a meeting of the Council of the Wakefield Chamber of Commerce, held on the 13th inst., the President (Mr. W. H. Lee) called attention to the unceasing efforts the manufacturing and merchant interests of the United Kingdom had made since 1859, by memorials to Her Majesty's Ministers, to obtain from the Government of India the opening of the short land route from Rangoon across British Burmah, to the Burman Shan States of Kiang-Tung and Kiang-Hung, and the adjoining south-west frontier of China; whereon, the present position of that project for opening such promising and greatly needed new markets to British commercial enterprise having been considered, the following resolutions were duly proposed, seconded, and unanimously passed:—

"That it unfortunately resulted from Lord Salisbury's retirement from office in the face of the important fact that, in obedience to his order, the survey of half the route, to the extent of 250 miles, had been accomplished and reported of most satisfactorily.

"That during the seven years which have since passed, European and American States have been systematically and actively advancing, in different directions, for commercial objects, towards various parts of China; seeing which, the Chambers of Commerce of the United Kingdom have continued to appeal more and more earnestly to Her Majesty's Ministers in favour of the short and comparatively easy route to Kiang-Hung.

"That the hitherto adverse course of the Government of India, unduly influenced and 'almost forced' by the 'repeated solicitations' of its military agent and sub-agent in British Burmah and Burmah proper, and supported by the Council of India, composed of retired members of the Indian services, precludes confidence being placed by this Chamber in a loyal observance by the authorities at Calcutta of his lordship's renewed sanction of the survey; unless, in exercise of the supreme authority vested in him, his lordship shall have seen fit to require its prompt completion, from the point on the right bank of the Salween river where the survey of 1867 stopped.

"That this Chamber would at the same time respectfully impress upon the Marquis of Salisbury that it can feel no objection to the survey or exploration by the Government of India of any other routes between India and China, whether prompted by political, military, scientific, or Indian commercial considerations; all that is sought on behalf of the manufacturers and merchants of the United Kingdom being that their goods for the west of China shall not be subject to the lengthened period of transit and to the greatly increased charges for freight, insurances, transhipments, and agencies by the way.

"That this Chamber would take this opportunity to express their respectful acknowledgments to his Lordship for having broken through, as they trust he will continue to do on the occurrence of further vacancies, the impolitic mode—injurious alike to the best interests of England and India—of forming the Council of India exclusively of retired and pensioned members of the Indian services, to the prejudice of the general commercial development of that extensive possession, of freedom of trade between it and the United Kingdom."

The Leeds Chamber of Commerce, at their meeting held on the 20th inst., had the following notice:—That the subject of a route from Rangoon to Western China, proposed fourteen years ago by Captain Sprye, and in favour of which about six memorials have been sent up by this Chamber, has again had its attention, and a memorial has been sent to Lord Salisbury, urging the completion of the survey of the route. If practicable, the sooner it is opened up, and the sooner a market of almost incalculable capacity may be opened for our manufactures, and if impracticable, the sooner it is demonstrated to be so, the better. On all accounts it is desirable to finish the survey, and your council has the satisfaction of having received a favourable reply from his lordship. The matter, however, must not rest, and your council trusts our Parliamentary representatives will not fail to take note of the position of this subject from time to time.

THE PRESBYTERIAN MISSION TO THE FAR EAST.

At the last meeting of the English Presbyterian Mission held in the College-hall, Queen's-square, the Clerk read a letter from the Rev. Mr. Dale, resigning his charge at Singapore on account of the serious illness of his wife, who was ordered to England. He stated that he much regretted this step, but was compelled to do so; but that he intended to remain until a successor was appointed, which he hoped would be by the end of April of this year. A letter was also read from the congregation, in which a committee was named to obtain a suitable successor to Mr. Dale. The Rev. Dr. Fraser moved that Mr. Dale's resignation be accepted, and that his connection with the Presbytery continue till end of April. Dr. Fraser bore testimony to what Mr. Dale had done, and his prospects for the future. This was seconded by Mr. H. M. Matheson, and agreed to.

The Rev. Dr. Dykes reported on behalf of the committee appointed to consider the propriety of the ordination of a catechist in connection with the Singapore Mission, that, taking all the circumstances into consideration, it would be unwise to do so at present.

THE TRANSIT OF VENUS.—Professor Young writes an elaborate statement to the New York *Semi-Weekly Times* describing the voyage to Peking of the scientific parties sent out by the United States Government to observe the coming transit of Venus. The letter states:—We left San Francisco on the 28th of July and landed at Yokohama on the 23rd of August, in the midst of a gale of wind, which proved to be the edge of a typhoon by which Nagasaki had been devastated the preceding night. With this exception the weather during the whole voyage was either fine, or at the worst a little showery, and the smoothness of the water was a continual and very gratifying surprise to one whose ideas of sea-going had been derived from a little experience on the Atlantic. The loneliness of this sea is striking. From the time of leaving the coast of California until we entered the Bay of Yeddo we did not see a single sail, nor any living thing except a whale or two, with occasional schools of flying-fish and porpoises, and always the patient gulls which followed us quite across the ocean. But the ship herself deserves a good word, for the most experienced voyagers among us agreed that we never found a vessel so comfortable, so well provided, and so well managed. Poor old *Alaska*! A week or so after we left her she broke her shaft, on her way down to Hong Kong, and while lying in the harbour there, repaired and nearly ready to sail, she was caught by the typhoon of September and driven ashore upon the rocks, from which she is hardly likely to get off. After visiting the various ports we left for Peking, where we found Admiral Pennock expecting our arrival, and zealous to do everything in his power to facilitate our object. We sailed on the 3rd of September, and after a very pleasant passage reached Tientsin on the 9th. We went up the river from Tientsin to Tung Chon in the usual manner—on small house-boats—and from the latter place completed our long journey by a sixteen-mile ride on donkeys, reaching the Imperial City late on Sept. 16, very sore and weary, but grateful and happy over our safe arrival. The instruments for taking the observations have arrived without any accident.

M. GEOFFROY, the French Minister in China, was at Rome a few days ago, and was received in audience by the Pope. He was accompanied by his wife, who brought with her two young Chinamen, her own converts to Christianity, to be presented to his Holiness. M. Geoffroy is believed to have visited Rome in accordance with the Pope's expressed wish. His Holiness desired a conference on Catholic interests in China, and on the means to be adopted to extend Christianity in that country.

THE Toronto Board of Trade have made a request for the reciprocal removal of the duty on teas and coffee and the replacing of the duty on those articles from the United States.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, JAN. 19.

The *Kieler Zeitung*, which is considered to be the semi-official organ of the Admiralty, publishes the following list of ships of war that are to be put in commission this year:—In April the *Niobe* for a cruise with naval cadets, the *Medusa* and *Rover* for the training of boys, and the *Musquito* for the Mediterranean station. The *Cyclop* will go to China and Japan, the *Tiger* to Wilhemshaven, as tender to the old wooden line-of-battle ship *Renown*, now used for gunnery practice. In May the gunboats *Drache* and *Delphin* will commence their hydrographical surveys and deep-sea soundings. In June a squadron will be formed for a cruise, in October the *Vineta* will go to Japan with cadets, and the *Comet* to the Mediterranean to relieve the *Meteor*. It is, however, very likely that some more vessels will be sent to the coast of Spain in consequence of the rehabilitation of the Monarchy, in order to reinforce the German squadron, which at present only consists of the *Nautilus* and *Albatros*.

There is now exhibited at the Museum of Trades in this city a very handsome and curious box of lacquered ware, a present from the Government of Japan to Captain Brock, of Hamburg, in appreciation of his humane conduct in saving the lives of a crew of Japanese sailors shipwrecked in those seas. I may here mention that the Museum was last year enriched by a valuable collection of Japanese articles of native workmanship that figured at the Exhibition at Vienna in 1873, presented by Messrs. Shioda and Hiroyama, the Japanese Government Commissioners, among which are some beautiful specimens of lacquered ware, such as are but seldom seen in Europe in such perfection; also a collection of native paper and articles made of paper, as well as their liquid varnish.

Herr von Prschewalsky, a learned Russian who has travelled for three years in China, is now engaged in preparing for publication the result of his experiences, and an account of his travels. It will be a work in three volumes. The first will contain the physical geography of those parts of the country that he visited; the second his meteorological observations, taken four times a day, with a description of the Fauna; whilst the third volume will be devoted to Botany and the Flora of the country. The maps and plans to illustrate the first part are being prepared in the Imperial Military and Topographical Institution at St. Petersburg. He hopes to be able to publish the first volume in the course of this year, but the whole work is not likely to be completed before the summer of 1877.

COMMERCIAL.

Since the re-opening of the Produce Markets Tea has been steady, but the sales were neither important nor numerous. The imports of last year (reduced to quarter-chests) were as follows:—Black teas 31,091 chests, against 42,375 ditto in 1873 and 43,850 ditto in 1872; and of green 2,213 chests, against 2,158 ditto in 1873 and 3,066 ditto in 1872. At the end of last year our stocks in warehouse consisted of 9,591 chests of black and 1,676 ditto of green. Rice is firmer, and exhibits a tendency to go up, as the stock is low and constantly getting lower from the daily sales, so that the first arrivals are likely to come to a good market. Cassia remains as before the holidays, and there is a good consumptive demand, the quotation being 66 to 67 marks for Lignea, and 110 for Flores. Pepper is in favour at 65 to 66 marks for Singapore and 61 to 62 ditto for Penang. Of Oil of Cassia 40 chests have been sold at fair prices for delivery on arrival. 300 chests of Star Annis, lately to hand, were sold as soon as landed. Gum Damar is in more favour, and rising; 5 chests of Singapore have changed hands.

SHIPPING.

ARRIVALS.—Peter Godeffroy from the South Sea Islands; Metis, from Rangoon.

The thaw has continued ever since my last letter, and the ice has mostly disappeared. The steam ice-breaker mentioned in my last did most efficient service, on one day liberating no less than seven sea-going steamers caught in the ice and embedded therein, who were thus enabled to proceed to their respective destinations without any further delay.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.

AMSTERDAM, JAN. 13.

To day is a *jour de fête* for General Van Swieten, whose admirers will present him with a golden cup, plenty of compliments, and a dinner into the bargain. His satisfaction must, however, be somewhat embittered by a letter which has been addressed to him by General Van Merlen, and published in the *Vaderland*. The following are the outlines of this epistle. "When you wired," the author says, "the Kraton is ours!" I hoisted the colours, but since I have read all the official documents, pamphlets, &c., about the second expedition, I quite agree with General Knoop that this expedition was only a "half success," and I am disappointed regarding my expectations from such a commander and such a naval and military force. I should not have meddled myself in this paper war if you had not accused all your antagonists of party spirit and want of patriotism. Such accusations are very bad arguments, and they prove nothing. Nobody doubted the bravery of our army or our navy, but we had hoped for more prompt operations. General Van Merlen goes on to detail some of the shortcomings of the Commander-in-Chief, and he concludes as follows:—"You say that the second expedition was a success. Certainly it was, if you were only charged with the capture of the Kraton; in that case you would have done your duty, which after all was not a very difficult one with such brave soldiers." General Van Swieten will not find it less easy to answer this letter than the congratulatory addresses which are forwarded to him.

The statement that General Verspyck had been appointed Commander-in-Chief of the East Indian army—which was given by the leading paper of the Conservative party—has been most positively contradicted. Nevertheless, the *Dagblad* maintains that it is correct.

The Members of the First Chamber met yesterday for the despatch of business. The greatest interest is exhibited about the elucidations which are to be given by Mr. Van Goltstein about the appointment of Mr. Van Lansberge as Governor-General of Java. I hope they will be satisfactory, but I fear such will not be the case. It creates some astonishment that another appointment causes relatively so little noise, though it was quite a surprise. Mr. Hasselman—a Conservative *pur sang*—is made a Member of the Council of State, replacing a thoroughly Liberal Member. This fact affords addition proof at that the policy of Mr. Van Goltstein is a mixture of Conservatism and Liberalism. Whilst we are waiting for the Ministerial elucidations, the following information is given by the *Arnhemsche Courant* as to the reasons that led to the dismissal of Mr. Loudon. In the last days of August Mr. Fransen Van de Putte wired to Buitenzorg that the Ministers had asked for their dismissal, and that Mr. Van Goltstein would be appointed Minister of the Colonial Department. Mr. Loudon thereupon wished at once to resign, because he knew that the new Minister had expressed strong disapproval in the Second Chamber of his conduct in the Atchin war. Mr. Van Goltstein, however, wrote a most conciliatory letter to Mr. Loudon, and perhaps this would have had a good effect if the Minister had not sent orders by telegram to stop Mr. Levyssohn Norman's commission. As soon as this telegram arrived Mr. Loudon asked for his dismissal. One of our papers—the *Standaard*—now asks if it is not necessary to alter the Java Constitution. This fundamental law dates from a time when there was no telegraphic communication with Java, and it will happen—as has happened now—that a conflict will occur between the Minister and the Governor-General, who according to this law is not obliged to obey the orders of the Minister, if he thinks it necessary to act contrary to them.

I told you in my last that the Minister of the War Department had ordered subaltern officers to be sent to the provinces to enrol young men for the East India Army. This measure has not had the desired effect. There are but very few volunteers, notwithstanding that the bounty is relatively very large.

Within a few weeks a new (English) line of steamers will be opened between Rotterdam and Batavia. Up to this moment no particulars are published.

The society to substitute cremation for interment numbers already 800 members. In some towns sub-societies have been established.

Much noise has been made in the press about the statue of Mr. Thorbecke, since the Minister Heemskerk refused to grant a few feet of ground for the site of the memorial.

AMSTERDAM, JAN. 20.

The last sitting of the First Chamber of the States General before the recess was of great interest to the public. The Colonial Budget was the subject in hand, and it was known that the Minister would give explanations about the resignation of Mr. Loudon. The Minister limited himself to the communication of the mere facts. On the 15th February, 1874, when the Governor-General was informed that the Liberal Cabinet would very soon resign, Mr. Loudon wished at once to resign, but his demand was not granted. The present Ministry, when they came into power, intended to retain him in office. But Mr. Van Goltstein was much disappointed when he opened his career as Minister, on the 27th of August, by a telegram, dated the 23rd, in which Mr. Loudon asked peremptorily for his dismissal, unless Mr. Van Goltstein would retract openly his criticism upon the Governor-General, which he had spoken in the First Chamber, and by which he stated that the Governor-General did not possess his entire confidence. This speech was delivered on the 16th of June, 1873. In answer to this telegram the Minister wrote a confidential letter, in which he demonstrated that, according to his opinion, these words needed not to be retracted, and he assured Mr. Loudon that in the meanwhile he would support his policy in the Chambers. In the month of December, however, the Governor-General asked again for his dismissal, this time unconditionally. This proceeding was called forth by the measure of the Minister, by which the mission of Mr. Levysohn Norman, who was charged to arrange for the conversion of communal property into individual estates, was stopped. Mr. Loudon wired, "My honour and my duty alike forbid me to work with your Excellency. Our opinions about the exercising and maintaining of our authority differ so much that it is impossible to come to any agreement." The two leading members of the Liberal party stated their sincere regret that Mr. Loudon had been obliged to take this extreme measure, but they considered that he had acted properly, inasmuch that the Minister had weakened the prestige of the highest functionary in our Colonies. Upon the Budget no further debate of importance took place, and it was approved of unanimously. The Minister of the War department had a hard task to defend his Chapter, in consequence of the very large sum which he requires. The Budget of the Naval department was carried by twenty-four against four votes, and contrary to the general expectation, it was defended most eloquently by the Minister, who made such a miserable figure in the Second Chamber.

Last Wednesday an extraordinary ceremony took place here in the public park. Three hundred and fifty persons had contributed to a fund in order to present General Van Swieten with a gold cup, and about one hundred were present to attend this *fête*. At half past four the General arrived, and was addressed by Mr. Gleichman, well known in financial circles. He made some excuses that the number of those who had contributed in behalf of this fund was so small; but he said no appeal had been made to the public, and his admirers would avoid fuss. If such an appeal had been made the number of subscribers would have been much larger. After this somewhat hazardous supposition, he recalled all that had been done by the General. Then the *cadeau* was handed to the General, who declared that he could not find words sufficient to thank the givers. This of course was comprehensible, but it was less clear when he spoke of his "conquering Sumatra." He further communicated the surprising fact that we are now busy erecting in Atchin a pharos, from which he concluded that when the entrance to the Malacca Straits has been made safe, people will see—of course by means of the light in the lighthouse—that Holland is still first among civilised nations. The *fête* concluded with a dinner. The Liberal papers have given the toasts in full, and those of your readers who are fond of reading agreeable nonsense I recommend to buy the *Handelsblad*. This paper and the *Nieuwe Rotterdamsche Courant* are still the thick and thin supporters of the Government policy in Atchin, but many influential Liberal papers have deserted to the camp of its opponents.

A very extended section report has been published about the Bill for the construction of railways in Java. A considerable number of the members of the Second Chamber pleaded for the system of their construction being undertaken by the State. Others, however, object to this course, and are in favour of the construction of the new lines by private enterprise. There has been also much difference of opinion about the question whether the State should manage the traffic. A mass of questions was addressed to the Minister, to which Mr. Van Goltstein answered most unreservedly. He supported most warmly the principle of constructing the line on account of the State, which also ought to manage the traffic. The Netherlands India Railway Company has forwarded an address to the Government, pleading the necessity of altering the conditions upon which concessions are granted for the construction of the lines.

I regret to record the death of Mr. W. J. Touekens. Since 1849 he had been a member of the First Chamber of the States-General.

Mr. J. L. H. A. Baron Gericke van Herwynen, our Minister for Foreign Affairs in the last Liberal Cabinet, has been appointed Ambassador at the Court of Brussels.

On the 8th of February a festival will take place at Leyden, to commemorate the three hundredth anniversary of the University. Several professors are invited to attend this ceremony, and amongst them are Mr. J. E. B. Mayor, from Cambridge, Mr. J. Heywood, from London, Messrs. J. Pentland Mahaffy and R. Atkinson, from Dublin.

As a curiosity I may mention that at a recent meeting of members of the Peace Society a proposal was made in sober earnest to establish a Society to Promote the Welfare of the Atchinese. It was urged that missionaries should be sent out in order to spread civilisation amongst the natives. *Risum teneatis, amici?*

The news that the Rev. Mr. Segers has accepted the proposal to become a professor at the Seminary of Batavia has been officially contradicted.

Some days ago the police arrested a large gang of coiners. There is much false coin in circulation.

SHIPPING.

ARRIVALS.—Jan. 14, at Brouwershaven, from Batavia, Triton, Nederland; from Macassar, Vrachtzoeker; at Texel, from Batavia, Sourabaya Packet; at Flushing, from Samarang, Copernicus; Jan. 15, at Texel, from Samarang, Helena and Henriette; at Hellevoet, from Batavia, G. H. Betz; at Brouwershaven, from Batavia, Æolus; Jan. 17, at Texel, from Batavia, Nicolaas Witsen, Bestevaer.

PASSENGERS OUTWARD.—To Java, per steamer Koning der Nederlanden: Messrs. L. C. Koster, J. Luytjes, R. W. G. van Pabst van Bingerden, A. van Schermbeek, A. J. van Marle, J. W. de Villeneuvs, W. W. C. Brederode, Last, A. Barge, Bonemeijer, Mrs. A. P. Meeussen van Viegen, Miss M. M. Heydenreich, Messrs. H. N. Grobbée, E. J. F. Tack, Sythoff, A. van Haarte, F. Hutschler, R. E. Batten, Miss J. M. Batten, Miss A. A. Beets, Mrs. Holtzapffel, Miss A. Gersen, Messrs. P. F. H. Volcke, J. Milder, J. C. Ulfers, J. C. Palm, H. L. Veerkam, J. C. Scheffer, C. J. Schotel, J. Wilhelmus, G. van der Swaagh, J. L. P. Lapra, A. A. Lammers, K. J. Prakken, P. Elenbaas, P. Dorland, J. Pasman, J. B. Lont, Voemaer, E. E. P. van der Meersch, C. de Munnik, A. J. Kerkhoff, J. Buys, A. E. de Bourbon, C. Boon, J. de Leeuw, C. H. J. Kampmeinart, J. Jongkees, J. C. T. Kroon, H. J. v. Spanje.

To Java, per steamer Madura: Messrs. R. H. F. A. Kempers, Leon Dezentje, B. A. Hildebrandt, G. H. Klosser, H. Prins, J. B. H. A. Wolff, D. J. Caminha, N. Rijnbende, D. A. Detmar, V. Kobler, C. G. Wemmerslager, C. Weintraub, A. Van Moerkerken, J. C. Parijs, J. C. G. Keedsmeijer, J. D. L. Roque, A. Schneider, L. Prochnitz, J. Maclaine Pont, W. Staal, H. Van Rijckevorsel, P. S. A. THE KELUNG COAL MINES.

IN the second part of his Report on the Foreign Trade of Tamsuy and Kelung for the year 1873, H.M.'s Acting Vice-Consul furnishes a translation from the annals of the sub-prefecture, published under the direct authority of the Chinese Government, which gives some noteworthy details respecting the history of the opening of these mines. More than a century ago, we find, "the inhabitants used to dig into "the ground, and sell the materials excavated to make em- "bankments for their fields, but as the excavations became "more extensive, it was feared that the *pulse of the dragon* "(geomantic influences) would be injured," and further operations were prohibited. From this time, about the end of the last century, there is a gap, it seems, in the official history of the mines until we come to 1847. From other sources it is known that in that year a British officer visited the mines, and reported that no difficulty was experienced by the natives in working them. In that year, however, and not improbably in consequence of the visit in question, "a further prohibition was put out, and in "1850 an application from the British Minister, request- "ing that the mines might be worked, was refused. In "1865 the Foochow Commissioner of Customs proposed "that foreigners should lease the mines;" and that year again a prohibitory notice was issued, at the instance of the sub-Prefect, gentry, and people. These coincidences are odd, and there can be no doubt that Mr. H. J. ALLEN is right in considering that, at any rate in late years, the superstitious objections of the people were directed solely against foreigners. Early in 1870, however, the shoe began to pinch at home, and the Chinese authorities wanted coal for their own purposes; and in consequence the Governor-General ordered inquiries "into the feasibility of opening "the mines at Kelung, having due regard to the wishes "and susceptibilities of the inhabitants." Three Chinese officials accordingly visited the district and made the required investigation, the result being that "in the 8th and "9th the prohibition as to working the mines was re- "moved." It is, of course, sufficiently well-known that the prohibitions above mentioned were to a great extent a mere *façon de parler*, and, as Mr. ALLEN observes in his comments on the matter, it is curious that the Commissioners sent to open the mines should have found that ninety-two mines had already been opened, for it shows that the people had overcome their fears of injury to geomantic influences. In removing the official prohibitions against coal-mining the Commissioners were careful to impose certain restrictions, probably intended to guard against *exploitation* by foreigners, for they directed that "there "being sixty-nine mines now open . . . within a tract "extending twenty *li* from north to south, and five or "six *li* from east to west, no others shall be opened." Jealousy of foreigners and foreign interference is very apparent in the rule which they made that "the lessees of "the mines, who shall be natives of the place, and shall "have their families' houses and tombs here, shall guarantee "each other, when they shall receive licences; but from "this all those in the employ of foreigners shall be ex- "cluded." Again, it was ordained that "purchases shall "be made through certain hongs, which shall be subject "to official inspection and supervision, and that whoever "refuses to deal through these hongs, but buy and ship "coal from the pit's mouth, shall be deemed guilty of a "breach of agreement;" and he would no doubt find the consequences of disobedience to be of a very unpleasant nature. Now that the Chinese are beginning to feel the urgent want of coal for their own arsenals, steamers, &c., it may be hoped that more liberal counsels will soon prevail with the high provincial authorities, and that before long it will not fall to the lot of a Consular officer to be obliged to state, as Mr. BABER was, in reviewing the trade of Tamsuy during the year 1872, that "coal-working at "Kelung is little more than a scratching of the surface in "a few places, and that the real coal-beds may be looked "upon as practically untouched." It is high time that this coal-field should be more fully developed by the aid of foreign capital and science, for it has been clearly shown that the coal is of a very fair quality for steaming purposes, and would be better if the pits were only properly worked, and even as matters now stand, it is stated that for household purposes it has no superior. To encourage production, and in the interests of commerce generally, the present absurdly high duty on native coal ought to be very considerably lowered; and on this point Mr. ALLEN thinks, and rightly too, that it is a pity that the reduction in Customs' duties from four candareens to five cash a picul, which was suggested in the Convention which Sir RUTHERFORD ALCOCK negotiated could not come into force. The present rate of taxation, he adds, is, as cannot be too often pointed out, far too onerous. Perhaps when, with the aid and assistance of foreigners, LI HUNG-CHANG has got the Chihli mines into working order, the Chinese Government will see the necessity for reform and liberality in the matters to which we have alluded, and in the meantime Her MAJESTY'S Minister at Peking ought never to lose an opportunity of urging the subject on their serious consideration.

MANCHURIA AND KOREA.

IN the discussions which have taken place with regard to the development of trade in the Far East, Manchuria and Korea have been almost, if not entirely, overlooked, and H.M.'s Acting Consul at Newchwang has done good service to the interests of commerce by directing public attention in his Trade Report to these localities, with which it may be hoped that before very long an important business will be done. In Mr. A. S. HARVEY'S opinion the attainment of this very desirable end will be materially hastened by the occurrence of two events in 1873,—the one being the establishment of a line of steamers connecting the Amoor, Port May, and Passiette with the Treaty ports of China, and the other a revolution in Korea, by which the usurping Regent, who set his face against all foreign intercourse, was deposed in favour of the young King, on whom better influences had been brought to bear. Mr. HARVEY is undoubtedly right in stating that "the more "rapidly the Russian Settlements on the Eastern coast be- "come wealthy and populous, the sooner will Manchuria "become a participator in the benefits of progress," for the Russians are not likely to allow the obstructive policy of the Peking Government to stand in their way, when it suits their purpose to turn the resources of Manchuria to profitable account. Again, in Korea the King has shown signs that he is not hostile to the admission of foreigners, or to the exchange of treaties with the nations of the West. It is, therefore, highly probable that, as Mr. HARVEY observes, the day is nearer when the country will be thrown open to foreign trade, and when this takes place, the advantages which will accrue to Southern Manchuria are sufficiently obvious. The position which that district occupies with regard to China, Korea, and Japan, is a very important one, especially when we consider that the southern portion of its seaboard is open to navigation all the year round; and it possesses two additional attractions in its great mineral wealth and the salubrity of its climate. On the latter subject Mr. HARVEY evidently entertains a very decided opinion, for, judging from his own personal experience, he considers that Europeans would enjoy as much vigour there as at home, whilst the beauty of the scenery along the ranges of the hills and the charm of sunny days and cloudless skies would make their banishment more easy to be borne. We commend this subject

Digitized by Google

to the notice of Her MAJESTY'S Minister at Peking, and we would point out that his newly-acquired influence with the Chinese Government would be turned to good account, and he would besides earn for himself the gratitude of a large section of the commercial world, if, after persuading the Chinese to dredge the Woosung Bar, abolish the *lekin* tax, and settle a few other outstanding matters, he were to induce them to consent, without any further ado, to the complete opening of Manchuria and Korea to foreign trade.

THE TROUBLES IN SIAM.

THE news of disturbances in Siam, announced by a telegram from Singapore, given in another column, comes upon us like a thunderclap in a cloudless sky. Nothing definite is or can be known in this country at present as to the origin of the quarrel between the Major and Subordinate King. An attempt for some reason or other was made to arrest the Second King, and he fled for refuge into the premises of the British Consulate, some two miles distant from his own palace. There for the present His Majesty may safely remain, without fear of molestation. It is further announced that the Second King has declined to appeal to arms, and has disbanded his forces, and it has been assumed by at least one of our contemporaries that the Second King has a large number of troops at his disposal, and is even in some sense "the Commander-in-Chief" of Siam. This is an error; as far as trained soldiers are concerned the Second King could probably muster about 2,000 men, or rather just so many as make up the body guard who protect his person and palace. Those of our readers who have any personal recollections of Siam will probably remember that the Second King, as Prince GEORGE, is a young man, now thirty-four years of age or thereabouts, tall in stature, but mild and timid in his disposition. He is the last person of those in authority in Siam to have knowingly involved himself in a struggle or feud with the Major Monarch. Some quarrel or other there evidently is, and it is probable, therefore, that it has been forced upon the Second King. There will be no bloodshed. This we feel great confidence in predicting, from what we know already of the gentle temper of the Siamese, and because there are in Bangkok many men of intelligence and education who will have influence enough to prevent any serious riots. If we ventured on any conjecture at all we should say the quarrel is a private one between the two kings, some squabble about the relations between the two Royal families, not an outbreak dividing the nation into two hostile camps or of serious consequence to the people at large.

THE appointment of Mr. W. HANDYSIDE TAPP as Registrar of Shipping at Shanghai is gazetted. We believe that Mr. TAPP will proceed to his post by the last mail in February. The first representation on the subject of appointing a registrar was made to H.M. Government in 1867, by Mr. TAPP, through Mr. Consul WINCHESTER. The Chairman of the Chamber of Commerce also wrote on the 17th of March, 1873, as follows:—"I am informed that the "question has already been laid before the Foreign-office "in a despatch from Sir RUTHERFORD ALCOCK to Lord "CLARENDON, dated 21st of November, 1869, which en- "closed a joint communication on the same subject from "Sir EDMUND HORNBY, Chief Judge of the Supreme Court "for China and Japan, and Mr. MEDHURST, H.M. Consul, "and it is understood that the representations made by "those gentlemen were in favour of the proposal which "this Chamber desires now to advocate."

MR. CHEN LAISUN, for many years connected with the foreign trade of Shanghai, and who was engaged by SHEN PAOU CHUN—one of the foremost Chinese officials—to superintend the education of Chinese youths in America, has come to this country, for the purpose of ascertaining the working of our various schools. He has at present about ninety pupils in Massachusetts and Connecticut, and it is quite probable that he will induce the Chinese to make a trial of England. Mr. LAISUN has been assisted in his examination of the schools about London by Mr. THOMAS HANBURY, formerly of Shanghai.

DR. BUSHELL, who has been for some time in England on leave, will return to his post as Physician to the Legation at Peking—which appointment he has held since 1868—by the San Francisco route, accompanied by Mrs. BUSHELL.

ANOTHER meeting of the Anti-Opium Association has been held at the Friends' Meeting-house, in Bishopsgate-street, at which Dr. LEGGE, Mr. HANBURY, CHEN LAISUN, and others spoke.

A DENIAL is given to a rumour which has been current that the French Government was making preparations for despatching a large expedition to Tonking, in Cochin-China.

Literature.

Mr. Edward Herslet, C.B., has supplemented the work on "Commercial Treaties," commenced by his father and continued by himself, with a collection of "Treaties and Tariffs Regulating the Trade between Great Britain and Foreign Nations," and "Extracts of Treaties between Foreign Powers." The first part, relating to the treaties between this country and Austria, is now before us, and it is in every respect a valuable compilation. It is Mr. Herslet's endeavour to show which of our commercial treaties are now in force, and also what treaties affecting commerce have been made between foreign States containing clauses conferring more favourable treatment on their respective subjects, commerce and navigation, than are specially provided for in the English treaties, but the benefits of which concession are or might be enjoyed by British subjects under the "most favoured nation" clauses of the English treaties. The compiler has, in fact, waded through a multitude of volumes, written in a variety of languages, and culled from them the useful portions, which he presents in a convenient and accessible form. Treaties have hitherto been surrounded with an immense amount of mystery, and their provisions have been quite unknown, even by those British subjects residing in foreign countries for whose benefit they were concluded. The volume before us and the successive portions of Mr. Herslet's work will do much to familiarise us with our privileges as British subjects, for a study of it will convey a knowledge of the position of England as regards her commercial engagements with other nations, and will materially assist in the inviolable maintenance of commercial treaties. The work is published by Messrs. Butterworths.

The *China Review* for September and October, 1874, contains three continuations of papers which have appeared in former numbers, viz., Mr. H. A. Giles's "Translation of the Hsi Yuan Lu, or Instructions to Coroners," Mr. C. F. R. Allen's "Tales from the Liao Chai Chi Yi," and Mr. J. G. Kerr's "Benevolent Institutions of Canton." The place of honour is assigned to an interesting article on "Audiences granted by the Emperors of China to Western Envoys," written apparently to disabuse people at home, as well as not a few in China, of the idea that the audience of June 29, 1873, was the first ever granted to European ambassadors. The writer has collected together a considerable amount of information on the subject, beginning with the mission of the Portuguese, Thome Pires, who landed at Canton in 1517, and was kept waiting there for three years. Much as we should like to do it, the space at our disposal precludes the possibility of following the writer through the curious details which he has brought together with much care, respecting missions, the history of which is, we doubt not, a *terra incognita* to a large number of his readers. In concluding his paper he makes an observation, in reference to the last audience in 1873, which the foreign envoys will do well to bear in mind in the future, if they wish these audiences to have any good effect on the Empire at large, where a strict attention to ceremonial observances is everything. Having pointed out that the Purple Pavilion (or Tsze-Kuang Ko), where Messrs. Vlangaly, Wade, &c., were received, is only just within the palace grounds, he remarks:—"The Grand Audience Hall is in the centre of the inner quadrangle, where there are fine waiting halls for all ranks; and it is here that our Ministers should have been received, and not in the place of reception for outer tribes and tribute-bearers." This number of the *China Review* also contains a paper on the Noble Art of Self-Defence in China, founded on a *brochure* printed at Canton, and accompanied by some grotesque woodcuts; and Mr. George E. Stent, whose *Jade Chaplet* we noticed same months ago, contributes the first instalment of a poetical account of Meng Cheng's Journey to the Great Wall, of which we hope to say more on a future occasion. M. Gubler's Report upon the Materia Medica of the Chinese completes a very good number of the Magazine. There is a paucity of "Notes" this time, but the Rev. Joseph Edkins contributes a very interesting one on the Present Aspects of Chinese Philology in Europe.

The Rev. A. Wylie, of Shanghai, has completed, in three books, a second edition of the translation of Professor Herschel's Out-

Digitized by Google

lines of Astronomy, revised and enlarged. The work must have been a laborious one, and reflects the greatest credit on Mr. Wylie, and we trust will be adequately appreciated by those for whose benefit it is intended. It is by such works that we shall gradually break down the ignorance and arrogance of the Chinese. In the prefaec Mr. Wylie says:—Chinese characters have been substituted throughout at a considerable expense for the English on the original plates, which have been obligingly furnished by Messrs. Longman and Co., the publishers. This will render the work much more in accordance with native taste and convenience. The engraving of the Chinese characters in London has been kindly superintended by Mr. Thomas Jenner, to whom the writer is greatly indebted for the care and trouble he has taken in the matter. Without such a friend it would have been very difficult to secure the accuracy that may now be relied on. Since the first Chinese edition was published the eminent author of the original work has finished his labour on earth, and it has seemed to the translator peculiarly appropriate that a life spent so greatly to the profit of his fellow-men should not pass without some record being appended to this re-issue of his most popular work among the numerous inhabitants of the middle kingdom. A short memoir has therefore been prefixed, the materials for which have been drawn chiefly from the extended obituary notice in the annual report of the Council of the Royal Astronomical Society, for which the writer is indebted to the kindness of Mr. John Williams, the esteemed Assistant Secretary; some particulars have also been gleaned from the memoir in the *Leisure Hour*, the proprietors of which have liberally permitted the use of their pictorial illustration, and these have been generously presented to the enterprise at the expense of Mr. Jenner. It may impart confidence to know that the whole of the manuscript has been submitted to the revision of Le Shen-lun, the collaborator in the original translation, who is now Professor of Mathematics in Peking College.

MARINE LOSSES IN 1874.

The *Shipping Gazette* gives a review of the most prominent occurrences relating to steam navigation during the past year. In the first place, there was a large falling off in the emigration trade to America, in consequence of the financial difficulties in the United States and the diminished demand for labour. This decline in the passenger trade has been aggravated by a severe competition between the steam navigation companies. Freights have been lower, generally, than ever known before, and the attempts made to bring about a better understanding among those directly interested have had no beneficial effect. A decrease in passengers and goods, with lower rates, must have told disastrously on the earnings of the companies; and the high price of fuel and provisions has tended to increase the expenditure. Fortunately, however, the year has closed without any such disastrous shipwrecks as those to which we had occasion to refer in our summary of the 1st of January, 1874. There have been some lamentable losses of life at sea in 1874, but none to equal the calamity which resulted in the stranding of the Atlantic (s.) near Halifax, when 586 persons perished. The past year, however, has not been free from losses in the Transatlantic lines. The Europe (s.), from Havre for New York, was abandoned, but the four hundred passengers and crew on board were timely rescued. The Amerique (s.), from New York for Havre, was also abandoned, but was fallen in with and towed safely into Plymouth. The Court of Admiralty was called upon to award salvage for the recovery of this derelict, and the Judicial Committee of the Privy Council reviewed the judgment of Sir R. J. Phillimore. The Mississippi (s.), from Liverpool for New Orleans, got ashore on the coast of Florida, near the Fog Rocks; but, after considerable exertions made to float her, she was eventually got off and taken into Key West. The Viking (s.), from Liverpool for Montreal, stranded near Farther Point and filled. The Trojan (s.), from Glasgow for St. John, sailed and has not been heard of. These casualties were not, however, so fatal to life as those which occurred in 1873; and, as regards the American trade, there is every prospect of better times for 1875.

The trade with India, the Straits, China, and Japan, through the Suez Canal, received considerable development during the past year, but the increased dues have been felt from the fact that the scale of freight has not corresponded with the heavier imposts. With respect to casualties to vessels in this trade, there were a few reported; but, looking to the large tonnage engaged, the losses were inconsiderable. The Arcturus (s.), from Liverpool for Calcutta, grounded on Gindurah Rock, and became a complete wreck; the Amelia (s.) was sunk in Lake Timsah, after colliding with the Annie Ainslie (s.); the Good Hope (s.), on her voyage from Calcutta, stranded at Ras Metamer, forty miles from Suez, but was got off; the Woosung (s.) was wrecked on the Kolamele Reef, twenty-five miles from Jibbel Teer, and became a total loss; the Firenze (s.), of Genoa, stranded seventy-eight miles from Suez; the Queen Elizabeth (s.), on her homeward trip from Calcutta to London, got on to the coast of Tarifa, and twenty persons were drowned—the ship broke up and became a complete wreck; the Calcutta (s.) was run into by the Galatea (s.) in the Hooghly, and was so badly damaged as not to be worth the cost of raising; the City of Carthage (s.) grounded on the Ras Shi-ikans Reef, in the Red Sea, but got off after jettisoning a portion of her cargo; the Dhoolia (s.) also stranded in the Red Sea, and subsequently floated off; the Canton (s.), from Foochoofoo for London, was lost on Min Reef; the Wyberton (s.), from Southampton for Java, collided with the Spanish steamer Buena Ventura, was cut down, and sank about twenty miles from Suez; the Tenasserim (s.), from Rangoon for London, stranded five miles north of Ras Hafoon, and became a complete wreck; the Gordon Castle (s.), tea laden, from China for London, got on the Birlings, floated off, then stranded at the Cascaes, but was ultimately got into Lisbon; the Clive (s.) got aground at Getettar, but was got off after jettisoning 300 tons of cargo; and the Ennerdale (s.), from Liverpool for Bombay, got aground near Ras Gharib, but got off with damage to her hull.

Among the losses also reported in our maritime intelligence were the Marley Hill (s.), which stranded on New Year's night on the north shore of Whitehaven; the Columbine (s.), near Oosima, Japan; the Ormesby (s.), from Cardiff to Constantinople; the Union (s.), sunk off Dundee; the Adelaide (s.), sunk at the entrance to Glenarm; the Ellen Constance (s.), from Porman for Hull, was run into and cut down by the Spanish ironclad Vittoria, and three men were drowned; the John Fenwick (s.), from Nicolaieff for Altona, was wrecked off Vlie, and ten persons drowned; the Ravensworth Castle (s.), from Baltimore for Leith, was wrecked at Craster; the Woolsington (s.) was lost near Stavanger, and all hand perished; the Netherton (s.) stranded near Cape Grisnez on a voyage from Newcastle to Boulogne, and was a total loss; the Relief (s.) was wrecked near Hirado in Japan; the Shamrock (s.) sank in the Humber; the Cambridge (s.) foundered in the North Sea, on her passage from Uddewalla for London; the Enterprise (s.) stranded off Brouwershaven and became a total wreck; the Sidra (s.), from Malta for Newcastle, has not been heard of; the Sunfoo (s.) stranded thirty miles from Hong Kong; the Akola (s.), from Kustendje for Lynn, went ashore on the Kentish Knock and broke in two; the Constance (s.) was abandoned near Paimbœuf; the Blende (s.) is supposed to have foundered at sea, between Douglas and Swansea; the Tacna (s.) upset off the Pacific Coast, and eight lives were lost; the Anthony Musgrave (s.) was wrecked on Unkomas Bar; the Monte Video (s.), from the River Plate for Rangoon, was totally lost; the Osprey (s.) was damaged and sunk in the ice; the Cornubia (s.), from Cardiff to Palermo, was wrecked at Santo Petro; the Clifford (s.), from London for Palermo was abandoned at sea; the Thistle (s.) was completely wrecked near Helvoet; the Bordelaise (s.) sank at Scilly and parted amidships; the Furness Abbey (s.), from Swansea for Garston, struck on the South Bishops Rocks and went down; the Liberia, African mail steamer, and the Barton (s.), from Glasgow for Sicily, were missed about the same time, and there is reason to believe they came into collision about two hundred miles to the S.W. of the Land's End, and both foundered with all hands; the Anna (s.), from New York for Rotterdam, sailed and has not been heard of; the Bonita (s.), of London, from Brazils, struck off Vigo Islands and filled; the Manchu (s.), from Nagasaki for Shanghai, coal laden, foundered in a gale, the coal bunkers having given way when the vessel was in the trough of the sea; the Wave (s.), from Sulina for United Kingdom, was run ashore near Muros, to prevent her from foundering, after have struck on a sunken rock; the Fairholme (s.), from the Clyde for Limerick, with coals, struck on a rock near Tory Island and disappeared, drowning five hands; the Nellie (s.), from Cardiff for Brindisi, foundered in the Bay of Biscay; the whaler Tay (s.) got nipped in the ice and sank; the Hankow (s.) collided with the Milbanke (s.) off Dungeness, and the latter sank, carrying down with her 14 persons; the Rosedale (s.) lies sunk in the North Sea, having been in collision with the Onega (s.); the Corinth (s.), from New York for Liverpool, struck on the rocks near Galley Head and broke up; the Marion (s.), with coals, took the ground in going up the Elbe and became a total wreck; the Camila (s.), from London for Oporto, which stranded at the entrance to the Douro, had to be blown up; the Red Sea (s.), from Cyprus for Liverpool, foundered off the Smalls, after colliding with the Xema (s.); the Liffey, mail steamer, was wrecked near the River Plate; the Chusan (s.), in putting back to the Clyde, was overtaken in the storm, and, in making for Ardrossan got on the Crinan Rock, broke in two, and one half drove in and partly blocked the passage to the harbour; the Mary (s.), from Glasgow for Trinidad, broke in two and foundered at sea with loss of three men; the Viceroy (s.) left Hull for Cronstadt, and has not been heard of; the Scorpio (s.), from Cardiff for Charente, went down in St. George's Channel; the Warree (s), from Liverpool for Africa, was lost on the rocks off Sestress; the Morena (s.), from the Brazils for Havre and Antwerp, struck on an island off Rio de Janeiro and filled; the Olinda (s.) was wrecked near Pernambuco; the John Dixon (s.) was sunk at Malta through a collision with the Queen Anne (s.), from Port Said; the Richmond (s.), from Sunderland for Burghead, stranded on Halliman's Skares; the Annsbro (s.), from Swansea for the Mersey, sprang a leak and foundered off Strumble Head; the Gomos (s.), engaged in laying a submarine cable, stranded south of Rio Grande; the Oliphant (s.) and the Laptek (s.), both laden with sugar, foundered the same day off Keelung; the Amelia (s.) was wrecked at Crow Rock; the Alsaska (s.) sank at Hong Kong; the Bayo (s.) was run into and sunk at Tarifa; the Leckwith (s.) stranded on Bilbao Bar; the Stad Brugge (s.) of London, from Cronstadt, has not been heard of since leaving Copenhagen; the Woodlark (s.) went ashore off Helvoet; the Mabel (s.), from Cronstadt, was sunk through a collision; the Rouen (s.), from Blythe for Havre, foundered off the Dudgeon, having been in collision with another steamer; the Tom Bell (s.), from Galatz for Rotterdam, got on the Monscar Reef; the Despatch (s.), from Alexandria for Hull, struck on a rock off Alumel-room and was wrecked; the Emma David (s.), from Kertch for Antwerp, shifted her cargo, capsized, and foundered; the La Plata (s.), foundered in the Bay of Biscay and fifty-seven persons were drowned; the Louise of Lorne (s.) got ashore off Withernsea; the Precursor (s.) foundered forty miles west of Gozo; the Tyne (s.), from Shields for London, stranded in Robin Hood's Bay; the Violent (s.), of Glasgow, from Nicolaeiff, with cargo shifted, foundered thirty miles south of the Lizard; the Orion (s.) struck on a rock off North Heligoland, and filled; the Clifton (s.), from Algeria, was abandoned in the Bay of Biscay. Among other casualties, the Affondatore, ironclad, struck the Zest (s.) at Palermo, and made a hole nine feet by eight.

The dreadful loss of life through the fire on board the Cospatrick, from London for Auckland, and the sacrifice of over 400 souls, makes the subject of fires of more than usual interest; we therefore give the accidents of this character happening to steamers in 1874. The Neptun (s.) was damaged; the Japan (s.), when at Calcutta, received

Digitized by Google

damage, as also the Wallachia (s.), at Almeria; the Kilarney (s.) was damaged at Terneuse; the coal bunkers of the County of Sutherland (s.) took fire at Batavia; the Glaucus (s.) at Boston, took fire, and was submerged; the Delambre (s.), from Liverpool for the Brazils, when at Lisbon, had fire in her bunkers; the Borneo (s.), when at Samarang, had to take assistance to cool down the coal; a fire broke out in the hold of the Timsah (s.) at Kurrachee, but was extinguished; the coals on board the Calypso (s.) were on fire at Messina, but the crew succeeded in preventing danger; a fire on board the China (s.) at Hong Kong did very little damage to the vessel; a fire in the hold of the Transit (s.) at Grimsby injured some cargo, but not the hull of the vessel; the Ballina (s.), when in the Clarence Dock, Liverpool, had a fire break out in the forecastle, but it was soon got under; the Windsor (s.), at Leith, had some woollen goods burnt; the Duke of Lancaster (s.), from Barrow for London, was slightly injured by fire; the Guinevere (s.), at Glasgow, took fire, but the flames were conquered by the floating engines; the Lion (s.), at Pernau, had some bobbins of flax injured by fire; the Yorkshire (s.) from Calcutta for London, put into Algiers with her cargo and coals on fire; the Rothesay Castle (s.) was destroyed by fire at Point du Chin; the bunkers of the Arch Druid (s.), at Bombay, had to be flooded; the coal in the bunkers of the Eastby (s.) in West India Docks, became heated; the Arbitrator (s.), caught fire in Brunswick Dock, Liverpool, but the damage was slight; the Queen (s.), on the Murray, had to be scuttled; the Ravenscraig (s.) succeeded in getting into Lerwick when the fire was growing serious; mats caught fire in the hold of the Mavis (s.) at Taganrog; cotton bales in the main hold of the Ohio (s.), from Philadelphia for Liverpool, were damaged by fire; the Windsor Castle (s.), from London for the Cape, put into Corunna, fire having broken out in the forehold from combustion; the Jeddah (s.), from Sydney for Melbourne, was scuttled in Twofold Bay in order to extinguish the fire; the St. Louis (s.), from New Orleans for Liverpool, had to be put aground at Tybee to extinguish the fire among the cotton; the Linda (s.), from Liverpool for St. John (N.B.), was on fire, and her crew were taken off by the Circassian (s.); the Darien (s.), from New Orleans for Hamburg, had to be put back in consequence of fire; the Black Diamond (s.) had to be scuttled at Belfast by the fire brigade; and the Ontario (s.), from Boston for Liverpool, had some bales of cotton destroyed by fire on the steerage deck.

The old year has not been without its regular average number of explosions. The boiler of the Chrysolite (s.) burst in Penarth Roads, and two men were killed; the Student (s.) put into Lisbon, with her master, chief engineer, and three firemen killed; the boiler of the Little Nell (s.), from Georgetown for Launceston, burst, and eight men were killed; an explosion on board the Tigress (s.), Polar expedition vessel, destroyed twenty-one persons; the boiler of the Curuzu (s.) exploded on the Amazon; the Oriana (s.), from Newcastle for Taganrog, burst her boiler and killed two men; the boiler of the Belisa (s.) burst on the Volga, killing three and wounding thirty-nine persons; the Apollo (s.), coal-laden, from Cardiff to Gibraltar, had her hatches blown off, but got into Falmouth with one man injured; the superheated pipe of the Winsloe (s.) burst, and killed two men, after which the vessel was towed into Falmouth; the Commandant Franchette (s.), from Sunderland for Bordeaux, burst her boiler and scalded two men; the Meuse (s.), from Cardiff for Port Said, put into Algiers through explosion of gas in her bunkers—one man killed, two badly hurt; the Cid (s.) exploded her boiler in leaving Belfast; the Moolgewaukie (s.), of Adelaide, blew up, two men being killed and several injured; one of the valves of H.M.S. Invincible burst, and scalded three men severely; an explosion of gas took place in the fore hold of the J. H. Lorentzen (s.), at Sunderland, but no serious damage was done.

One feature in the steam tonnage for 1874 will be disclosed when the returns are published in the *Mercantile Navy List*, 1875. From the 1st of January to the end of August in 1873 no less than 379,528 tons of steam shipping had been built in the United Kingdom. Down to the end of October in 1874 the tonnage added was 361,713; so that there has been a falling off in the shipbuilding trade. From the number of vessels which have been wrecked, in addition to thirteen now lying in the Thames, Mersey, at Dunkirk, and elsewhere, and have to be recovered, it is evident that the tonnage supply will not equal the demand, if the country is favoured with peace and prosperity. The year just closed has been marked by parliamentary proceedings respecting the gross and register tonnage of steamers, and we shall no doubt hear more of these matters in the coming session.

PUNCH TO THE KING OF SIAM.

FAIR greeting, Courteous Cousin mine. You are the King of Siam,
And *Punchius Rex* the mighty, monarch of Fleet-street I am.
No need, I'm sure, of further ceremonious introduction,
For *Punch* is doubtless known and read with rapture and instruction.
As constantly in far Bangkok as 'tis in near Balmoral.
I (let us, Cousin, drop, *pro tem.*, the old Imperial plural.)
Read with pleasure, whose expression cannot be too *prononcé*,
That very friendly letter signed by BHASHAKARAWONGSE.
(I hope, with all my heart, that I have spelled and scanned precisely
The something prolix name of one who turns *our* tongue so nicely.)
Effulgency! your proffer is enlightened as 'tis handsome,
And from the courteous Sovereign of a distant Eastern land, some
Who think themselves much nearer to the civilised meridian
Might take a profitable hint. 'Twould tax an Art Ovidian
To sing the metamorphoses these demiurgic Sciences
Have wrought with all their wizard spells and wonderful appliances.
But Science, Cousin Siam, your true Cosmopolite is;
And wide as Nature in its sphere its broad benignant flight is,
And, like that often quoted "touch of Nature," kins us truly
From here to distant Siam, as from there to farthest Thule.
Much sneered at for its prosiness, but with its own Romance, it
Has just been watching warily Dame Venus at her transit;
And is about to send a stoutly-armed but peaceful legion,
To circumvent the icy guards of the circumpolar region.
Punch favours undertakings of this brave and blameless genus,
And, though he's heard some hints that slippery Sol and tricksy Venus
(As might have been expected) have been plotting to befog us,
And in a maze of merely bogus calculations bog us,
Yet, spite of solar shifts, or interlunar plots and pranks, it
Is plain that Science means to win at last. KING PUNCHIUS thanks it.
And now, by way, no doubt, of an agreeable variety,
The pundits of our Royal Astronomical Society,
And other learned bodies, have made up their minds to follow
The little game that's coming off 'twixt Dian and Apollo.
With Camera, and Spectroscope, and FOUCAULT'S Siderostat,
They mean to keep an eye upon the point the pair have crossed at;
And solve the secrets,—stiffish stuff for long and learned papers,—
Of chromosphere and corona, of spectra, beads, and vapours.
Punch warmly wishes them good speed. And now, most courteous Cousin
Of Siam, comes your amicable offer—worth a dozen
Palavers or State protocols, as genuine links to bind us
And put the bad old days of white exclusiveness behind us.
Punch promptly drinks your royal health in a stoup of right good Stingo,
And though our people may not understand each other's lingo
So well as we might wish perhaps, yet genuine love and liquor
Are of no land or lexicon. It makes the blood run quicker
To think that Saxons may *drink hael* as far as far Chinese land,
With such a brick as you must be, Lord of the Siamese land!
Punch wishes *his* observatory (fixed so much farther west
Than Bangkok's latitude) allowed *himself* to be your guest:
But he must keep his perch, although with sympathies sporadic,
For Nature's Nobs (*you'll* understand), must not be too nomadic.
No doubt, in that particular, we are but brother yokesmen,
Yet be assured that Britons, through their very first of spokesmen,
Return you hearty thanks. Accept? By Jove, they'd better do it,
Or certain swells shall hear of it. Good DE LA RUE would rue it
If such a chance were slighted, and 'twould be a trifle comical
If asinine punctilio ruled in matters astronomical.
But *Punch* has not the slightest doubt the Royal men of Science
Will be but too delighted to remit a prompt compliance.

Legal.

CHARGE AGAINST A MERCHANT.

Johann Frederick Heindrick Trautmann, carrying on business in Great St. Helen's, late of Shanghai, appeared before the Lord Mayor on the 21st inst. upon a summons which charged him, under one of the sections of the Debtors Act, with having obtained goods upon credit from Messrs. Burkett and Co., by false and fraudulent pretences, in connection with an American railway called the Illinois, Missouri, and Texas Railway. Mr. Besley opened the case at some length. The learned counsel stated that in the year 1871 the railway in question appeared to be in difficulties, and they mortgaged all their property for the purpose of raising a sum of £300,000 to go on with the works of the railway, and it was proposed to raise this sum by the issuing of 1,500 bonds for £200 each, and the bonds were to bear interest at the rate of 7 per cent. per annum, payable half-yearly in January and July. The attorney or agent for the railway in England was a Mr. Herrington, and it appeared that the defendant had entered into a contract with this gentleman for the purchase of the whole of the bonds at seventy-five discount, or at the price of £125 for each bond. The defendant was then represented to have applied to the committee of the Stock Exchange for a settling day for the bonds, and a prospectus was issued, in which it was represented that sixteen miles of the railway were actually opened, that there was a thriving Dutch and German population living close to it, and that there was also a large quantity of lead and iron ore ready for carriage upon the railway. A map and picture of the railway of a very flattering kind was also published with the prospectus, and it was represented that the bonds were issued for the purpose of completing the railway. The next step that appeared to have been taken by the defendants was to apply to the committee of the Stock Exchange for a settling-day to be named for the shares, and according to the rules of the Stock Exchange in this respect, with reference to dealings in foreign bonds, it was necessary that proof should be given that a certain number of the bonds had been dealt in and subscribed for by the public or in some other way, and the defendant wrote to Mr. Slaughter, the secretary of the Stock Exchange, asking for a settling-day to be named, and representing that 700 shares had actually been placed at their full nominal value among his own friends. Before a settling-day could be named it was necessary that an actual bargain in the bonds should take place upon the Stock Exchange, and it was alleged that by some arrangement made by the defendant one or more bonds were sold, and eventually a settling-day was named, and the bonds were quoted in the official list at the price of 140 to 160 per bond. When this had been done the defendant appeared to have applied to the prosecutors and represented that he was largely engaged in shipping shirtings and similar goods to China, and he proposed to make an arrangement for the purchase of 200,000 pieces of shirtings, and it was eventually arranged that the goods supplied by the prosecutors should be paid for by one-third in bonds of the railway, and two-thirds in cash, and he at the same time said that the railway was likely eventually to turn out a great success, but that his firm had invested more money in the undertaking than they ought to have done, and that their capital was locked up for the moment, and this was the reason why he proposed to pay partly in bonds for the goods that he was purchasing from the prosecutors. Under this agreement the prosecutors seemed to have supplied a very large quantity of goods to the defendant, and they were paid for in the way proposed, namely, one-

Digitized by Google

third of the amount in bonds and the remainder in cash. Things went on in this way until last year, when it appeared that the Hong Kong and Shanghai Banking Company, who had advanced money upon the security of some of the bonds that had been deposited with them as collateral security, felt it to be their duty to send an agent to see the real position of the railway, and according to his report the representation that sixteen miles of the railway were actually opened was not true, and the condition of the undertaking was very unsatisfactory. This report was brought to the knowledge of the prosecutor, and he in consequence refused to accept any more of the bonds in part payment of his goods, and from further information he received the present charge was preferred against the defendant.

M. Jacob Burkett, the prosecutor, was examined, and he proved the transactions he had entered into with the defendant, and which went to corroborate the above statement. It appeared in the course of his examination, however, that very shortly after the contract for the delivery of the goods had been entered into with the defendant he received a letter from him, in which he stated that he was acting in the matter on behalf of the company, but he said that he did not at the time take notice of the fact. Before the examination in chief of the defendant was concluded the summons was adjourned, and the defendant was permitted to depart upon his entering into his own recognisances in £100 to appear at the next examination.

SALVAGE CASE.—THE "KROONPRINS DER NEDERLANDEN."—On the 20th inst. a case came before the Court of Admiralty having reference to salvage services rendered to the Dutch steamer *Kroonprins der Nederlanden*. It appeared that on the morning of the 7th of May, 1873, the *Calliope*, a screw steamship of 1,124 tons, and bound from Newcastle-on-Tyne for Alexandria, with coals, was in the Mediterranean Sea, off Cape Rosa, when signals of distress were observed from the Dutch steamer, which was bound for Java, with passengers and troops—150 in all—and a general cargo. Her engines had broken down. The *Calliope* took her in tow, and after a somewhat difficult towage, during which the *Calliope* received damage to the extent of about £1,300, she succeeded in getting the other ship into Valletta Harbour. The value of the property saved was about £150,000. The Court awarded the sum of £4,000, with costs.

THE EUROPEAN ASSURANCE SOCIETY.—The Right Hon. Sir W. M. James, one of Her Majesty's Lords Justices of Appeal, has consented to act as interim arbitrator of the European Assurance Society Arbitration.

Naval and Military.

It seems a trifle strange (writes a correspondent) that nearly every Navy List that has been published lately has understated the number of medical officers who have resigned. This past quarter only one is shown as having thrown up his commission, but I am told that the late surgeon of the Cadmus, recently serving in China, was granted permission to resign on the paying off of that vessel. There is, however, nothing in the Navy List to confirm this, but on the contrary, the name of the officer still figures on the active list. If this is done purposely it is a move unworthy of so large a department. I think we may put it down to the usual want of correctness.

The Undaunted, 31, wooden frigate, 4,020 (3,039) tons, 2,503 (600) horse-power, fitting out at Sheerness as flag-ship for Rear-Admiral Macdonald, the new commander-in-chief for the East India station, is fast progressing towards completion. As the Undaunted's service will be in a hot climate, great attention has been paid to the system of ventilation on board.

An order has been issued by the Naval Commander-in-Chief at Devonport, Sir H. Keppel, that any of Her Majesty's ships lying alongside the dockyard shall have a suitable boat hoisted at the davits ready for immediate use in the event of a man falling overboard or other sudden emergency. Such a boat is to be kept exclusively for such service.

Captain Colley, of the 2nd Queen's, who served throughout the China war of 1860, including the taking of the Taku Forts, the actions of August 12 and 14, and September 18 and 21, and the advance on Peking (for which he received a medal with two clasps), is meutioned for promotion to an unattached majority.

Mr. Henry G. Stembridge, assistant-paymaster of Her Majesty's ship Invincible, has been tried by court-martial at Malta on three charges of embezzlement and making false entries in wine accounts. He was found guilty, and sentenced to six months' imprisonment, and to be dismissed Her Majesty's service with disgrace.

Mr. Richard Williams, paymaster, R.N., is the officer selected by Rear-Admiral Reginald Macdonald, the newly-appointed Commander-in-Chief fol the East India station, to accompany him as his secretary. Mr. Williams was previously secretary to Vice-Admiral Farquhar, when Commander-in-Chief in the Pacific.

Intelligence has been received of the progress of Vice-Admiral Ryder, the new commander-in-chief on the China station. He left Suez on the 8th ult. in his flagship Audacious, reached Aden on the 19th, and was to sail thence for Galle, after having coaled.

The Home-office has under consideration a proposition made by the Admiralty for the employment of police of inland towns as recruiting agents for the Royal Navy. A bounty is to be granted for each eligible boy thus sent afloat if this system should be adopted.

The death of Major E. Ward, of the 107th Regiment, who served in the campaign in China in 1860 with the 15th Punjab Infantry, is announced, at the age of thirty-eight.

Monetary and Commercial.

Tenders for £700,000 in bills on India were received on the 20th inst. at the Bank of England. The amounts allotted were:—To Calcutta, £459,500; Bombay, £210,000; and Madras, £30,500. Tenders on Calcutta and Madras at 1s. 10 3-16d. will receive about 60 per cent., and on Bombay at that price in full. These results show a somewhat increased demand for remittances to the East.

Messrs. Rothschild have issued the prospectus of the new Five per Cent. Brazilian Loan. The amount is £5,000,000, in bonds of £100, £500, and £1,000 each, and the price is 96½ per cent., payable in instalments up to the 2nd November. The first half-yearly coupon is payable on the 1st July next, and the redemption of the loan will be effected by a sinking fund of 1 per cent. per annum, the operations of which will commence on January 1st, 1877. The lists were opened on the 20th inst., and will be closed this day.

We understand that private transactions are taking place in the Chinese Government Loan at 2½ to 3 premium.

The report of the Imperial Bank (Limited) exhibits an available total of £41,074, and recommends the payment of a dividend at the rate of 8 per cent. per annum, free of income-tax, for the half-year, adding £10,000 to the reserve fund.

The directors of the National Bank have declared a dividend of 11 per cent. per annum, or 33s. per share, free of income-tax. The dividend paid this time last year was 10 per cent. per annum, or 30s. per share.

The report of the London and South-Western Bank for the six months ending the 31st Dec. recommends a dividend at the rate of 8 per cent. per annum.

The directors of the London Joint-Stock Bank have issued their report. The net profit amounts to £134,126, and a dividend is recommended at the rate of 15 per cent. per annum, with 10s. 6d. per share bonus, being together equivalent to 11 per cent. for the half-year.

The report of the Eastern Telegraph Company for the six months ending the 30th September last shows an available balance of £99,432. An interim dividend of 1¼ per cent. was paid in October last, and a like amount on the 14th inst. The balance to be carried forward is £1,007.

The directors of the New Zealand Trust and Loan Company (Limited) have resolved to declare a dividend of 5s. per share, free of income-tax, being at the rate of 10 per cent. per annum, at the meeting on the 27th inst.

The directors of the Manchester Fire Assurance Company declare a dividend for the half-year ended on the 31st December last of 5 per cent., making, with an interim dividend paid in July last, 10 per cent. per annum, carrying forward £17,000 to the reserved funds.

John Crossley and Sons (Limited) announce a dividend of 10s. per share, making, with that paid in August, a distribution of 16 per cent. per annum. The sum of £15,551 is carried to reserve.

Messrs. Turquand and Harding, the liquidators of Overend, Gurney, and Co. (Limited), have issued a statement of affairs to the 31st December last. A sum of £41,496 13s. 6d. has been realised during the past year from the assets, and a further return made of 10s. per share. These assets have produced £1,515 5s. 3d. in excess of the values put on them, and £3,757 15s. 11d. has been obtained in dividends in respect of items to which it was impossible to attribute any definite value. The payment to the shareholders during the year, with previous returns, makes £3 per share. The sum now in hand is £6,515 6s. 9d., and no period can at present be mentioned when any further return will be made.

Underwriters have increased rates to Australia to 25s. f.p.a.—and 27s. 6d. in tin cases.

It has been announced by the Dutch Indian Railway Company that the repayment at par of the outstanding bonds of the Five per Cent. Loan, 1871, will take place on April 1, 1875, after which date interest will cease. The bonds are payable in Amsterdam at the offices of Messrs. Lipmann, Rosenthal, and Co., and Messrs. Wertheim and Gompertz, and in London at the offices of Messrs. Samuel Montagu and Co.

Bar silver has been sold at 57½d. per oz., the market having slightly receded, but we quote 57⅝d. per oz. at the close. Mexican dollars have maintained their value, and have been sold at 56½d. per oz.

ARTICLES OF IMPORT.

An important fall in the value of money has not apparently had any beneficial influence upon the Produce Markets, and although several leading articles have undergone some recovery from the previous depression, there is a general want of animation. Tea is in heavy supply, but is fairly firm. Silk continues very quiet. Sugar has been dull, and with some pressure to sell brown East Indian kinds, prices have given way 3d. to 6d. per cwt. The rapid recovery in Coffee has not been sustained at the

Digitized by Google

close. Rice has become dull, and prices have given way. Sago and Black and White Pepper have further declined; small Nutmegs are 1d. lower. Other Spices unaltered. Cutch, Gambier and Hemp quiet at previous rates; Galls have declined. Other articles continue quiet, without change in prices.

TEA.

There have been heavy supplies offering, with, however, less pressure to sell; in fact, some importers refrain from showing their holdings; and as regards Congous, at 1s. 4d. to 1s. 7d. per lb., they are fully justified, there being room for 1d. to 1½d. per lb. advance, without doing harm to buyers. Dealers must be making large profits on their late purchases, for during the pressure to sell at the opening of the year some cheap teas were secured. The export from all China from 1st June to 14th inst. is 154,750,000 lbs., and we quite expect it will reach to 160,000,000 lbs. by 30th May, this difference being made up of Greens from Shanghai, and Common Scenteds and Tayshan Congou from Canton. Looking at the foregoing, the increasing home consumption, and every probability of a large Spring export trade, there is little doubt of a favourable reaction as regards red and black Congou, many classes of which rule at a reasonable figure, and nearly all show loss on cost. There is no improvement in scented Teas; the consumption of Caper, though showing a large total, had sold during the greater part of the season at heavy loss to importers. Oolong is selling at low figures. Green: With advices from New York of a further and decided advance, in some cases as much as 5c. per lb., this market, as regards common lines, shows an improvement of 1c. to 1½c. per lb. from the lowest point of the market, say during December. Medium to fine grades have not participated, as there are large supplies available, with a large amount on the water and close at hand. Indian leaf rules firm, and a good business doing.

Deliveries from London, from 1st to 18th inst. inclusive, or fifteen days of 1875, 8,931,002 lbs., against fifteen days, 1874, 8,830,587 lbs. Imports, deliveries, and stocks in London, from 1st Jan. to 31st Dec.:—

Imports.		Deliveries.		Stocks.	
1873.	1874.	1873.	1874.	1873.	1874.
163,409,104	158,007,875	164,311,554	169,529,596	88,619,672	77,808,856

SILK.

The market has been very quiet, business having been checked by the announcement of public sales without reserve; these commenced on the 19th, and are not yet finished. China Silk is most in favour, and rates are well maintained. Canton Silk also commands fair prices. Japans are to a great extent neglected, and those in the sales realise very low prices. Deliveries 1st to 20th inclusive:—China, 2,471 bales; Canton, 240; Japan, 558; total, 3,269 bales.

COCOANUT OIL.—Sales by private contract have been unimportant, and there has been no change in prices, but a good quantity was offered by auction and partly sold. Of 196 casks Ceylon 26 pipes good, tare 19 per cent., sold at £38, and 21 hogsheads, tare 22 to 23 per cent., at £39, the remainder bought in, good to very fine in pipes at £38 to £39, good in puncheons at £38 10s.

CHINA MATTING.—In auction 413 rolls were sold, white at 33s. to 46s., red check 39s. to 49s. 6d. per roll.

CAMPHOR.—Nothing doing.

CUTCH and GAMBIER are quiet, but previously quoted rates are firmly maintained.

GALLS.—At auction 232 cases China were bought in at 59s., but since partly sold at 56s., and subsequently 179 boxes good partly broken sold at 55s., being a reduction of about 4s. per cwt. since the 7th inst.

HEMP.—The market for Manila has been very quiet, with only moderate sales at about former rates. Privately 160 bales fine Quilot have been sold at £48 to £49. In auction of 1,341 bales about 650 bales sold, good roping at £35 10s. to £35 15s., fine at £37 10s. to £37 15s.

GUMS.—*Benjamin* unchanged. *Copal* firmer and again higher, large trade up to 33s. for fine. *Damar* firm and again higher, fair trade at up to 64s. for fine. *Gamboge* steady; value unchanged.

ISINGLASS.—The monthly public sales embraced 22 cases Penang, only 8 of which were sold. Leaf middling to fair at 2s. 1d. to 3s. 1d.; Pipe, dark to middling at 2s. 3d. to 3s. 3d.; purse 1s. 5d., being barely former rates.

MUSK.—The sales have embraced 54 caddies Tonquin; two-thirds sold at 41s. 6d. to 42s. 6d. for good even well-shaped pods; 18s. to 19s. rough and bally; and 26s. wet pickings. Of 60 caddies Yunan, half sold; fair at 31s. to 34s., damp and rough 20s. to 25s.; 6 tins grain retired.

OILS.—Aniseed quiet, small sales only at 8s. 7½d. *Cassia* continues dull and very plentiful; small sales at 4s. 4d. to 4s. 6d. *Nutmegs* quiet; good sold at 8d. *Lemon Grass* firm. *Cinnamon* scarce, and fine still wanted; good sweet sold at 6s. 2d. to 6s. 6d. *Citronelle* is firm; sales afloat at 1 15-16d., spot at same figure. *Lemon Grass* firm, and rather higher.

PEPPER.—*Black* quiet; only moderate trade; sales at 6d. for Singapore, and in sale, fine sold at 6 1-16d.; good 6d.; Penang at 5¾d. *White* easier; fair sales at 8¼d. down to 8d.; in auction, a few bags fine sold at 8¾d.; 200 to 300 bags fair at 7¾d. to 8d.

RICE.—The demand has subsided, and prices in all positions have given way about 3d. per cwt. In auction 6,562 bags Necransie per Oceana were sold, middling to good at 8s. 6d. to 9s. The private sales on the spot comprise white Bengal, ordinary to good middling at 10s. 6d. to 11s. 6d., old Rangoon at 9s., new ditto at 9s. 6d., and 4,000 mats Japan at 10s. 4½d. For arrival 700 tons new Raree Ballam, December to February shipment, have been sold at 9s. 9d. to 10s., and several cargoes, including two cargoes of new Burmah for arrival, one of 800 tons at 8s. 9d. if Rangoon, and 8s. 6d. if Necransie, and one of 1,000 tons Rangoon, February-March shipment, at 8s. 10½d. open charter.

RHUBARB.—Market for China steady; of 100 cases offered half sold, good bold selected at 2s. 11d., fair 1s. 5d. to 1s. 6d., low and ordinary 3d. to 9d.

SAGO and TAPIOCA are steady, and prices are firm, without alteration.

SHELLS.—*Mother o'Pearl:* The monthly public sales held on the 12th inst. included, of Manila, 62 cases, only 9 of which were placed at £12 2s. 6d. to £12 5s. per cwt. for fine bold in sorts, being fully the previous value. Macassar are very scarce, and high prices would be readily obtainable. *Tortoise:* The auctions presented 13 cases Singapore, which were all but one sold; selected fine mottle of medium and large size at 30s. per lb.; good to fine in sorts on the string at 22s. 6d. to 25s.; ditto with more or less dull or thin intermixed at 18s. to 21s. 6d.; small, 17s.; pickings, good, 15s., being fully the previous value. *Japan Ear Shells:* Of 414 cases, &c., 25 tons loose Silver 330 cases and 6 tons were disposed of at dearer rates, medium and broken at £16 15s. to £20, bold to good bold untrimmed £25 to £35, fine (of new import) at £35 15s. to £37 5s.

SPICES.—*Cinnamon:* Ceylon is steady at unchanged rates. *Cloves:* Penang are scarce and firm; sales at 2s. 2d. to 2s. 2¼d. *Mace:* 62 cases Penang, &c., met a steady demand, and 47 cases sold at the former value; middling at 3s. 4d., middling old (30 cases Singapore, import 1873) at 3s. 3d., ordinary dark and low middling at 2s. 7d. to 3s. 1d., pickings at 1s. 10d. to 2s. 1d. per lb. *Nutmegs* are about 1d. per lb. cheaper; 200 cases, &c., sold—77's to 75's at 3s. 8d., 115's to 105's at 2s. 10d. to 2s. 11d., 125's at 2s. 9d.

SAPANWOOD, STICKLAC, SOY, STAR ANISEEDS.—The market for these articles is without alteration, but little business having been done

TOBACCO, &c.—Owing to the failure of the American crop last year the prices of American leaf tobacco have advanced to very high figures, but manufacturers seem to be of opinion that, considering the enormous stock of tobacco in this country, the present prices are not justified. At public sale Thursday, 236 bales Japan realised 5¼d. to 7½d.; 219 bales ditto country damaged, 5¼d. to 7d.; 5 bales repacked, 3¼d.; 9 bales sea damaged, 3½d.; 306 bales China fetched 7d. to 8½d.; 158 bales country damaged, 5½d. to 6¾d.; 3 bales sea damaged, 3½d.—*Cigars:* 8 cases Manila sold at 4s. 9d. and 5s. 3d.; 1 case ditto sea damaged, 4s. 3d.

STRAW PLAIT.—In auction 275 bales China chiefly sold at £9 7s. 6d. to £25 5s. per bale.

TIN has been dull; a few parcels have been pressed for sale, and as there is not much speculation at present quotations have gone back The current rates are:—Straits on the spot £93, afloat £92 10s. to £93, Banca £101, Billiton £95 per ton, being 20s. to 30s. decline from last mail's quotations.

WAX shows some decline; at auction of 2,417 cases Japan 1,580 cases sold at a decline of 3s. to 4s., middling yellow saucer at 48s. to 49s. 6d., good thin to fine bold white ditto (of which the bulk consisted) at 50s. to 51s., a few extra bold at 52s., middling yellow cakes 49s. to 50s. 6d., good to fine white bold ditto 51s. to 51s. 6d.

FREIGHTS AND CHARTERS.

Berth rates of freight to the Eastern Ports are without material alteration since our last issue. Ready ships are in request, but are in somewhat better supply. Coal freights rule firm.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 65s. weight, 60s. meast. To Hiogo: 70s. weight, 65s. meast. To Nagasaki: 75s. weight, 70s. meast. To Shanghai: 50s. weight, 40s. meast. To Hong Kong: 50s. weight, 40s. meast. To Singapore: 50s. weight, 40s. meast. To Penang: 40s. weight or meast. To Colombo: 40s. weight or meast.

Per SAILING VESSELS.—To River Amoor: 80s. To Yokohama: 40s. weight, 35s. meast. To Hiogo: 45s. weight, 40s. meast. To Nagasaki: 50s. weight, 40s. meast. To Shanghai: 35s. weight, 25s meast. To Hong Kong: 35s. weight, 30s. meast. To Singapore: 25s weight, 22s. 6d. to 25s. meast. To Penang: 27s. 6d. weight or meast. To Batavia, Samarang, and Sourabaya: 27s. 6d. weight, 27s. 6d. to 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Singapore: £25 to £26. To Penang: £25, f.c. To Galle: £23.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Hong Kong: 32s. 6d. To Shanghai: 35s. To Singapore: 25s. to 26s. To Colombo: 25s. To Galle: 23s. To Batavia and Sourabaya: 24s. to 25s.

From Birkenhead, per ton.—To Hong Kong: 22s. To Shanghai. 27s. 6d. To Singapore: 20s.

The Admiralty have invited tenders for the conveyance of 47 tons 26 feet of stores for Singapore.

MISCELLANEOUS.

NEW YORK, JAN. 4.—Advices from Japan, of Dec. 4, state that the four boilers have been recovered from the wreck of the America (str.), which was burnt in August, 1872, on her voyage from San Francisco to Yokohama, and was beached at Kanagawa; the boilers were taken to Yokoska. Divers had been at work on the wreck for five months. An effort was to be made to raise the hull next spring.

ROTTERDAM, JAN. 18.—The Helena and Henriette, Heiner, arrived at Nieuwe Diep, from Samarang, reports having experienced heavy gales, during which the vessel laboured heavily, and the pumps had to be kept constantly going.

CASUALTIES.

The Sydney (Swed. barque), Kroner, which arrived at Queenstown Jan. 18, from Sourabaya, with sugar, was in collision with a German brig, and had bulwarks on port side, one boat carried away, and fore rigging damaged.

ROTTERDAM, JAN. 16.—A telegram announces that the Jonge Cornelis, from Cardiff to Batavia, which put into Lisbon on or before 14, was damaged.

MANILA, SINGAPORE, JAN. 16.—The Lord Macaulay (barq.), from Hong Kong to Ilo Ilo, put in here; she was caught in a typhoon, and grounded on Sambales, and will go to Hong Kong for repairs.

DEAL, JAN. 19.—The Kashgar (barq.), Russell, from Middlesboro' to Hioge, has anchored in the Downs with loss of boats, &c.

TRIAL TRIP OF THE S.S. "LANGKAT."—On the 9th inst. a trial trip of this handsome steamer was made on the Thames, and notwithstanding the boisterous nature of the weather a speed of 11¼ knots was attained. The vessel left Cubitt Town at 11.45, and proceeded down the river to the measured mile in Long Reach, where the speed mentioned was obtained, and then proceeded as far as Sea Reach, when she was turned round, and returned to her moorings, arriving at four o'clock. The vessel and machinery have been constructed by Messrs. J. W. Dudgeon, of Millwall and Cubitt Town, under the special survey of Lloyd's, in which register she is classed 90 A. She is 322 tons B.M., and 275 tons gross register, 60-horse power nominal, twin screw compound engines, length 150ft., breadth 21ft., depth 13ft. 6in., schooner rigged. She is fitted to carry twelve first-class passengers in the after cabin, and has every convenience, particular attention having been paid to the ventilation, which is everything that can be desired for a hot climate. She has also been fitted with 'tween decks in fore and after holds, for the purpose of conveying ponies from Deli, on the east coast of Sumatra, to Penang, large numbers of which are annually imported. Her upper deck is of teak, and awnings are fitted fore and aft. During the whole of the run there was no occasion to ease the machinery on account of the usual complaint of tight or loose bearings, but the engines and boilers continued to work at full speed from the time the vessel left until she returned to her moorings. This is the second vessel that has been built for the owner, Mr. Lee Pee Chuan, by these builders, through Messrs. Friederichs and Co., of London and Penang, whose senior, Mr. F. H. Friederichs, was on board during the trial trip. Mr. Lee Pee Chuan is one of the most enterprising Chinese merchants in Penang, and already owns several large steamers running on the coasts of Burmah, Malacca, and Sumatra.

The Halloween, Captain Watts, owned by Messrs. John Willis and Son, has made another quick passage from China, having left Shanghai on the 21st Oct. and arrived off the Isle of Wight on the 19th inst.—ninety days—with a full cargo of about 1,500 tons tea and silk, at a freight from 70s. to 80s. The round voyage from London to Sydney, Shanghai, and home was accomplished in nine months seven days, of which seventy-eight days were used in port.

DRUGS, CHEMICALS, &c.,

WHOLESALE AND FOR EXPORTATION.

DRUGS, &c., guaranteed genuine as imported, and PHARMACEUTICAL PREPARATIONS made in strict accordance with the Pharmacopœia.

All Orders accompanied by Drafts, or sent through Merchants, attended to promptly, and executed upon the best terms.

Ningpo	Manila	Calcutta

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, and America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Shareholders having their shares on the London register receive their dividends at the fixed rate of 4s. 6d. per dollar. Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

COWASJEE DINSHAW,

Close to the Landing Place, Depot of

JAMES EPPS & Co, 48, Threadneedle-street, and 170, Piccadilly.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

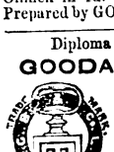
Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter, or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.



THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

OSLER'S GLASS CHANDELIERS.

WALL LIGHTS AND LUSTRES FOR

Per French steamer *Sindh*, March 14.—To Batavia: Mr. and Mrs. Erdman. To Galle: Mr. Fairhurst.

Per P. and O. steamer *Malwa*, from Southampton, Jan. 28.—To Shanghai: Mr. H. de Bastide. To Hong Kong: Mrs. Armstrong, Mr. and Mrs. S. G. Bird. To Singapore: Mr. J. D. Vaughan.

Per P. and O. steamer *Nizam*, from Venice, Feb 5.—To Singapore: Mr. Miller.

Per P. and O. steamer *Surat*, from Southampton, Feb. 11.—To Yokohama: Capt. and Mrs. McDonald. To Hong Kong: Sub Lieut. Cameron, Surg. Major Ferguson, Mrs. Ferguson, Mr. D. R. Crawford. To Singapore: Mr. R. Lirde. To Ceylon Mr. W. Ropers, Capt. and Mrs. Clarke.

Per P. and O. steamer *Baroda*, from Venice, Feb. 19.—To Singapore: Mr. R. B Parr.

Per P. and O. steamer *Baroda*, from Brindisi, Feb. 22.—To Hong Kong: Mr. and Mrs. F. W. Mitchell. To Ceylon: Mr. Livan, Mr. J. M. Robertson, Jun.

Per P. and O. steamer *Peshawur*, from Southampton, Feb. 25.—To Yokohama: Mr. and Mrs. Troup. To Singapore: Mr. and Mrs. Innes.

Per P. and O. steamer *Lombardy*, from Brindisi, March 8.—To Galle: Mr. Anthony Trollope.

Per P. and O. steamer, from Southampton, March 11.—To Hong Kong: Mrs. Maclean and party.

Per steamer *Ulysses*, from Liverpool, Jan. 27.—For Suez: Mr. Sharpe. For Shanghai: Mr. and Mrs. Penfold, Capt. Bassett, Capt. Hawthorne.

Per Pacific mail steamship *Great Republic*, from San Francisco, Jan. 2.—For Yokohama: Dr. A. R. Platt and wife, H. Vinay, Mrs. M. E. McClean, H. P. McIntosh, U.S.N. Rev. Mr. Borchard, Shioda, Ishizawa. For Shanghai: Miss Georgie Garland, Mrs. Colby, the Master of Blantyre and servant, Houstoun Boswall, B. Brenan. For Nagasaki: F. Hillyer and wife. For Hiogo: I. S. Shann. For Hong Kong: L. Van W. Van Vliet, Richard S. Shepard, Isaac F. Shepard, H. C. Wodehouse, Bing You, 298 Chinese.

Summary of News from the Far East.

JAPAN.

Our usual advices from the Japan Ports have not come to hand by the present mail.

CHINA.

PEKING AND TIENTSIN.

The Imperial audience granted to the Ministers from Japan and the United States took place at Peking on the 29th Nov., at the usual early hour. The Japanese Minister, as being the earliest arrival in China, was received first, and Mr. Avery immediately afterwards. H.E. Yanagiwara left for Japan on the following day, his interpreter, Tei, remaining in charge of the Legation for the winter. We understand that Yanagiwara was, while on his way towards Tungchow, assaulted in the person of one of his retainers, who was struck on the head by a stone thrown at him by a Chinese. Tei, who is in charge of the Legation at Peking, forcibly represented the case to the Tsungli Yamen. That body expressed much regret at the occurrence, and sent an escort to accompany the Minister and his suite for the remainder of the journey. At Tientsin the wounded man was visited by the Taoutai; and the Tsungli Yamen have sent a letter of apology to Yanagiwara, announcing at the same time the capture of the offender. While at Tientsin Yanagiwara called on the Governor-General and the Customs Taoutai, and his call was returned by those high officials at the United States Consulate.

On the 2nd Dec. H.E. General Raasloff, Danish Minister to China, arrived at Tientsin, and called upon the Governor-General next day. On the 4th Li Hung-chang returned the call at the residence of Mr. Twinem, the Acting-Commissioner of Customs. General Raasloff has since left Tientsin for Peking by road. The river being frozen over in many of the reaches, even near Tientsin, where the influence of the tides keeps it open longest, traveling in barges is impossible.

The weather at Tientsin was very mild and pleasant, without any wind, but the Chinese were expecting a change to cold stormy weather about the 7th December.

SHANGHAI.

The present mail brings advices from this port to the 18th December; the P. and O. mail from London October 30 was received on the 15th December The following summary of news is from the *North China Herald*:—

The North China Branch of the Asiatic Society has held its second meeting, when there was again rather a small attendance. A. Wylie, Esq., Vice-President, occupied the chair. The Rev. G. D. B. Miller, Messrs. W. Chrystall, W. A. Turnbull, E. Hamilton, E. P. Hague, W. V. Drummond, and A. Goetz, were

Digitized by Google

elected resident, and Messrs. A. Fauval and G. Barton non-resident members. Messrs. E. J. Caldbeck and W. Daniel (resident), and Mr. Harry Hicking, of Hong Kong, were then proposed and admitted as members. The Chairman mentioned that the Society had been invited to appoint two delegates to represent it at the approaching Congress of Geographical Societies in Paris, and the Council suggested Sir Rutherford Alcock and Père David. The nomination requires to be confirmed at next meeting. A letter from M. Mesney, late of Kweichau, accompanying the presentation of a number of articles for the Museum, was then read, and a special vote of thanks was awarded to that gentleman. Mr. Cordier read a very exhaustive paper, historical, geographical, religious, and political, on Tongking and recent events there. Dr. Macgowan, taking into consideration the lateness of the hour, gave only an abstract of his Notes on Chinese Toxicology, referring solely to Arsenic in this his first of the series of Notes. To both gentlemen cordial votes of thanks were passed.

A numerously-attended meeting of members of the Shanghai Volunteer Corps was held on the 14th Dec., at the Lyceum Theatre. The chair was occupied by Mr. Purdon, Chairman of the Municipal Council, and Civil Commandant of the Corps. The meeting was called expressly to elect a captain and adjutant-general, in the room of Captain Brewer, resigned. It was, however, thought probable that he might be induced to reconsider his resignation if again elected, under certain modifications in the management of the corps. Captain Cann therefore proposed, and Captain Rice seconded, that Captain Brewer be elected, Mr. Waller moving, and Mr. F. A. Groom seconding, the appointment of Captain Hart, of No. 1 Company. The ballot was in favour of the last-named gentleman by forty-six to twenty-one votes, seven declining to vote. This result was doubtless mainly owing to the uncertainty as to whether Captain Brewer would consent to resume the duty. The necessity of engaging the services of a professional drill-sergeant was next discussed, and the matter will be laid before the Municipal Council for consideration. The band lastly claimed attention, it being represented that the nineteen members of which it is composed have attained a high degree of efficiency, but that unless more funds were forthcoming at the end of the present month they must dissolve. It is understood that the members of the Corps will be invited to make up the amount necessary, and should that plan fail in procuring the whole sum, the Council will probably provide the remainder. The meeting separated with the usual vote of thanks to the Chairman. The appointment of Captain Hart to be Commandant, with the rank of major, has been officially notified; and Captain Brewer has since been elected to the command of No. 1 Company.

It is satisfactory to find that the agitation has already resulted in practical evidence of a revival of interest in the Volunteer movement. About thirty members of No. 2 Company attended the company drill called by Captain Cann, which shows an encouraging increase. The Shanghai Rifle Club has held its first competition, when Captain J. J. Tucker won the prize offered, with a Metford rifle.

The late missionary difficulty at Hoochow has, we are glad to hear, been successfully adjusted by H.M.'s Consul, a sum of $200 having been paid as an indemnity for the personal losses of Messrs. Meadows and Douthwaite, a proclamation issued, and a promise given that other premises will be provided as a preaching place as soon as the ill-feeling against the missionaries has somewhat subsided. The amount paid as indemnity does not quite come up to that claimed, the Chinese authorities having declined to pay anything on account of the property lost by the Mission or its Chinese adherents, on the ground that they had no official knowledge of the existence of the chapel, and that the natives brought the trouble on themselves by permitting the premises to be employed for a different purpose than that declared in the lease. But it is at any rate satisfactory that something in the way of redress has been effected, and it is an encouraging consideration that this result has been arrived at by means of friendly negotiation alone.

The Japanese troops having now all retired from Formosa, the remainder of the sum to be paid under the convention has been handed over by the Chinese to the Japanese authorities here.

The whole of the cargo of the *Conqueror*, which took fire lately when about to sail, tea-laden, for New York, has been discharged into the godowns at Hunt's Wharf. The amount damaged has not yet been correctly ascertained, but is, we believe, less than was anticipated.

We hear that the steamer *Leven* has become the property of the Chinese Merchants' Steam Navigation Company, and that her special employment will be lightering the company's steamers at the Taku Bar. It is stated that the company intend to increase the number of their fleet very considerably.

The Municipal Rifle Range is now being put to a very serviceable use. Parties of from twenty-five to fifty of the crew of H.M.S. *Modeste* are practising daily, under charge of Mr. Weatherdon, chief gunner's mate, for the annual prize offered by the Government to the best small-arm shot of every crew in Her Majesty's naval service.

There has been a paper hunt from a point opposite Overweg's bungalow, round by Sicaway, till within half a mile of the Bubbling Well. The day was lovely, and the turnout of spectators immense, particularly at the finish, where a double, and in some places treble, rank of carriages occupied the road for nearly a quarter of a mile. There was a full field of hunters, and the run was a very good one, but long, with a check or two which made the finish ten or fifteen minutes late. The three first ponies took the last jump together, Mr. Walker, on Apollyon, narrowly wresting light-weight prize from Mr. Lang, while Mr. How carried off the honours for the heavies. When the concourse of carriages began to move off, the sulky temper of the Chinese pony led to several smashes. We saw two carriages which had come to grief, and a pair of lamps in such a position, lying deserted by the wayside, as to suggest that a third trap had been taken across country.

The excellent amusement of football, which flourished a couple of winters ago, but has since been neglected, is to be revived in connection with base ball, one subscription of Tls. 10 per annum admitting members to the privileges of both clubs. It is intended to open the football campaign on an early day.

On the 12th Dec. pumps were kept at work on the *George Washington*, the shoal water to which she had been moved enabling this to be done with effect; and having thus been lightened, she rose with the assistance of the pontoons. The scuttle holes were then stopped, and she was towed to the Honkew side and moored at Messrs. Farnham and Co.'s new wharf. The water having been further pumped out, some bales of cotton were removed, and the injuries she had sustained by the fire which broke out in her just three weeks ago were partially ascertained. She proves to have been badly burnt on the port side, by the main hatch, along the under side of the deck beams and ceiling. The cargo proves to have suffered very little by three weeks' immersion. Except at the outside of the bales, the cotton is perfectly clean, and dries readily. The deck and rigging of the vessel present rather a wrecked appearance, but the hull, which has now been pumped dry, is reported by competent authorities to be in wonderfully good order. It is probable the ship as well as cargo will be put up to auction, for the benefit of the concerned.

BURNING OF THE "HORATIO."

The American ship *Horatio*, Capt. Hardy, which arrived at Shanghai on the 1st Dec. from New York, with kerosene oil and general cargo, has been totally destroyed by fire in the harbour. The fire is supposed to have been caused by the carelessness of a Chinese tinsmith who was repairing some kerosene tins on deck. Only a small quantity of oil remained on board at the time. The captain and chief officer were severely burnt. The *North China Herald* supplies the following account of the disaster:—

The outbreak was discovered, as we were informed, near the galley on deck, at about 12.40, an hour at which the Captain, with Mrs. Hardy, their child and its nurse, who was also stewardess of the vessel, and the first mate, Mr. Crownshields, were at dinner; the second mate, Mr. Randall, having charge of the deck. On the alarm being given, it was at once seen by those on board that the chance of saving the vessel was almost nil, from the fact that a number of the cases containing kerosine were then on deck, some empty, others leaky and being repaired. In a few seconds the fire had caught these, the wind rapidly sending it aft. The application of water would have been of no use, for the kerosine when brought in contact with it would only have spread, to carry destruction still wider. Captain Hardy's first thought, therefore, was the safety of his wife and child and the stewardess; and during the few minutes that elapsed in the happily successful endeavour to lower them into a sampan alongside, the fire, which had now become flame, had made its way right aft to the cabin, and so round to the taffrail, along the top of which, as well as the adjacent bulwarks, it was seen running and flickering in a way to show experienced eyes that in a few moments the upper works of the ship would burst into flame. Smoke in dense black volumes began to ascend from the cabin, and from the kerosine oil cases near the waist of the ship, betokening how surely and rapidly the fire was gaining ground. This, however, did not deter Captain Hardy from re-entering the cabin, which, differing from ordinary deck-houses, was built the whole width of the ship, and was, in fact, a short poop. His object was to recover some cherished articles belonging to his wife, as well as three valuable chronometers. Mr. Crownshields followed him to render aid, and also to try and save the ship's insurance papers, but the danger had become too imminent, and they had hastily to escape over the side, as a fierce body of flame leaped full at them, burning them severely on face and hands. Rendered thus helpless, they were pulled into a sampan by Mr. Randall, who had got down before them, and removed to the U.S. corvette *Hartford*, one or two of whose boats arrived alongside very soon after the ship took fire. Mrs. Hardy, child, and the stewardess were also taken on board the *Hartford*, having been unable to save a single article of clothing beyond what they wore. The deck around the mainmast, the mizzen-mast, cabin, and taffrail, were now one mass of fire, which, seizing hold of the lower standing and running rigging, leaped from rope to rope with great speed and intensity, until both the main and mizzen tops were in flames and burning furiously, presenting a scene that in the darkness of night would have been one of much grandeur, and was even lurid and awe-inspiring in face of the noonday sun.

In the meantime the fire-alarm bells were clanging ashore, and the members of the various volunteer fire companies, with their engines, the police with hose-reels and extincteurs, and a large number of spectators were hastening from all points to the scene of the conflagration. It was, however, soon perceived that water, unless the burning ship

Digitized by Google

were scuttled, would be of no avail in such a fire; and the vessel being moored nearly in mid-stream rendered nugatory all efforts from the shore. Many of the firemen—the Mih-ho-loongs being conspicuous by their red shirts and white helmets—went afloat in sampans and other craft, hoping to be of some use, but no help could be rendered in the way of extinguishing the flames, which each minute rose higher and higher, until the whole after part of the ship was ablaze from deck to tops. About half-a-cable's length astern of the *Horatio* lay the *Laju*, another large ship, with all her sails shaken out to dry. Her position was apparently one of some danger, from the possibility that burning fragments from the *Horatio* might be carried amongst her rigging, the wind blowing in her direction and the great body of fire being at the after part of the *Horatio*. However, the possibility of such a fatality was soon removed by the determination to slip the cables and tow the *Horatio* over to the Pootung shore, with the view of placing her on the mud, and so preventing her wreck from becoming an obstruction in the fair way. The steam-tug *Rocket* performed this duty, and succeeded in towing the ship to a position close to Pootung. This was afterwards felt not to be altogether judicious, however, as to sink the blazing wreck, which now began to be contemplated, it would be necessary to haul her off again into deeper water. The tug *Sampson* therefore hauled her out a little way, but even after again making the ship fast, it was found that she would not be far enough from the shore. By this time the surface of the river for hundreds of yards around was covered with small craft of all sizes,—boats from the U. S. corvette *Hartford*, H.M.S. *Modeste*, the Russian, French, and German men-of war, and from the Chinese gunboats (the latter looking creditably trim and sailor-like), the merchant vessels, the Harbour-master's hulk, the various landing jetties, and sampans innumerable, each with its living freight; while advantageous points ashore for witnessing the spectacle were crowded with people.

While the *Rocket* was slowly towing her to the shore, the mizzen-mast, top, and upper rigging were all on fire, and at about 1.45 the whole mass went over the quarter into the river with a hiss and splash loud enough to be heard at a considerable distance. The fire still raged aft, and there being now even less possibility of extinguishing it, it was resolved to riddle the hull with cannon shot, and the *Hartford's* launch went within a few yards of her side and fired charge after charge, till nine large holes were made, none of them, however, being near enough the water's edge to be of service unless the ship could be taken into deeper water, and this was now deemed impossible. The flames were raging with momentarily increasing fury fore and aft, and the foremast rigging was soon burnt through in its turn, as the others had been before it, the fire also extending to the bowsprit and the foretop, again leaping and running from clew-line to bunt-line, from stay to lanyard, in manner marvellous for its swiftness, and painfully suggestive of the horrors of such a catastrophe at sea. About three o'clock the flames had nearly done their destructive work on deck, and extending downwards to the lower parts of the ill-fated craft, reached the magazine, which blew up with a flash brilliant in the extreme as seen against the comparatively dull red of the conflagration around it. The burst of smoke which followed the explosion was of a sickly green, while that from the blazing wood, hemp, pitch, and oil presented varied hues, from dead black to light grey, the volumes being of great bulk and sailing away grandly against the half-clouded sky. At 3.45 the foremast went by the board, falling over towards the Pootung shore, and throwing up the most sparkling coruscations, while from the forecastle there shot up for some distance flames and blazing fragments so large and fierce as to cause a shudder at the thought of what was going on below deck. The hull was so secured as to prevent all probability of the fire doing any further damage, the large concourse of spectators both ashore and afloat began to depart, and the fire was left to burn down until it met with the water which had been let in.

As to the outbreak of this destructive fire, the steward of the vessel states that a Chinaman on board was engaged near the galley soldering up some of the leaky kerosine cases, for which he had at hand a brazier of lighted charcoal, being at the time surrounded with other cases of the inflammable oil. It is not now known how the oil took fire, though it is believed that either a spark or burning cinder from the brazier must have fallen upon the deck, the rapidity with which the flames travelled forbidding any attempt at extinction. What became of the Chinaman is not known, but as he was surrounded with the cases, most of which were in a blaze in less than a minute, there are some fears regarding his fate, especially as no one saw him afterwards. It is possible, however, that frightened at the mischief he had done, he bolted over the side, and has gone into hiding. There were only a few members of the crew on board, and they had leisure to escape forward, the flames at the outset travelling aft.

SWATOW.

The correspondent of the *China Mail*, dated 10th Dec. says:—The British vessel *Albert Victor* arrived here, bringing ten men and one woman, the former Chinese and the latter Siamese, picked up at sea eighty miles south-east of the Shantung Promontory. They were found floating in a huge water-tank. They informed the captain of the *Albert Victor* that they had left Newchwang on the 21st November, in the Siamese barque *Contest*, which foundered the next day near the Shantung Promontory. The captain of the *Contest*, by name Kramer, had taken refuge in the water-tank before the Chinese now saved entered it, but, on seeing their approach he left it, and was not seen again. The *Contest* went down half an hour after the boats, which are supposed to have been made use of for safety by the Malay crew, were entered, but, owing to the darkness, nothing is known by those who are rescued by the *Albert Victor* as to the fate of either officers or crew. The water-tank floated about for six days with its living occupants, who during that time had no other provisions than a fowl and a salt fish. They state that they had no water to drink the whole time, and that they had made up their minds to kill and devour the pretty and young Siamese female who was sharing their fate in the water-tank. They were all so exhausted that they had to be carried on board the *Albert Victor*. One of those rescued is the supercargo of the *Contest*.

HONG KONG.

Our advices by the present mail extend to the 24th December; the French mail from London 6th November was received on the 18th December, and the following P. and O. mail of Nov. 13 arrived out on the 21st Dec. The following items of news are from the *China Mail*:—

An extraordinary meeting of the shareholders in the Union Insurance Society of Canton took place at Hong Kong for the purpose of authorising certain alterations in the Articles of Association with regard to the reserve fund. A considerable amount of discussion took place, it being held by some of the shareholders that the resolution proposed pressed somewhat unfairly upon non-contributing shareholders, who ought, as their proportion of the profits is much less, to be credited with interest on their proportion of the amount held back for the reserve fund. Ultimately the proposed resolution was passed, the Chairman promising that the views of the dissentient shareholders should receive full attention.

The Chinese pagoda in Rangel's Labyrinth, which was partially destroyed by the typhoon of 22nd-23rd September last, is now being repaired. A new pagoda, dedicated to some high personage of Buddhistic mythology, is being constructed for the gratification of the votaries who are expected to throng the building during the New year's festivities, which commence on the 6th February next.

In connection with the wood case recently tried by Mr. Justice Snowden, we learn that for the wrecked ship burnt by some Chinese wreckers at Cow-e-chow in order to strip her, the agents put in a claim against the Chinese Government through H.B.M. Consul at Canton. The mandarins thereupon exacted an indemnity of $5,000, the amount claimed, from the inhabitants of the island. This sum was made up by contributions, and was handed over to the agents, who generously remitted $1,000.

In the Supreme Court, Captain Finch came up for his final discharge in bankruptcy. His Lordship (Sir John Smale) observed that he understood that there was no opposition to the bankrupt's discharge. After a slight pause he observed that he signed the discharge with much satisfaction, because the bankrupt was the victim of circumstances, and left the Court without the slightest imputation on his character.

A submarine torpedo was very successfully fired off the Naval Yard. As many people are aware, efforts have for some time been in progress towards removing some rocks lying between the Dockyard jetty and the Commissariat pier, and the torpedo fired this afternoon was the second of a series which will probably include some five or six. The arrangements were most satisfactorily made under the superintendence of the Gunnery Lieutenant of H.M.S. *Iron Duke*, and upon the electric connection being made, a column of water and spray rushed upwards into the air for some sixty feet, presenting a most interesting appearance. The results of to-day's operations will not, of course, be known until the rock has been examined by divers. Another torpedo was very successfully exploded on the 18th Dec., off the Naval Yard; an equally high column of water, but with more mud, was thrown up as on the former occasions. The crew of a passing junk were nearly scared out of their senses as the water rushed up, and their bewilderment created much amusement to those watching the proceedings.

Among the passengers for Europe by the French mail was H.E. Viscount San Januario, ex-Governor of Macao.

The Grand Lodge of China Annual Masonic Banquet was held on the evening of the 18th Dec., and was attended by sixty Masons. The dinner, provided by Mr. Dorabjee, of the Hong Kong Hotel, was good, and a very pleasant evening was passed.

The British West Indian Emigration Agency at Canton is about to be closed, or, at least, the present agent, Mr. Sampson, is about to resign his office.

The second section of the telegraph line between Foochow and Amoy is now completed, and remains intact. We think that the company's agent, Mr. Henningsen, ought to be complimented upon having so far carried out the work entrusted to him, despite much underhand opposition. The Shanghai papers advise us of General Raasloff's departure for Peking. As his Excellency has been specially instructed by the Danish Government to enforce the fulfilment of the alleged agreement between the Chinese Government and the Great Northern Telegraph Company, his advent will put matters in a clearer light.

An ordinance, enacted by the Governor of Hong Kong, with the advice of the Legislaive Council, to render personation, with intent to deprive any person of any property, felony, has been published. The penalties for this offence range from three years to life penal servitude, or imprisonment for a term not exceeding two years' hard labour.

His Excellency the Governor is pleased to direct that the 24th,

Digitized by Google

Christmas Day, and Saturday, the 26th instant, as also New Year's Day, and Saturday, the 2nd January, shall be kept as holidays throughout the Government Departments.

We find a notification in the Chinese version of the *Government Gazette* directing that in the transaction of all business with the Government, the Chinese are only to use the names given to them at their birth, so as to avoid the confusion that may be caused by the use of aliases. We observe, however, the absence of any translation of the proposed Registration Ordinance, but this will not cause much inconvenience, as one has already appeared in the *China Mail*.

Energetic measures are being taken to raise the wrecked steamers *Albay* and *Leonor*. The hulk *Celestial*, belonging to the Dock Company, and a dismantled barque, are lying one on either side of the *Leonor*, and chains will be passed under her to raise her up. It is nearly time the two wrecks were taken out of the way of the boat traffic to the wharf.

Our old friend the *Fort William* was disposed of by public auction the other day for some $14,000, the purchasers being, we believe, Chinese, who intend to break her up, and for this purpose she will be towed to Whampoa. The *Fort William* came to this colony in 1844 with a cargo of cotton, and from 1845 she had been the constant receiver of overland goods, the *Lady Mary Wood* being, we believe, the first carrier that went alongside her. The *Fort William* was burnt nearly to the water's edge in 1850, but was rebuilt. The Chinese believe that the lining will be found to contain a large quantity of stolen property, hastily stowed away in openings by stevedore coolies, and of course lost in the unexpected gap between the inner and outer skins. Hence the large price given for her.

The trade assignee (*Re* Geo. Glasse, bankrupt) saying that he was satisfied with supplementary accounts filed, and had no question to ask the bankrupt, the bankrupt passed his final examination. The Registrar certified that all proper forms had been passed through. The order to come up and obtain certificate of discharge was made for the 2nd January.

A correspondent writes :—

Reports of trade both here and from the ports point to a persistent dulness, and I hear rumours of the financial difficulties of several well-known firms. Messrs. Bourjau and Co., of Hong Kong and Shanghai, well-known merchants, have failed for a large sum. Mr. Stanschild has been appointed to liquidate their estate, the exact liabilities and condition of which are not yet fully known.

The Hon. R. Rowett, member of the Legislative Council, and one of the respected firm of Holliday, Wise, and Co., retires from business at the end of the year. He will return to England very shortly, and the probability is that China will know his presence no more. He will be much missed, both in public and private life. In the former he was always known as the bold advocate and staunch supporter of popular measures. In the latter he had the character of an honest and industrious man of business, a faithful friend and genial companion.

Mr. N. B. Dennys, the editor of the *China Mail*, and well-known both in Europe and America for his contributions to Anglo-Chinese literature, has been rewarded by a *German* recognition of his talents and services. Perhaps the old proverb holds good in Mr. Dennys' case—whose name, by-the-by, I mentioned a few weeks ago, when he completed and published a Manual of the Cantonese dialect. He has found more honour in another country than his own. The University of Rostock has conferred upon him the degree of Doctor of Philosophy, a distinction which we in China, at least, are willing to admit is well deserved.

THE NAVAL HOSPITAL.

The last mail brought to Hong Kong Deputy Medical Inspector-General Morgan, R.N., who has, we understand, this day taken over charge of the Naval Hospital at Wanchi from Deputy Inspector-General Loney. The present occasion is therefore *apropos* for a few remarks regarding an institution of which Dr. Loney has been the chief director since 1872—primarily afloat, and latterly in the convenient premises purchased from Messrs. Jardine, Matheson, and Co.

The present Naval Hospital building—lately the "Seaman's Hospital," Wanchai—was built by Messrs. Jardine, Matheson, and Co., in 1862, Dr. Adams being the first house surgeon. The building is admirably adapted to the purpose for which it was designed, and the grounds are well laid out. New drainage works, planting, turfing, and other improvements (partly rendered necessary by the lapse of time) have been extensively undertaken, and when the works now contracted for are complete, nothing will remain to be done to render the hospital one of the best in the Far East. Dr. Morgan in fact finds much of his work done to his hand.

Until a very recent period the accommodation for the sick of the Squadron on this station has been found afloat. In December, 1841, H.M.S. *Minden* was selected for a hospital ship, and was followed by the *Hercules*. She in turn was replaced by the *Melville*, which vessel was sold and broken up in 1873, soon after the transfer of the Hospital to the shore. This latter event took place on the 28th of May last, when Deputy Inspector-General Loney took charge of the buildings on Mount Shadwell. The following day he moved over from the *Melville* with the officers, other *employés* of the establishment, and sick; and by two o'clock the same afternoon the hospital was fully established on shore with stores sufficient for present use. A grant of £3,000 from the Admiralty was subsequently obtained for the construction of surgeon's quarters, store rooms, and a guard wall with gateways, and these necessary works are now fast approaching completion.

Judgment has been given by Chief Justice Smale in the case of Robinson *v.* Bell and others, commonly known as the Hong Kong Distillery. His lordship having gone fully into the matter came to the conclusion that there was no actual ground of fraud against the defendants, and therefore gave judgment in their favour.

LOSS OF THE PACIFIC MAIL STEAMER "JAPAN" BY FIRE.

On the 17th Dec. the fine steamer *Japan* was totally destroyed by fire at sea, about one hundred and thirty miles from Hong Kong; part of the crew and passengers were picked up and conveyed to Swatow, and thence took passage per steamer *Yesso* to Hong Kong. The following is the report of Captain Warsaw, made at Hong Kong Dec. 19 :—

The P.M.S.S. Company's steamer *Japan*, 4,351 22-100 tons, E. R. Warsaw commander, left San Francisco on Saturday, November 14, 1874, at noon, with twenty-four cabin passengers, five European steerage, eight Japanese, 422 Chinese, 975 tons cargo, 168 boxes treasure, value $358,508, twenty-one packages mails; had pleasant weather with variable winds during passage to Yokohama; arrived Dec. 10, 10 A.M., landed twenty-two cabin passengers, four European steerage, eight Japanese, 400 tons cargo, sixteen packages mails. Received on board one European steerage passenger, three Chinese, forty-five tons cargo, 600 tons coal, one bag mails, stores, &c. Sailed from Yokohama, Dec. 11, 1874, at 4 P.M., for Hong Kong. Experienced pleasant weather up to noon, Dec. 17, when the wind freshened into a strong breeze from N.E. with rough sea. At 9 P.M. passed Lamock Light, distant five miles, ship under sail and steam. At 11.25 P.M. Breaker Point bearing West ¼ South, distant twenty-six miles. Strong N.E. monsoon with rough sea. Fire first discovered, engines stopped, ship headed in shore, ventilators turned from wind, all fire engines working in perfect order, every effort made to subdue the fire, at same time officers detailed to swing all boats preparatory to saving life. All efforts to save the mails proved useless. Finding it impossible to subdue the fire, abandoned the ship with last boat at 1 o'clock A.M., December 18th, the ship then being enveloped in flames amidships, directly in engine and fire rooms, all communication being cut off between forward and aft part of the steamer. Remained until noon in the vicinity of the wreck, saving life. Engaged a fishing junk to assist. Cruised in the vicinity of the wreck, and succeeded in saving 117 souls from boats and water. Seeing no more life stood in for Cap Chi point. At 6.30 P.M. intercepted English steamer *Yottung*, Captain Kock, who kindly took us on board, and conveyed us to Swatow; thence transferred to steamer *Yesso* for Hong Kong. I beg to convey on behalf of my officers, crew, and self, our sincere thanks to English and American Consuls at Swatow, Captain Kock, and officers of steamer *Yottung*, and Captain Ashton and officers of the steamer *Yesso*, for their kindness in rendering every possible assistance.—

(Signed) E. R. WARSAW.

The *Hong Kong Times* gathered the following information from Dr. V. B. Gates, surgeon of the *Japan* :—

I was aroused at about 11.30 P.M. on the night of the 17th by an alarm from the ship's bell. My cabin, which was abaft the smoke-stack, was full of smoke. I had only time to put on the first garments to hand, and secure my watch and sword and three ten-cent pieces. The intensity of the smoke was such that it put the lamp out. I was compelled to rush out immediately to get a little fresh air. I have lost my surgical instruments, worth $650, medical and surgical books to the value of $350, and $200 locked up in my trunk, which I had not time to open and remove. I remained on board about one hour. A short time after I was roused I perceived flames coming up from the centre of the vessel, blown forward. All hands went to work and worked hard. Three streams of hose were immediately used, and then eight others, but without avail. It was a bad night, pitch dark, with a rough sea. The exertions of the captain were untiring, and I thought he would sustain personal injury from too close proximity to the flames. My impression is that the fire arose from spontaneous combustion. There was something peculiar about the coals, which were shipped at Yokohama. They were so ignitable, and burned so furiously. At about one P.M. on the 18th, with Dr. Tyndal and ten Chinese, we secured a boat and made from the ship as fast as possible.

The *Hong Kong Daily Press* says :—

Early on the morning of the 19th instant the community was startled by the intelligence that the magnificent steamer *Japan*, belonging to the Pacific Mail Company, had been completely destroyed by fire on the high seas. The first news was brought by an open boat, which arrived at 4 A.M., containing the chief engineer, Miss Stott, a passenger, and seven Chinese. Later in the morning—namely, about nine o'clock—a second boat arrived, containing the baker, stewardess, and six Chinese. This boat was picked up by a fishing junk, which took it on board, and brought it, together with the inmates, to Hong Kong. Finally, yesterday the *Yesso* arrived, containing Captain Warsaw and the remainder of those who were saved from the wreck. It appears that the total number missing by the sad accident is 389 Chinese, one European steerage passenger, and the cook. The steamer had a general cargo on board, and treasure to the amount of $358,508. The history of the conflagration will, it is to be feared, remain involved in obscurity. None of the accounts which have been given explain fully the first cause of the accident, but they concur in showing that the conflagration spread with the most frightful rapidity. From Captain Warsaw's account, it appears that the fire was right amidships, and that it raged in a very short time with such awful fury that it was impos-

Digitized by Google

sible to communicate from one part of the vessel to the other. Under such trying circumstances, it is easy to understand that any thoroughly concerted measures were impossible, and it was soon evident that those on board must endeavour to save themselves from the flames. On this becoming apparent nothing was left but to take to the boats and such other life-saving apparatus as were on board, among which was a raft which could carry as many as 150 people. It is not certain whether, in the terrible confusion which took place, it was possible to float the raft. The *Japan* is one of the finest steamers belonging to the company. The means of extinguishing fire, and the life boats and life-saving apparatus, were ample, and would probably have been found quite sufficient to deal with any ordinary accident in the way of fire; but from all accounts the present catastrophe appears to have occurred with unheard-of rapidity.

Mr. Praed, M.P., who was at one time supposed to be on board the *Japan*, left Hong Kong by the present mail. Lord Claud Hamilton, M.P., who arrived at Yokohama on Nov. 26, was not a passenger by her.

The following gives the details of those saved and lost, so far as known when we go to press:—On board upon leaving Yokohama: 128 crew, 2 cabin passengers, Mr. Crocker and Mr. Tindall, 2 Europeans, steerage, 425 Chinese, steerage; total, 557. Saved so far as known: 106 crew, 2 cabin passengers, 1 steerage (Miss Stott), 34 Chinese, steerage; total, 143.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 31st Dec.; the P. and O. mail from London Nov. 27 arrived out on the 27th Dec. We take the following items of intelligence from the *Straits Times*:—

An interesting question has been raised in the Legislative Council as to the legality and the effectiveness of the so-called blockade of Klang by Tunku Dia Oodin, the Viceroy of Salangore, in connection with the seizure some time ago of the British steamer *Sri Malacca*, owned by a Chinese British subject in Malacca. The owner petitioned the Executive Government under the late Administration, without obtaining any satisfaction, and therefore applied to the Legislative Council by means of a petition presented through the Hon. Mr. Shelford, who argued the case with great ability; and though he met with considerable opposition from the Official side, has been so far successful that, by a resolution of the Council on the 24th Dec., the petition was referred to Government for consideration. It was, of course, impossible that the Legislative Council could afford the petitioner any relief, or do more than give publicity to the matter. The Council has held four meetings during the fortnight, but it has been found impossible to close the Legislative work during the current year, and as several important measures yet remain to be passed, the Council now stands adjourned to the 4th January. The main business of these four meetings has been the consideration of the estimates, and the unofficial members deserve the thanks of the community for the searching inquiry they have made into the items of expenditure and their efforts to keep it within bounds.

The question of altering the constitution of the Singapore Municipal Commission is now under consideration by the Council. The measure is very simple, providing merely for the withdrawal of the Colonial Secretary, who is President ex-officio, and giving the Governor power to nominate two members instead of one, who, with three elective members, will constitute the Board, which will choose its own President. This alteration in its constitution will have the effect of removing the Commissioners from Government control, though giving them at the same time the advice and assistance of two Government officials.

The results of the late expedition to Sunghie Ujong fully justify the decision of Sir Andrew Clarke to make a display of force, although the immediate object of the expedition had been previously attained without its assistance. The Datu Bandar and Rajah Mahmood had, as reported, made their way to the Sultan of Salangore, but afterwards came to Singapore, under the escort of Captain Dunlop, to make terms with the Governor. This action on their part augurs well for the future peace of the petty States; and though at the outset there may be a few petty disturbances, it is probable that after the first two or three instances the necessity for armed expeditions will cease to exist.

The *Government Gazette* contains two circular despatches from the Secretary of State for the Colonies,—the first providing for the intermediate custody in a colony of soldiers sentenced by court-martial to penal servitude, and the seconding providing that when a Governor appointed to a colony does not proceed direct to the colony after embarkation, he shall only be allowed half salary for the time that would have been incurred in a direct journey. Thus, a Governor coming from Europe to the Straits or Hong Kong, *via* Bombay or Calcutta, would have to make the *detour* at his own time and expense.

The Government is calling for more volunteer police constables to serve in Perak, and, with an eye to secure good men for that service, stipulates that they shall be unmarried Mohammedans, able to read and write. No doubt it is desirable that a good class of men should be obtained for Perak, but it is also necessary for the peace and good order of the colony that its police force should have drill and local experience, instead of having its best men constantly drained for service in the Malay States, while we have to be content with raw recruits, who know nothing of their duties. The *morale* of the force has already been materially weakened by this means, and we regard the prospect of further drafts from the ranks of the constables with serious misgivings.

The constant banging of large crackers and fitful discharge of fireworks throughout the town is becoming a serious nuisance and a chronic source of danger. A few nights ago some unskilful person unknown let off a large sized English signal-rocket, which, instead of going up in the air as it should have done, flew straight into Dr. Rowell's compound on Prinsep's hill, where, after ploughing up a deep furrow, it buried itself to the depth of a foot and exploded with a report like a cannon. The whole neighbourhood was startled by the terrific report, but after the first alarm had subsided the place was examined, disclosing the shell of a signal-rocket of the most approved make, though how or where it was obtained will probably not be easily discovered.

The Governor has, we learn, to encourage the undertaking, become patron of the Singapore Rifle Association, and presented them at the outset with a prize of $20 for competition. The third competition, which was a very lively one, began on the 12th and was concluded on the 19th Dec., at the rifle range on the race course. Ten prizes were competed for, amounting in all to the value of $50. The competitors numbered eighty-five, who had each five shots at each range of 200 and 400 yards. The first prize was closely contested for, the result being a tie between Private Somers of the 10th and Mr. T. Davidson of the S.V.C., but in the final test between these two of three shots at 400 yards, Somers proved the winner by one point, his competitor therefore obtaining the second prize.

The news from Atchin so far received is not encouraging. The neighbourhood of the Kraton has been flooded, and after the water subsided the exhalations from the wet mud had seriously affected the health of the Dutch troops, no less than 1,100 of whom were under medical treatment on the 10th inst. H.N.M.S. *Watergeus* had been despatched to the West Coast with an ultimatum to the refractory petty States there, which are nominally under the Dutch flag, but returned to Great Atchin on the 16th December, with an unsatisfactory report of the results of her mission. The latest Batavia papers received give a continuation of Colonel Pel's diary down to November 23. From this it appears that the Atchinese still continue their plan of skulking about singly or in scattered bodies in the neighbourhood of the forts held by the Dutch, and taking shots at them from behind bushes and banks or the adjacent jungle whenever they have an opportunity; they also now and then discharge random shots from lillas in the direction of these forts. Their workers at bentengs and breastworks, &c., continue to occasionally assemble and be again dispersed by a shell or two falling amongst them, as usual. Colonel Pel, by all accounts, purposed to employ the latest arrived reinforcements sent from Java to Atchin in a general advance against the enemy and their fieldworks on the 13th and 14th Dec., but was prevented by the occurrence of unusual floods, which subsided in a few days, but left much wet behind; the Atchin river had risen, overflowed its banks, and caused much damage both to the Hollanders and their foes. Until the mud caused by this overflow in some measure dries up or settles down, field operations cannot conveniently take place, at least, on the scale proposed by Colonel Pel, who means, it would appear, to beat up the enemy's quarters to some purpose.

The Christmas and New Year holidays are being duly observed. The Tanglin Club have issued invitations for a Ball, and there will be the usual New Year Sports on the Esplanade and a regatta in the harbour.

A gang of ten Chinese from Campong Glam attempted a gang robbery at Pulo Dammar, but were frustrated by the Malays living there, who turned out in a body and gave the ruffians a severe mauling, and afterwards handed them over to the police.

Monsieur Nicolas de Maclay, the well-known Russian traveller, who has lately been on a visit to the Maharajah of Johore, left Lingga on the Moar River for the interior of Johore on Thursday last.

The German war steamer *Ariadne* anchored in the roads on the 25th Dec. She comes last from Galle, which port she left on the 7th Dec.

Commercial Report.

(For dates see first page.)

IMPORTS.

HANKOW.—There had been no improvement in the state of the Piece Goods market. Grey Cottons alone commanded any attention. There had been a steady though small demand for Shirtings, and 7-lbs. T-Cloths had been taken to a rather larger extent. Prices generally showed but little alteration.

SHANGHAI.—The market had continued quiet, the principal feature being a slight improvement in Camlets, but with this exception there

Digitized by Google

had been little change. Cotton Goods were slightly lower; there had been some enquiry for Japan early in the fortnight, but it had subsided. T-Cloths had been only in limited demand, but prices were unchanged. White Shirtings quiet, and without alteration. Drills somewhat lower. Velvets also rather lower and quiet. Fancy Cottons: Business unimportant, but no change in prices. Woollens.—Camlets had been in better enquiry, and prices had advanced. Long Ells had only been dealt in to a moderate extent, and prices were slightly better. Spanish Stripes were without alteration.

FOOCHOW.—The sales reported are:—Grey Shirtings, 8 lb., 1,200 pieces at $2.45 to 2.50 per piece. Lead, small sales at $8.50 per picul against tea.

HONG KONG.—The arrivals during the interval, besides the mail steamers, had been the s.s. Hankow, Lyeemoon, Menelaus, Ajax, and ship Lord Macaulay, bringing full supplies of manufactured goods for this market and the North. There had been more life in the import market during the week than had been exhibited for some time past. The Chinese had been contracting more freely for goods which they would not probably take delivery of until after their New Year holidays. Importers were willing sellers, and had met the demand freely, but there had been no improvement in prices.

CANTON.—There had been no sales of Lead, and, consequently, quotations were nominal. LB., $8.45 to 8.50, and WB., $8.55 to 8.60. Quicksilver had been dealt in to the extent of 20 flasks at $225, less 1 per cent., but deliverable at Hong Kong.

BATAVIA.—There had been little if any alteration in the market. Values of English staples were still drooping. A moderate business had been done in Grey Yarns, but Coloured Yarns continued to be difficult of sale.

SINGAPORE.—Messrs. Boustead's Circular says:—There is little change to note in Piece Goods, and the market keeps quiet for most articles. 8¼ lbs. Grey Shirtings have continued in fair request at late rates. A forced sale has been made at a decline. 6 lbs. and 7 lbs. only saleable to a small extent. There has been a little more inquiry for 7 lbs. T-Cloth, and as stock is now small, prices are firmer. 6 lbs. quiet at last quotation, light weights neglected. A moderate inquiry has been experienced for fine qualities of 36-inch White Shirtings, but low and medium kinds are quiet. 45-inch White Cambrics, 15/16 keep in limited demand, and prices are weak; low qualities neglected at present. Grey Yarn of all counts keep very dull, and sales can only be made at a decline. Coloured Yarns keep very dull indeed. Iron is very quiet, and in the absence of any important business prices are mostly nominal. Copper Sheathing is neglected and quotations are unaltered. Yellow Metal meets with very little inquiry, but prices are a shade firmer, owing to the late favourable advices from England.

PENANG.—The market had been very dull, business had been very trivial, and values were generally unchanged. It was not expected that any improvement in demand would take place until after the Chinese New Year.

EXPORTS.

TEA.

HANKOW.—No business had been done during the fortnight. Export of Hankow district teas to Dec. 12, 1874, 54,009,353 lbs.; ditto, 1873, 54,350,047 lbs.; decrease, 1874, 340,694 lbs.

KIUKIANG.—Two small lots Kiukiang packed tea had been settled at Tls. 16½. Export from the commencement of season to Dec. 9, 1874, 21,890,000 lbs.; ditto 1873, 19,849,105 lbs.; increase, 1874, 2,040,895 lbs.

SHANGHAI.—Black: There had been no change in the market, an unimportant business had been transacted at about previous prices. The market was almost bare of stock. Settlements for the fortnight 1,982 chests, stock, 1,011 chests. Green: Business continued on about the same scale as during the previous fortnight. Quotations had not been changed, although a slightly easier feeling was perceptible at the close, which was most noticeable in medium and common chops. The following were about the prices paid: For Country tea, 24,532 half-chests at Tls. 23½ to 35 per picul; Pingsuey, 756 half-chests at Tls. 21½ to 29 per picul; settlements, 25,288 half-chests; reshipments, 1,122 half-chests; stock 99,632 half-chests.

FOOCHOW.—An unimportant business had been transacted. Congou: Settlements 2,450 chests at Tls. 12½ to Tls. 15½, teamen being more willing sellers at a slight concession on previous quotations; arrivals 500 chests. Souchong: No settlements or arrivals. Oolong: Settlements 300 half-chests at Tls. 16½; arrivals nil. Scented Teas: No settlements or arrivals. Flowery Pekoe: No settlements or arrivals. The exports to Great Britain, the Continent of Europe, and the Cape of Good Hope amounted to 58,761,856 lbs., against 50,594,258 lbs. at same time last year. To America, 1,629,232 lbs., against 3,140,598 lbs. To the Colonies, 13,395,547 lbs., against 12,216,531 lbs. last year.

AMOY AND FORMOSA.—The Amoy market continued quiet up to the 10th Dec., when a concession on the part of Teamen of about one dollar per picul induced some business, and 9,300 half-chests had since been settled at the decline mentioned, leaving a stock of 8,500 half-chests. The German barque Taikun had been chartered for New York at £3 3s. per ton, and was loading; her cargo will consist mostly of Formosa Ooloong. A great part of the Teas lately purchased still continued to be shipped off *via* Hong Kong, where the vessels Chinaman and Chattanooga were receiving it at a through rate of £3 per ton of forty feet. At Formosa the season was considered at an end, the export of Formosa Ooloongs to date to the China coast being 3,124,354.

CANTON.—Messrs. Deacon and Co.'s Report says:—There is barely anything to relate about markets since the issue of our last printed circular under date Dec. 7. In consequence of the advanced state of our season for both Tea and Silk, and there being no likelihood of a large business doing in either article, we purpose from now, until the commencement of our next year's yield, to compile our Circular once a month. During the fortnight the only settlements have been Scented Capers, which show no change whatever in price. The commoner class of this description is much mixed with last season's leaf, and in appearance and cup is undesirable.

SILK.

SHANGHAI.—After the departure of the last P. and O. mail some considerable settlements of Tsatlees of well-known chops were made for Europe, which, combined with a good enquiry for Re-reels amongst American buyers, caused a decidedly improved feeling to prevail for a few days, notwithstanding adverse news from the home markets. Buying, however, was restricted to a few, and the market had since relapsed into its previous state of quietude. The settlements for Europe during the fortnight amounted to about 1,500 bales, in which were comprised Gold Lion chop on the basis of Tls. 375 for No. 1; "China-jan" at Tls. 340; "Kin-hock" at Tls. 315; No. 2 "Pagoda" at Tls. 322½, and 100 bales of Yakee chop Nos. 3, 3½, and 4 at Tls. 405, 380, and 355, on joint account with the Chinese. For America, 361 bales, mostly re-reeled Tsatlees and Hainings, had been taken at prices ranging from Tls. 320 to 350, and Tls. 315 to 410 respectively. Settlements for the fortnight, Chinas, 1,800 bales. Total settlements since 1st June, 56,300 bales; against, 1873-74, 46,300 bales; 1872-73, 46,800 bales. Comparative unsold stock, 1874, 11,500 to 12,000 bales; 1873, 5,500 bales; 1872, 3,500 bales.

CANTON.—Business had been almost neglected during the fortnight, and transactions had been confined to a narrow compass, settlements for French mail were 71 bales and since then 90 bales had changed hands. There was no quotable difference in prices ruling previously, and little likelihood of a decline in rates till after Chinese New Year (in February next). No. 4 Tsatlee was still held for $340 to 345 per picul. Stocks had hardly been added to.

At PENANG.—From London, &c., Jan. 25, Benledi (str.); Hector (str.).

At BANGKOK.—From Rio de Janeiro, Dec. 14, Constance.

DEPARTURES.

From SHANGHAI.—For London, Dec. 12, Agamemnon (str.); for New York, Dec. 5, Mikado; 12, Lady Louisa.

From FOOCHOW.—For Falmouth, f.o., Dec. 7, Courier; 8, Schwan; 16, Sea Gull; for New York, Dec. 6, Taitsing.

From HONG KONG and CANTON.—For London, Dec. 18, Mathilda Atheling; 21, Agamemnon (str.); for New York, Dec. 18, Caroline; 21, Hans; for San Francisco, Dec. 19, Frederick Tudor; 21, Ferdinand Bumm.

From MANILA.—None.

From BATAVIA.—For Channel f.o., Dec. 21, Flevo; 22, Stavers; for Holland, Dec. 13, Tromp; 19, Dahlia (str.); 20, Utrecht; 22, Dordrecht; 11, for New York, Dec. 18, Sea Belle; 23, Gijsbertus Hermanus, Mendosa.

From SINGAPORE.—For London, Dec. 8, Sylvia (str.); 19, Alice Ritson; for Liverpool, Dec. 20, Zeeburg; 29, Lochleven Castle.

From PENANG.—For London, Dec. 22, Asterope; 31, Agamemnon (str.).

From BANGKOK.—For Marseilles, Dec. 5, Banda; Rio Grande do Sul, Nov. 24, Johannes.

VESSELS LOADING.

At SHANGHAI.—For London, Glenearn (str.), Achilles (str.), Omba, Laju; for New York, Inverness, Sooloo, Mary Whitridge.

At FOOCHOW.—For London, New York.

At HONG KONG and CANTON.—For London, Kinfauns Castle, Titania, Ardent; for New York, Chinaman, Chatanooga, Alden Besse.

At BATAVIA.—For Holland, Java Packet, Maria, India, Cornelius Smit, Otto, Hampton (str.).

At SINGAPORE.—For London, Celæno, Guiseppina N.; for Marseilles, Nola; for Hamburg, Gustav and Marie; for New York, Marie; for Boston, Olive.

At PENANG.—None.

FREIGHTS AND CHARTERS.

At SHANGHAI.—For London, steamer, £3 10s. per 40 ft., and for sailing vessel, £3 per ton of 50 ft.; for New York, £2 10s. per 40 ft.

At FOOCHOW.—For London, by steamer, £3 per 40 ft., by sailing vessel, nominal; for New York, nominal.

At HONG KONG and CANTON.—For London, general cargo, £3 per ton of 50 ft.; for New York, £3 per ton of 40ft.

At SINGAPORE.—For London, £3 for tapioca and sago, £4 for measurement, £4 10s. to £5 for pepper, and £6 for gutta.

At PENANG.—For London, per steamer, tin, £2 10s., tobacco, £4, measurement goods, £4 10s.

VESSELS PASSED STRAITS OF SUNDA.

Dec. 11, Amsterdam, from Singapore, to Liverpool; 19, Pelikan, from Foochow, to Hamburg.

LATEST TELEGRAMS.

THE DUTCH WAR IN ATCHIN.

THE HAGUE, JAN. 26.—An official despatch has been received from Atchin, dated 15th January, which states that on the 10th the Dutch occupied a point north of Missigit-Longbattah, without sustaining any loss. The sanitary condition of the troops is less favourable than at last advices.

THE MALAY STATES.

SINGAPORE, JAN. 30.—Sir Andrew Clarke has assigned residences to Datu Bandar of Sunghie Ujong in Rochore, and to Rajah Mahmood in Gaylang. The Malay Peninsula is quiet. After the celebration of the Chinese New Year considerably increased activity in trade with the protected Native States is anticipated.

DEATH OF THE EMPEROR OF CHINA.

(TIMES TELEGRAM.)

SHANGHAI, JAN. 25.—The Emperor of China died on the 12th of January. His successor is a Prince of five years of age. Everything is quiet.

(REUTER'S TELEGRAMS.)

PARIS, JAN. 29.—The French Government has received a despatch confirming the news of the death of the Emperor of China. He died, it is stated, from an attack of small-pox, which is making great ravages in Peking, after eleven days' illness. The help of foreign doctors had been persistently refused, and the Emperor was attended only by his chief physician.

SHANGHAI, JAN. 29.—Rumours are current of disturbances at Peking concerning the succession to the Throne.

THE POLITICAL RUPTURE IN SIAM.

SINGAPORE, JAN. 29.—The position of affairs in Siam is unaltered, and anxiety is felt at the persistence of the Second King in remaining at the British Consulate. Both parties are understood to be anxious for the mediation of Sir Andrew Clarke, who, it is presumed, however, cannot act without authority from the British Government.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Jan. 23, at London, from Colombo, Gertrude; 26, off Dungeness, from Java, for Amsterdam, Aria en Betsy; 28, at Liverpool, from Manila, Trinidad; at the Clyde, from Java, Friedeburg, Vigilant; from Akyab, Achilles; at Queenstown, from Ilo Ilo, May Queen; Jan. 4, at Havana, from Saigon, Aurora; 14, at Boston, from Batavia, Zingra; 28, off Falmouth, from Batavia, for Rotterdam, Twe Gezusters; 29, off Deal, from Colombo, &c., Eldorado (str.); 28, at Bristol, from Java, George's Ville; 26, at Brouwershaven, from Batavia, Lichstraal; 22, at Barcelona, from Manila, Nuevo Lantaro; at Boston, from Singapore, Western Chief.

DEPARTURES.—Jan. 28, from London, for Shanghai, Scindia; for Singapore, China, &c., Glenfinlas (str.); Dec. 18, from Callao, for Philippines, Bartolomeo Padre; 28, from Liverpool, for Batavia and Sourabaya, Wein Holenfelde; Jan. 27, from Antwerp, for Hong Kong, Ernest; from Havre, for Saigon, Bluche; 30, from London, for Nicolajefsk, Genitiv; 22, from Liverpool, for Cardiff and Shanghai, Robert Boak.

SPOKEN.—Don Quixote, Manila to New York, Jan. 4 (?), at Anjer; Papa (German barque), Hong Kong to Monte Video, Nov. 14, 22 S., 70 E.; Petronella, Amsterdam to Macassar, Dec. 3, 23 S., lon. 27; B.H.C.B. (Dutch barque), Padang to New York, Nov. 22, 27 S., 6 E.; Indus, Pasaroeang to Falmouth, Dec. 22, 1 S., 21 W.; Cameo (barque), Singapore to London, Dec. 1, 82 S., 14 E; A.M.E., Amsterdam to Sourabaya, Jan. 22, 40 N., 8 W.; Ariadne (North German barque) for Amoy, Jan. 5, 1 N., 25 W.; Cotherstone (barque), Sunderland to Singapore; Rota (Danish ship), Java to Sylt Island, Jan. 15, 25 N., 36 W.; J.L.V.B. (Chingtoo), Sunderland to Anjer, Dec. 24, 6 N., 25 W.; Black Prince, for Japan, Nov. 20, 41 N., 42 W.; Dewsbery (barque), Cardiff to Singapore, standing S.S.E., Paul Thornmann, Newcastle to Java, Jan. 6, 1 N., 27 W.; Agra, Singapore to New York, Nov. 19, 50 N., 91 W.

CASUALTIES.—East London, 15th Dec.—The Nuova Abele, of Genoa, Francisco, from Pasaroeang to London, with sugar, drove ashore 6th, during a gale, about 300 yards W. of the Karlezha; crew saved. The vessel is a total wreck, and none of the cargo will be recovered.

HAMBURG, JAN. 28. — The Venezuela (3-masted schr.), Kroncke, which sailed hence, 21st, for Wladiwostock, was in collision near Freiburg, with the Castor (Germ. brig); she sustained sertous injury to stern, and put back here this morning.

SINGAPORE, JAN. 27.—The Calabar has not arrived.

FALMOUTH, JAN. 28.—The Antipodes, Williams, from Ilo Ilo, with sugar, has arrived here, leaking badly.

The May Queen arrived at Queenstown Jan. 28, from Ilo Ilo, and reports having experienced very severe weather during the passage; on the 24th, in lat. 49 N., lon. 17 W., carried away lower maintopsailyard, and split lower maintopsail.

The Calabar steamship, Captain Hutchison, which left London Nov. 11, Suez Dec. 2, for Singapore and China, has not since been heard of, and the premium at Lloyd's is now 60 to 80 guineas. The Oberon has arrived from Geelong in 74 days.

MISCELLANEOUS.—At St. Helena, Dec. 25, Argonaut, Cameron, from Foochow, for London; 26, Ellen Browse, Runciman, from Padang, for New York; 28, Beautiful Star, Biltos, from Hong Kong, for London; 30, Ville de Bruxelles, from Bangkok, for Marseilles; Jan. 1, Gravenhage, de Vries, from Batavia, for Rotterdam; Louise, Vogelyang, from Java, for Amsterdam; D.M.C.B. (Parke barque), Young, from Batavia, for Falmouth. Off St. Helena, Dec. 26, Jupiter, from Batavia, for Amsterdam; 30, Princess Louise, from Java, for Cuxhaven; 31, Anita, from Amoy, for New York; Jan. 2, Mary Nelson, from Penang, for London; Anna (Austrian barque), from Singapore, for New York; 8, Johanna, en Margarethe, from Batavia, for Rotterdam.

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, JAN. 27.—The P. and O. Company's steamer Teheran arrived at 5, and the mail left at 5.30 P.M. for London.

HEAVY PORTION OF PRESENT INWARD MAIL.—ALEXANDRIA, JAN. 26.—The P. and O. Company's steamer Khedive left Port Said at 3 P.M. for Southampton, where she may be expected on the 7th Feb.

NEXT INWARD MAIL.—SUEZ, JAN. 26.—The Messageries Maritimes steamer Sindh, with the inward French mails from China and Japan, arrived here to-day, and will leave to-morrow for Port Said and Marseilles, at which latter port she may be looked for on the 4th Feb.

INWARD MAIL DUE FEBRUARY 25.—GALLE, JAN. 27.—The Messageries Maritimes steamer Anadyr, with the inward French mails from China and Japan, left here to-day for Suez and Marseilles.

HEAVY PORTION OF LAST INWARD P. AND O. MAIL.—SOUTHAMPTON, JAN. 26.—The P. and O. Company's steamer Peshawur, with the heavy India, China, and Australian mails, arrived here to-day. She brings ninety-eight passengers, specie to the value of £684,765, and 9,279 packages of general cargo. She left Calcutta on the 17th of Dec., Madras the 21st, Galle the 25th, Aden the 3rd of Jan., Suez the 10th, Port Said the 11th, Malta the 15th, and Gibraltar the 20th.

OUTWARD MAIL OF JANUARY 1.—GALLE, JAN. 27.—The Messageries Maritimes steamer Ava, from Marseilles, 3rd inst. left here to-day for Singapore.

OUTWARD MAIL OF JANUARY 15.—SUEZ, JAN. 25.—The Messageries

Digitized by Google

Maritimes steamer Hoogly, from Marseilles 17th inst., left here to-day for Aden.

OUTWARD MAIL OF DECEMBER 11.—SHANGHAI, JAN. 27.—The P. and O. Company's steamer Hydaspes, with the London mails of the 11th December, arrived here to-day.

OUTWARD MAIL OF JANUARY 22.—SUEZ, JAN. 29.—The P. and O. steamers Venetia and Cathay, with the outward India and China mails of 14th-22nd inst., left here to-day for Bombay and Calcutta respectively.

DUTCH OUTWARD MAIL.—PADANG, JAN. 16.—The Netherlands Steamship Company's steamer Prins Hendrick, from Southampton on the 15th ult., arrived to-day.

BIRTHS, DEATHS, AND MARRIAGES.

BIRTHS.

ANNESLEY—On the 23rd Jan., at Devon Cottage, Blackheath-park, Kent, the wife of Henry Arthur Annesley, of a son.

DALLAS—On the 19th Jan., at Dunain, Inverness-shire, the wife of A. G. Dallas, of a son.

FERGUSSON—On the 13th Dec., at Shanghai, the wife of R. Fergusson, of a son.

GUBBAY—On the 22nd Jan., at Eastbury, Watford, Herts, the wife of A. M. Gubbay, of a daughter.

HUNT—On the 26th Jan., at the Admiralty, Whitehall, the wife of the Right Hon. George Ward Hunt, M.P., of a son.

MACTAGGART—On the 28th Jan., at Blackheath-park, the wife of William Mactaggart, of a daughter.

MULLER—On the 14th Dec., at Shanghai, Mrs. F. W. Muller, of a son.

PIKE—On the 25th Jan., at Ellerslie, Sydenham-hill, Mrs. John B. Pike, of a son.

SHARP—On the 26th Jan., at 29, Ladbroke-square, London, the wife of Captain W. Granville Sharp, Madras Staff Corps, of a son.

SPENCE—On the 18th Jan., at Dunedin, N.Z., the wife of Edwin John Spence, late of Yokohama, Japan, of a son.

WHITTALL—On the 20th Dec., at Hong Kong, the wife of the Hon. J. Whittall, of a son.

MARRIAGES.

GRANT—HODGSON.—On the 21st Jan., at Stratford-on-Avon, Cardross Grant, of Swatow, China, to Emily, second daughter of Arthur Hodgson, of Eton Vale, Queensland, and Clopton, Warwickshire.

GREENHAM—PARSONS.—On the 21st Jan., at St. Mary's Church, Bridgewater, by the Rev. Prebendary Bullar, Vicar of Over Stowey, assisted by the Rev. W. G. Fitz-Gerald, Vicar of Bridgwater, and the Rev. A. E. Parsons, Vicar of Haydon, Dorsetshire, uncle of the bride, Richard Greenham, of Trieste, to Elizabeth Ada, only daughter of John Parsons, F.R.C.S., of Bridgwater.

INNES—ROBERTSON.—On the 28th Jan., in Canterbury Cathedral, by the Lord Bishop of Dover, assisted by the Very Rev. the Dean of Canterbury, James Innes, Treasurer to the Government of Sarawak, son of the late Cosmo Innes, of Edinburgh, advocate, to Emily Anne, youngest daughter of the Rev. J. C. Robertson, Canon of Canterbury.

LAKING—MANSELL.—On the 26th Jan., at St. James's Church, Piccadilly, by the Rev. Dr Francis Hessey, Vicar of St. Barnabas, Kensington, Francis Henry Laking, M.D., of Cleveland-row, St. James's, to Emma Ann, second daughter of the late Joseph Mansell, of Addison-road, Kensington.

MITCHELL—CARMAN.—On the 21st Jan., at St. George's, Camberwell, by the Rev. Samuel Smith, Francis Williams, eldest and only surviving son of F. W. Mitchell of Hong Kong, to Lottie, eldest daughter of P. L. Carman, of Camberwell.

SMITH—DAREY.—On the 21st Jan., at St. Giles's Church, Camberwell, by the Rev. Clement Smith, brother of the bridegroom, assisted by the Rev. E. A. Causton, brother-in-law of the bride, Frederick Burgess Smith, of Canton, China, eldest son of the late Henry Smith, of the War-office, to Maria Victoria, youngest surviving daughter of the late Thomas Darey, of The Grove, Camberwell.

DEATHS.

BOYD—On the 16th Jan., at the First Free Manse, Forfar, Mary Tower, widow of the late George Hay Boyd, of Ceylon, and daughter of the late Dr. James Tower, of St. Thomas, West Indies.

BULMER—On the 22nd Jan., at the residence of his son, Munstone House, Hereford, the Rev. Edward Bulmer, Rector of Moreton-on-Lugg, and Senior Minor Canon of Hereford Cathedral, aged 82.

HOWELL—On the 10th Dec., at Shanghai, Mr. R. W. Howell, aged 23 years.

JENKINS—On the 21st Jan., at 131, Highbury New-park, Bessie, the beloved wife of D. J. Jenkins, M.P. Her many friends will kindly accept this intimation.

MACLEAN—On the 2nd Dec., at East London, British Kaffraria, Colonel John Maclean, C.B., late Governor of Natal, aged 64.

SILLAR—On the 22nd Jan., at Cefn-y-Coed, Carnarvon, David John, infant son of John Charles and Jane Ellen Sillar, aged twenty-six days, having survived his mother twenty-one days.

Legal.

THE CHARGE AGAINST A MERCHANT.

Mr. Johann Frederick Heindrick Trautmann, carrying on business in Great St. Helen's, late of Shanghai, again appeared before the Lord Mayor on the 27th ult. upon a summons which charged him, under one of the sections of the Debtors Act, with having obtained goods upon credit from Messrs. Burkett and Co., by false and fraudulent pretences, in connection with an American railway called the Illinois, Missouri, and Texas Railway. The charge was withdrawn, the prosecuting counsel admitting that circumstances which had transpired since the adjournment rendered that course absolutely necessary. All imputations against the defendant were also withdrawn. —Mr. Poland said the defendant had been brought to the Court under a complete misapprehension of the circumstances, and there was not the slightest foundation for the charge.—The Lord Mayor said it was a proper case for enquiry, and he was glad that it had resulted in the defendant entirely freeing himself of the charge made against him. He dismissed the summons.

ADMIRALTY COURT.

COLLISION.—THE "INDUS" V. THE "ABBOTSFORD."

This was a cross cause of damage, the first being brought on behalf of the P. and O. Company, the owners of the *Indus*, against Mr. John Williamson, of Liverpool, the owner of the *Abbotsford*, trading between Antwerp and New York. The facts of the case, as stated on behalf of the *Indus*, were, that that vessel, with a crew of 150 hands, on the 24th of November last, was on a voyage from London to Bombay, bound for Southampton, with a general cargo of merchandise, and shortly before 1.10 A.M. had arrived nearly abreast of Dover. At this time the weather was fine and clear, and there was a full moon; the wind was a light breeze from the N.W., and it was about two hours after high water. The *Indus* was in charge of a duly licensed Trinity Pilot, and was under steam, steering S.W. by W. ½ W. magnetic, and going at the rate of about ten knots an hour. She had her masthead and side lights properly burning, and a good look-out was kept. At this time the *Abbotsford*, which was two or three points before the beam on the starboard side of the *Indus*, and had been for some time previously going in a parallel direction with, and from a quarter to half a mile inshore of her, crossed her bows when right ahead about two miles distant. The *Indus* continued her course. There were several ships inside the *Indus*, which passed outside of all of them, and the *Abbotsford* appeared to be inside of several of them. The lights of the *Abbotsford* at this time were not seen, but her red light was visible a minute or two before the collision, about three points before the starboard beam of the *Indus*. No other light was noticed, and she was heading stem on directly for the bridge of the *Indus*, under a starboard helm. Dover was then about N.N.E. from the *Abbotsford*. The pilot on board the *Indus* seeing there was a danger of collision, ordered "Starboard helm," and then "Hard a-starboard," and her engines were kept on ahead, and the *Abbotsford* was hailed to port her helm and go astern, but the *Abbotsford* with her stem and port bow struck the port quarter of the *Indus*, doing her very considerable damage. The *Indus*, under a starboard helm, had altered about four points to the south, and was heading at the time of the collision about S.S.W. The *Abbotsford* was heading S.W. After the collision she went away astern of the *Indus*, under a starboard helm, and both vessels proceeded on their respective courses. The blow was described to be on the starboard quarter, between thirty and forty feet from the taffrail, and of about twenty-nine feet in length.

It was contended on behalf of the *Indus* that the collision was solely attributable to the negligent navigation of the *Abbotsford* by passing inside the line of ships in the harbour of Dover, and, after she had landed her pilot, coming out under a starboard helm upon the *Indus*, which had never ported her helm, but was under a starboard helm, at the time of the collision. She was the seaward vessel, and the *Abbotsford* could not have come into collision if she had not come round under a starboard helm to cross the bows of the *Indus*. For the defendants it was urged that the *Indus* caused the collision by not keeping out of the way of the *Abbotsford*, and not keeping a proper look-out, she going ten knots an hour and the *Abbotsford* from two to four knots, the two vessels, before the landing of the pilot, having been proceeding in a parallel course as overtaking vessels, it being the duty of the sternmost ship to keep out of the way of the other which was ahead.

Sir R. J. Phillimore, after giving an elaborate summing up of the evidence, pronounced judgment in favour of the P. and O. Company. A question of law as to whether, there being a compulsory pilot on board the *Indus*, his jurisdiction extended beyond Dungeness, was reserved for consideration hereafter.

COLLISION.—THE "CONSUL PLATEN" V. THE "SATSUMA."

This was an action instituted on behalf of Carl Kahl and others, of Stralsund, in Germany, the owners of the *Consul Platen*, a barque of 301 tons English measurement, against Mr. Abbray, the owner of the *Satsuma*, a barque of 356 tons register, belonging to the port of Sunderland. From the evidence, which was of great length, it appeared that the *Satsuma* left London on Dec. 28, bound for Yokohama, with a general cargo. At about 5 P.M. on the following day she was in the English Channel, the South Foreland Light bearing about W.N.W., under all plain sail, close-hauled on the port tack, heading about S.W. by S., and was proceeding at the rate of about five knots through the water. At this time she observed three vessels, two being directly ahead of her, and the third (the *Consul Platen*) about a point on her starboard bow, about a mile off. The *Satsuma* kept her course, watching the *Consul Platen*, which, when close upon her, opened her red light. Thereupon the *Satsuma* ported to pass under the stern of the *Consul Platen*, but, being unable to clear her, the two vessels came into collision, the port side amidships of the *Consul Platen* striking the jibboom and starboard bow of the *Satsuma*, carrying away the jibboom and head gear, and doing other damage. For the plaintiffs it was contended that the *Satsuma* was on the port tack and going free; therefore, it was her duty to look-out which the evidence proved she did not do. It was not denied that the *Consul Platen* had her lights burning, and they ought to have been seen by the *Satsuma*, under whose bows she was beating up Channel, and in stays. She was heading in to the shore on the port tack, and her lights ought to have been seen. The argument for the defendant was that if the *Consul Platen* was on the port track, as alleged, the *Satsuma* never could have seen her red light until she got into stays. The defendant's case was that the vessels were proceeding in the same direction, and that the *Consul Platen* was one point upon the starboard bow of the *Satsuma*, and, therefore, she could not have seen her red light until she came about. The *Consul Platen* had no right to go into stays with the *Satsuma* close to her. The case of the *Consul Platen* was that the *Satsuma* was first seen between a quarter and half a mile, and nearly on the port beam; and if so, and she was still shooting ahead, the *Satsuma* could not have struck her on the starboard side. The truth of the case was that the *Consul Platen* was not careful, and went about, which she ought not to have done; hence the collision.

The decision of the Court was in favour of the plaintiffs, and therefore against the *Satsuma*.

The Correctional Court of Appeal of Paris tried last week a libel case, the defendant in which was Father Perny, formerly Vicar-Apostolic and Superior of a Roman Catholic Mission in China, and now director of the Seminary for Foreign Missions in Paris. The libel complained of was contained in an anonymous pamphlet, published against M. Hervey de St. Denys, who succeeded to the Professorship of Chinese Language and Literature, vacated, in the College de France, by the death of the celebrated Chinese scholar, Stanislas Julien. This pamphlet, the title of which was *Literary Quackery Unmasked* (Le Charlatanisme litteraire devoile) contained the most virulent attacks against the qualifications and character of the new Professor. The

Digitized by Google

authorship of it was traced to Father Perny, who seems to have ambitioned for himself the inheritance of Stanislas Julien. However, he denied it, and tried to fix the responsibility of the libel on another man's shoulders. But the Tribunal de Versailles found him guilty, and sentenced him to six months' imprisonment, besides a fine. On appeal, the Court of Paris, taking into consideration the grievous character of Father Perny and the services rendered by him to Chinese studies, reduced the penalty to two months. Father Perny was one of the hostages in the hands of the Commune, and narrowly escaped from being shot. He was one of the most conspicuous witnesses in the trial of the murderers of the Archbishop of Paris and other hostages.

Naval and Military.

Rear-Admiral Robert Coutart M'Crea died last week at Guernsey, When a lieutenant in 1834 he was appointed to the Zebra. That sloop when on the coast of New Holland, was thrown on her beam ends and compelled to part with her guns; and she was also, when in the Straits of Malacca, struck by lightning and dismasted. In April, 1837, her commander, who had been advanced to post rank on the 10th of January preceding, succeeded in forcibly removing the ex-Rajah of Quedah from his abode at Bruas, on the coast of Perak, in the Straits of Malacca, and carrying him prisoner to Penang. In the performance of this service the boats of the Zebra, under the personal direction of Captain M'Crea, had to sustain a severe action, continued for one hour and a-half, with a brig and a powerful stockade, defended by a numerous band of Malays, more than sixty of whom were killed or wounded. To mark their estimation of Captain M'Crea's conduct, the East India Company presented him with a piece of plate of the value of 100 guineas. He paid off the Zebra in 1838, from which date he ceased to be actively employed.

The death of Brevet-major J. Sweeny, of the Royal Artillery, is announced. He served in the China Expedition of 1840-43, including the capture of Chusan, the attack on Chuenfee, the capture of the Bocca Tigris Forts, the storming and capture of the heights above Canton, of Amoy, Chusan, Chinhae, Ningpo, the repulse of the night attack, the attack and capture of the enemy's entrenched camp on the heights of Segoan, of Chapoo, Woosung, Shanghai, and Chin-Kiang-Foo, and the landing before Nanking.

Colonel A. T. Cadell, R.H.A., has been appointed to the command of the Cannanore Division of the Madras Army, with the rank of brigadier-general, in succession to Brigadier-General Macintire, whose period of service has expired. Colonel Cadell served throughout the China expedition of 1840-42, including the capture of Chusan, attack on Chuenpee, capture of the Bogue forts, attack on heights of Canton, and capture of Shanghai and Chin-Kiang (medal).

A subscription has been opened at Portsmouth, the object of which is to raise a memorial to the officers and men who were killed during the Ashantee campaign, or who died from the effects of the deadly climate. The nature of the memorial, which will depend in a great measure on the amount of subscriptions raised, will be decided at a future date by the committee of management, which is under the presidency of Sir Garnet Wolseley.

Captain Francis William Sullivan, C.B., at present in command of the Resistance, attached to the Channel Squadron, will be flag-captain to Admiral George Elliot, Commander-in-Chief elect at Portsmouth. Mr. James W. M. Ashby, C.B., will retain his appointment as Admiral's Secretary, and Lieutenant Harry F. H. Hallett, at present serving in the Devastation, will be flag-lieutenant. Admiral Elliot will hoist his flag on March 1.

We regret to learn that Navigating Sub-Lieutenant John Lawrence Veitch, of the Hornet, son of Commander Harry T. Veitch, R.N., has died of dysentery at the Naval Hospital, Hong Kong, deeply regretted by his commander and shipmates. This is the second of his sons Commander Veitch has lost whilst in the service of their country, his eldest having died of fever, when lieutenant of the Magpie, in the Persian Gulf.

The Coast Guard Retirement Pension of £30 a-year, vacant by the death of Retired Commander Peter P. Inskip, R.N., on the 3rd inst., has been filled up by the promotion of Retired Commander John Steddy, R.N., from the £20 list; and the vacancy thus created on the £20 list has been awarded to Retired Commander Robert A. Mowbray, R.N.

In consequence of the numerous desertions from the Navy, the Lords of the Admiralty have issued a circular, stating that men who break leave or desert to avoid foreign service shall invariably be sent abroad to their ships after punishment. While awaiting their passage they are to be kept in close confinement.

The defenceless state of many of our foreign naval depots and Government establishments is engaging the attention of the authorities. Arrangements have already been made for the defence by torpedoes of Halifax, Bermuda, and Malta, and the re-armament of Trincomalee is under consideration.

We learn that the Admiralty have it in contemplation—if their lordships have not already actually decided to grant the boon—to allow the privilege of wearing plain clothes to the officers of the Fleet when on shore and not engaged on any duty connected with the Service.

The two captain's naval pensions of £80 a year, vacant by the promotions of Retired Capt. C. R. Johnstone and Retired Capt. Richard B. Beechey on the 1st inst., have been conferred upon Retired Capt. Montagu B. Dunn and Retired Capt. Macleod B. Cockcraft, R.N.

Staff Surgeon Colan, M.D., who served during the China War in 1860, when he was present at the capture of the Taku forts, and was actively employed in the Peiho river, and also in the Ashantee war, has been appointed senior medical officer of the Arctic Expedition.

A representative meeting of the officers, clerks, and workmen in all branches of the Royal Laboratory Department has been held, to make arrangements for erecting, by subscription, a memorial to the late Colonel Milward over his grave in Chatham Cemetery.

The gunboat Rainbow, lent to the Royal Naval Artillery Volunteers for drill purposes, having completed her fittings and taken in her guns, two 68-pounders, at the Royal Arsenal, has been towed up by a steam-tug to her moorings opposite Somerset House.

Captain Henry Frederick Nicholson, 1869, has been selected by the Admiralty to succeed Captain Hugh Campbell as Captain of Greenwich Hospital, on the latter officer commissioning the Undaunted, as flag captain to Rear-Admiral Macdonald.

A large quantity of old war stores returned from the Ashantee Expedition and other useless war *matériel* has been sold by auction at the Royal Arsenal, Woolwich.

A tablet to the memory of Lieut. Eyre, who fell while leading the assault on Coomassie, has been placed in St. Michael's Military Church by his brother officers.

The death of Deputy-Inspector General R. T. C. Scott, who served in the Hastings, flagship, on the China station, is announced. He was ill only three days.

Lieutenant Edward McDougall S. Claremont, 1870, will accompany Rear-Admiral Reginald Macdonald to the East India Station as flag-lieutenant.

It is currently reported that the forthcoming Navy Estimates will show an increase on those of the current year of about a million sterling.

Lieutenant C. S. Blake, Royal Artillery, has been appointed Assistant-Inspector of Warlike Stores at Ceylon.

Miscellaneous.

THE OPIUM TRADE IN CHINA.

(MORNING POST.)

In the accounts of the trade of China lately received from our Consuls at the different treaty ports we notice a large increase in the importation of opium at every one of those places except Chefoo. Opium smuggling is extensively practised at nearly every port, and probably quite as much of the article is passed in illicitly as is entered through the custom-houses. At Canton in 1873 about 823 piculs (nearly 110,000 lbs.) passed through the custom-house, the greater part of which was manufactured at Malwa and the remainder at Patna. At Chefoo the imports from India by the Bombay houses was less than in 1873. At Foochow, Ningpo, and Hankow the imports of the Persian drug shows a considerable falling off. At Foo-chow-foo, where a remarkable diminution in the quantity of the Patna opium imported was noticed in 1873, the increased production of the China-grown drug is assigned as the cause of the slackness of the trade. This may be the case, as in that district the cultivation of the poppy was more successful in 1873 than in 1872. The general opinion of the authors of these reports appears to be that though there is a large increase in the manufacture of opium throughout China it is not likely to influence the demand for the Indian drug to any appreciable extent. The latter is in general used only when mixed with foreign opium, being considered by many as prejudicial to health when smoked by itself. In Newchwang the consumption of the China-grown drug is confined to the very poor people, or to those who reside at a distance from the "towns and main highways of traffic." The opium trade amongst the Chinese producers in its present state is utterly unproductive to the State. In the province of Szechuen, notwithstanding the issue of edicts more or less severe against the manufacture and sale of opium, it is produced in large quantities and almost universally consumed. The drug of native manufacture is smuggled to a great extent, as well as the foreign. In the province of Hankow the amount of smuggling in 1873 was known to have been unusually large. In the province to which Ningpo belongs, throughout the whole of which, as well as in the adjoining prefecture of Tai-chow, the native drug is extensively manufactured. Yet the import trade in foreign opium increased from 5,000 chests in 1870 to 7,500 in 1873. The duties paid to the Chinese Government on this latter quantity came to 220,000 taels, and future years will in all probability see this revenue considerably augmented, for the province, having now recovered from the evils of the Taeping rebellion, is growing in population and prosperity, and the demand for opium is not likely to decline. Our consul at Ningpo looks upon the probability of an increasing sale for the article with considerable interest. At the commencement of these remarks we spoke of the prevalence of smuggling, which is principally attributable "to the heavy imposts laid upon the drug," which are not designed to check the importation of opium, but simply to get the largest duty possible out of it. As long as the opium is in the hands of foreign traders a certain duty (30 taels per picul) only can, under treaty arrangements, be levied upon it; but when once it is in the possession of the subjects of the empire it is no longer in the tariff, and the authorities raise the duty from forty to fifty per cent. A little less greed on their part would remove the great inducement to smuggling, and ensure them a better harvest; but, as the consul at Canton remarks, the celestials "have their own ideas on political economy, and a great objection to try experiments;" consequently they persevere in their mistaken policy, though the folly of it has frequently been pointed out to them, and whilst contraband trade in opium "flourishes to an extent scarcely credible," the Government loses a very considerable amount of revenue annually. In the same way the manner in which the production of the native drug is treated is so absurdly vacillating that a trade which might be immensely profitable fails to be so.

JAPANESE AND FOREIGNERS.

The Japanese (remarks the *Globe*) are not satisfied with the way in

Digitized by Google

which their country is treated by European nations. They especially claim what they call "equality of rights between foreigners and ourselves," meaning either that Japanese abroad ought to be under Japanese laws, or that foreigners in Japan should be judged by these laws. The *Japan Mail* calls attention to a volume of essays in the Japanese language in which this view is upheld. Our contemporary has no difficulty in showing that the claim could not, under existing conditions, be entertained. Suppose Englishmen in Japan were to be placed under Japanese law, would they have complete assurance that their rights would be respected? No one who knows anything of that country would say so. It possesses no settled system of law; tribunals are capricious in their decisions, and not always above influences supposed long ago to have become powerless in Europe. If, therefore, Europeans were placed on a level with the natives almost as much harm would be done to the latter as to the former, for no European in his senses would invest capital in a country in which, at any moment, he might be deprived of the fruits of his enterprise and skill. Neither England nor any other Power desires to discourage a rising State; but before Japan can be treated as an equal she must first become an equal. She must acquire some knowledge of jurisprudence, and obtain judges capable of administering impartially a body of just laws. This is not so easy of attainment as ardent Japanese probably imagine; but there is no reason why the end should not be gained by patient advance in the path Japan has already, although too precipitately, entered. As regards the proposal that Japanese abroad should be tried by their own laws, nothing could be more absurd, and the sooner its absurdity is realised the better. There is no hardship in the existing system, for Japanese in England, Germany, and France are certain to be equitably treated—which is more than can be said of Japanese in Japan. Probably this demand is merely advanced from a vague notion that the honour of Japan requires it, not because it is considered really necessary or likely to be conceded.

FUNERAL OF LADY CARNARVON.

On Saturday, the 30th January, Lady Carnarvon was buried, in the presence of a large and sorrowing assemblage of all classes, and amid manifold tokens of the deepest respect, in the cemetery in Highclere-park, some five miles from the town of Newbury. During the greater part of Friday, and until midday on Saturday the body of the Countess lay in State in the library, which was hung with black cloth. The inscription on the coffin plate ran thus:—"Evelyn Georgina Katherine, wife of Henry Howard Molyneux Herbert, fourth Earl of Carnarvon, only daughter of the sixth Earl of Chesterfield, born 3rd November, 1834; died 25th January, 1875." The late Countess was wholly averse from anything like ostentation, and it was her desire to be laid in the open cemetery, beside the graves of those who had been devoted and faithful in the service of the family. Her last wishes were lovingly obeyed, and her remains rest in a plain brick grave near those of the nurse of the present Earl, and of the housekeeper, Mrs. Laverick, one of the victims of the Shipton accident, who was buried little more than a month ago. At twenty minutes to two o'clock the funeral procession emerged from the Castle, and moved slowly along the winding road to the cemetery in the following order:—The Earl's Newbury tradesmen, the Mayor of Newbury (Mr. Adey), the ex-Mayor (Mr. Hickman), and other members of the Town Council; the principal tenantry, agents, and stewards of Lord Carnarvon; the officiating clergymen, the Rev. E. T. Waters, rector of Highclere, and the Rev. G. Raymond Portal, chaplain to Lord Carnarvon. The pall-bearers were the Rector of Newbury (Rev. James Leslie Randall), the Rev. N. G. Ridley, the Rev. F. C. Gosling, the Rev. L. Owen, the Rev. C. Young, and the Rev. D. Moore. The mourners were the Earl of Carnarvon, the Hon. Alan Herbert, the Hon. Auberon Herbert, Lady Gwendolen Herbert, the Earl and Countess of Portsmouth, Miss Ogilvy, the Hon. and Rev. Canon Forester, Colonel the Hon. H. Forester, Viscount Lymington, General the Hon. Robert Curzon, Lord Newport, the Earl of Ducie, Earl Beauchamp, the Earl of Donoughmore, Lord Londesborough, Lord John Manners, Sir Robert Peel, M.P., Hon. J. K. Howard, Mr. William Chatteris, Mr. W. Kingsmill, Mr. W. Fox, Mr. W. B. Beach, M.P., &c. The servants of the household followed. Arrived at the gates of the cemetery the tradesmen and tenantry formed a close line on each side of the roadway, and the body was borne into the mortuary chapel, followed by the mourners. From the chapel to the grave was but a few steps, and here Lord Carnarvon deposited upon the coffin a wreath of camellias sent by the Countess of Chesterfield, who had been in close attendance upon her daughter throughout her illness. His Lordship also placed upon the coffin other floral designs from friends of the late Countess. The bells of the Newbury churches tolled, and the tradesmen partly closed their places of business in the afternoon. On Sunday morning, at the Chapel Royal, Savoy, the Rev. Henry White, the chaplain, in the course of his sermon, made special reference to the late Lady Carnarvon, who for many years had been a member of the congregation.

LAUNCHES.

On the 21st ultimo Mr. Kinlock, of Yarmouth, launched a vessel from his yard named the Lord Macduff, owned by Captain M'Donald. Between perpendiculars she is 160 feet, her extreme breadth is 30 1-10 feet, the depth of the hold is 17 9-10 feet. She is to be employed in the Eastern trade—chiefly, in all probability, in traffic with China.

On the 27th ultimo Messrs. Caird and Co. launched from their shipbuilding-yard at Greenock a screw steamer of the following dimensions:—Length, 165 feet; breadth (moulded), 22 feet; depth of hold, 11 feet; tonnage, about 391 B.O.M. The vessel is built for the Burmah Steam Navigation Company, and is the third constructed for that company by the same firm. The vessel was named the Pyah Pekhet.

SHIPOWNERS AND LEGISLATION.—A meeting of London shipowners, called by Messrs. Donald Currie, Money Wigram, and Green, was held at the offices of the first-named firm, to consider the course which shipowners ought to adopt in view of probable legislation in the coming Session upon the subject of merchant shipping. The firms represented in the room were Messrs. Anderson and Anderson, Shaw and Maxton, Rankin, Gilmour, Strang and Co., the P. and O. Steam Packet Company, Devitt and Moore, G. Marshall and Sons, G. Thompson, jun., H. and R. Green, Donald Currie and Co., and Money Wigram and Co. Messrs. Daniells and Co., Messrs. Blythe and Green, the Royal Mail Steam Packet Company and others had expressed a general adhesion to the course which was ultimately recommended. Mr. Donald Currie, having been asked to take the chair, proposed the following resolution:—"That this meeting of shipowners in the City of London desires to express to the President of the Board of Trade its conviction of the necessity for the introduction in the ensuing Session of Parliament of a wise and comprehensive Government measure affecting British shipping. It recognises the necessity for regulations to prevent undue risk to life at sea, to procure a better supply of seamen, and their proper treatment and control, and generally for such legislation as will secure these objects without undue restrictions on trade."

COLONEL GORDON'S EXPEDITION.—Much satisfaction will be felt by those who either heard or read the report of the address delivered by the Rev. H. Waller at the Society of Arts. There are not a few who have continued to entertain doubts as to the *real* object which the Khedive of Egypt has had in view in sending out such expeditions as those headed by Sir H. Baker and Colonel Gordon. Not a few also had grave doubts as to the honest purpose of the Sultan of Zanzibar in professing to oppose slavery. Mr. Waller, however, was in a position to remove all doubts, and we are assured not only of the honesty of purpose of both rulers, but, what is better, of practical results which give us reason to hope that the slave-trade in that portion of Africa has received its death-blow. Colonel Gordon has won over one whole tribe, through whose instrumentality 1,600 slaves have been saved from the "market." The Sultan of Zanzibar will be the greatest loser by the cessation of the traffic; but he is represented to be "hand-and-glove" with our representatives in putting a stop to it. It is sad, however, to learn that a supposed civilised and Christian State has to acknowledge as citizens men of whom it can be said:—"The Portuguese have been the greatest slave-dealers on that [the Zanzibar] part of the coast; and the traffic in slaves with them is now more active than it has been for years." And these are called Christians!

THE ORDER OF ST. MICHAEL AND ST. GEORGE.—The Queen has appointed Sir Hercules George Robert Robinson, K.C.M.G., now Governor and Commander-in-Chief of the Colony of New South Wales and its dependencies, to be an Ordinary Member of the First Class, or Knights Grand Cross of the Order of St. Michael and St. George, and Mr. William Edward Frere, lately senior member of two commission of inquiry into the condition of the Indian labours in the colony of British Guiana and the Island of Mauritius, to be an Ordinary Member of the Third Class, or Companions of the said most distinguished Order.

THE untimely death of the Emperor of China is believed by the *Mémorial Diplomatique* to be the result of some dark plot, hatched within the walls of the Imperial Palace. The same paper remarks that Western interests are not likely to suffer from the event, as the late Sovereign was thoroughly hostile to foreigners. In that respect he was in strong opposition with his uncle, Prince Kung, the former Regent, who is very friendly to Europeans and European progress, and whose life, on that account, would be in danger should the retrograde party get now the upper hand in the government of China.

WITH reference to the death of the Emperor of China, Mr. C. R. Low writes to *The Times* to state that the "Almanach de Gotha" is mistaken in its account of his age, he having been born in the year 1850, and not 1856. Mr. R. K. Douglas writes in reply, stating that the young Emperor was, according to our system of calculation, between five and six years old in 1861, and it is fair therefore to assume that he was born in 1856, as stated in the "Almanach de Gotha."

M. FERDINAND DE LESSEPS has addressed to the Czar a long letter on his scheme for a railway to India. The communication was referred to a special commission, including several of the Ministers and General Kaufmann, and this body has decided, almost unanimously, that the project is impracticable, and that, in the present state of commercial relations with Central Asia, it is even hardly worthy of consideration.

MR. THOMSON delivered a lecture at the rooms of the Society of Architects, Conduit-street, on "China and the Far East." Some photographs brought home by Mr. Thomson were shown by the lime-light, which made the lecture both interesting and amusing.

THE Eastern and Australian Mail Company's steamer *Normanby* arrived at Singapore from Brisbane on the 27th ult. The company's steamer *Singapore* left Singapore on the same day for Hong Kong.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, JAN. 27.

Political news since my last letter has been very scanty. The members of the Second Chamber are still in recess, and it is not yet known when they will re-assemble.

The King has taken the initiative in the movement to erect a memorial to those who lost their lives in the Atchin expeditions. He has contributed a large sum, and has invited Jhr. T. V. A. de Stuers to endeavour to realise the project. Of course it will be successful, and perhaps it will induce young men to join the East India Army. Up to this moment they seem to be of opinion that it does not pay.

You will remember that a fortnight ago a gold cup was presented, with much ceremony, to our illustrious general, Van Swieten. This proceeding was generally sharply criticised, and it created much surprise when a statement was made that Lieut.-General G. M. Verspyck, the sub-commander of the second Atchinese expedition, had consented to accept a sword of honour, with an inscription. The story, however, proved to be a hoax.

I have several times alluded to the trouble about the statue of the late Mr. Thorbecke, which could not be erected in the Hague. As a curiosity I may add that some schoolboys have forwarded an address to the King, protesting against the behaviour of the Minister Heemskerk in this matter.

The Grand Cross of the Leopold Order has been conferred by the King of the Belgians on Mr. Van Lansberge, the new Governor-General of Java.

JOINT-STOCK BANK DIVIDENDS, 1874.

The dividends declared of the following Banks are as follows :—

	Per Ct.	Per Ct.		Per Ct.	
London and Westminst. r...	11	making 21 for the year, against		22	in 1873
London Joint-Stock ...	11	,,	21	,, ,,	22½ ,,
Union	7½	,,	15	,, ,,	15 and 2½ bonus ,,
City...	5	,,	10	,, ,,	10 ,,
Imperial	4	,,	8	,, ,,	8 ,,
Alliance	4	,,	8	,, ,,	7½ ,,
Consolidated	5	,,	10	,, ,,	9½ ,,
Metropolitan	4	,,	8	,, ,,	6½ ,,
London and South-Westrn.	4	,,	8	,, ,,	6½ ,,
City and County	3½	,,	7	,, ,,	—

The decline of dividends is thus confined to the largest and most prosperous banks, and forms, after all, but an infinitesimal part of their great profits ; while, on the other hand, in the case of the smaller banks, the dividends have either been as good as in 1873, or have advanced. The experience of the Discount Companies has been much the same as that of the Joint-Stock Banks, and Mr. Chaytor, chairman of the National Discount Company, was saying to his company on the 20th inst. much the same as Mr. Sellar, who occupied the chair at the meeting of the London and Westminster, was holding forth to his constituents at the same hour. "The increase in the Bank rate," Mr. Sellar remarked, "from 2½ in July to 6 per cent. in December, had not been caused by the demands of commerce, but by the demand for gold from France and Germany. This was the principal cause of the decline of the dividend of the Bank, because there were large deposits on which they had to pay a high rate of interest, whilst the power of investing the money was less." Mr. Chaytor had a precisely similar reflection to offer :—"The praiseworthy efforts," he said, "of the Bank of France to resume specie payments, and the German coinage, had impaired the amount of specie in the Bank of England, and money for these purposes had been more valuable than money employed in commerce. Since the termination of the Franco-German War, a great number of powerful establishments connected with all the principal foreign countries had formed their head-quarters in London, and, holding as they did a large amount of securities, had the power to press them on the London market when a demand came at home, and so gold was taken away from this country. The drafts of bullion from these causes, taken necessarily (though not directly) from the Bank of England, had had the effect of driving up the rate of the Bank for the purpose of protecting the position ; and the result was, that whilst this and similar companies had to allow a high interest on deposits, yet the rate of money for commercial purposes and for the discount of bills was of a much inferior value." There can be no doubt that this is the exact situation, and we think it is a situation not likely soon to be materially changed. The London market must be prepared to give out gold when, in the course of transactions, gold is demanded for foreign purposes.

The Times on this subject says :—

Nowadays 10 per cent. is counted only the first step forward, and banks below that standard, as well as some others, appear to sacrifice reserves and to pinch on every hand in order to give big and ever bigger dividends. Some banks err in this way more flagrantly than others, but the sin is more or less one of all the banks—great or small. The earned reserves of even the greatest of them are not what they ought to be in view of the business they often do, the risk they run, and the liabilities which they have. This question of reserve funds is, indeed, one of very much wider significance than at first sight may appear, because their augmentation forms probably the ultimate channel through which something like stability will be given—if it ever be given—to the rates for money in the discount market. Under the present system of banking in England—a system not likely to be speedily changed—it is only through its reserve fund that a bank can increase without direct loss that hoard of unemployed capital which is essential to sound business. The Joint-Stock Banks of this country make their large dividends by using their deposits. Their paid-up capital is comparatively quite insignificant, and it is by borrowing enormous sums from the public at a cheap and lending them at a dearer rate that they earn what seem at first sight such huge and disproportionate profits. But, having only small capitals and borrowing thus largely, it is evident that they cannot afford to let much of their money lie idle. Only the Bank of England, which gives nothing for what is lent it, and perhaps some old-fashioned private banks, can afford to keep great stores of unused cash by them. It would almost ruin some banks to try to keep any but the narrowest margin. There is a certain competition, too, among them for the money of the public, so that the price given for it is often close upon what is got for relending, and this increases the difficulty. A kind of prescription is current among money-dealers that the rate given for deposits must be so much and no more below the Bank of England *minimum* than will allow a fractional profit ; and when, as has happened within the last six months, that *minimum* is fictitiously high for the business doing, banks and lending institutions generally may have a hard task to get the prices they pay. This tempts them into taking dangerous business for the sake of the extra profit, and all these things together make it almost impossible for a Joint-Stock Bank to keep a store against a pinch.

If this be so, it follows clearly that no possible re-adjustment of the currency could remedy the uneasy feeling that the want of such astore is perpetually producing. What matters it, supposing there should be a national currency of unlimited paper down to notes for 5s., if all that paper currency is in use—all, at least, that the banks can scrape together ? There will then be no greater store of money to meet a time of difficulty than there is now. Unlimited paper would mean merely lowering of values, not greater security; that can only be produced by large reserves of unused loanable capital, which paper is not. The Money Market would be just as uneasy when bullion went away in small sums, supposing we had a great national paper currency to-morrow, as it is now so long as all available resources that lending institutions can lay hands on are kept in use. There can be nothing clearer than that fact, and, therefore, the remedy for the present undoubtedly unsatisfactory state of the English Money Market is not to be found in tinkering the paper currency. That currency may not be perfect, bu it is, at least, safe, which it was not before 1844, and its imperfection have little or nothing to do with the troubles of the Money Market. I all the gold kept in Scotland against the excess note issue there, and all the gold in the vaults of the Bank of England held as security for the convertibility of its notes, were available for international trade tomorrow, it would be all lent, sold, employed in some fashion, to promote new ventures and widen commerce, until we should stand practically where we were before, except that values might have for a time declined.

It comes back to this, therefore,—that if the Money Market is to be steadier and easier than it as been the banks and discount houses must lay by against a rainy day just as other people do ; and the one way for them to effect this is by means of their reserve funds—their surplus savings. These savings are the only part of the capital they work with that costs them nothing. The larger they are the easier will it be for them to keep much money idle. It is impossible now to get rid of the habit of paying for deposits, although the London and Westminster sets a good example, as its high standing enables it to do, in paying less than many institutions do ; and these deposits must be employed, however little be given for them. The only practical means for getting large stores of unused money, therefore, seems to be to pay smaller dividends and lay by larger slices of the yearly profits. This race for high dividends is one of the most pernicious features of modern English banking, and is more than anything else the cause of the frequent disturbances from which our Money Market suffers ; and it is a race that benefits comparatively very few. Some original or early shareholders get larger returns on their investments, but, as the subjoined table will show, the great mass of buyers in the market of to-day get but very ordinary dividends on their money. So eager are people for investments in good banks that prices of shares are forced up until they yield very little, if anything, more than, say, Indian or Colonial Government stocks. In fact, the higher the dividends the less they are likely to yield to present buyers. This, it will be urged, is one great preventive against banks retracing their steps. If they declared lower dividends they would depreciate the value of their shares and cause the public to lose money. There is force in the objection, but only if it be supposed that the saving we advocate is necessarily accompanied by decreased dividends in future. To us it does not at all seem so, for, as has been said, the evil of banks is that they are racing after higher and ever higher dividends. The question really comes to be—Should banks pursue this course of continually augmented dividend-paying, or should they pause and seek to lay by at a greater rate than now ? They need not go back, but should they go on ? Only one answer can be given to that question by those who deprecate the continual fluctuations of the Money Market. It would be the soundest policy, and, in the end, the most profitable, to cease this scramble after extravagant dividends, and be content to save as well as spend. The first aim should be to lay by, after dividends of an ordinary kind have been realised. Before so great a change in banking habits can be carried out, however, a change in public sentiment is necessary. Just now the public are more to blame for the fever in the Money Market and the straining of the banks after profits than the banks are themselves. We are assured that it is no uncommon thing for a bank to lose some of its customers should it pay less any year than the year before by a half per cent., or fail to show the desired increase. High dividends are, therefore, bids for more customers, and necessary conditions of keeping those a bank already possesses. Under these circumstances it is quite natural that officials should feel strong anxiety never to fall behind, but rather, if possible, to score a mark higher each successive year, and under such a system we can well understand why a decline of one per cent. in a leading bank, with dividends at twenty or twenty-two, should give cause for lamentation and condolence.

The remedy lies, therefore, in the end, with the public. When moneyed men and business people come to see that in the long run they lose more than they gain by using up their resourses to the very utmost, and by compelling the banks to do so as well, in the fashion now prevalent, they will support the banks in a thriftier, more rational line of policy. Until they do this, the question of reserves against panics and all the evils of a bare Money Market will exist as they do now, discuss and doctor as we may. The evil lies in the habits of modern business and in the immoderate desires of modern investors, and no currency panacea can do any good till these radical causes of harm are removed. We have followed a short-sighted policy in this matter, and in consequence it is difficult for the banks to keep a reserve of £8,000,000 of unemployed money in the Bank of England ; they do it grudgingly, and, as they say, at a loss. But had the banks and discount houses on the list given below even placed a third more annually to their reserves, which now amount to only £3,650,788, they might by this time have been able to keep 10 or 12 millions idle without suffering from it. Some of these banks could not have done this, perhaps, with ease : but others could, and neither shareholders nor they would to-day have been the losers.

The subjoined table shows the position of some of the principal Banks and Discount Houses in London as to Dividend, Reserve, &c.:—

Name.	Paid-up Capital.	Reserve Fund.	Dividend per cent. per annum.	Yield per cent. at present price.
Alliance...	£800,000 ...	£180,000 ...	8 ...	£6 0 9
City	600,000 ...	170,000 ...	10 ...	7 2 10
Consolidated	800,000 ...	112,000 ...	10 ...	5 12 3
General Credit and Discount...	1,500,000 ...	200,000 ...	10 ...	7 17 11
London Joint-Stock ...	1,200,000 ...	514,989 ...	21 ...	6 0 0
London and South-Western	166,180 ...	9,000 ...	8 ...	7 2 3
London and Westminster	2,000,000 ...	1,014,799 ...	21 ...	5 9 1
National	1,500,000 ...	500,000 ...	11 ...	4 17 1
National Discount ...	800,000 ...	500,000 ...	14½...	6 18 1
Union	1,395,000 ...	450,000 ...	17½...	5 19 3

The London & China Telegraph.

LONDON: MONDAY, FEB. 1, 1875.

DEATH OF THE EMPEROR OF CHINA.

IT was only on January 21 that news reached this country from Shanghai to the effect that the health of the Emperor of CHINA was in a critical condition, and now, without any further preparation, we are told that the eighth monarch of the Ta Ching Dynasty has been gathered to his fathers. This event, which, in accordance with Chinese ceremonial usage, will plunge the whole Empire into mourning as if for a parent, took place at Peking on January 12. Although the youth, who has—to quote the usual Chinese phraseology,—ascended on the dragon to be a guest on high (for in China an Emperor never *dies*), has been on the throne for thirteen years and five months, there is not much to be said of his career and his reign, for with one solitary exception it has been marked by no event of striking importance. This monarch, who has reigned under the style of TUNG-CHIH, succeeded to the Dragon Throne at the early age of seven, on the death of his father in August, 1861, and for some years but little was heard of him, except that his education was being carefully attended to under the eyes of the Empresses Dowager. His name first came into prominent notice on the occasion of his marriage, October 16, 1872. On the 23rd of February in the following year he formally assumed the reins of power, and on the 29th of June, 1873, occurred the event by which his brief reign will be best remembered in the future; we allude, of course, to the reception of the foreign Envoys by the Son of Heaven without the observance of any humiliating ceremony on their part. Of the character of the young EMPEROR little is known, but, judging from some rumours which reached us about a year since, there is reason to fear that he was given to habits of dissipation, and it is possible, though we hope we may be wrong, that to this cause, as in the case of his father, may be attributed his premature decease. That his nature was petulant and still childish there can be no doubt from the foolish way in which he treated his uncle and best friend, the Prince of KUNG, in September last. His intellect was apparently not of a high order, for at the time of his marriage it was currently said of him by the Chinese at the capital that he was dull and stupid, and very backward in his literary attainments. Although he had exercised the supreme power for almost two years, he has done nothing for which foreigners have to be grateful, except in yielding to the force of circumstances in the matter of the Audience. With regard to his successor the telegraphic news is conflicting; the Peking telegram of Jan. 13 says, "Heir uncertain;" while the Shanghai correspondent of *The Times* telegraphs, under date of Jan. 26, that the "successor is a Prince of five years of age," but does not mention who he is. Under these circumstances, and as the EMPEROR is supposed to have the absolute disposal of the succession, it would be idle to hazard a guess as to who is now the occupant of the Dragon Throne, and we must wait patiently for further and more certain intelligence, though of this fact there can be little doubt, viz., that the Vermilion Pencil will be again put into commission for some years to come.

THE negotiations for the formation of a company to lay down a railway between Saigon and Camboja have not yet resulted in anything definite.

THE DISTURBANCES IN SIAM.

DISPUTES for the succession, and the intrigues of rival factions for supreme power, have been the curse of nations since civilisation began. What bloody deeds have not the armies of contending rajas wrought in India in bygone days, what throes of anguish have for months past convulsed unhappy Spain as the followers of DON CARLOS or the standards of Madrid were alternately successful? In France, the strife of parties, each persistently setting one selfish end above every other interest, has envenomed society, brought the Government to a dead lock, and made the political liberty of the country over to the perilous keeping of a single soldier. And now, from remote Siam, we hear of disturbances—born, if we mistake not, of the same fruitful mother of troubles—which have driven the one Monarch in fright from his palace, and transformed the amiable boy who wears the First King's crown into the pitiful exemplar of a jealous Asiatic despot baulked in his unworthy ends. The First and Second Kings have fallen out; this much is undoubtedly true. We also know that the subordinate Monarch, on an attempt being made to arrest him, fled to the British Consulate; and there Mr. NEWMAN doubtless discovered him seated under the flagstaff, like HANNIBAL in old time, "a great and wondrous refugee." Now how—in the absence of precise information—are we to unriddle this perplexing and unexpected intelligence? Whence the origin of the strife? The origin, if we mistake not, is to be traced to a dispute as to the succession in the event of the major King's demise.

The young Monarch—he is but twenty-two years of age—is alleged to be consumptive; anyhow his health for some time past has been so critical that the gravest apprehensions are entertained as to the probable duration of his reign. He has several younger brothers, all of them still minors, and one son a few months old. Now if there be any meaning at all in the institution of a second King we take it to be this, that on a vacancy to the supreme throne occurring there should be some successor ready, marked out by a special title and by previous solemn consecration, to take the deceased Monarch's place. Our own plan is to constitute the maxim that "the king can never die," one of the cardinal doctrines of our constitutional law; and by statute to tie up the succession to the Crown in one family strictly in tail; but in Asia a queen regnant is unknown, and the Brahminical system from old times has been either for a reigning sovereign to make one of his sons secure of the succession by getting him inaugurated as a Yuva-raja (junior king), or else a major king and a junior king,—a king regnant and a king elect,—have been crowned and enthroned with simultaneous though independent rites. This is what we see in the two Kings of Siam. The Siamese monarchy does not necessarily devolve in the strict line of hereditary descent. The succession is indeed confined to the members of a single family, both in the case of the First King and the case of the Second King; but when a vacancy to the throne occurs the Senabodi, or Supreme Council, meet and decide as to the particular successor. Having thus in secret council settled who is to be the man, they go through the ceremony of submitting the chosen prince's name to the assembled host of general nobility, and if they approve also, the succession is settled. In an autograph letter written by the present supreme Monarch, shortly after his accession, he says, "I have the pleasure to mention that our Go-"vernment in Council has elected me to assume the reins "of government, notwithstanding my juvenility." A declaration against interest, to use a legal phrase, that the control over the succession in Siam rests with the Council of State. The present sovereign, however, as we understand it, has lately abolished the old Senabodi or Supreme Council, formed of the six most powerful nobles, and replaced it by a somewhat youthful body of Privy Councillors to the number of fifty or thereabouts. Now it is—we fear—under the influence of some of the leaders in this Privy Council, who dread lest their own power, and the advantages which power brings with it, might pass from them if their sovereign died and the sceptre changed hands, that an attempt has been made to induce the Second King to give up his reversionary claim to the supreme throne. Of course the Second King would not agree; he would hardly be expected to sacrifice the interests of his own family; and, besides this, he might well

Digitized by Google

plead that both he and his Royal colleague would be overstepping their constitutional functions if they attempted to alter the line of succession, and to take from the Supreme Council the prerogative which has been very properly entrusted to its control. This would be the natural course of the dispute; and if we have given a correct interpretation of the case, if the First King and his party have been trying by pressure on the Second King to retain the supreme throne in the former monarch's own family, then we cannot but hold that an unwise and reprehensible step was taken when by a violent arrest it was endeavoured to extort a concession which force of argument had failed to secure.

Siam is a small country, of but little interest to the world at large. Hitherto, like a good boy, it has always been treated with special leniency and indulgence, and *its true interest lies in keeping quiet*, without giving outsiders trouble, or requiring Germans, French, English, and Americans to hurry up gun-boats to the Menam river for the protection of foreign residents. During the recent changes in the organisation and constitution of the Government the old Regent and his family seem to have been somewhat under a cloud. They have probably purposely held aloof from the innovations. As for the Regent, he is known to have been away in the interior when the actual disturbances began, and he perhaps hopes that when, for lack of experienced heads, matters have got to a dead-lock, he and his friends will descend in triumph on the stage as the saviours of the country, and, as the phrase goes, "put things through." This may be the ex-Regent's "little game," and if it is, the Major King and his advisers by an unsuccessful appeal to force have played up to their opponents' hands. Actual bloodshed, as we said in a previous issue, we do not anticipate, though if the Siamese once get to fighting they are as cruel as they are uncontrollable, and we might hear of dreadful atrocities. He will therefore have much to answer for who shall strike the first blow. Disturbances and disquietude, of course, frighten away capital, and do much harm to trade; this makes us all the more anxious for peaceful news; but besides, there might be real danger if the Chinese, for their own ends—for plunder, in fact—banded together in their secret societies and began to riot. There are 30,000 Chinamen in Bangkok, perhaps more, and they occupy some of the most difficult and important localities in the capital. They are not without leaders of their own, too; they are always on the watch for opportunities to get the upper hand, and a regular Chinese outbreak would on every ground be a real disaster for the Siamese.

Since the above was in type we understand that Lord DERBY has intimated that no steps will be taken by our Government in support of the claims of the Second King. The despatch of the gunboat from Singapore was simply for the protection of British subjects and property in the event of any danger growing out of the affair, but up to this moment nothing further has been communicated. This confirms the views we expressed on receipt of the first telegram. With the suspicious nature of all Orientals the First or reigning King was apprehensive that Mr. KNOX, our Consul General, would influence the conduct of our Government. Fortunately the private views and wishes of individuals do not sway the Councils of our Foreign-office.

THE "WAR" IN ATCHIN.

A FRENCH general, spectator of the charge at Balaclava, remarked with *sang-froid* to a bystander, "c'est magnifique mais ce n'est pas la guerre." Of the position till recently of the Dutch in Atchin we cannot even say so much as the Frenchman did of our own cavalry escapade. It has been neither "magnifique," nor in any proper sense "la guerre." War we must indeed call it for want of any more convenient term, but it was in reality a sort of military occupation, and may be compared to a disease in the human body which has passed into the chronic phase. The pains and peril of the acute attack are over, but the sufferer has reached a stage in his malady which no drugs can permanently cure. His constitution is being slowly undermined, and he is doomed to sink inch by inch to his grave. We have been expecting that a melancholy fate such as this is reserved for the Atchinese; they have lost their independence, and it is not likely, in spite of all their efforts, that they will be able to retrieve their position. Sooner or later the end must come; but several items of intelligence have been recently published which are a little more cheering than those that for some months back have simply described the ill-health of the Dutch troops in the Kraton, or the submission of some petty potentate on the sea-coasts. Among other things we learn that Mr. LANSBERGE has succeeded Mr. LOUDON as Governor-General of the Dutch East Indies, and a more important point still is the rumour, *which comes to us from Holland*, that the English Cabinet has notified the authorities at the Hague that affairs in Atchin cannot be allowed any longer to remain as they are. Of course there is no doubt of the accuracy of the first announcement; there is, indeed, a great outcry against Mr. LANSBERGE, partly due to religious prejudices (for he happens to be an Ultramontane), and partly because he is not known to be anything more than an experienced diplomatist; but for our part we fail to see that Ultramontanism has much concern with the government of twenty million Mahommedans; and if success in diplomacy is not a recommendation for a Colonial Governor's post we should like to know what is. Perhaps the dissatisfied Dutch would like to give away the berth by competitive examination?

The reported interference of the English Foreign-office sounds too good to be true. We are the most powerful nation perhaps in the whole world, but certainly in the East; our commercial relations are very seriously affected by the never-ending hostilities in Sumatra; our pepper-markets are starved, and our carrying trade, great and small, in many respects is materially interfered with. Who, then, has so good a right to make their voice heard as we have? And this truth comes home with all the greater force to us when we consider that it was we ourselves who made over Atchin to the Dutch. We it was who, in defiance of a long-established treaty, handed over the Sultan and his subjects *nolentes volentes*, to the tender mercies of the Hague. Hence, not merely on the grounds of commercial expediency—though these are of great importance—but in tardy reparation of the indefensible policy we pursued, we shall only have done what common sense dictates if we have really urged Holland to make some haste in settling her differences with Atchin. It is not impossible when Parliament reassembles that some papers relating to this question may be laid upon the tables of the Legislature. We should hail their appearance gladly; Lord DERBY will have gone a long way towards redeeming the disastrous policy of the late Administration if he has really recognised the right of Great Britain to protect the interests of her subjects and her commerce in the East. The standing point of Lord CLARENDON and his successor was a most detrimental one, wholly misunderstood by the Chinese, but for all that taken advantage of, not in China only, but wherever in Asiatic waters there was a Power whose own interests differed from ours. Let us hope that the tide has turned. If England is seen to be something more than a passive geographical expression by those various authorities who are in power in the East, our merchants will find the current with them in their commercial transactions, instead of having, as for the past seven years, to pull steadily against the stream, to steer their ships in the teeth of the wind. However this may be, there is good ground for believing that the Dutch have a more vigorous policy now in view.

WHEN noticing the Order in Council constituting Shanghai a port of registry we observed in regard to the clause on certificates of mortgage or sale that it should extend to Japanese ports. We are informed that this provision does extend to any port out of the country in which the port is situate under the Merchant Shipping Act, 1854, but sales under these certificates could not be effected by them in China, the country in which the port of registry is situated, unless specially provided for in the Order. Hence the object of the clause. In reference to the powers of the Minister in Japan, the port of registry (Shanghai) being situate in China the Minister in Japan has no jurisdiction over the Registrar, but care has been taken to give full

Digitized by Google

power to the Minister in China to deal with any case concerning a ship registered at Shanghai. The *Morning Post*, in noticing this appointment, says :—"For a considerable "period British shipowners resident in China and Japan "have been subjected to great inconvenience and uncer- "tainty in the matter of registering their title, and by "parity the nationality of the ships they became possessed "of. This blot has at last been removed by the constitu- "tion of Shanghai as a port of registry for British ships, "and we find by the *London Gazette* that Mr. W. Handyside "Tapp, with whom the project originated, and who for many "years has urged the desirability of adopting this important "measure, has been appointed the Registrar of Shipping at "Shanghai. Mr. Tapp has been over ten years in the Con- "sular service at Shanghai, and has, as may be expected, an "intimate knowledge of the local requirements, besides "being thoroughly conversant with the various complicated "phases of mercantile marine law, the procedure of re- "gistry, and the other duties connected with merchant "shipping."

In the course of this month shipments of about 200 tons of bronze coinage will be made to Bangkok on behalf of the Siamese Government. The coins, which have been made by Messrs. Watt and Co., Birmingham, are very neat; the larger represents 1-32 of a tical, and corresponds in size and value to our penny. The smaller coins are halves and quarters. The introduction of this coinage, which will be an immense boon to the Siamese, in place of the paper currency, is due to Mr. Mason, the Consul in London.

A decree of the President of the French Republic, dated 21st ult., establishes a bank of issue, loan, and discount for the French colonies of Cochin China and India, under the style of "Bank of Indo-China." The privilege is conceded for twenty years to a joint-stock company. The Bank of Indo-China is empowered to make advances on the security of merchandise and crops, as under the law of 24th June last on colonial banks, and submitted to the control of the commission on colonial banks instituted by the said law.

A pamphlet has been issued to members of Parliament and others on the "Hong Kong Blockade Question," with a circular from Mr. Granville Sharp, who acted as secretary to the meeting held at the City Hall in Hong Kong. This subject is still under the consideration of Government.

The Royal Geographical Society and the Astronomical Society have decided that they will not despatch a special mission to Bangkok to observe the sun's eclipse next April, but will co-operate with the Royal Society in their mission.

The Russian Councillor of State and Chamberlain, M. Charles de Struve, Charge d'Affaires and Consul-General of Russia in Japan, has been appointed resident minister.

Captain von Eisendecker has been appointed German Minister-Resident and Consul-General in Japan.

Literature.

Report of a Journey into the Interior of Formosa. By T. L. Bullock, of H.M.'s Consular Service.

Embedded in the last batch of Consular Reports from China we find an interesting account by Mr. Bullock of a journey which he made into the interior of Formosa in the latter part of 1873, in company with the Rev. W. Campbell, of the English Presbyterian Mission, and Mr. J. B. Steere, Collector in Natural History for the State Museum of Michigan, U.S. We could wish that other Consular officers would follow Mr. Bullock's example, and draw up concise and intelligible reports of holiday excursions which they may make in the little known districts of the Chinese Empire, as the information which they are able to collect is often of considerable value.

Starting from Taiwanfoo, Mr. Bullock and his companions travelled for three days in a north-easterly direction, until they reached the foot of the hills; thence, striking east, they reached in a day and a half a small lake called Tsui-sia-hai, whose shores are inhabited by a tribe of "water savages." After a stay of some days they went due north, through the mountains to Posia, or Po-li-sia, a small plain entirely surrounded by hills, which is the abode of a large number of the Sek hwan (Shou fan), or civilised aborigines. During their fortnight's stay the party made a three days' excursion into the country of the Che hwan (Sheng fan), or wild savages. "The flat country of Formosa," says Mr. Bullock, "was almost everywhere capable of cultivation, and was cultivated with the greatest care. The principal crop was rice, but there were large tracts of sugar-cane, and sweet potatoes, and small patches of peanuts, indigo, and areca palms. . . . Mr. Steere, whose travels in tropical countries give weight to his opinions, said that we passed through some of the most fertile land he had ever seen." The Sek hwan who inhabit the Posia plain number some 4,000 or 5,000; they are as fair as the Chinese, but differ markedly from them in feature; the men wear their hair after the fashion of the Ming dynasty. They are nominally under the Lok Khang (Lu Chiang) magistrate, but are practically allowed to manage their own affairs by means of headmen elected by the tribe and the several villages. They pay no taxes at all, and seem to be visited by a Chinese official only about once a year. A Protestant Mission has been at work at Posia with considerable success, for "in three of the villages there are chapels built by the inhabitants at their own cost, with native preachers paid by the Mission; the chapels are also used as Mission schools."

Mr. Bullock's party found some difficulty in getting a guide and interpreter to accompany them to the nearest village of the wild savages, but at length they secured the services of a trader. The village which they visited belonged to a tribe called the Boo hwan, and was "situated a long day's journey nearly east from Posia, exactly at the watershed, on the top of the central ridge, but at a comparatively low part of the mountain chain." They met with a friendly, but not a cordial, reception, the savages being evidently suspicious of the objects of their visit. "The Boo hwan are a red-skinned, slightly-built, under-sized race, and, with the exception of the calves of their legs, singularly wanting in muscle; the features of some of them are regular and quite handsome." After the manner of savages, the men and women are all tattooed, and their manners and customs generally appear to be very primitive, but they had plenty to eat and were all fat and well-fed. "They grow a plant having the appearance of a gigantic nettle, from which the women weave a strong cloth, much resembling canvas; they also make a small quantity of very coarse cloth from the hair of some animal. . . The women possess some skill in embroidery. They distil a weak kind of spirit, which they drink to excess on certain occasions. A portion of the cloth and embroidery, and of the produce of their hunting, is bartered to traders for salt, gunpowder, hardware articles, and ornaments." As an illustration of the position occupied by the wild savages *vis á vis* the Chinese, we may mention that there is a reward of $60 given on the border for one of their heads.

The water savages, mentioned before, who live on the shores of the Tsui-sia-hai, "are chiefly worthy of notice because, though so small a tribe, they are yet distinct from any of their neighbours. The Chinese never class them amongst either the savage or the civilised aborigines, but invariably speak of them as 'water savages.'" From various indications they seem to be a small relic of a separate race, which is fast dying out. Those Chinese, says Mr. Bullock, who have settled among them have large plantations of tea, and profess themselves very desirous of opening a direct trade with foreigners in both tea and camphor. If such really be the case, surely they ought to find no difficulty in gratifying their wish. With regard to the languages of the three classes of savages of which we have spoken, Mr. Bullock expresses the same opinion as that held by Mr. Taintor in his *brochure*, which we noticed a few weeks back, viz., that they are undoubtedly of Malay origin. It is pleasing to have to record that Mr. Bullock's party, during their journey, met with no signs of ill-will on the part of the Chinese. They were extremely inquisitive, and not very polite, but, he thinks, not intentionally rude. The party met with only one instance of unfriendliness, and in three different places they were lodged and entertained by well-to-do Chinamen, who would accept no payment for their kindness.

The *Rajahate of Sarawak*, which has already appeared in the *Oriental Magazine*, is now issued in the form of a pamphlet, and concludes with the following remarks :—If we are inclined to enlarge upon the scheme it would be easy to show how much England loses and has lost in prestige and influence by the stupid fear of responsibility, which seems to tie the hands of successive Ministries. This pusillanimity has borne its fruits in the Eastern Archipelago and elsewhere. The petty wars of Ashantee, Sumatra, and even of Abyssinia, may all be traced to the absence of that commanding position which such a nation as England may at any time assume, without offence to the dignity and interests of other nations. Should she continue to neglect to reap the advantages which are within her grasp the day may not be remote when she will find her trade in the Archipelago pass entirely into other hands. She would have nothing to fear in the shape of wars with the people; neither would the Rajah Brooke, if Labuan was transferred to his exclusive rule; for it has been shown in the various campaigns forced upon him and his predecessors by some of the Dyak tribes—who are far more

Digitized by Google

warlike than the subjects of the King of Ashantee—that with a native following, such as he has, jungle warfare is much less hazardous than it would be with European soldiers.

The American Board of Foreign Missions, in their report, state that in Japan two churches have been organised with more than twenty members, and more than half of these wish to become preachers of the Gospel to their own people. Mr. Leavitt, writing from Osaka, on the 14th September, says of one native convert, nineteen years old, who occasionally conducts the religious service :—"His development has been wonderful. I cannot but feel, when with him, that he is a veteran in the service—so modest, so wise, so self-possessed, and so capable as a preacher. When he is to take a service he prepares his discourse either from a text of his own choosing or one which we give him. He studies his authorities upon it (reading English quite well), and comes prepared for a presentation better than any of the missionaries here can give at present."

At the last sitting of the French Académie des Inscriptions et Belle-Lettres, on the 22nd inst., two memoirs, one on Formosa and Lin-kin Islands, the other on the Ethnology of Central and Southern China, were received from M. Hervey de St. Denys, the well-known Chinese scholar and Professor at the Collége de France. M. E. Renan presented to the Academy the first French-Cambodgian dictionary ever published. Its author, M. Aymoins, is a young officer in the French army, stationed at Saigon. It is, according to M. Renan, a conscientious work, and calculated to supply useful materials to philological science.

Mr. Charles G. Leland has in the press a work entitled "Fu-Sang, or the Discovery of America by Chinese Buddhist Priests in the Fifth Century." It will be published in London and New York simultaneously.

THE PRESS ON THE DEATH OF THE EMPEROR OF CHINA.

(THE SPECTATOR).

"The Viceroy of India and the Emperor of China govern half the human race" with absolute political authority; and in Europe, which like Rome calls and thinks itself "the world," no man outside a minute circle cares to study or to know anything of the personality of either potentate. The former is known in England a little, for Anglo-Indians are numerous and talkative, and have a keen interest in watching the dispenser of patronage; but the latter is, except to four or five men in St. Petersburg, a mere name, a figure so little realised that there is question as to his age—one expert contending that the *Almanach de Gotha* is all wrong, and that he was twenty-five instead of nineteen—dispute as to his position in the Empire and doubt whether his character is of any importance to living being,—whether an Emperor of China is not necessarily a *Roi fainéant*, hemmed in, like a Grand Lama, by inexorable ceremonial laws, in whose name a Council of State controls the vast and civilised population, of whom not one in ten thousand have ever seen a European. The very law of succession followed at Peking is not understood, and no one can say at this moment definitely whether it was or was not the interest of any one to get rid of the lad whom nearly four hundred millions of men accounted semi-divine. And yet one would think, apart altogether from the question whether Europeans are, as they fancy, the only human beings in the world, there was enough in the position of the Emperor of China for his death to excite some passing interest in Western mankind. The inner life of the Court of Peking is to a certain extent a mystery, the system of government implying a semisacredness in the person of the Emperor as the Father of China, and as the being who alone can represent the whole Empire before the Supreme—he, for instance, alone can offer the propitiations required by earthquake, or famine, or flood—which necessarily involves a careful seclusion of his individuality from ordinary eyes; but enough is patent to show that the Emperor, when he pleases, is as absolute as a Sovereign can be who is bound by certain traditional principles. He cannot legislate at will, any more than the Sultan can; but the hierarchy of the "Services" who govern and administer the Empire ends in him, and if he pleases and has the mental force, he can impose his policy on his people as fully as any other sovereign, the Mikado of Japan, perhaps excepted. It is true affairs can go on without him, the Council of Six acting like a Cabinet, and with more direct authority; and this has been the case for a long time, Hienfung, the Emperor whom we defeated in 1860, having been a worn-out debauchee and drug-eater, guarded like an idol from the external world; and his successor, first a child controlled by an overbearing Minister, and afterwards a lad just beginning life, and as is asserted, with a tendency towards his father's debilitating vices. It is true, too, that the group of nobles and statesmen immediately around the throne have in the long interregnum of thirteen years possessed themselves of the springs of power to a degree formerly unknown; that Toungchi, the lad just dead, failed in a most extraordinary manner in a desperate effort to emancipate himself from Prince Kung, whom he dismissed and degraded one week for disrespect to the throne, and next week was compelled to reinstate in all his honours and offices; and that it may be the policy of the Council to endeavour, during a succession of minorities, to perpetuate their power. But no expert in Chinese politics doubts, we believe, that the keystone of the Chinese system is still the Emperor; that the millions recognise no other rightful Lord; that if he is of full age, and willing to give orders, he must be obeyed; that his will alone would outweigh that of all the statesmen around him; that, for example, if he inclined to a warlike policy, China would sooner or later go to war. The ceremonies which hedge him in are not more severe than the ceremonies which hedge in a Pope, and which leave the personality of the Pope still all-important, nor is there any proof that, his order once passed, it could till recalled be disobeyed. Still less will any one doubt that a change in the succession leaves room for a vast number of ambitions, and may completely change the character and policy of the scarcely known Junta which for thirteen years has controlled the policy of China. New men, and above all, new women, must obtain influence. and may exercise it in ways of grave importance to European interests,

The soul of this Junta is supposed to be Prince Kung, and it is obvious that he is necessary to it, or the extraordinary effort which induced the late Emperor to recall his decree of degradation would not have been made, and it is nearly certain that he will for the present return to power. The force which coerced Toungchi will coerce the "grandson of Prince Tung, now five years old." The disturbing element, the Emperor just arriving at manhood, and clearly anxious to emancipate himself by sacrificing Kung and his allies, has gone, and the Governing Committee is once more free to pursue the policy which it has for thirteen years so persistently followed up. What that policy is is another question, one party of Europeans in China declaring strongly that Prince Kung's name is synonymous with peace and "civilisation," and another that he never concedes anything till he is compelled, but of its results there can be no question. Very steady hands, with very far-reaching designs, have governed during that time the Chinese Empire. When they took power the Empire seemed to be going to pieces from internal dissensions, but now the Peking Government is as well obeyed throughout its enormous territory as that of Calcutta. Prince Kung, if he be the dominant spirit, has, as we read the recent history of China, determined to temporise with Europe until he can reinvigorate the Monarchy, and has granted every request strongly urged by the resident Envoys, except free entrance into the interior of the Empire. He has used the skill of the barbarians in finance until he has credit enough to raise a loan, and has money not only for the daily expenses of the Administration, which are supplied from the provincial fiscs, but for war-like purposes; has formed an army, or two armies, which can move, and fight, and conquer; has stamped out the embers of the dangerous Taiping movemen; has not only crushed but extirpated the Mohammedans of the West; has alarmed Nepaul into some transactions of which the India-office probably has the key, but which suggest submissions; has attacked the new ruler of Kashgar, risking thereby Russian interference; and has on the Eastern side so reorganised the Chinese forts, artillery, and military arrangements that European residents think the next war will be most formidable, and have become liable to accesses of panic. A war with Japan, which would have interrupted these measures and have given Europe an invaluable ally in the Far East, was avoided by concessions which must have galled Chinese pride intolerably, and which, but for a serious purpose, would scarcely have been made; and the interference of the Emperor, who wanted to rule for himself, was in some way, it may have been by a harem intrigue, it may have been by a threat which he knew could be fulfilled, overcome by means which for the first time in centuries exhibited the semi-sacred Emperor to his subjects as a person whose will could be set at naught. The theories prevalent in China to explain these occurrences are many, the most prevalent being the existence of two parties in the inner cabinet, one hostile and one friendly to the foreigner; but the facts, the few undeniable and known facts, all point one way—to the existence in Peking of a committee, which includes Prince Kung, which is not divided, which is resolute, patient, and able, which has resolved to consolidate the central authority, to crush down all rebellion, whether provincial or general, whether stirred up by fanaticism or only by discontent, and to keep off the intruding foreigner even at the hazard of war, and which hitherto has succeeded in all its designs except the subjugation of Kashgar. Whether, as some observers think, the designs include the isolation of China by the expulsion of Europeans we cannot tell, but the facts that China is governed by strong men with a definite object, that their Government has lasted thirteen years, and that the death of Toungchi will protract it for fifteen years more, seem to us to suggest the only explanation of all that has occurred, and it is not a pleasant one. If the governing power in China can form a strong army—and the evidence points that way—and can maintain a persistent and courageous policy, a contest with China would be, either for Russia or England, a formidable and expensive affair; and the date of that contest would not rest with the Foreign-office, either of St. Petersburg or London. The Governing Committee of Peking can, if that is part of their plan, force on a struggle in any year and at almost any moment, merely by hinting to their Satraps and their Generals that, on the whole, the hour for a struggle has arrived. Russia could not sit quiet and see Kashgar occupied, or Great Britain bear the seizure of Khatmandoo—which has happened once before—or Europe generally endure the summary extinction of the whites in the Treaty ports. We pretend to no special knowledge of dynastic politics in Peking, and doubt if any European quite understands the governing ideas of her Cabinet, or the reason for passing over grown members of the Imperial House; but to assert that a change in the depositaries of power in an Empire situated like that of China, which can drag half Europe to war at its own discretion, is a matter of no importance, is unsound. China is too near to Russia, Great Britain, Portugal, Holland, and all European Powers with commerce for that kind of indifference, and we may yet find that the death of the secluded lad whose end was announced by telegraph on Tuesday is the event of the year. The Emperor of China matters little to London, but the policy of China matters a good deal, and that policy may be seriously modified by an event which for half a generation will leave China without the ruler whom her people are accustomed to obey. However weak the throne, the person whose signature is necessary to all acts will never be without a real influence on affairs.

(THE TIMES.)

To the nations of Europe the Emperor of China is but a dim image of distant barbaric splendour, personally not even a name, for hardly one out of ten thousand Englishman could have told yesterday how the ruler of the most populous Empire in the world was called, or what was the name of his father before him. To-day some interest in the subject may be created by the announcement that the young Emperor

Digitized by Google

Toung-chi, died at Peking on the 12th of January. He succeeded in infancy to a throne, his heritage was faithfully guarded for him, he married in early youth, he took upon himself a few months after the administration of his mighty Empire, and he is now suddenly cut off. His name will be added to those of the many Princes over whose early fate their subjects may mourn and generously persuade themselves that death cut short the development of the highest virtues. It is possible that in after times the period of this young Emperor's reign may have a great historical interest—not, indeed, for anything he has done, but as the period when old things began to pass away in China and a new age opened. The last twenty years have seen the relations of China with the outer world transformed. The movement had commenced some time before. The Chinese Government had never recovered the effect of the war of 1840. Its supposed power as commanding unnumbered millions of the human race, the mysterious grandeur that surrounded it, the belief that it could for ever maintain, in spite of all the world, its system of morose isolation, were shattered by the victories of the British. It became evident that a European Power with the command of the sea, and with the means of providing and transporting a sufficient army, could at any time burst the feeble barriers of Chinese exclusion, and, in fact, make indefinite conquests in the country. The effect of this on the great maritime nations was that they began to watch each other—pretty much as the European Powers watch each other in their dealings with the Turkish Empire. England had, it is true, stipulated for advantages for her neighbours as well as for herself, and this unselfish and judicious policy has given a friendly character to the relations of the various Powers with each other in Chinese affairs. But, when anything important is to be done, each one likes to be well represented on the spot, from a vague misgiving that its rival may obtain some advantage through the inherent weakness of the Chinese Government. Of the effect produced on the Chinese themselves by the War of 1840 we must speak with less certainty, but it is said that the internal disorders which succeeded—the most remarkable of which was the insurrection of the Taepings—were due in a great measure to the shock which the Imperial system had received. Tien-teh and his followers aspired to overthrow the Mantchu dynasty, which had shown itself incapable of protecting the Empire from the "outer barbarians." However, the old system held its ground essentially unbroken. The foreigners were content with their trade, and through the great port of Shanghai they could communicate with the wealthiest regions of the land. The intercourse between the maritime nations and China was considerable, but little in comparison with what it was destined to become. Year by year, however, new forces came into existence, and pressed on the social and political fabric of the Empire. Year by year the authority of the European nations increases, and the old exclusiveness melts away, as far as the people themselves are concerned, under the influence of interest. The Chinese Government has acknowledged the superiority of European civilisation in many ways, and not least by placing its forces under an Englishman in the war of life and death which it waged against the rebels. A more complete recognition of the rank and authority of foreign nations is to be found in the personal reception of the Ambassadors by the Emperor which was conceded some time since. We are on the verge of still greater changes, all in the direction of increased intercourse and the breaking down of the barriers which prevent free travelling and free settlement in the Chinese Empire. It would be wrong, however, to represent China as a mere inert body which only receives the impressions which the European races make upon it. On the contrary, there is reason to think that very remarkable events may possibly be in store in Asia through the vigour of which the Chinese race is capable. The humiliations of the Government seem to have been the cause, or the opportunity, of new and unexpected movements. Chinese energy has taken the forms of rebellion and emigration; if the Government recovers its authority, the same energy may carry the Imperial power into regions of Asia where it has hitherto been only nominal. The impulse, indeed, is said to have already commenced. When the time comes that Europeans can freely travel where they please, they may be able to contemplate a power far more extensive and complete than that which their fathers reverenced forty years ago.

(DAILY NEWS.)

The young Emperor of China has not long enjoyed the dignity to which he succeeded under somewhat melancholy circumstances. In his nineteenth year he has, to adopt the official language in which the death of a Chinese Emperor is notified to his subjects, "ascended on the Dragon, to be a guest on high." In this country we felt a somewhat peculiar interest in the Prince who has died thus young. We had a sort of acquaintance with him. For some years the Western World concerned itself but little about the Emperor of China. A sort of intercourse, hedged around and chilled as far as it could possibly be by Chinese etiquette and aversion to foreigners, began to spring up between the Western nations and China through diplomatic relationship and through commerce. It was interrupted every now and then by some outbreak of Chinese fanatical hatred like the massacre of Tientsin, but there was a general impression that the new Emperor was not so bitterly set against friendly relationship with the West as most of his predecessors had been. A little personal interest was awakened in him among Western readers when it became known that the youthful Emperor was about to be married. The general arrangements and conditions of the Imperial marriage, its subjection to the orders of the stars and the astrologers, its ceremonials, its etiquette, and the mystery in which so much of its pomp was sought to be shrouded, formed a subject as curious and as interesting as ever occupied the pen of a newspaper correspondent.

The young Prince came formally to the Imperial Throne in the following year. That year was made somewhat memorable by the settlement of the long-disputed and evaded question as to the reception of Ambassadors from foreign States by the Emperor. According to the long-established usage in China a Minister received in audience by the Emperor must perform the "Ko-tow," that is, he must go down on all fours three times, and knock his forehead nine times against the ground. It is needless to say that a Western Ambassador would no more be likely to perform this ceremony in our day (it is doubtful whether it was not got through in a slurring sort of way by Western Envoys in other times) than the English sailors long ago could be induced to trample on the crucifix as a means of escaping from Eastern cruelty. The Treaty of 1860, which gave the right of residence in Peking to the representatives of the foreign Powers, undoubtedly specified that the Envoys of the States making the Treaty should not be required to use any other forms at an audience but such as are recognised in European Courts. Still this did not bind the Emperor to give audience to the Ambassadors, and year after year had passed away without any opportunity arising of putting the question to a test. It was believed by many observers that the young Emperor would never be allowed, even if he were inclined, to yield so much to the exactions of the pushing and detested Western nations. The matter, however, was settled in June last, when the Emperor received the representatives of Great Britain, the United States, Russia, France, and the Netherlands, and no one except Prince Kung went on his knees to the Sovereign. When the audience question had been thus disposed of the Emperor of China passed almost entirely out of the thoughts of people in Europe. The news of the poor youth's immature death will revive a sort of interest in one who, little more than a phantom to the vast majority of his own subjects, became associated with our history somewhat peculiarly on more than one occasion. An Emperor of China is indeed so walled up from the world by prescription, routine, and custom that he is little more than a name to the living. His death can call forth even in his own country hardly more emotion than is to be awakened by the knowledge that one of a line of Imperial shadows has faded away, and that another is dimly to be seen in its place.

(STANDARD).

What will be the effect of the Emperor's death upon the course of affairs in China it is not possible at this distance and with our present information to conjecture. The Heir to the Throne, we are told, is a child of five. But for the moment it would obviously be of more importance to know who will be Regent. On that point, however, we get no information. The father of the Sovereign just deceased left four brothers, of whom Prince Kung was second. We presume that the new Emperor is son of the eldest of the four, Prince Tun. Will Prince Kung again become Regent? At the accession of the deceased Emperor he made himself master of the government by a kind of *coup d'état*. The little Emperor was detained at the place where his father had died by the chiefs of the old Chinese party, who, in possession of the Sovereign's person, felt that they would have the real power in their hands. But the Emperor's mother favoured Prince Kung, and by her aid he was able to bring back the Emperor to Peking. To make his victory secure the Regent brought his discomfited rivals to trial before a tribunal of which he was himself president, condemned them to death, and had them executed. If vigour and resolution will now restore him to power his antecedents warrant us in saying that they will not be wanting, But in 1861 Prince Kung, in addition to the confidence of the Empress-Mother, was practically Regent before his brother's death, having been left by the Emperor, on his flight from Peking, with very extensive authority. Now he is out of office, and may not have the support of the new Emperor's mother, who will, of course, be his guardian. But if merit and the interest of China decide, there can be no question that Prince Kung ought to be Regent. The world has not often seen a more signal example of the regeneration of an empire than that presented by China under the Prince's Regency. Instead of the universal anarchy that prevailed in 1861 there is now everywhere unquestioning obedience to the Throne. The Taepings have long since been utterly crushed; the Mohammedan kingdom which the Panthays built up in Yunan has been utterly subdued, the wild tribes of the north have again been brought under subjection, and Eastern Turkestan alone still sets Chinese arms at defiance. Nor is it merely that the integrity of the empire has been maintained. Prince Kung had wisdom enough to recognise the superiority of European civilisation, and to try to make it his friend. He did not, indeed, like the Japanese Government, attempt to crowd into a lifetime the progress of centuries. But, at least, he kept faith with foreign Powers, and he adopted such foreign inventions as seemed likely to aid in restoring the Empire to vigour. Of course there must have been a large reserve of vitality in the Chinese people or the policy of the Regent could not have been so successful. The ablest surgeon cannot galvanise a dead limb to life. But this fact in nowise detracts from the merits of Prince Kung.

Everything is quiet, we are told. As the announcement was thought necessary, it may be that disturbances were apprehended. Should they break out, the healing, unifying policy of Prince Kung may speedily be undone, and we may witness other insurrections as formidable as those of the Panthays and Taepings. But if order should be preserved, and if the wise statesmanship which effected such wonders since 1861 should rule the Empire for another dozen years, it is impossible to avoid speculating as to the result to the rest of the world. The population of China is estimated at about 450,000,000, or, say twice the population of India. These numbers are a mere estimate, it is true, but there can be no doubt at all that the population is enormous. The experience we have of Chinese, not only in their own country but in the Straits Settlements, in Australia, and the United States, proves them to be excellent workmen, industrious, patient, frugal, and persevering, while we need but refer to Gordon's "Ever Victorious Army" to prove that with proper discipline they make admirable soldiers. The Empire, too, produces so many articles that Europe and America are glad to buy that its trade is capable of indefinite increase; and with its trade so also its revenue. The installation of an enlightened Government could hardly fail enormously to develop this trade, to open new ports to us, and, what would be of still more importance, to open to India communication with Western China and Thibet. To England more particularly, therefore, it is of great importance that the new Regent, whoever he may be, shall not belong to the party hostile to foreigners. On the other hand, it is impossible not to look forward with some apprehension to the time when this enormous population, which already from Thibet looks down upon the plains of Bengal, and at Yunan is within a hun-

Digitized by Google

dred miles of our Burman possessions, shall be in possession of the arms and the mechanical appliances of Europe.

(THE HOUR.)

It would be premature to speculate on the results which may flow from the early death of the Emperor. For all we know at the present moment he may have named his infant son his successor, just as he in his turn had been nominated by his father. But it may be doubted whether, in the existing condition of national Chinese feeling, a long regency is likely to be accepted, or even tolerated. There have been rumours of risings, though successfully suppressed, in more parts than one of the Celestial Empire in the course of the last six months. There are revolutionary spirits abroad that must be promptly subdued by the strong hand of a central authority. Nor has China only her internal troubles to cure. She has her Imperial ambition to gratify. It is notorious that the improvements which the Mikado has recently introduced into Japan have directed the attention of China to similar efforts at self-development. As a first step towards achieving these we hear of a Chinese army being organised upon a scale hitherto undreamed of. The arsenals of Europe have been taken stock of by Chinese observers, and guns and ammunition are being bought up in Germany and England for the better protection of the "Land of Flowers," and for the speedier fulfilment of what has now evidently become a deeply-seated national determination. Ideas march rapidly, and the Chinese are a quick-witted people. They cannot be, and they are not, blind to the strength of the position of their country. They know how favourably it is placed for commerce; they know that it must continue to be, as it is, one of the great trading centres of the world. Why, they may ask, shall their own resources contribute to the fortune and prestige of foreigners? The first step in national progress in this enlightened age is the creation of a national debt, and China commenced the creation of that nucleus a few weeks ago. It is true that it is a small one—less than a fleabite in comparison with the liability of any well-established European State. But still it is a beginning, and a beginning which is at least significant of the spirit which animates the new Chinese policy, and which may at any moment assert its influence in the counsels of the Imperial Government. It would be absurd to suppose that England has anything to fear from China. Only, in the face of facts like these, it may be just as well that England should preserve an attitude of increased vigilance; and at a conjuncture so critical as this in the history of the nation it manifestly is a very important matter who and what manner of man the successor of T'Oung-Che will be.

(DAILY TELEGRAPH.)

His poor little Majesty, Toai-shun Ai-sin Kioh-lo Tung-chi, Emperor of China, has departed this life. If we could hear this event with Chinese ears, it would be perfectly simple to comprehend and explain why the weather has of late been so gloomy and unpleasant. His Majesty was Tientsye, or Son of Heaven, and, as even foreign devils must be aware, First Cousin of the Moon and Brother to the Sun. It would not be unnatural, therefore, for pigtailed people to ascribe the absence of the solar orb day after day, and the frantic conduct of the elements, to deep concern at the demise of one who stood in such close relation to the powers of the universe. The subjects of his late Majesty will indubitably think that the cyclones which devastated the China coast towards the close of the year 1874 were symbols of the coming disaster—signs that Ai-sin Kioh-lo Tung-chi, eighth in descent from Shun che, first of the Mixg dynasty, was about to join his great relations in the realms above.—[The remainder of this article is written in the same style, and though doubtless appreciated by the readers of the *Daily Telegraph*, scarcely calls for reproduction in these columns.—ED. *L. and C. E.*]

(THE GLOBE.)

The sudden death of the young Emperor of China will scarcely affect the interests of the vast Empire over which he ruled more than the occurrence of a similar event would in constitutional countries. Although nominally an autocrat among autocrats, and regarded by his subjects as semi-divine, the potentate who sways the destinies of the most populous nationality in the world is hedged in with numberless restrictions that serve to limit his apparently boundless power within rather narrow lines. Tradition is, in reality, the monarch of the Celestial Empire, and custom her prime minister. Possessing the most conservative instincts of any people on the face of the globe, the Chinese offer a desperate resistance to innovations of all sorts. Yet, although this contentment with things as they are still continues to exercise great influence with the masses, being sedulously fostered by the mandarins, there seems no question that during late years old things have been gradually giving place to new, even in that stagnant Empire where civilisation seemed fated to remain in a fossilised condition. Although the admission of foreign trade was resisted in every way by the mandarin class—who, no doubt, saw in it the thin end of the wedge which would eventually open the Chinese mind to a conviction of misrule—the conquering arms of the "outer barbarians" have succeeded in gaining by force that which no amount of diplomacy could win. Every year the external commerce of China increases, until now it has reached such dimensions that the mandarins dare not attempt its destruction for fear of creating discontent among the mercantile classes. Whether power will gradually pass from the hands of an oligarchy of learned men into those of a great middle class of merchants and traders, only time will show. According to the opinion of Europeans who have resided at the great ports, this tendency is beginning to display itself wherever external trade has introduced foreign ideas and theories of government. But too much weight must not be attached to the state of opinion at such exceptionally situated centres of population. Their leading merchants may entertain the most profound contempt for the mandarin class, and may even hold the Emperor himself in derision, without in any way influencing opinion among the myriads who people the interior. To them the Emperor still remains a semi-divine abstraction, whose orders are no more to be questioned than the ethics of Confucius, and the mandarins, as the executive of this all-powerful monarch, are regarded as little less infallible. Nevertheless, the outer crust of resistance to external civilisation having been broken through, it becomes possible to hope that, as years roll on, China will gradually throw off the sleep of centuries, and take her proper position among the civilised Powers of the world.

(PALL MALL GAZETTE.)

After a short but eventful reign, the "great Emperor Tung-chi has become a guest in heaven." Born in the year 1856, he was only five years old when his father, the Emperor Hien-fung, tottered into his grave a worn-out, decrepit man of but thirty years of age. By the will of Hien-fung the Prince of I, Su Shun, and others, all of whom were zealous partisans of the anti-foreign party, were nominated as Regents, to the exclusion of Prince Kung and others, on whom had fallen all the responsibility of the negotiations with the representatives of England and France at the conclusion of the war. The crisis was one of extreme danger to the Empire. Had the Council of Regency continued to hold power, the foreign treaties would have been thrown to the winds, and the difficulties already caused by the march of the allies on Peking and the progress made by the Taeping rebels would have been increased tenfold by the presence for the second time of an invading foreign force on the soil of China. Happily, however Prince Kung, with the support of the Dowager Empress, was equal to the occasion; and while the members of the Regency were escorting the body of the Emperor from Jehol, where he died, to Peking, ere even they reached the capital, they were seized, and, on charges which at such times in Eastern countries are held to be sufficient, were thrown into prison. Su Shun paid the penalty of his crimes on the scaffold, and to the Prince of I was sent a silken cord, with which he put an end to his existence. This revolution having been effected, the Dowager-Empresses were appointed Regents, and Prince Kung undertook the practical administration of affairs. The politic course pursued by the Administration served to strengthen the position of China with foreign Powers, and to mitigate the evils under which the Empire was suffering. The Taeping rebellion, which had devastated the richest provinces of China for years, was at last suppressed; the leaders were either taken or slain, and their strongholds were recovered. Through the instrumentality of the foreign Customs, the revenues of the Empire were largely increased; a college was established in Peking for the instruction of natives in foreign sciences, and European drill-instructors and engineers were lent to the Government to reorganise the army, and to establish arsenals and dockyards. These and similar progressive undertakings occupied the attention of the Regency during the twelve years which elapsed between the death of the Emperor Hien-fung and the assumption of supreme power, in February, 1873, by his youthful successor. In accordance with custom, his coronation was preceded by his marriage in October, 1872, with the Empress Alute and three wives of the second class, whose numbers, had he lived, would have been supplemented by 116 other ladies. In June, 1873, the Audience question, which had for years been in dispute between the Chinese and foreign Governments, was settled by the Emperor receiving in audience the Japanese and European Ambassadors. Little or nothing is known of the private life of the Emperor Tung-chi. The training of youthful heirs to Oriental thrones is not such as is likely to prove favourable to the development of any great individuality of character, and the accession of Tung-chi to the Throne does not seem to have modified in any way the policy pursued by the direction of the State.

THE HONOUR AND INDEPENDENCE OF THE PRESS, AND "THE TIMES" IN PARTICULAR.

The extraordinary libel case, Rubery *v.* Grant and Sampson, has at length been brought to a close. Baron Grant has been absolved by the jury from all responsibility in the matter, and Mr. Sampson has been cast in damages £500. Mr. Rubery is therefore vindicated, and another lesson has been given on the responsibility of the Press. Still, public opinion will always support newspapers in their laudable efforts to expose fraud, and in this instance it is universally felt that *The Times* was rendering a great public service in frustrating an attempt to practise a colossal imposition. The jury, however, are of opinion that in associating Mr. Rubery with this attempt at fraud *The Times* did the complainant a wrong, and they have marked their sense of this wrong by awarding substantial damages. *The Times*, true to the magnanimity for which it has always been conspicuous, says—"The verdict is to us a light matter. A barefaced fraud was stopped in its inception by our action, and if in the protection of the public we did any wrong to Mr. Rubery we are ready to recompense him tenfold. The importance of the case arises out of the relations between the defendants that have been brought to light." The action which *The Times* has taken throughout this painful investigation has been dignified and liberal. It made the charge against its late City Editor its own, and defended it at great cost, reporting in its own columns the whole of the voluminous evidence, the addresses of counsel, and the summing-up of the judge, a determination being manifest from the beginning not to suppress a single fact bearing on the case. It did not forsake its old *employé* in this critical time, even though their mutual relations had previously been severed under circumstances which it is now asserted justified the proprietors in pressing for a resignation. But the real importance of the case arises, as has been justly observed, from the disclosures which it brought about concerning the relations between the two defendants. The verdict sheds little light on the opinion of the jury in this respect, and outside opinion is not unanimous as to how far the evidence given in open Court favours the conclusion that there were such corrupt relations between the two defendants as to warrant *The Times* to confess to a "feeling of profound and unalloyed mortification." But every right-minded man must admit that there is great propriety in the following remarks:

Digitized by Google

—"Whether Baron Grant hoped for anything and whether he got anything, we do not inquire. But this much we do feel at liberty, and, indeed, under the necessity to say, that in allowing himself to enter into such relations of obligation to a financial agent, Mr. Sampson betrayed the unbounded trust that had been reposed in him, and that had any knowledge of these transactions reached us, there would have been long since a change in the authorship of the Money Articles of *The Times*. The honour and independence of this paper must ever be above suspicion, and the humiliation we have suffered is hard to bear—a hardship compared with which the damages that have been awarded to Mr. Rubery are as a feather in the air." There is, in fact, something more than propriety—there is ring of genuine dignity in this declaration, which is not only worthy of the leading journal, but which ought to be accepted as enunciating the only sound principles on which a free and independent newspaper can deal with the great financial interests of the country. The temptations to a man in the position of the City Editor of a first-class paper are great, but in proportion to the extent to which he proves himself incorruptible, will be his authority and usefulness. Great confidence is reposed in the British Press, because it is believed to be above sinister influences, and one of the most unfortunate results of this *cause célèbre* will be the creation of a distrust—more or less permanent—in the disinterestedness of the financial advisers in which the public have been accustomed to confide. We have no wish to follow Mr. Sampson in his retirement with any personal remarks, and even had we stronger views of his indiscretion than those which we actually entertain, we should have been unwilling to add to the severity of the penalty which has already overtaken him. We have ourselves, on various occasions, exposed frauds and abuses of a flagrant character, and have incurred no little odium thereby; but we have steadily endeavoured to avoid all personalities, and have felt that we were thus all the stronger to launch our bitterest invectives against the *systems* of fraud and corruption which have fastened like parasites on our commerce and finance. By these bold and independent utterances we have, however, won the esteem and confidence of an influential clientelle, and we mean to abide by the same rule, and retain, unimpaired and unimpeachable, the proud distinction of daring to be honest and truthful.

MARINE INSURANCE.

The following letter, signed "C. G.," and dated from Genoa, having reference to the case of "Sassoon *v.* Harris," recently tried in the Court of Queen's Bench, has been published in the *Shipping Gazette*:—

I cannot help making a few observations on the decision of the jury at the trial, awarding the plaintiff £30,000, and the consequences thereof. Sassoon and Co. have insured £30,000 on *Delta* and other steamers from Bombay to a port in China not north of Shanghai. According to these facts, any single chest was insured for about £70 17s. 7d., whilst their real value was about £149 18s. 11d., so Sassoon and Co. were not covered for £79 1s. 4d. on each chest. They, therefore, had not insured the whole amount, nor is it to be seen from what is published that the £30,000 insured was to be for that particular lot of 223 chests which was lost, and I am justified in concluding that they intended to insure £70 17s. 7d. on every chest of opium, which is as near as possible 47·296 per cent. of their real value, whilst they ran the risk on 52·704 per cent. of the value of the opium. Had the *Delta* with all the 423 chests been lost, the Underwriters would have had to pay £30,000, and Sassoon and Co. would have sustained a loss of £33,430, equal to 52·704 per cent. of the whole value. However, as only one steamer, with 213 chests, has been lost, the loss is about £35,000, and if the Underwriters should have to pay £30,000, Sassoon and Co. would only sustain a loss of £5,000, equal to about 14·3 per cent. Now is it reasonable that Sassoon and Co. should not be liable throughout the whole voyage for the same percentage or share? Have not the Underwriters run the risk on the 200 chests which arrived safely, and are they not entitled to consider a part of their liability at an end on that account? It is not likely that any Underwriter would consent to a condition which imposes upon him the payment of the whole sum insured on a parcel of goods, if only one half of the parcel is lost, for the result of such a clause or condition would be, that in the above case f.i., the Underwriters run twice a risk of £30,000—£60,000 from Hong Kong to Ningpo, receiving the premium for £30,000 only, or that, in case of particular average, amounting to 50 per cent. on the whole lot of 423 chests, the Underwriters would, in the above instance, have to pay £30,000, which is equal to a total loss, although the goods arrived. If this last hypothesis is denied—that is to say, if it is pretended that no total loss would be paid, but only a proportional sum—then I am at a loss to account for paying a total loss, or, rather, the whole sum insured, when only a part of the insured objects have been lost, as is the case with Sassoon and Co.'s goods. Just put the case that the first lot of 200 chests reaches its destination with a damage of 25 per cent., and the Underwriters, according to the above rule, are required to pay all the damage, because it does not exceed £30,000—say £7,107 10s. Could any one, in case of the loss of the second steamer with the 223 chests, pretend the rest of the insurance money equalled £22,892 10s., on the ground that the sum insured is £30,000, and that the Underwriters are implicitly liable up to that amount? This inference would be the consequence of the decision in the case of Sassoon and Co.; but, according to my humble opinion, the Underwriters have run a risk on the 200 chests, which arrived with a damage of 25 per cent., and that risk was in the proportion of 200-423 of the whole sum insured. They, therefore, have an undoubted right to be held responsible only for 223-423rds of the said sum for the lot sent in the second steamer, and they should not have to pay £30,000 on that lot, but only the above-mentioned proportion thereof, which would be £15,815 12s. No Continental Underwriter would settle otherwise, and it is difficult to understand how any other way of settlement could be fair and just, unless there be circumstances in the case which are wholly unknown to me. Being in no way interested in the case of Sassoon and Co., I certainly have no interest one way or the other, and I offer these few reflections only for the purpose of broaching a point which certainly deserves the consideration of the Underwriters in a very high degree.

THE PACIFIC MAIL COMPANY INVESTIGATION.

The Ways and Means Committee of the American House of Representatives resumed the hearing of evidence in this inquiry on the 6th ult.

Charles Abert said he was agent or attorney for the Pacific Mail Company from 1860 until September, 1873; in this capacity he commenced application for increased subsidy in December, 1871, and managed the case until the first part of February, 1872, when he was superseded by Irwin, but thereafter acted as Irwin's counsel and disbursing agent. The disbursements were made between the 2nd of February and 1st of July, and aggregated between $100,000 and $125,000. Witness received $100,000 of this amount from Irwin personally in New York, May 27, 1872, in a cheque signed either by Bellows or Stockwell. The witness's agreement with Stockwell was verbal and related only to witness's professional services. For these he received $1,000 cash, and was to receive $30,000 more in case of success, but being superseded he could make no claim, and considered he had none for this latter amount. He subsequently received from Irwin between $5,000 and $7,000 for services as counsel. Disbursements were made by witness under Irwin's direction in Washington to fifteen or twenty different persons, some of them residents of Washington and some not, and mostly strangers to witness; these payments were made after Irwin left New York for California; witness took receipts for all his payments, and sent these receipts to Irwin in California; witness, in view of his relations to Irwin as counsel and of Irwin's refusal to answer similar questions, said he felt compelled at present to decline to give names of persons to whom he made these payments under Irwin's directions. He desired to state, however, that not a cent of the amount disbursed by him was paid with any agreement or understanding or expectation that it would ever reach any member of Congress. The question was therefore waived *temporarily*, and witness was directed to hold himself in readiness to reappear whenever notified.

COMMITTAL OF MR. IRWIN.

Irwin was brought before the bar of the House in the custody of the Sergeant-at-Arms. The Speaker, addressing him, said: It is my duty, under the order of the House, to address to you this question:—"Are you ready to answer the questions which have been addressed to you by the committee, and which you have heretofore refused to answer?" Mr. Irwin: "I am not, Mr. Speaker." He then proceeded to read a statement to the House, denying that he was in contempt of that body, and declining to give any further information. When Irwin had completed the reading of the statement, Mr. Dawes offered a resolution directing the Speaker to propose to the witness the following questions:—"First, give the names of the persons whom you employed to aid you in procuring the subsidy from Congress in 1872 for the Pacific Mail Steamship Company? Second, what was the largest sum paid by you to any one person to aid you in procuring that subsidy?" The resolution was adopted, and the Speaker proceeded to put the questions to Irwin. To the first question Irwin replied: "Mr. Speaker, I am compelled to decline doing so for reasons which I have already stated." To the second question he replied: $275,000.

Mr. Dawes then offered the following resolution, which was adopted:—Resolved—That Richard B. Irwin, having been heard by the House, pursuant to the order heretofore made, has failed to show sufficient cause why he should not answer, and that he be considered in contempt of the House. A long discussion then ensued on a resolution offered by Mr. E. H. Roberts of New York, directing the Serjeant-at-Arms to keep Irwin in custody in the common jail of the district of Columbia. Finally the resolution was modified so as to read:—Resolved—That Richard B. Irwin be remanded to the custody of the Serjeant-at-Arms, to abide the further orders of the House, and while in such custody he be permitted to be taken by the Serjeant-at-Arms before the Committee of Ways and Means, if he shall declare himself ready to answer such questions as may be lawfully put to him, and while he shall so remain in the custody of the Serjeant-at-Arms he shall be kept in the common jail of the district of Columbia. The resolution was adopted.

On the 8th ult. Mr. Parsons appeared before the committee, and read a statement of his connection with the Subsidy business. It seems he wrote arguments, collated statistics, checked off the rolls of the House and Senate, so as to designate the votes that were for the Subsidy and those that were doubtful, and helped to get the material for this check list by personal conversations with Members and Senators. For all this work he received $13,500. He swore that he knew nothing about any persons that were employed in corrupting Members of Congress, and that he made no disbursements of money to members or others.—John G. Schumaker then appeared. The substance of what the committee got from him, after a wearisome examination, was that he took his $275,000 cheque to the Brooklyn Trust Company, and, by direction of some client, who it is supposed was Irwin, got it broken up, as he says, into smaller cheques, and he ordered it to be sent by the Trust Company to certain other clients in the City of New York. He claimed to have received only about $10,000 for his own services, and to have had the rest distributed to his "clients" in New York. He admitted having drawn the cash for one of the $50,000 cheques, and he distributed it by direction of his "client." The two $50,000 cheques which passed through Jay Cooke and Co.'s Bank he says he did not collect. He is not sure whether he will refuse to disclose the names of various parties to the transactions, though he

Digitized by Google

thinks he will not do it unless he is compelled to. He urged the relation of client and attorney as excusing him from testifying.—Representative Randall, of Pennsylvania, was then sworn. As this investigation originated with Mr. Randall, who offered the resolution in the House for the purpose, he was asked as to his knowledge of any improper means being used to influence the passage of the Subsidy, when he replied that, from conversations, he believed a member of Congress was approached directly and offered a consideration to vote for the Subsidy. The member was Mr. John B. Storm, of Pennsylvania, who was offered $1,000 for his vote. He had this information in two ways—one from Mr. George W. Morgan, and the other from Mr. Storm himself. It was due to Mr. Storm to say that he never indicated any purpose to vote for the Subsidy, nor did he vote for the Bill. Mr. Storm did not tell him from whom the proffer came, but related the fact as if to strengthen his (Mr. Randall's) energy in opposition to the Bill.

On the 11th Mr. Charles Abert was re-examined. The Chairman asked: "To whom did you distribute the $106,500 belonging to the Pacific Mail Steamship Company, according to the direction of Irwin?" Mr. Abert read a preliminary statement explanatory of his position, saying he found no reasons to prevent him from answering, as he was agent or steward, and acted according to Irwin's direction. If any money had been paid improperly it had been without direction from him. Reverdy Johnson gave him another opinion on Saturday, after a further explanation, to the effect that he (Mr. Abert) acted in a merely financial character, and not as counsel, and therefore he could answer the question as to whom he paid the money. The following is the list of payments made by Mr. Abert, as stated by himself:

R. C. Parsons	$1,500	J. M. Morris	$1,500
H. G. Fant	11,000	Donn Platt	5,000
A. W. Randall	6,500	Charles H. Sherrill ...	500
J. McFarland	25,000	William Moran	200
W. B. Shaw	15,000	Charles Abert	7,000
A. B. Corwine	3,100	Chittenden	5,000
J. G. Berrett and Samuel Ward	7,000	J. G. Berrett	2,500
		Cormick	500
O. J. Averill	9,000	Ingram	5,000
John H. Hersey	11,000	John Boyd	4,500

making an aggregate disbursement of $120,800, between the dates of March 6 and September 6, 1872.

Irwin is ordered to be kept within the limits of the jail, not being allowed to walk outside. He is confined in the same room in which General Sickles was put while on trial for the murder of Key. Irwin *still insists* that the chief object of the committee is to suppress testimony which he desires to give.

CAUSES OF THE LOSSES OF PACIFIC MAIL COMPANY'S STEAMERS.

Within a brief period no less than eleven fine steamers—most of them first-class—belonging to the Pacific Mail Steamship Company, have been totally wrecked or burned, involving in several cases a serious loss of life, and crippling the company almost to the uttermost verge of insolvency. It is scarcely within the bounds of possibilities that so many conglomerated *accidents* should befall a single company in comparatively so short a time, and several of the prominent New York journals, including the *Nautical Gazette* and the *United States Economist*, entertain the opinion, which largely prevails here, that the majority of those disasters were not "accidents" at all, but the legitimate results of premeditated intention. The *Nautical Gazette* talks after this wise: "We have not quite the faith to believe that the loss of the Pacific Mail steamer *Japan* by fire was the result of accident, nor have we ever believed that the *America* was burned by reason of accident. We believe that their destruction is but a part of the damnable plot to effect, if possible, the ruin of the line." Captain Osbon, the bluff, straightforward, thoroughbred veteran seaman, who holds the helm of that journal and directs its course, never uses the subjunctive mood. He never indulges in such sentences as "It is rumoured," "It is said," "We hear," etc., but comes at once to the point, and lets his readers know just what he thinks in the plainest and most direct language. Of the same sort is the *United States Economist*, a prominent, sound journal, whose utterances are always well weighed and carefully considered. Speaking of the misfortunes that have befallen the Pacific Mail Company, it says:—Of course all the loss of life and property to the company's vessels at sea is due to the system that has so long wrecked its affairs on land. The affairs of the company are not carried on on business principles, and never were. Pacific Mail has long been regarded as a fancy stock, securing a large influence on the stock market to the lucky individuals who may control it. It seems to be always furnished with an available supply of funds for stock or other purposes. Half-a-million dollars seems to be a mere bagatelle in its transactions. First, the personal concerns and interests of the President and Managing Directors were considered, and the interests of the company seemed to be the very last matters thought of. Contracts were made for rickety breakdown vessels at fancy prices, the bulk of which went into the pockets of the managers. Then, by a natural law of attraction the ships were officered accordingly. No attempt was made to obtain able and capable men. For many years it has been a subject of derision on the Pacific Coast respecting the incapable persons sent out to officer the ships. The only wonder is that there is a single one left.

The *Nautical Gazette* also states its belief on what it deems good grounds, that "attempts have been made to injure and destroy some of the new iron steamers recently built by the company." It is certain that several of them, including the *City of Peking*, which should have arrived here long ago, have unexpectedly met with disasters, and this constant recurrence of serious calamities to a single line is not to be accepted as the results of accident in a majority of cases. We agree with Captain Osbon's opinion when he says, "We do not by any means claim that the company's management is without fault, but we do believe that it is not entirely shorn of its integrity and honesty." In the meantime, the entire business community is anxiously awaiting some more reasonable definition of the disasters that have occurred to the company than the mere plea of "accident."

THE EASTERN TELEGRAPH COMPANY, LIMITED.

The fifth half yearly general meeting of this Company was held on the 29th ult., at the Cannon-street Hotel; Mr. JOHN PENDER, M.P., in the chair. The directors' report was taken as read. It stated that the revenue for the six months ending 30th September last amounted to £176,806 18s. 6d., from which are deducted the ordinary expenses of the company, £46,323 4s. 8d., leaving a balance of £130,483 13s. 10d.; of this amount £30,222 1s. 11d. is absorbed by special expenditure during the half-year, as shown in the accounts, and £828 13s. 1d. by income-tax, leaving the sum of £99,432 18s. 10d. net profits. An interim dividend of 1½ per cent., paid on the 14th of October last, and a further interim dividend of 1½ per cent. paid on the 14th inst., amounting together, with interest on debentures, to £98,425, leaves a balance of £1,007 18s. 10d. to be carried forward.

The CHAIRMAN said that the directors had at last succeeded in getting a concession from the French Government for the use of a direct line through France, which would enable them to utilise the Marseilles Malta cables, thus securing a more efficient line to Egypt. He referred to the regret with which the directors had received the retirement of Sir George Elliot, Bart., M.P., whose services to telegraphy were so well known. Referring to the accounts, he stated that, during the past half-year, the revenue was less by about £2,000; but it was a matter of almost universal notoriety that in that period Eastern trade had not been satisfactory, and the amount of telegraphic communication was consequently somewhat less. It was an encouraging feature that so far the falling-off had been confined to the Trans-Indian system; the falling-off had amounted to something like £10,000 on that system, but the Mediterranean and Australian systems had almost made up for that deficiency. From the opening of the Brazilian line, the increase on the other parts of this company's system had amounted to £8,000, so that the decrease was reduced to about £2,000. Owing to the depression of business in Eastern trade, the merchants who used the telegraph now, for the sake of economy, put as much in half-a-dozen words as they formerly put in twenty, consequently the amount of traffic which was going was quite as large, if not larger—in fact, there were something like 2,000 more messages sent, and something like £10,000 less taken. When Eastern trade was in a better condition, no doubt the company's traffic would return. He had always contended that telegraphy could not go backwards, but must go forwards. Referring to the increase of £21,643 in the expenses, he explained that the increase was owing to the screw steamer *Chiltern* having been engaged nearly all the half-year in repairing and relaying portions of the Lisbon cable, and the extra expense was for stores, &c., for that vessel, and also for fitting out the steamer *Hawk*. He did not anticipate that those expenses would be at the same rate in future. The London expenses had somewhat decreased; amongst other items, there had been a decrease of £1,000 in the directors fees, in accordance with what he stated at the last meeting. The reserve fund of the company was invested in Government securities, which could be put upon the Exchange and realised to-morrow if necessary. Referring to the threatened competition by certain parties who had obtained a concession from the French Government, and who were endeavouring to raise money by a syndicate for the purpose of laying a cable to Egypt, he was prepared to show that such an undertaking could not be attended with a fair amount of profit to shareholders who might invest their money in it. He said it might be asked how it was that gentlemen could be found willing to promote such a company, and he pointed to the fact that there were five telegraph construction companies in existence at the present time, who, as long as they could secure contracts, probably did not much care whether the shareholders in the telegraph companies got a profit, or not, out of the cables which they had laid. He believed that the Eastern Company was now so strong that it was impossible for any competition to succeed. Referring to the Indo-European Company, he said that up to the present time no arrangement had been come to with the company. He moved the adoption of the report and accounts.

SIR CHARLES WINGFIELD, K.C.S.I., seconded the resolution.

A discussion took place, in which Mr. STEWART, Mr. FINLAY, Mr. HAYWARD, Mr. W. ABBOTT, and other gentlemen took part, and, in answer to questions,

The CHAIRMAN said that this company's cables had been made by the Telegraph Construction and Maintenance Company, and he believed the Construction Company had given this company the best cables which could be made. As regarded the Lisbon cable, it was laid by the Government chart, but it was afterwards found that the soundings marked on that chart were in many cases fallacious; the cable was now relaid in soundings where it was believed it would last a much greater length of time. He had always stated to the shareholders that submarine telegraphy was more or less of a speculation, and though they were disappointed in not receiving the amount of dividend which he had referred to as probable at one or two previous meetings, still he was prepared to justify every statement he had ever made relative to the probable amount of dividend which they might expect to receive. As to any increase in the expenses, they must bear in mind this important fact—that, whilst there was a clamour, even amongst the shareholders, for a reduction of the tariff, yet, the more they reduced the tariff on submarine telegrams —say from twenty to ten words—even if they got the same amount of returns out of the ten words, yet they must get it at a very largely increased expense to what they paid on the twenty words. Therefore hey must not suppose that the expenses could be largely reduced; at the same time, the directors would exercise every economy consistent with efficiency. As regarded the £700 paid for medical charges, it must be borne in mind that there were twenty-five stations, so that the amount paid for attendance at each was very small, and it was absolutely necessary that the young men employed should have proper medical attendance when necessary.

The report was then adopted.

The retiring directors, Baron Emile d'Erlanger, Colonel Glover, R.E., and Lord William Hay, were re-elected; and the auditors, Mr. John Ball and Mr. H. Dever, were reappointed.

A vote of thanks to the chairman and directors closed the proceedings.

Monetary and Commercial.

Late telegrams from Japan report business very dull, and freights falling. The Government have started a weekly line of steamers to Shanghai, *via* Hiogo and Nagasaki.

The subjoined letters have appeared in *The Times* on the subject of six months' bank bills. An "Anglo Indian Banker" writes:—

"There is no physical impossibility in the way of assimilating the usance in India to that in Australia. If the value of Eastern produce is subject to such frequent and violent fluctuations, that is surely the best reason why the risk of advancing upon it should be lessened, and that the profit should be in proportion. Of late years, however, the case has been notoriously the reverse. It is quite true we have not the same control over the usance in India that we have in Australia—that is to say, so long as Rothschild and Baring allow themselves to be drawn on at six months there will be a difficulty; but it is the only difficulty in the way of reducing the usance. Nor are they likely to make any move in the matter so long as a suffering public shows no signs of impatience. But, as they can very well dispense with this long date, it is very improbable they would allow business to go past them in order that houses of an inferior standing might have an opportunity of ruining the trade for themselves and others.

"If a bill be perfectly good and discountable at the lowest rate of the day, it is of little consequence to the holder that it is not upon a firm whose wealth is 'beyond the dreams of avarice.' What has been done once may be done again. The usance in the East has already been reduced from ten months to six months, and we can most of us recollect when the par of exchange between Edinburgh and London was thirty days, whereas the charge for remitting money thence has now about reached the vanishing point. The world goes round on its axis, and big folks, as well as small, must go round with it. Your correspondent should have known that I spoke only of Anglo-Australian Banks, not purely Colonial Banks, whose head office is in the colony and whose proprietary are mostly colonial. Of course they must draw on a London banker in order that their bills may have free vent in the discount market."

"Australian" replies as follows:—

"It would, of course, be satisfactory if the usance on bills in the East could be assimilated to that in the Australian colonies, where the currency is sixty to ninety days' sight, but I cannot agree with 'An Anglo-Indian Banker,' whose letter appears in your Money Article of this morning, when he says 'What suits the Antipodes should apply equally to India and China.'

"The circumstances are, I submit, different. The produce which forms cover for bank drafts issued in Australia consists mainly of wool, and gold in the shape of bullion and sovereigns minted in Sydney and Melbourne. Nothing can be more satisfactory than such cover—the gold requires no comment; but, as regards wool, I can say that during my connection of a quarter of a century with Australian banking, I have never had experience of loss arising out of the hypothecation of this article.

"I doubt if any Indian banker can say as much for cover provided by Eastern produce, the market value of which is liable to frequent and violent fluctuations. In dealing with it an Indian bank requires, therefore, more time to turn round.

"But the Indian banks do not possess that control over the usance which is enjoyed by Australian banks. A large portion of their buying business consists in the purchase of clean bills drawn under the six months' sight credits of leading mercantile houses in London, and as long as these houses continue their issue so long will Indian banks be compelled to maintain the present usance. They cannot purchase at six months' and issue at sixty days' sight."

The directors of the London and County Banking Company have decided to recommend at their meeting on the 4th February the payment of a dividend of 10 per cent. for the half-year ended the 31st December last, after appropriating £15,000 to the reduction of premises account. This, with the June payment of 10 per cent., will make 20 per cent. for the year 1874. The amount to be carried forward will be £18,936. This compares with a similar dividend last year.

The Universal Marine Insurance Company (Limited) has issued its report for 1874, and from it we learn that the net premium income of the year was £264,679, while losses falling to be paid for amounted to £236,895. A second dividend of 5s. per share has been declared, making 10s., or 10 per cent., on the year.

The directors of the Ouvah Coffee Company (Limited) announce a dividend for the half-year at the rate of 10 per cent. per annum on the share capital, being at the same rate as that declared at the corresponding period of last year.

The Bombay Sugar Refinery Company (Limited) has been formed, with a capital of 750,000 rupees (or £75,000), in shares of 150 rupees (or £15), for establishing a sugar factory in Bombay or its neighbourhood. One thousand shares are to be allotted in England.

The failure is announced of Malcolm M'Donald, sole partner of the firm of Malcolm M'Donald and Co., merchants and manufacturers, West Nile-street, Glasgow, and St. Louis, United States, with liabilities of nearly £34,000. There is a realisable dividend of 4s. 5d. in the pound, without allowing for the expense of sequestration.

The Market for Bar Silver has not continued quite so firm, and some transactions have been done at 57½d. to 57⅝d. per oz. There have been no transactions in Mexican dollars.

The bullion per P. and O. steamer *Malwa*, from Southampton, Jan. 28, was in gold, to Galle, £1,432; in silver, to Singapore, £6,800; to Hong Kong, £1,200. Total in gold, £1,432; in silver, £8,000.

ARTICLES OF IMPORT.

A general tone of quietude has continued to be the ruling characteristic of the Produce Markets during the week, and the business done has again been very limited in extent. Tea and Silk, although dull, have been fairly firm, and Coffee has maintained the advance established last week. Pepper and Spices have been steady, with some business doing, but all other articles, especially Rice, have been and continue very dull.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—Privately the market has been very quiet during the week, but a larger quantity has been offered at public auction than for some time back, a large proportion consisting of Canton Scented Teas. Prices for all good kinds of Congou have been fairly maintained, but Canton Capers have given way about ½d. per lb. for common to fair kinds. The public sales have comprised 28,000 packages, all offered, and sold without reserve, about 16,000 packages being Canton Scented Teas. The deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	3,238,035	2,054,481
Coastwise	861,713	858,173
Exports	669,770	328,742
Total delivered	3,769,568	3,241,396

Congous.—Red-leaf kinds: Siftings have not been so readily saleable, and prices show a slight decline for the commoner qualities. Broken-leaf kinds show no material change. Fair to good common have sold about ¼d. to ½d. per lb. lower at public sale. Fair to good medium Kaisow and Saryune kinds show no alteration. Good to fine Kaisows remain firm. In finest transactions have been few at about former rates. Pak Lin kinds remain as last week. Black-leaf kinds: Old season's common sold, at public sale, at 9½d. to 9⅝d. per lb. In fair to

Digitized by Google

good common prices show no alteration. Fair to good medium have been sold to a moderate extent at last week's prices. Good to fine remain firm. In finest sales have been limited. New make Canton kinds have been freely offered, and prices fo fair quality have been barely maintained. Oolongs maintain the improvement recently noted. In Souchongs, fair to good have been difficult of sale; fine remain as before. Scented Teas: Canton Capers have been freely offered, both privately and at public auction, at the latter about 11,000 boxes have been sold without reserve, chiefly at prices ranging from 10d. to 11½d. per lb. for common to good fair kinds, showing about ½d. per lb. decline. About 5,000 boxes of Canton Orange Pekoe have also been sold without reserve, chiefly from 10d. to 1s. 1½d. per lb., being also easy rates. Foochow kinds: Capers show no improvement; business in Orange Pekoes has been moderate at about previous rates. Green Teas: There has been a rather better market, owing to enquiry for export, and last week's rates have been fully maintained.

SILK.

Messrs. Kilburn, Kershaw, and Co.'s Circular says:—The public sales which commenced on the 19th ult. were concluded on the 22nd. The total quantity offered was:—China, 3,590 bales; Canton, 228; Japan, 516; Bengal, 61; total, 4,395 bales, of which the greater portion was printed without reserve, or taxed at prices which ensured its sale; there was a steady but not active competition for all such Silk, and the demand was chiefly for Tsatlees, prices of which have fully established the rates previously ruling by private contract; say 12s. to 12s. 6d. for common and inferior Tsatlees, 12s. 9d. to 13s. 6d. for fair to good Nos. 5 and 4¾, 14s. to 14s. 6d. for fair to good 4½, 14s. 8d. to 15s. 1d. for Red Peacock, 15s. for Ku Kee Kin Hock, and 16s. to 16s. 6d. for Ku Kee Chin Jan; a few parcels of 3½ and higher grades were also sold without reserve, but part was damaged; the prices realised were from 16s. to 19s. 8d. Kahing Taysaam of the better kinds were not much wanted; but the lower sorts sold at 10s. 10d. to 11s. 6d., and 9.12 moss at 11s. 1d. to 11s. 2d., Skeins 10s. 9d. to 11s. 1d. Of Canton Silk the quantity was very small, and readily taken at 11s. 7d. to 12s. 1d. for ordinary to good No. 4 Tsatlee. Japan Silk was neglected, and sold only at low prices.

The general market is quiet since the public sales, but there is nevertheless a steady inquiry for China Silk at the full rates of last week, with a decided tendency to higher prices, Tsatlees still continuing in most favour, and the lower grades being more specially in demand. Canton Silk is unchanged, 12s. being difficult to get for good No. 4, while some old common parcels have found buyers at 11s. to 11s. 3d., price being the object. Japans and Bengals are both very quiet. The deliveries of China Silk are very satisfactory. Deliveries from 1st to 29th instant:—China 3,456, Canton 346, Japan 642, Bengal 166 bales. Total bales, 4,610.

COFFEE.—The demand has been well sustained, and the sales have gone off with spirit at the extreme of last week's rates to 1s. per cwt. advance. Closing prices are: Plantation Ceylon, bold 105s. to 108s. 6d., middling to good middling 101s. to 103s. 6d., rather small and low middling 94s. 6d. to 99s., small grey 90s. to 92s., peas 119s. to 122s. 6d., triage 80s. to 92s. Native, good ordinary 93s. The sales have included 312 bags Singapore pale mixed with blacks, realising 78s., one lot 78s. 6d. per cwt.

CIGARS.—In public sale 2 cases Manila were quitted at 5s. 6d., and 13 cases Manila cheroots at 5s. 9d.

CHINA PRESERVES.—An offer of 597 cases Ginger was bought in at 7d., but 55 casks were quitted at 5¾d. per lb.

COTTON.—The market has shown a stronger tendency, and a good business has been done on the spot at full prices, viz. Tinnivelly, 5½d. to 5¾d.; Western Madras, 5½d. to 5⅝d.; Bengal, 4¼d. to 4⅜d.; Western Madras, 5 3-16d. for good fair, landing.

CANES.—500 Malacca sold, mouldy and retied at 1¼d.; 26,740 Borneo at ⅞d. to 1⅛d. and 10,000 ground Rattans at 1½d.; 65,000 Tonquin out at ⅜d. to ½d., 6,695 Penang Lawyers at 2¼d. to 5¼d.; 1,500 Dragon sold at 3d. each.

GAMBIER meets a steady sale at previous rates; 1,128 bags cubes in auction were chiefly sold, free pale at 40s. 6d., and slightly run at 40s. per cwt.

PEPPER.—A small supply of Black brought forward; 1,412 bags chiefly sold at rather firmer prices, viz.:—219 bags grey West Coast Penang at 5⅞d. to 6d.; 281 bags Saigon at 6d., one lot at 6⅛d. for good clean, and 5⅞d. to 5⅞d. for unsifted; 531 bags Singapore at 6d. to 6⅛d. for good, and 6d. per lb. for greyish; 200 bags dull Singapore were bought in at 6d. Of *White* there has been no Singapore or Penang in the sales.

SUGAR.—There has been only a limited business during the week in East Indian kinds, prices showing little or no alteration. On the 22nd ult. 2,520 mats and 1,294 bags Penang chiefly sold, cane at 19s. to 20s. 9d., and low to good brown and common date at 17s. On the 25th 1,500 tons old landed Taal and Zebu were sold at 16s. On the 26th 100 baskets low date Penang (out of 2,448 baskets offered) sold at 15s. On the 28th 1,900 bags sun-dried Ilo Ilo were sold at 19s. per cwt.

SPICES.—*Cinnamon:* All offers bought in, viz., 54 bales 1 parcel 2 boxes Ceylon at 3s. for firsts, 2s. 6d. for seconds, and 2s. 3d. per lb. for thirds. *Cassia Lignea* has gone rather cheaper, but 1,000 cases offered were all sold at 56s. to 57s. per cwt. for fair unworked. *Cloves* are dearer; 30 cases Penang sold at 2s. 2d. to 2s. 2½d. per lb. *Mace* has brought late value, and of 84 packages about four-fifths sold, good red Penang at 3s. to 3s. 3d., middling at 2s. 9d. to 2s. 10d., common at 2s. 6d. to 2s. 8d., chips and packages 1s. 9d. to 1s. 10d. *Nutmegs* have met a steady demand at late rates; of 103 packages Singapore and Penang catalogued 75 packages sold, fine brown, averaging 61 nuts to the lb., at 4s. 4d., 64s to 66s at 4s. 1d. to 4s. 2d., 74s at 3s. 9d., 73s to 76s at 3s. 8d., 77s to 79s at 3s. 7d., 85s at 3s. 5d., 110s and 113s at 2s. 9d. to 2s. 10d., and 126s at 2s. 8d.

SAGO is dull; 1,224 bags were offered and chiefly bought in, 70 bags good large selling at 18s., and a few lots small at 17s. to 17s. 6d. for brownish to good small. *Flour:* Of 267 bags Singapore offered 40 bags fair pinky sold at 14s. 3d. The sound of 1,067 bags Borneo was bought in at 14s. 3d., the damaged selling at 10s. to 13s. 6d. per cwt.

TAPIOCA.—The market appears rather quiet, but good qualities support their value. Of 1,561 bags flake offered the greater part sold somewhat slowly, good Penang at 2½d. and small to good bold Singapore at 2¼d. to 2½d. per lb. *Pearl* went barely up to late rates; 560 bags partly sold, fair bold medium at 21s. 6d.

TOBACCO.—At public sale 249 bales China were partly sold at 5d. to 8d.; 56 boxes ditto damaged at 2¾d. to 4d. Of 1,490 bales Japan, a large portion was placed at 6d. to 8¼d.; 1 bale ditto repacked damaged at 3d. Two bales repacked damaged Java sold at 3d.

TIN.—For consumption there is a fair amount of business doing, and there are some transactions for forward delivery. The large arrivals this month have kept prices in check. The bi-monthly sale of Banca took place in Holland on the 27th inst., when 22,600 slabs were sold at average 56.10, equal to £98 per ton in London. The current quotations are Straits on the spot £92 10s., afloat £91 10s., Banca £98, Billiton £95 per ton.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

Quietness has become the characteristic feature of the Manchester Market, and the demand for both Yarns and Goods has been of a limited character. Up to the 26th ult. the attitude of producers was firm, and their quotations unaltered, but the weaker tone of the Cotton Market has brought out more disposition to accommodate in respect of prices, more particularly where orders have run out; and where distinct offers have been made, sellers of both Goods and Yarns have been willing to make slight concessions, without at all pressing sales, and these reductions apply only to medium and ordinary goods.

FREIGHTS AND CHARTERS.

There is no alteration of importance to report in rates of freight to the East since our last issue; the berths are fully supplied with tonnage. Homeward chartering is quiet.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 65s. weight, 55s. meast. To Hiogo: 70s. weight, 65s. meast. To Nagasaki: 75s. weight, 70s. meast. To Shanghai: 50s. weight, 40s. meast. To Hong Kong: 50s. weight, 40s. meast. To Singapore: 50s. weight, 40s. meast. To Penang: 40s. weight or meast. To Colombo: 35s. weight or meast.

Per SAILING VESSELS.—To Yokohama: 40s. weight, 35s. meast. To Hiogo: 45s. weight, 40s. meast. To Nagasaki: 50s. weight, 40s. meast. To Shanghai: 35s. weight, 25s. meast. To Hong Kong: 35s. weight, 30s. meast. To Singapore: 25s. weight, 22s. 6d. to 25s. meast. To Batavia, Samarang, and Sourabaya: 27s. 6d. weight, 27s. 6d. to 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Singapore: £24. To Penang: £25, f.c. To Galle: £23.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Shanghai: 35s. To Singapore: 25s. to 26s. To Colombo: 25s. To Galle: 23s. to 24s. To Batavia and Sourabaya: 24s. to 25s.

From Birkenhead, per ton.—To Singapore: 20s.

CASUALTIES.

The Duchess, Smith, arrived at Falmouth, Jan. 23, from Panaroekan, with boat smashed, and bulwarks carried away.

BATAVIA, JAN. 22.—The Leila, from New York to this port with petroleum, has stranded off Anjer, and will become a total wreck; part of cargo will be saved.

YARMOUTH, JAN. 24.—The Duke (barq.), of North Shields, bound to Singapore with coal, was in collision in the roads, and lost bowsprit and received other damage. She arrived at Gravesend, 26.

ROTTERDAM, JAN. 23.—The Thorbecke, Klasen, from Batavia to Amsterdam, grounded on the Harsens while entering from Nieuwe Diep.

Advices from New York, 13th Jan., state that the Flying Spur (ship), of London, Croot, arrived there, 12th, from Manila, reports:—Oct. 29 was struck by a heavy sea, which damaged rails, bulwarks, decks, and stove boats, &c.; Jan. 9, forty miles S.E. of Sandy Hook, experienced a heavy N.W. gale, and the next day a frozen vapour drift set in, which lasted 12½ hours; a severe frost at the same time caused the vessel to be completely icebound as high as twenty feet above the deck, and prevented anything being seen at twenty yards; several of the crew had their hands badly frostbitten.

RYDE, I.W., JAN. 26.—The Queensberry (barq). Herring, from London to Colombo, anchored yesterday, with loss of sails and some head gear.

The Pride of the Ocean, Welsh, from Batavia, arrived at Plymouth Jan. 26, with loss of jibboon and part of bulwarks.

FALMOUTH, JAN. 26.—The Ella, Christie, from Cardiff to Hong Kong, with coal, has put in here with decks started, and making a little water.

BREST, JAN. 26.—The authorities at Conquet telegraph that the Queen of the Colonies (ship), from Batavia to Falmouth, with sugar and coffee, has anchored in distress on the Pierres Noires, and request that a Government steamer may be sent to her assistance. The Souffleur has been despatched to the Pierres Noires to assist the Queen of the Colonies and tow her here; weather foggy. Jan. 27th.—The Queen of the Colonies was stove in and sunk near Beniguet, last night; the vessel lies, it is said, on sand, with upper works uncovered at low water; little hope of salvage; heavy sea. CONQUET, JAN. 27.—The Queen of the Colonies is a total loss in Brest Bay; all the crew saved.

MISCELLANEOUS.

At MAURITIUS.—Dec. 19, Ephrem, Vaujoyeux, from Colombo.

DEAL, JAN. 26.—The Edelina, Chalmers, for Singapore, which put back to the Downs yesterday, is detained owing to crew being refractory.

The James Vinicombe, Macpherson, from Sunderland to Anjer, anchored off Deal, Jan. 27, with part of crew refractory.

NOTICES TO MARINERS.

Japan—Nipon, East Coast.—Revolving Light on Inuboye Saki.—The Japanese Government has given notice, that from the 15th November, 1874, a light would be exhibited from a lighthouse recently erected on Inuboye Saki, east coast of Nipon. The light is a *revolving* white light, showing a bright flash once *every half-minute*, elevated 168 feet above the level of the sea, and in clear weather should be seen from a distance of nineteen miles. The illuminating apparatus is of the first order. The lighthouse, 105 feet high, is a circular brick building, painted white. Position, lat. 35° 43′ 30″ N., long. 140° 53′ 30″ E. The light is obscured towards the land over an arc of 104° or between the bearings of E.N.E. and S. ¾ E.—Hydrographic-office, Admiralty, January.

Strait of Tsugar.—Harbour Light at Awomori.—The Japanese Government has given notice, that from the 1st November, 1874, a *fixed* white harbour light would be exhibited from a staff placed about 100 yards from the high water mark, in front of the town of Awomori, Strait of Tsugar. The light is elevated forty-five feet above the sea, and in clear weather should be seen from a distance of six miles. Position, lat. 40° 51′ 45″ N., long. 140° 45′ 15″ E.—Hydrographic-office, Admiralty, January.

Malacca Strait.—Red Pier Light at Malacca.—The Master Attendan at Singapore has given notice, that from the 7th November, 1874, a *red* light would be exhibited on the pier head at Malacca. In clear weather it should be seen from a distance of six miles.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.
Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 6d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the Fakirs that I was a doctor, and that I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an immediable effect upon the patient, which satisfies him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

OSLER'S GLASS CHANDELIERS.

WALL LIGHTS AND LUSTRES FOR CHANDELIERS IN BRONZE AND ORMOLU

KEROSENE, MODERATOR AND OTHER LAMPS FOR INDIA AND HOME USE.

TABLE GLASS OF ALL KINDS.

ORNAMENTAL GLASS, ENGLISH AND FOREIGN

Per steamer *Venice*, to leave London Feb. 10.—For Hong Kong: Mr. A. Steinmitz. For Yokohama: Mr. Otto Bottiger.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The Pacific mail Company's steamer *Colorado* arrived at San Francisco on the 21st ult., with advices to the 22nd December. An account of her detention *en route* will be found in another column. The following summary of news has been telegraphed to New York :—

The final argument in the *Maria Luz* case in Japanese, in course of arbitration by the Emperor of Russia, is now being prepared at the Japanese Foreign-office, under the direction of E. P. Smith. The existing arrangement is found to be unsatisfactory to both sides. One detail of the dispute, on the part of the Chinese, which remains to be adjusted, is the towing of junks from the Foo Choo Islands to the province of Fu-Kien. Hitherto the junks have had to pay an annual sum for commercial privileges. The Japanese Government orders that this be discontinued, and asks that the system be abolished by the Chinese authorities.

Arrangements had been completed for beginning the new postal system on the 1st of January. All the preliminaries were satisfactorily settled, except for the reception of letters from Yokohama in Hong Kong, which point was overlooked by the United States Government. The Japanese Government will undertake the mail delivery at Hong Kong until the deficiency is made good.

Much comment has been excited in Yokohama by the extraordinary disposition of a case made by the Consul-General of the United States. A sailor belonging to the United States steamship *Lackawanna* was brought before the Consular Court, charged with drunkenness and assault. On being questioned as to the place of his nativity he replied that he was born in Liverpool. Thereupon the Consul-General sent him before the British Court, where he was fined. The same man had been previously tried and punished for a similar offence by the Consul-General of the United States, whose refusal to exercise jurisdiction in the present case is attributed to a quarrel with Captain McCaulay, of the *Lackawanna*.

A Government decree for the relief of the poor throughout the Empire announces that any pauper, permanently incapacitated to work by accident, or any invalid over seventy years of age, shall receive annually ten bushels of rice. Persons without family, temporarily incapacitated, shall receive one pint of rice daily. Orphans under fifteen, and all persons over seventy, shall receive annually three and a half bushels of rice.

The last of the Japanese troops left Formosa in the latter part of November, and arrived at Nagasaki in the first week of December. General Saigo was expected in Yedo on the 27th of December, when a grand demonstration was to be made in his honour.

Several applications for naturalisation have recently been made

Digitized by Google

the Japanese Government. At present there is no authorisation for a change of allegiance.

The Japanese Government has appropriated $1,600,000 for the construction of wharves in the harbour of Yokohama. The work is to be commenced immediately.

A new Japanese mission will proceed to Korea in January or February, with instructions to bring an envoy from that country to the Court at Yedo.

The new Austro-Hungarian Minister, Chevalier Von Schaefler, arrived at Yedo, and presented his credentials to the Mikado on the 18th of December.

Machada, formerly an officer in the Department of Education, has been appointed Commissioner from Japan to the Centennial Exhibition at Philadelphia.

CHINA.

—o—

SHANGHAI.

The present mail brings advices from this port to the 25th December; the French mail from London November 6 was received the day this mail left. The following summary of news is from the *North China Herald*:—

The *Horatio* has been burnt to within a few feet of the water's edge, and but for the intervention of the copper, would have been burnt still lower. At the sale of the wreck the following prices were realised: the anchors and chains in the stream Tls. 125, Lots 2 and 3; the hull and coals, Tls. 2,660, Farnham and Co.; anchors and chains on board, Tls. 110. The masts, yards and gear, &c., Tls. 180; total amount realised, Tls. 3,075. We regret to learn that Mr. Crownshields, the chief officer of the *Horatio*, who was very badly burned during the destruction of the ship, has died at the Hospital.

At a meeting of the North China Insurance Company, term 1875-77, Mr. J. A. Maitland in the chair, the representatives of Messrs. Adamson, Bell, and Co., Gibb, Livingston and Co., Gilman and Co., Turner and Co., and Thorne Brothers and Co. were elected directors, and Messrs. Rowley Miller and Peter Maclean auditors. It was announced that a dividend of Tls. 300 per share would be payable in January, and that the business done by the old company had proved very satisfactory. So far as is known, the company lose only the small sum of $700 by the burning of the *Japan*.

In the Supreme Court the case "Chaya Yahichi (a Japanese), appellant, *v.* Walter Mourilyan and Charles Adolph Heimann, trading as "Mourilyan, Heimann and Co.," respondents, was heard before Sir Edmund Hornby, Chief Judge. It was an appeal from the judgment of the provincial Court at Hiogo, in a case wherein the appellant, then plaintiff, sued the defendants, as agents of the steamer *Wasshi*, for the sum of $2,369, for breach of charter-party. Mr. Hannen appeared for the respondent, the appellant being unrepresented professionally. His lordship characterised the case as being a very important one as between natives and foreigners, and reserved judgment upon the points raised.

The Supreme Court, R. A. Mowat, Esq., sitting as Registrar, with Messrs. A. J. Little and M. Coryell as Assessors, has heard arguments on reference, in the case of the sinking of the *St. Francois*, French barque, while lying at the Shanghai and Hongkew Wharf, by the *Cawdor Castle*, steamship. Mr. Robinson appeared on behalf of Captain Simon and the owners of the barque; and Mr. Wainewright for the owners and agents of the *Cawdor Castle*. The arguments of the learned council extended to considerable length, and involved on both sides much technicality of marine law. The Registrar, at the conclusion, briefly intimated that the Court sustained the contention on the part of the brig, which was that, as the steamer was the wrong-doer, the owners of the brig had a legal right to refuse to receive back their vessel, even after she had been raised and repaired by the defendants, and to claim compensation by payment of her full value. The Court afterwards proceeded to hear evidence on the three items of the value of the vessel, her stores, and freight.

At a meeting of No. 1 Company, S.V.C., Lieut. Sim in the chair, it was unanimously resolved, on the motion of the Chairman, seconded by Private Milsom, to recommend the appointment of Capt. Brewer to the Municipal Council, as Captain of the Company. The Chairman, in making the nomination, referred in complimentary terms to Capt. Brewer's past services in connection with the Corps, and remarked that the rather small attendance at the meeting—one-third of the Company—was to be accounted for by the fact that the members regarded Capt. Brewer's election as a foregone conclusion. It was then suggested that the sergeants should ascertain, by circular among the members, what hours and what days it would be most convenient to have drill. The new uniform of the Company, it was mentioned, is to arrive by the next French mail.

The new steamer *Hankow*, consigned to Messrs. Siemssen and Co., has arrived alongside the Shanghai and Hongkew Wharf. She is a very fine specimen of naval architecture, being 2,400 tons register, 407 feet in length, and 42 feet beam, with 28 feet depth of hold. She was built by Messrs. C. Mitchell and Co., of Newcastle-on-Tyne, and is fitted with compound engines of 500-horse power by Messrs. R. and W. Hawthorn and Co. The cylinders are 52 and 96 inches in diameter, and the engines have all the latest improvements, including steam reversing gear, condensers, &c. The saloon accommodation is of the highest class. Among other comforts each cabin is provided with an electric telegraph to the pantry, to summon the steward or attendants, the particular cabin being indicated by a number. On the poop is a very comfortable smoking room. She has accommodation for seventy-two first-class passengers. In the wheel house a novelty is to be seen in Cameron's patent steam steering gear. By means of this, the helm can be put hard over each way with a very trifling exertion and movement of the wheel, which is not more than two feet in diameter. She is also fitted with steam winches and windlass. The average speed of the vessel is 10½ knots per hour on a consumption of thirty-eight tons of fuel per day. The passage from London was made in fifty-five days eight hours steaming, and the total consumption of coal was 1,890 tons, the number of revolutions made from Gravesend to Woosung being 2,820,670. The *Hankow* was detained three days at Woosung, and had to discharge a large quantity of cargo before she could be got over the Bar.

Capt. Thomson, of H.M.S. *Modeste*, has taken leave of his officers and crew, on departing for Hong Kong, to take command of H.M. surveying and discovery ship *Challenger*. The crew were all mustered aft, when Capt. Thomson announced the termination of his command of the *Modeste*, and expressed the regret he felt at severing a connection which had been to him one of uninterrupted satisfaction. In the evening the ship was illuminated with blue lights, and, amidst the loud cheering of the crew and the music of the band, Captain Thomson, escorted by the whole of the officers off duty, proceeded to the *Bangalore*. The cheering was renewed again, and was supplemented by that of the crew of the British merchantman *Northampton*, which also exhibited a blue light and sent up rockets. The *Modeste*, under Captain Thomson's command, has been what is significantly termed amongst British blue-jackets a happy ship, and general regret is felt at losing so popular a commander, while at the same time the men feel a degree of pride that he should have been selected for so important a command as the *Challenger*.

On the 18th Dec. two firemen, named Thomas Redmond and Alexander Kehoe, belonging to the steamer *Achilles*, after a few hours' leave on shore, went off to their ship in a sampan, taking with them a camphor wood chest, which had been purchased by Redmond. The third officer, Mr. Duggan, hearing a disturbance alongside, went to the gangway to ascertain the cause, and saw a man, who afterwards proved to be Redmond, in the water. Mr. Duggan ran down the gangway ladder, and succeeded in grasping and, with the assistance of the quartermaster, hauling him on to the ladder. Redmond then said that he wanted to get his chest on board himself, and also to help his companion on board, and in order to do this he jumped rather suddenly into the sampan, the consequence of which was that all went overboard together. Kehoe never rose again, but Redmond managed to keep afloat by paddling. Mr. Anderson, chief officer, who had been attracted by the noise, got into a sampan, and endeavoured to rescue Redmond, but he sank within two yards of the proffered help. The sampan was allowed to drift with the tide near to the floating chest and a hat belonging to Redmond, but nothing was seen of either of the men afterwards.

A case of some suspicion happened on the river on the 17th Dec. A marine named Edward Carpenter, belonging to H.M.S. *Ringdove*, visited an acquaintance on board H.M.S. *Modeste*, and got into a sampan in order to return on board his own vessel, about ten o'clock. He did not report himself on board, and as he was also missing from next morning's parade, every place was visited which men-of-war's men are known to frequent, but without avail. A sequel to this mysterious affair is, that neither the sampan man nor sampan have since been seen, although the boat was in attendance on the ships above named.

The Concordia Theatre was crowded on the 23rd Dec. with the guests of the Club Liedertafel and Theater Verein, and the entertainment provided by the courteous hosts was very enjoyable and therefore successful. It consisted of a one-act farce, *Carlchen's Erste Liebe*—Young Carl's First Love—and a short and particularly droll comedy, *Herr Meidinger und sein Contrabass*"—Mr. Meidinger and his Double Bass. The more prominent characters in both pieces were admirably taken, and the subsidiary ones were fairly filled. Before the rising of the curtain and between the plays the audience were regaled with some charming pianoforte duets, and the few accompaniments called for during the performance were neatly and tastefully given by the same talented amateurs.

Pedestrians who take their evening walk in the direction of Yangtsepoo, and who enjoy the bracing effect on the muscles of climbing the Alpine heights of Hongkew bridge, will learn with regret that the Municipal Council invite tenders for lowering that admirable structure which forms the only eminence of any note in Shanghai. It is another instance of the levelling ten-

Digitized by Google

dencies of the age; but we are glad to make the announcement, because we sympathise with the jinricksha coolies, for whose benefit doubtless the change has chiefly been resolved on. Had the community generally been worthy of consideration, it would have been carried out long ago.

We desire to call the attention of the Municipal Council to a growing evil, in the hope that at the forthcoming meeting of landrenters in May next something may be done to suppress, or at least reduce it. Under the existing regulation there seems to be no limit to the number of licenses issued to wheelbarrow coolies, and at the present moment the settlement is infested by no fewer than 2,000 of them. During the past six weeks or two months they have increased by nearly 400, and the cry is still they come! The police cannot stop them, and are powerless to prevent the nuisance and danger they create in the public thoroughfares. The bund and other leading thoroughfares are crowded with them, and they enter into brisk competition with the jinricksha coolies in soliciting almost every well-dressed passer-by to take a ride. They are troublesome to pedestrians and dangerous to drivers. The present tax of 200 cash per month each on barrows is not sufficiently high to prevent still further accessions to this not altogether desirable class, and the questions may be asked, where do they come from, and what are they? A little inquiry shows that they are chiefly field-labourers, who come from various parts of Kiangsu, whose rate of wages is about 1,000 or 1,500 cash per month, but who, hearing of the El Dorado of Shanghai from friends who have returned home with cash enough to enable them to rent or buy a little land on their own account, hasten hither with their barrows from distances of fifty, a hundred, and in some instances a hundred and fifty miles, in the hope of doing likewise. Hence the great increase of this immigration, to which we wish to draw attention. To limit the number by hard and fast line would perhaps be considered impolitic; but it is possible so to raise the monthly tax, both on wheelbarrows and jinrickshas, as to keep the traffic within narrower limits, without interfering with the advantages which the public receive from competition, even among coolies.

A serious riot has occurred at Taichow, in the Teentai district. In consequence of the tax on rice having been increased, the people rose *en masse*, to the number of ten thousand, about twelve days ago, and attacked the Chehsien's yamen. They were opposed by the guard, but these, it is reported they either killed or compelled to fly. The gentry came to the assistance of the officials, but as usual with the Chinese when they get thoroughly excited, the rioters had become perfectly reckless and uncontrollable. A leading gentleman and the son of the Chehsien were killed, and the district magistrate himself narrowly escaped sharing their fate, having been rescued only after he had received cuts on the head, shoulders, and leg. Soldiers have been sent to Taichow from Ningpo and other places to the number of 1,500 or 2,000 and it is said that some six or eight executions of rioters have taken place already. The ringleaders, with a numerous following, have fled to the hills, however, whence it will be almost impossible to dislodge them if they are provisioned to stand a siege.

The *Peking Gazette* contain official reports by the Governor of Kwangtung and the Customs' Taoutai at Canton, upon the great typhoon of 22nd September. Although these reports come rather late in the day, they will be read with some degree of interest. They refer chiefly to the loss of life among Government servants and the damage likely to result to the revenue from the destruction of tax stations and the disturbance of trade. The joint memorial (No. 3 of Nov. 30) reads somewhat as if Hong Kong and Macao were regarded as legitimate centres for the collection of Chinese revenue, instead of ports under foreign Governments.

NINGPO.

The *North China Daily News* states that instances of interference with missionaries have again to be reported from the Chekiang province. At Ping-gan-hsien, a city in the prefecture, and to the south of Wanchow, the Rev. Mr. Stott and another gentleman, who had recently established a Mission station there, have been compelled to retire to the prefectural city, where they remain, having claimed the protection of the Chifu. The two missionaries had rented a house in Ping-gan, with the full knowledge and tacit consent of the local authorities; but though no preliminary opposition was offered, they had no sooner got into their new quarters than a popular outcry was made, just as at Huchow; a mob congregated, wrecked the premises, and compelled the Missionaries to withdraw. On complaint being made to the Chifu at Wanchow, he ordered reparation to be made and the issue of a proclamation setting forth the objects and the rights of the missionaries, and enjoining respectful treatment of them. The recurrence of these outrages, however, tends to show that something more than simple reparation for the actual damage done will have to be insisted on. The rowdies, instigated by the *literati*, seem to regard an attack on missionaries as an exciting kind of amusement. Although the immediate satisfaction offered may be accepted in the meantime, it is hoped that the matter will be further represented at Peking, with the view of impressing strongly on the Chinese the gravity that such outrages acquire from the frequency with which they occur in this province.

Fears are said to be entertained regarding the safety of the Church of England Mission at Szchee, about ten miles from Ningpo. A dispute had arisen between a resident in Szchee and the head of the native Christians in the district; and as demonstrations of ill-feeling against the Christians were being made, the Taoutai has sent an officer, in company with an officer from H.M. Consulate, to endeavour to settle the difficulty.

HONG KONG.

Our advices by the present mail extend to the 31st December; no later mail from London had arrived out. The following items of news are from the *Hong Kong Daily Press*:—

An extraordinary general meeting of shareholders of the Union Insurance Society of Canton was held on the 28th Dec., to confirm the resolutions passed at the meeting held on the 11th Dec. There were present:—Messrs. Pyke (Chairman), Sassoon, Hon. J. Whittall, Messrs. Lowcock, Hoppius, Hon. R. Rowett, Messrs. Ede (Secretary), Andre, Karberg, Landstein, Cairns, Alabor, and Nelson. The Chairman proposed that the resolutions passed on the 11th December be now confirmed. Mr. Nelson seconded. The resolution was passed unanimously, and the meeting then terminated.

A very large tiger has been entrapped in a pit over on the Kowloon side, about twenty miles inland. The Chinese who caught the animal came over here to invite some Europeans to go and shoot it, to enable them to make medicine out of it. Two Europeans accordingly set out, but one of them broke down five miles off the place, and the other went on. On his arrival at the spot, seeing the tiger was such a fine specimen, he at once struck a bargain and bought it. It will shortly be brought over to Hong Kong to be exhibited.

On the 30th Dec. the three prisoners charged with complicity in the *Spark* outrage were again brought before Mr. May, the magistrate. Mr. Brereton appeared to prosecute on the part of the Chinese Government. Some further evidence having been given as to the identity of the accused, Mr. Brereton put forth his points of application for rendition. These were cited at considerable length. After a considerable amount of argument as to the powers of the magistrates to commit the prisoners for trial, or to make a report to H.E. the Governor, and remand them to jail pending instructions, it was ruled that they had power to do both, and, accordingly, after discharging the third prisoner, the other two were told they would be committed for trial at the criminal sessions of the Supreme Court, and were asked if they chose to make their defence here. They made answer they would make it here. Mr. Brereton objected to the course taken by the magistrates to send the case to the Supreme Court. The prisoners then made the subjoined statements:—

The first prisoner said he had been thirty-three years in this colony and had never been out of it. He was eighteen years of age when he first came to Hong Kong, and had been master of a pullaway boat for thirty years. On the sixth moon of last year (July 1873) the witnesses Chun Ng Mui, and Chun Ayuet, asked him to take them to Stonecutter's Island. There were three other men with them. He refused to take them as it was 6 P.M. They abused him, and threatened to take him into custody. He told them to do so. After some angry words one of the five men said, "never mind, we will take a passenger boat." They then left. He believed this false charge was brought in consequence of that. He had witnesses.

The second prisoner said he had been three years in this colony. He was a fisherman from Toongkoon, and had a licensed boat. In the summer he fished at Shung-wan and in the winter over at Yow Mah Tee. He had never been away from the colony. He did not know any of the witnesses. He did not do anything to them. He did not know why they brought this charge against him. He believed they did it for the reward offered.

Inspector Horsepool said none of the witnesses pointed out the prisoners. The man who pointed them out had never been seen since their apprehension. The second prisoner said he never saw who pointed him out, as when he was arrested he was asleep. The evidence of five witnesses for the defendants was then taken, all of whom testified that the prisoners were in the Colony on the day of the piracy.

The defendants were then committed for trial. In the course of the proceedings two witnesses were charged with having given false evidence. One was acquitted and the other remanded for further investigation.

We understand that Colonel Loring, the American Vice-Consul here, has received a communication from the United States' Consul at Swatow, stating that he had sent a messenger to the wreck of the *Japan*, and that its exact locality had been ascertained. He also mentions that the bodies of two Chinamen, with upwards of $2,000 in gold upon them, had been picked up.

The sunken steamer *Leonor* has been successfully removed from the old spot in front of the Insurance Engine-House, and has been towed down near the New Pier, at Wanchi, for the purpose of beaching her.

THE BURNING OF THE "JAPAN."—OFFICIAL ENQUIRY.

The official enquiry into the loss of the *Japan* has been held at the American Consulate. The Court comprised:—H. S. Loring, Esq., Vice-Consul, President; Commander Lewis, U.S.N. *Yantic*; Lieut. Gillpatrick, U.S.N. *Yantic*, and Captain Clough

Digitized by Google

(mercantile marine), American ship *Malay*. The principal points of the evidence adduced were as follows :—

John Henry Cosgrove stated : I was chief engineer of the *Japan*. I have been chief engineer of different ships between seven and eight years. I have been in the service of the P.M.S.S. Company since 1856. The fire originated about half-past seven o'clock on the night of the 17th Dec. The first intimation I had of it was the sounding of the engine-room, going to stop the engine. At the moment of the first alarm I was in my room. I was not on duty. I went directly to the engine-room te see what was the matter. I next went to the steam-pumps. I had a great difficulty in getting to the pumps. I could not get to the amidship pumps on account of the fire and smoke. After starting the forward pumps and getting two or three streams of water to bear on the fire, I succeeded in reaching the amidship pumps. I was calm and collected at this time. All the outward discharges were attended to. The third assistant and the first assistant engineers were in charge when the alarm was given. I asked if the pumps were started, and being told "no," I went to them myself. Not two minutes had elapsed from the time of the first alarm till the starting of the pumps. The room was full of smoke when I got there, and all the lights were out but one. Fire was coming through the forward bulkhead, dividing the engine-room from the freight deck. I do not know what freight was stowed there. I saw that all pumps and gear were in proper working order. I made an inspection in San Francisco, and found everything in proper working order, and reported to the captain. I made an inspection of everything on the night of the fire at eight o'clock, and all was in proper order. I first saw fire at the bulkhead mentioned, and then saw flames coming through a door near the engine-room. I next saw the engine-room all on fire, and flames were coming up both fire room skylights. Every man was at his post, and all orders were obeyed, so far as I know. The conduct of the officers and men in my department was very good, all working well and doing their best.

James Henry stated : I am an engineer, and have been in the employ of the P.M.S.S. Company since 1850. I was third assistant engineer on board the *Japan*. I believe the fire broke out at twenty-eight minutes past eleven P.M. on the 17th inst. The first intimation I had of the fire was that I saw smoke coming from the freight deck on the port side through a coal bunker. I was in the engine-room on duty, and had full charge there. When I saw smoke I called out "Fire," and the gong to stop the engine was sounded in less than half a minute afterwards.—Michael Jordan stated : I was employed on the *Japan*, and had made ten voyages in her. I was a water tender. The first alarm of fire was given about twenty-five minutes after eleven. I was in the fire-room, and perceived the smell of wood burning. I called out that there was wood burning somewhere, and the gong was sounded and the engine stopped almost immediately. I was on watch at the time. I then pulled down the dampers and opened the smoke and fire doors.

Henry Harrison Andrew stated : I was second officer on the steamer. The fire occurred about half-past eleven P.M. When I heard the alarm I was officer of the deck, and I rang the fire-bell. I was relieved by Quartermaster Harris, and went aft and called the chief officer and the third officer. Cleared away all the boats aft. I left the ship in the last boat with the captain and chief officer. We saved some ten or fifteen passengers and crew and lay by the ship all night. Next morning about eight o'clock we came across a fishing junk.—David Fulton said : I was second assistant engineer on board the *Japan*. When the first alarm of fire was given I was asleep in bed. I first heard the gong sound for the engine to be stopped. My station in case of fire is at the fire pumps amidships. I proceeded to my station immediately on hearing the alarm. I opened the steam valve and the sea valve, and set the water running, and then started the water through the hose to the deck. I then started to go on deck, and the flames, which seemed to be coming from the freight deck, nearly cut me off.

Harry Lester stated :—I was employed on board the *Japan*, and was on board when she was burned. I was steerage watchman. On the steerage deck I smelt something burning. I went into the forward donkey-room on the steerage deck, and not seeing anything there, I rushed up the ladder and gave the alarm. I then saw smoke issuing from round the forehatch. I called to the deck watchman, and closed the ports in the steerage. The smoke was then issuing from holes in the lining of the ship, and I directly afterwards saw flames coming out there. I started to report that, and saw the bulkhead between the fire-room and the steerage in flames. I went to report that to the captain, and I went on the hurricane deck, but could not find him, but I reported it to the chief officer. I went below again to where I saw fire, and got an axe. I cut a hole in the bulk head right under the fire. The flames were coming up through the stock-hole, where a port had been taken off, and I remained here for ten minutes directing two streams on it. I then went to the fore-hatch, where there was a hole and a hose inserted, and I cut another hole and put in another hose. I then got some wet blankets. It then got very hot, and about fifteen minutes afterwards the water supply became weak. I went to the captain, and he told me to cut a hole in the forward steerage on the port side, and I and the steerage steward did so. The flames then burst out there at once. I looked fore and aft the steerage then and could not see a soul, and we then went on the main deck and found we could not pass the engine-room for the flames. I think the fire originated amidships on the port side, in or around the fire room, or in the bunkers.

John Rooney stated : I was purser on board the steamer *Japan*. My duty in case of fire is to assist the surgeon in allaying excitement among the passengers. In case of abandoning the ship, my first duty is to save the mails. I made an attempt to do so on the night of the fire, but was not successful, on account of the smoke. I went with the painter, and we brought out six bags of mails. My light was then extinguished by the smoke. In trying to find my way on deck I was knocked down, and I dropped the mails. When I reached the deck I met Captain Warsaw on deck by the engine-room. He ordered me to go on deck and see if the boats were swung. I came back and reported to him that they were swung. I then told him I had been unable to get out the mails, and asked him for some men to assist me. He told me to try and save what I could of them. I found the steward on the deck and several others, whom I cannot name, going to the mail room. The captain met us and told us to save ourselves. I left the ship in the second starboard boat. I was in charge of the boat. The vessel was all on fire amidships, and all communication cut off fore and aft. The captain was on the hurricane deck after I left the ship. He was the last man I saw on board.

Joseph Kennedy stated : I was carpenter on board the steamer. I think every effort was made to save the ship, and all the officers did their duty. Robert Morris Tyndal said : I was a passenger on board the *Japan*. Captain Lewis : What was your idea of the conduct and self-possession of the captain and officers during the destruction and abandonment of the *Japan*? *A.*—My idea was that they were perfectly cool and collected, especially Captain Warsaw. *Q.*—Was everything directed, as well as you were able to judge, in a quiet manner, and with that firmness which should characterise a captain and his officers on such an occasion? *A.*—It was.

JUDGMENT OF THE COURT.

The decision of the Court was given on the 28th Dec., and was as follows :—

That the fire was caused by the spontaneous combustion of the coal placed there when coaling in the harbour of Yokohama, the coal having been taken on board during a violent rain storm, and consequently stowed in a wet and damp condition. That at the last inspection previous to the fire, the engineer on duty failed to inspect this bunker, although he did inspect all others containing coal, the reason assigned being that no coal had been used from this bunker since 5 P.M. that day. That such was the condition of affairs at 11.25 P.M., when the first alarm was given and smoke seen to issue from the vicinity of the coal bunker referred to. That immediately the engine was stopped, a general alarm sounded, ventilators turned from the wind, and in fact, the rules and regulations of the Company, made and provided for such an emergency, strictly complied with, and that the officers and crew at once put forward every effort in their power to subdue the flames. That the fire apparatus was in excellent condition, and was used to its utmost capacity, until the increasing heat prevented the pumps from working. That everything was done on the part of Captain Warsaw and the officers and crew generally under his command to save the vessel. That after all human efforts had proved fruitless, as shown by the evidence to subdue the fire and save the ship, she was abandoned by all on board at 12.45 on the morning of the 18th, the commander being the last man to leave the ship, but we find that in abandoning the vessel there was an evident lack of organisation in lowering and manning the boats properly, although they were properly equipped and provisioned.

That we are of opinion that there should have been established a boat station bill upon this steamer, providing for the emergency of abandoning the ship, with a view to the greater security of the lives of the passengers as well as the ship's company, and to prevent confusion and disorder, as well as the lowering of the boats unauthorised by the commanding officer. A more rigid inspection of coal bunkers, a greater care in regard to burning surplus coal first, and a more careful supervision of the condition of the coal when coaling should be exercised, and the temperature of the coal bunkers should be taken at least once every four hours for the purpose of preventing and detecting any incipient signs of combustion going on in them.

From all the evidence we gather, the captain was cool, calm and collected, that he did his duty nobly and well, and exerted himself to the fullest extent to save the vessel under his command, and after her abandonment, in remaining by the wreck until all hope of saving further life was gone. We consider the conduct of the chief engineer reprehensible, both in passing an unauthorised order calculated to dispirit the persons engaged in subduing the flames, and in allowing the largest boat, in which he was the only male European, to leave the ship only partly filled, without endeavouring to save the lives of those remaining on board and in the water, although, from the evidence, he appears after reaching the boat to have been suffering from inhalation of smoke, and not to have been actually in command of the boat.

We consider the great loss of life among the Chinese passengers arose from the communication between the fore and aft ends of the ship (at which latter end most of the boats were placed) being cut off, their paralysation by fear preventing any efforts to save their lives, the roughness of the sea and darkness of the night, and the weight of the money in many cases slung upon their persons ; although life preservers were abundant, and were extensively made use of.

(FROM A CORRESPONDENT.)

Christmas has passed with the usual amount of festivities, and Hong Kong is alive to pleasure, if dull to trade. In my last I mentioned that there was an amount of uneasiness among mercantile houses. I have now to record another failure, that of Messrs. M'Gregor and Co. The state of stagnation or depression now, I am grieved to say obtaining, is due to the trade of the Far East being overdone in England. The China trade was found such a very good thing at first that it became a resource for capital that would have been better employed elsewhere. This is the secret of the whole matter—too much capital—and though it may seem a paradox, all those connected with this market will, I think, bear me out that it is not the less true.

A dinner was given by a number of gentlemen, residents in Hong Kong, to a popular man, who is leaving by this mail. Mr. C. Dulcken, editor of the *Hong Kong Daily Press*, and for fourteen years connected with the press in China, North and South, goes home, he says, for ever. His friends, who are really sorry to lose him, got up a valedictory banquet. Mr. Rowett, the head of Holliday, Wise, and Co.'s house, was in the chair, and

Digitized by Google

the feast was attended by all the members of the press in Hong Kong who could leave their work, and by representatives of all the professions. Mr. Dulcken's successor is now between here and Singapore in the *Sarpedon*, bound hither—Mr. Chatterton Willcox, whose name is as yet unknown in China, and one I never heard in literary circles.

Commercial Report.

EXPORTS.

TEA.

SHANGHAI.—There had been a steady and fairly large business in Green Teas during the week. American buyers had been the chief operators, and the advance quoted by last mail had been fully maintained. The market closed quiet, and but few transactions were likely to be reported until the commencement of the New Year. Holders were firm. Settlements: Black, 202 chests, common, at Tls. 14; stock, 1,100 chests; Fychow and Moyune, 15,656 half-chests, at Tls. 24 to 35; stock of all kinds, 96,300 half-chests. Export to Great Britain (exclusive of lost cargoes):—

	1874-1875.		1873-1874.
Black	64,642,361 lbs.	against	57,972,955 lbs.
Green	8,717,678 „	„	8,029,355 „
	73,360,039		66,002,310

FOOCHOW.—Transactions during the week had been on a more extended scale. Congou: Settlements 7,800 chests at Tls. 12 to 15¼, and Tls. 16 for boxes; common to fair common kinds had been settled at a decline of Tl. ⅛ to 1, while for the few chops of the better grades still on offer fully previous rates were demanded. Arrivals 800 chests. Souchong: No settlements or arrivals. Oolong: Settlements, 200 half-chests at Tls. 15; arrivals nil. Scented Teas: No settlements or arrivals. Flowery Pekoe: No settlements or arrivals. The export to Great Britain, the continent of Europe, and the Cape of Good Hope amounted to 58,761,856 lbs., against 51,396,558 lbs. at same time last year; to America, 1,629,232 lbs., against 3,140,598 lbs.; to the Colonies, 12,205,547 lbs., against 12,216,531 last year.

SILK.

SHANGHAI.—Fully 1,800 bales (chiefly medium and common Tsatlees and re-reels) have found buyers on this side during the past week, increasing total settlements from 1st June to date to 58,000 bales, against 47,500 bales last year. At the close of last mail, "Dragon" Chop Tsatlees were settled on joint account with the seller at Tls. 390 per picul for No. 3; since then it was reported that for "Blue Elephant" Tls. 330 per picul had been refused, and Tls. 420 and 320 per picul were demanded for "Koo-fong Sing's" No. 3 and "Red Peacock" respectively. Re-reels had been in special demand, and even rejected parcels had readily found buyers at very full rates. The unsold stock was reduced to barely 11,000 bales, and the greater proportion was classed only as "rubbish." Doubtless the satisfactory prices (to the sellers) would induce larger arrivals.

Shipping Intelligence.

ARRIVALS.

At SHANGHAI.—From London, Dec. 19, Hankow (str.); from Liverpool, Dec. 21, Menelaus (str.); from London, &c., Feb. 2, Scotland (str.); Nankin (str.).

At FOOCHOW.—None.

At HONG KONG.—From London, Dec. 26, Glenroy (str.).

At MANILA.—None.

At SAIGON.—From Newcastle, Dec. 25, Victoria; from Bordeaux, Dec. 19, Ango.

At SOURABAYA.—From Boston, Feb. — Castine.

At SINGAPORE.—From London, &c., Feb. 1, Maju Madru (str.), Min (str.), G. F. Haendel, Kale.

DEPARTURES.

From SHANGHAI.—For London, Dec. 20, Achilles (str.); 22, Crocus (str.).

From FOOCHOW.—For London, Dec. 22, Achilles (str.).

From HONG KONG.—For London, Feb. 2, Fleurs Castle (str.); 4, Titania.

From MANILA.—For London, Dec. 17, Romeo; for San Francisco, Dec. 10, Clara Bell.

From SAIGON.—For Monte Video, Dec. 31, Chateaubriand.

From SINGAPORE.—None.

LATEST TELEGRAMS FROM THE FAR EAST.

THE MALAY STATES.

SINGAPORE, FEB. 3.—The British and Malay flags have been hoisted at Perak, and a proclamation has been issued by the Sultan guaranteeing security of life and property, inviting settlers to open mines, and offering free grants of land for plantation.

THE DEATH OF THE EMPEROR OF CHINA.

PEKING, JAN. 16 (VIA KIACHTA).—The Empress, overcome by grief at the Emperor's death, has committed suicide. A son of the seventh prince, a boy three years old, has been proclaimed Emperor. The Empress mother is again Regent.

SHANGHAI, FEB. 1.—The death of the Emperor of China has been officially proclaimed here.

SHANGHAI, FEB. 3.—The proclamation announcing the Emperor's death details the ceremonies to be observed at his funeral, and intimates that his successor has been established. All is quiet, and the rumour of disturbances connected with the succession to the throne has not been confirmed.

THE WAR IN ATCHIN.

THE HAGUE, FEB. 1.—The Government has received a despatch dated Atchin, Jan. 26, stating that the flag of the Netherlands has been hoisted at Poelockajol, and that the troops have established a fresh post at Poengeiblangtjoet, without encountering any resistance. The inhabitants are desirous of peace, but are incited to war by their chiefs.

VOLCANIC ERUPTION IN JAVA.

THE HAGUE, FEB. 3.—The Government has received a despatch from Batavia, of to-day's date, announcing an eruption of the volcano Kloet, in the island of Java, whereby great destruction has been caused at Blitar.

THE NEW EMPEROR OF CHINA.

SHANGHAI, FEBRUARY 5.—A son of Prince Chun, has been proclaimed Emperor of China. Li-Hung-chang is appointed his First Minister. Prince Kung's name is omitted from the list of the members of the Privy Council.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Feb. 4, at Falmouth, from Batavia, Cedric; off Queenstown, from Rangoon, for London, Prince Rupert; Jan. 23, at New York, from Hong Kong, Juan F. Pearson, Rifleman; at Boston, from Ilo Ilo, Calcutta; Feb. 3, at Glasgow, from Singapore, United Service (str.); 4, at Queenstown, from Ilo Ilo, Lanercost; 5, at London, from Singapore and Penang, Luzon; from Canton, Beautiful Star; at Deal, from Java, Pride of the Ocean; 4, at Portsmouth, from Sourabaya, Maria Elisa; 5, at Falmouth, from Sourabaya, Sharperton; at Liverpool, from Macassar, Sampo; at Queenstown, from Java, Elizabeth Childs; 3, at Texel, from Batavia, Golden City; at Boston, from Sourabaya, Castine; 6, at Deal, from Bassein, Walls Castle; at Falmouth, from Pasaroeang, Indus; at the Clyde, from Sourabaya, Belle Alliance; 7, at London, from China, Singapore, &c., Agamemnon (str.); at Deal, from Colombo, Mathew Cay (str.); Peveril of the Peak; 6, at Falmouth, from Batavia, Duke of Richmond; from Rangoon, Maria Goturzo; at Liverpool, from Singapore, Bertie; 8, at London, from China, Sea Gull (str.); 7, off St. Catharine's Point, from Penang, Hope.

DEPARTURES.—Feb. 4, from Cardiff, for Singapore, Enrico Dandolo; 3, from Sunderland, for Singapore, John George; 2, from Hamburg, for Shanghai, &c., Olympia (str.); 3, from Antwerp, for Singapore, Fyen (str.); 5, from London, for Colombo, &c., W. H. Atkinson (str.); 4, from Shields, for Java, Kataia; 6, from London, for Colombo, &c., via Suez Canal, Viceroy (str.); from Cardiff, for Hong Kong, Virginia; from Liverpool, for Batavia, Wien Hohenfeldt; from Newcastle, for Hong Kong, Silurian; from Liverpool, for Anjer, Tarquin.

LAID ON.—At Liverpool, for Cardiff and Shanghai, Challenge.

SPOKEN.—Acheen (ship), Shanghai to New York, Dec. 25, 15 S., 6 W.; Moss Glen (barque), Sourabaya to Falmouth, Jan. 6, 2 N., 23 W.; E.P.S.T. (?) (ship), Glasgow to Java, Jan. 7, 3 N., 23 W.; R.D.H.W. (Ger. ship), Hamburg to Shanghai, Jan. 7, 3 N., 23 W.; Peveril of the Peak (ship of Glasgow), Colombo to London, Jan. 23, 34 N., 37 W.; Vanguard (barque), Cardiff to Penang, 48 days out, 29 S., 28 W.; Zehlima, London to Penang, 14 miles W. by S. of the Lizard; Ivalo (Russ. barq.), Cardiff to Singapore, Dec. 22, 24 S., 25 W.; Indian Empire, Cardiff to Japan, Dec. 26, 21 S., 28 W.; Hope (barq.), Penang to London, Jan. 13, 20 N., 36 W.; Lady Cecilia, Newcastle to Singapore, Nov. 16, 5 N., 25 W.; Chittagong, Sunderland to Colombo, Nov. 30, 40 S., 33 E.; James Johnstone, Sourabaya to Falmouth, Dec. 26, 12 S., 10 W.; Noordzee Kanaal, Batavia to Amsterdam, Dec. 27, 10 S., 11 W.; Boldon of Sunderland, Liverpool to Singapore, Dec. 31, 10 S., 11 W.

CASUALTIES.—The Lanercost, Bloomfield, which arrived at Queenstown, Feb. 4, from Ilo Ilo, experienced severe weather, Jan. 28, in lat. 44 N., lon. 26 W., during which she lost mizentopmast, mizenboom, and part of bulwarks. Advices from Mauritius, dated Jan. 8, state that the Mary M. Francis (schooner), Francis, from Cheribon to Baltimore, with sugar in canisters, put in there Dec. 12, making about eighteen inches water per hour; the master reported that on the 15th Nov., in lat. 11 S., lon. 92 E., the vessel suddenly sprang a leak, making five inches water per hour, which continued to increase. The Agamemnon (str.), from Shanghai, &c., to London, got ashore Feb. 7, in St. Margaret's Bay, Dover, but has since been towed off, and proceeded to London, apparently without damage. The Wien Hohenfelde, Liverpool to Java, foundered after collision with the Magne (str.), off Port Lynas. A telegram dated Shanghai, Feb. 4, says:—The German barque Progress has been wrecked on the Pescadores Islands. The captain and three of the crew have arrived at Swatow. One of her boats is missing.

MISCELLANEOUS.—Algoa Bay, Jan. 2, Ino, Benman, sailed for Anjer; at Table Bay, Jan. 6, Claudine, Curtis, from Singapore; Wild Duck, Jones, sailed for Colombo; at Suez, Feb. 3, Glenearn (str.), from Singapore. The Duke of Sutherland (str.), London to Colombo, &c., passed Malta Feb. 5; at Mauritius, Dec. 12, Mary M. Francis, from Cheribon, for Baltimore; 14, Egbert, Mills, sailed for Galle; 17, Regina Coeli, Messac, sailed for Galle; 26, Perthshire, Christie, sailed for Galle; 27, Henry Miller, Cumming, sailed for Galle.

THE MAILS.

PRESENT INWARD MAIL.—MARSEILLES, FEB. 5.—The Messageries Maritimes Company's steamer Sindh, with the inward French mails from China and Japan, put in yesterday off Hyeres Roads, where she landed mails and passengers. She brings 110 passengers and a general cargo, including 776 bales of silk, 3,496 packages of tea, 263 packages of sundries, and specie to the value of £41,547 for London, which part of her cargo will be forwarded to its destination per company's steamer Ganges, due in London on or about Feb. 16.

HEAVY PORTION OF LAST INWARD MAIL.—SOUTHAMPTON, FEB. 7.—The P. and O. steamer Khedive, from Port Said Jan. 26, Gibraltar Feb. 3, arrived here this evening with the heavy India and China mails.

NEXT INWARD MAIL.—SUEZ, FEB. 7.—The P. and O. Company's steamer Peking, with the China and Australian mails, arrived on the 5th inst., and the Lombardy, with the Bombay mail, this day.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, FEB. 2.—The P. and O. Company's steamer Malwa, with the India and China (heavy) mail, from Southampton on the 28th ult., arrived at 10 A.M., and leaves at 1 P.M. for Port Said. Experienced fine weather; all well.

DUTCH OUTWARD MAIL.—SOUTHAMPTON, FEB. 2.—The Java Company's steamship Java, Captain J. D. Gollards, sailed this evening for Padang, Batavia, Samarang, and Sourabaya, carrying the mails, 30 passengers, 100 Dutch troops, and a full cargo of general merchandise.

BIRTHS, DEATHS, AND MARRIAGES.

BIRTHS.

BAILLIE—On the 27th Nov. last, at Yedo, Japan, the wife of Lieut. C. W. Baillie, R.N., of a son.

BROWN—On the 30th Dec., at Bogie, Singapore, the wife of David Brown, of a daughter.

DA SILVA—On the 26th Dec., at Hong Kong, the wife of M. A. da Silva, of a daughter.

HEYWOOD—On the 25th Dec., at Hong Kong, the wife of H. C. Heywood, of a son.

JACKSON—On the 16th Dec., the wife of Dr. F. E. Jackson, surgeon to the Hospital, Wellesley, Penang, of a son.

PYKE—On the 3rd Jan., at Hong Kong, the wife of Thomas Pyke, of a son.

ROUGEMONT—On the 5th Feb, at Filkins Hall, Oxfordshire, the wife of Lieut. Frank Rougemont, commanding H.M.S. *Helicon*, of a son.

STONE—On the 10th Jan., at the Royal Observatory, Cape Town, the wife of E. J. Stone, M.A., F.R.S., &c., Her Majesty's Astronomer at the Cape, of a daughter.

WRIGHT—On the 1st Feb., at Worcester-park, the wife of Herbert M. Wright, prematurely, of a son, stillborn.

MARRIAGES.

BOAD—BALDWIN.—On the 5th Dec., at St. John's Cathedral, Hong Kong, by the Rev. R. Hayward Kidd, Colonial Chaplain, Captain William Boad to Miss Hannah Baldwin.

DUFF—INGLIS.—On the 28th Dec., at St. John's Cathedral, Hong Kong, by the Rev. R. H. Kidd, Colonial Chaplain, Thomas William Duff, of Chinkiang, to Helen Harriet Smithers, daughter of John Inglis.

FINDLAY—BROWN.—On the 23rd Dec., at Colombo, Ceylon, John S. Findlay, Brodie House, Colombo, to Minnie, youngest daughter of the late Daniel Brown, Liverpool.

KING—RIVES.—On the 7th Jan., at Grace Church, by the Rev. Henry C. Potter, D.D., assisted by the Rev. William F. Morgan, D.D., and the Rev. Henry Y Satterlee, Ella Louisa, eldest daughter of Francis R. Rives, of New York, to David King, jun., of Newport, R.I., late of China.

DEATHS.

ALLEN—On the 4th Jan., accidentally drowned, at Rattolle, Ceylon, Willie, the beloved son of John William Allen, of 37, Strand, and Ashchurch Villa, Shepherd's-bush, aged 26.

DENT—On the 31st Jan., at 12, Hyde-park-gardens, Marianne, second daughter of the late Thomas Dent, aged 27.

THE NEW EMPEROR OF CHINA.

(PALL MALL GAZETTE.)

Prince Chun, the father of the young Prince who has been proclaimed Emperor of China, is the seventh son—Prince Kung being the sixth son—of the Emperor Taou Kwang, who died in 1850, and was succeeded by his son Hien Fung, during whose reign the Treaties of Tientsin were signed. Prince Chun was for some time, and probably is still, commander of the foreign-drilled Manchu troops at Peking; he is reputed to be warlike, energetic, and opposed to Prince Kung's more enlightened views of foreign policy. Li Hung Chang, who is mentioned in the telegram as being appointed First Minister (or, what is more likely, a member of the new Cabinet), is at present Governor-General of the Metropolitan Province of Chili, and is well known to foreigners by the name of Li Futai, who, when Governor of Kiangsoo, succeeded, with the assistance of Colonel Gordon, in driving the rebels from that province, and giving the death-blow to the Taiping rebellion. The exclusion of Prince Kung from the Cabinet may be attributed to the dislike felt towards him by the Empress Regent (mother of the deceased Emperor) and to his general unpopularity in Court circles. It will be remembered that after the death of the Emperor Hien Fung, Prince Kung obtained power and ascendency in the councils of the Regency by forcing his way into the Palace, and obtaining the execution of his two most powerful rivals. And, in the present instance, backed as he is by an able and influential official following, it is very doubtful whether he will be content to be deprived without a struggle of his many important and lucrative posts. The death of an Emperor of China has usually been followed by a period of disturbance; and should the practice of leaving instructions regarding the succession—for the Emperor of China has the right of nominating his successor—owing to the youth of the late Emperor, have been omitted, the suicide of the young Empress may be the first of a series of tragical events of which it is impossible to predict the *dénouement*. It should be added that Li Hung Chang is the ablest and most ambitious of the Viceroys or Governor-Generals of Provinces, and one who has long been regarded with great jealousy by the Peking Government. Li is a Chinese, not a Tartar; and as such has been an object of suspicion to all the Tartar party in the capital. He has devoted himself for many years to the creation of arsenals and the arming and diciplining of troops under foreign instructors. The motley force lately sent to Formosa on the evacuation of the island by the Japanese was probably no part of the force under Li's command, which he would be little likely to detach from those under his own immediate control. He has long been suspected of designs to overthrow the Manchu dynasty.

MINING IN CHINA.

The Times, in noticing the Commission of Mr. James Henderson, says:—Many will have felt that these measures in several ways imply changes which to this country are of no ordinary importance. It is, however, more obvious what effect they will immediately produce on our general Eastern trade than how they may ultimately affect our domestic industries. We are becoming gradually accustomed to the loss of our former monopoly in the economical working of coal, and we have no reason to anticipate any but beneficial effects from the opening of the unlimited coalfields of China. The result will obviously be to economise and to cheapen coal in our own markets and to stimulate our general steam trade in the Pacific and Indian Oceans. The present design of the native administrator, under whose commission Mr. Henderson has arrived in England, is, indeed, limited to rendering the Chinese Imperial armaments independent of foreign supplies; but it is obvious that if capital and skill are once successfully employed in working the inexhaustible supplies of coal and iron which the soil of China affords, not only will they speedily go far beyond this point, but it is impossible to set limits to the development of an industry so likely to acquire a firm establishment. We are much mistaken if this does not turn out to be the most effectual method of "opening China" that has yet been discovered. With regard to our own commercial interests, of course, the free competition of the huge population of China would revolutionise some conditions of our native industry. But such

Digitized by Google

an effect must be very gradual; and in the meantime the mere influx of English skill could not fail in producing a beneficial effect on our ordinary trade and other relations with China, and a connection so close as that which bids fair to be established would certainly lead to an increase, on the part of China, in the desire of communication with this country. Our iron trade, though less independent, cannot be affected for many years to come, though it is quite possible that this nation may, sooner than has been anticipated, even by those who have threatened us with an approaching exhaustion of our coal-fields, be destined to undergo a struggle for her commercial supremacy. We may, perhaps, hope that this prospect will afford matter for some serious consideration to English capitalists and labourers in the midst of the disastrous and suicidal struggles which have become almost epidemic among us. The edifice of our trade has not been built up by the blind operation of unintelligent force, nor by the mere calculation of proportions, balances, and percentages. Minute economy, prudence, and enterprise are as necessary to sustain as to found a commercial system, and those qualities are no longer so conspicuously developed as they once were in those with whom lies the maintenance of the main trade which has given us our present sovereignty in the markets of the world.

QUEEN'S SPEECH.

CHINA AND JAPAN.

The following paragraph appears in the Speech:—

"The differences which had arisen between China and Japan, and which at one time threatened to lead to war between those States, (countries) have been happily adjusted. I have learnt with pleasure that the good offices of my Minister at Peking have been largely instrumental in bringing about this result."

Earl GRANVILLE in his address said:—

"The intelligence relating to the settlement of the differences between China and Japan is satisfactory, for no greater evil in that part of the world can be imagined than a war between those two countries. It is admitted that this happy result is largely due to the exertions of our able Minister in China; but the sentence in which the acknowledgment is made appears to be misplaced, for surely it is unusual to mention a Minister personally, although I do not at all deny that great credit is due to a Minister on whom the burden of a negotiation entirely rests."

The Duke of RICHMOND, in reply, stated that his noble friend objected in a good-humoured manner to the language of the paragraph with regard to China and Japan. The Speech from the Throne says, "I have learnt with pleasure that the good offices of my Minister at Peking have been largely instrumental in bringing about this good result," referring to the adjustment of the late differences between those two countries. My noble friend says it ought to be "my good offices." But there were good reasons for the language which has been used. At the distance of this country from China it was perfectly impossible to give the Minister there minute instructions. He had general instructions, therefore, to promote peace if he could; and I shall be corrected by my noble friend near me (the Earl of Derby) if I am wrong when I say that it was mainly due to the personal influence of the Minister there that the happy result alluded to was brought about. We thought it right that it should be known here that results so desirable had been attained by the personal influence of the Minister, and that is the reason why the paragraph has been expressed as it is.

WITH reference to the invitation sent by the King of Siam to English astronomers to view the forthcoming solar eclipse, a correspondent of the *Athenæum* points out that the Siamese have very slight scientific knowledge, and, therefore, the astronomers must not count on anything more than a little unskilled manual assistance. He also doubts the ability of the Siamese to afford such hospitality as would be appreciated by Europeans. We venture to say that the presence of a British community at Bankok will obviate any difficulty on this score.

THE Pacific Mail steamship *Colorado* arrived at San Francisco on the 21st ult. She left Hong Kong Dec. 12, arrived at Yokohama on the 19th, and sailed on the 22nd. The cause of the unusually long passage of the *Colorado* was a succession of north-west gales, by which she was driven far to the southward of the usual course, and was compelled to put into Honolulu, Sandwich Islands, for coal, which place he reached on the 9th of January, sailing again on the 12th.

THE Committee of Ways and Means of the American House of Representatives have not yet come to a decision concerning the reimposition of the Tea and Coffee Duties proposed by Mr. Bristowe, and appear to be of opinion that this measure, if taken, should also apply to certain other articles now on the free list. It is thought probable the Committee will finally recommend that tea and coffee should be left duty free.

THE Eastern and Australian Company's steamer *Brisbane* arrived at Brisbane, from Singapore, on 29th ult., four days early, with London mails of 11th December.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, FEB. 2.

The death of Major-General Meydam, of the Engineers, is reported from Berlin, and is a great loss, not so much to the Army as to the Telegraphic Department, of which he was the head, and had the merit of having organised and brought it up to its present high state of efficiency. It was only quite recently that he obtained the rank of general officer. In spite of much official opposition, he succeeded in gaining the consent of the Emperor to the employment of unmarried young ladies and widows without children in his department, which has been found to work so admirably. One of his last official acts was to devise a distinctive badge for them, as an equivalent to the uniform of the masculine sex, consisting of a knot or bow of black velvet crossed by a silver arrow, and worn at the throat of the dress when on duty, simple and neat, as till then the distinctive mark of these ladies being in the service of the State was a very decided tendency to their over-dressing themselves in the most *outre* fashion of the day, which he considered unbecoming their position, and therefore speedily put a stop to. His successor has not yet been appointed, but it is expected that the vacancy will be filled up by an officer of scientific attainments either of the general staff or the engineers. In the meantime the duties of Director-General have been transferred *pro tem.* to Dr. Stephan, the Postmaster-General. Berlin papers state that negotiations have been opened to induce General von Chauvin to return to the office that he formerly held as Head of the Telegraph Department; others say that the appointment will be given to Colonel May, of the Engineers, who is now superintending the topographical survey of Alsace-Lorraine; while others again maintain it will be given to Lieutenant-Colonel Schulz, commandant of the Railway Military Battalion.

On Saturday last the ordinary general meeting of the Makler (or Brokers') Bank of Hamburg was held in the Exchange Rooms, Herr J. Frensdorff in the chair. The annual report, which, contrary to the usual custom, was not printed for distribution, was read by the secretary. It states that the sanguine views of the directors expressed at the last annual meeting have not been realised, as the Exchange has not yet recovered from the general depression caused by the crisis of 1873. They were, however, in a condition to declare a dividend of 6 per cent., which, under the circumstances, might be considered satisfactory. A motion was then made by Dr. Wex for a reduction of the joint-stock capital to one million thalers by the purchase of the needful number of shares at par but free of interest, for which purpose the shareholders be invited to make offers, and if more were presented than were required a *pro rata* repartition should ensue. As no objection was made by any of those present the motion was passed and the directors authorised to do the needful for the execution of the measure. The amount of the shares to be thus called in and amortised is 335,000 thalers. The balance-sheet shows a clear profit of 102,774 reichs marks, which, after paying all salaries, rent, dotation of reserve fund, and deduction for doubtful debts, leaves 96,120 marks for a divid end of 6 per cent. on the 40 per cent. paid-up capital. At the close of the meeting the usual elections took place, when Herr Lappenberg was confirmed as member of the Court of Administration, vice Baron von Kapherr, resigned, Herr Ernest Jacques was elected a member, and Messrs. L. Levy and H. F. Uhlenhoff re-elected as auditors for the current year.

Dr. Ernest Bieber, a young lawyer of this city, has been appointed German Consul at Singapore by Imperial decree dated the 18th of January.

The frigate *Elizabeth* is expected at the beginning of April from the Far East, where she will be relieved by the frigate *Ariadne*, which will first proceed to Swatow.

COMMERCIAL.

Tea is very firm, with an active demand; sold for arrival per *Pelican*: 364/4 chests and 6,536/8 Congou, as well as 237/4 and 1,048/8 chests Souchong. Extensive purchases of cleaned Rice have strengthened the market so much that prices are looking up, and holders are difficult to treat with. Cassia Lignea is firmer than it has been, no alteration in Flores. Pepper is lower, Singapore 62 to 63 marks, and Penang 59 to 60; at these prices there are buyers.

Bank Shares mostly lower: Norddeutsche 141½, Vereinsbank 123¾, Commerz and Disconto 81, Hypothek 117⅞.

IT is stated, upon good authority, that in consequence of the Protectorate recently established by the French in Tonquin, a new port will be opened to trade in close proximity to and in communication with the Gulf of Tonquin. A commercial treaty which will have this effect is, we are informed, under negotiation as supplementary to the treaty recently made with the authorities of Tonquin. The result of this will be to throw a considerable portion of the trade in the direction of the new port, and it will probably prove of importance to the colony of Hong Kong by causing a portion of the traffic between China and Tonquin, which has hitherto been conducted in junks, to be carried on by means of steamers.

WE learn that Mr. ROWETT, for many years head of the house of HOLLIDAY, WISE, and Co., and a member of the Legislative Council of Hong Kong, will, on his arrival home, take a post in the London office of the Hong Kong and Shanghai Bank.

MR. VAN LANSBERGE, the newly-appointed Governor-General of Java, &c., will proceed to Batavia by the Nederland Company's steamer *Voorwaarts*, from Amsterdam on the 13th inst.

The report of the Thetis Marine Insurance Company to be presented at the meeting to be held on the 10th inst. shows the premiums for the past year to have amounted to £37,380, and the claims settled in 1874 to £115,624. The results of the year's operations leave an unfavourable balance of £102,435. The capital of the company, including debentures, is £125,600, and the present value of the investments is £13,300.

THE article in our last under the heading of "The Independence of the Press" was taken from the *Monetary and Mining Gazette*, a valuable weekly paper on all mining and other investments.

A COLONIAL MUSEUM.

WE understand that Lord CARNARVON, Secretary of State for the Colonies, has under his consideration the establishment of a permanent Museum of a thoroughly practical character for the exhibition of all products from British Colonies and Settlements. The proposal is not altogether new. It has been discussed in several quarters, but never to any definite shape. If we remember rightly, the Royal Colonial Institute a year or more ago had something to say on the subject, and even went so far as to come to some resolution in this direction, but no more has been heard of it. The Colonial-office made a small beginning by instructing all Colonial Governors to vote certain sums of money towards the establishment of what was termed a Colonial Annexe to the South Kensington Museum. This was the project of Lord KIMBERLEY, but it was apparent on the face of it that the Colonies did not stand in need of annexation to the South Kensington galleries. What the Colonies desire, and what they will be well content to pay for, is an "Economic Museum" of their products, arranged with a view to practical results, not for the sake of mere show or effect on the spectator. It should be organised for the mutual benefit of the home manufacturer or consumer and the colonial producer. A writer in a planting journal last year, alluding to this subject, remarked that there was no one connected with the Colonial-office competent to undertake the organisation of such a Museum as was required. But surely the Secretary of State for the Colonies will have no difficulty in finding one or more suitable persons for this duty. The same writer adds, "Such a Museum, properly organised and officered, should "prove the means of informing the British manufacturer "of much which he is desirous of knowing; he should "there be able to learn whether our Colonies can supply "him with new fibres for his spinning-frames and his "looms, or whether old fibres can be more economically "produced in one part of the world than in another, and "whether costly and rare materials may not be supple-"mented by others at a lower cost; the paper maker "would be equally glad to receive information from such "a source of any cheap vegetable materials likely to be "useful in his mills." It is gratifying to learn that Lord CARNARVON entertains the idea of such an institution, for the proposal will, in that case, not be allowed to slumber; we feel sure it will be received with satisfaction throughout the East. Penang and Singapore, equally with Mauritius and Ceylon, will be warm supporters of the project. It will be a decided advantage to coffee and sugar producing islands to have their staples seen and examined side by side with each other, accompanied by comparisons of soil, climate, altitude, temperature, &c. Were this done, many of the now unexplained discrepancies in quality and value might be accounted for, to the mutual benefit of those most interested. Penang is becoming a tea colony, so is Ceylon; surely the planters in both of these settlements would be glad to see the results of each other's progress in this new branch of industry. There is yet one other class who could not help being advantaged by access to such an institution as that in contemplation. We allude to persons about to visit any of the Colonies, whether as travellers only, or as settlers. To be able to study the natural products of a country before proceeding to it; to be informed of the particular localities wherein certain articles are produced; the relation they bear to articles of a kindred class in other countries, would certainly be of unspeakable advantage to very many who would otherwise land in the Colony they are visiting totally uninformed on many points of interest to them. We shall hope before long to be in a position to give our readers fuller particulars concerning Lord CARNARVON'S plans for a Colonial Museum, in reference to which we would suggest that the scheme should comprise collections from all Asiatic possessions, such as Java, Manila, Borneo, Japan, China, &c., for purposes of comparison in various classes of produce.

COCHIN-CHINA.

THE *Saigon Courier* of the 20th December last publishes the complete text of the new postal convention between Cochin-China and the Straits Settlements. A summary of this convention appeared in our columns on the 4th of January. The French, by their own admission, have not yet made any approach to success in the administration or development of their Indo-Chinese possessions; the fact is, they have exceptional difficulties to contend against, for though the natural riches and the productive capacity of Cochin-China may be very great, the inhabitants have stuck for ages at a low pitch of civilisation; they are intensely ignorant, miserably poor, and yet thoroughly satisfied to remain what they are. It will take two or three generations to alter this state of things, whether the change be made by peopling the country with Chinamen, or by improving the character and condition of the Annamese. There is a good deal more of science and method about French administrative systems than is to be found in English communities, and it ought, therefore, to follow that French colonies go ahead faster than ours; but somehow matters turn out quite otherwise, and it would seem as if the official supervision which science and method entail in some way clogs the wheels of progress, and that we get on better in our own hap-hazard state because our free expansion is less surrounded by checks. A very good illustration of this sort of thing occurs in the *Saigon Courier*, to which we have just referred. There the reader will find his attention drawn to the agricultural capabilities of Phu-Quoc, a large island off Kampot, in the Gulf of Siam, and now part of the possessions of France. This island has evidently been examined most carefully by French surveyors; its meteorology has been noted, and the soil of its hills, plains, and sea-shore has also been analysed by French chemists. Of course, the object is to attract capitalists to the place, so as to develop its agricultural resources; and if an English administration took this business in hand they would confine themselves to announcing the terms on which Government grants, &c., could be obtained, with perhaps a further hint or two as to the average price of labour there. Of these matters, which in English eyes are all important, the French say nothing; they prefer to explain to us the precise latitude and longitude of Phu-Quoc, to describe its soil as made up of sand, silica, lime, magnesium, oxide of iron, and so forth, pointing out that the lime is insufficient, and that magnesium is a good substitute for lime. Liebig is referred to as an authority on the soil proper for grain cultivation. Agriculturists are told that they must plant trees and shrubs on the hill-slopes, and develop grasses on the plains, that they will be restricted from clearing jungle at a certain height above the sea-level, or from disturbing the growth of the bushes along the sandy shore. All this may be very proper, and the information given may be of the highest interest to scientific men, but we question its importance to the rough-and-ready colonist, who may find his practical experiments quite at variance with the theories set before him, and who is usually too independent to submit to the checks of officialism, and too eager to turn his money over quickly to wait till by chemical combinations he has mixed up for himself a suitable soil. He will take the soil as he finds it, and grow the article that pays best. He will not begin by selecting the product he most fancies, and then make a soil to suit its cultivation. On another subject we observe that the French are acting with truer wisdom. They are promoting education

Digitized by Google

among the natives, offering rewards and prizes to scholars, and training Annamese to act as instructors in the provincial schools. This will pay in the end. To educate the people is to make them richer, with quickened industrial powers, and multiplied wants; besides rendering good government easier and crime less common. The French genius for scientifically-organised administration could not find a field more suited for its too-often inter-meddlesome spirit than in busily pushing education among the idle, dirty, apathetic children of Annam.

THE vacancy created in the Ceylon Civil Service by the retirement of Dr. CHARSLEY, late Principal Civil Medical Officer, has been filled by the appointment of Dr. KYNSEY, of the hospital staff at Netley. This officer's experience in the East, especially in Ceylon, where he served some years ago on military duty, eminently qualifies him for the post. A careful selection was rendered more than ordinarily necessary in view of the fact that the Ceylon Government are establishing medical officers and hospitals throughout the coffee districts of the interior. Governor GREGORY has, we think, exercised sound discretion in the selection.

THE Burma Steam Company, Greenock, despatched on the 6th the steamer *Shwaydagone*, Captain MCNAIR, for Tavoy and Rangoon. Captain BOWERS, the superintendent, will take out the *Pyah Pekhet* in about three weeks.

THE *Gazette* notifies the appointment of Mr. CHARLES TREMLETT to be Her MAJESTY'S Consul at Saigon.

THE CHINESE SUCCESSION.

(THE TIMES.)

"Rumours" from the Far East are ordinarily of so attenuated a character as barely to merit even a passing notice; but the rumours which have been flashed to us from China within the last few days point to such momentous contingencies that if there be any foundation of truth in them they are worthy of the most serious consideration of Englishmen. It was hardly likely, indeed, that the sudden death, without issue, of the young Emperor of China, who had only reigned three years, after a female Regency of twelve, should pass without exciting misgivings and surmises concerning the succession. The nearest heir to the Throne being the infant grandson of an uncle of the late Emperor, speculation as to the constitution and character of the future Government was the most natural thing in the world. There was, first of all, the question whether the numerous surviving uncles of the deceased Sovereign would acquiesce in the claims of the child of Prince Tun, and be content to consign the affairs of the Empire to another long Regency. And then, assuming the young Prince's title to be indefeasible, what form was the Regency to take? Among so many claimants and amid the strife of parties, which occasionally rages fiercely in Peking, a battle on this question would seem almost inevitable; and, notwithstanding the proverbial slowness of the East in most things, in crises like the present aspirants for the Eastern Thrones are wont to display both energy and readiness when the moment arrives for a *coup d'état* or a revolution. With so much antecedent probability, therefore, of a struggle for supremacy at Peking, the rumour of disturbances there may be sufficiently accounted for without necessarily assuming its truth. But, whether there be an actual disturbance at the present moment or not, it is obvious that the circumstances of the Chinese Government are full of difficulty and danger. The stake which this country has in China is sufficient to impart to the question more than a mere political interest for us. Our sympathies are appealed to on no sentimental grounds. The most enduring bond that ever united two nations, that of common commercial interests, binds our people to the vast population of China, and whatever menaces the peace of that Empire may well create anxiety in the minds of our manufacturing and trading classes. Not, indeed, that British commerce with China has ever begun to realise the reputed, though probably much exaggerated, expectations which the population of that Empire and their advanced material civilisation caused most naturally to be entertained. The total value of British trade with China after all the efforts that have been made to stimulate it—efforts which have notoriously proved ruinous to many of those engaged in it—remains not only insignificant, but almost unprogressive.

With a population at least equal to that of British India, a far more productive soil, and a greater complexity of personal wants, the figures of exports to and imports from China amount only to one-third of the value of our trade with India. The effect of the Taeping insurrection—a decade of rapine and butchery—has by no means been effaced. Jungle still grows on the ruins of what in the memory of living men were noisy cities; disastrous floods, which have submerged large tracts of country for several successive years; occasional local famines; the weight of arbitrary taxation generally, and affecting our own trade in particular, contrary even to the provisions of our Treaty; and our, as yet, imperfect access to the interior of the country—these and such like causes may help us to comprehend the stationary character of our trade with China without impairing our hope in the future. But the fact of our being driven to influences beyond the ordinary conditions of commerce in order to find an explanation of the backwardness of the China trade illustrates the precariousness of that trade, and how sensitive it may be to political commotion. Recent events in China have brought out in a clear light the state of utter disorganisation into which the administration had fallen. On one side we see a comparatively insignificant Power like Japan inflicting a signal humiliation on the great Empire, while in the Western Provinces we hear of disbanded and unpaid armies revenging themselves on the industry of the country, and the smouldering fires of rebellion flickering up here and there with ominous frequency. Notwithstanding the vast sums of money expended during the past ten years on arsenals, on ships of war, torpedoes, and on drilled soldiers, the first threatening blast of war discovered the Chinese army as existing only on paper; and the fleet, of which so much has been said and written, for all practical purposes "nowhere." It is the disorder which such revelations bring to light which lends to a possible quarrel, unimportant in itself, a significance of no common kind. At another time a squabble for legitimacy in China, a dispute as to which brother should place his grandchildren on the Throne, would excite little enthusiasm among the Chinese people, and would be a matter of indifference to us. But we cannot forget that the Manchu Dynasty, which has ruled China for 200 years, is alien, unpopular, and worn-out. The military prowess which enabled a small tribe of so-called Tartars to subjugate and hold the Chinese Empire, to impose a badge of conquest on all its male inhabitants, which is their most conspicuous "head mark" to this day, has disappeared, and the noble qualities of the Emperors of the last century, Kanghe and Kienlung,—have given place in the later scions of their house to effeminacy and utter worthlessness. This moribund dynasty, governing a great Empire on the mere tradition of a power, the substance of which has long since passed away, would do wisely not to draw too marked attention to the weak tenure of its authority; for, once the title of an occupant of the Throne—*i.e.*, of the Vicegerent of Heaven on earth—is seriously called in question, the Divine Right theory may receive irreparable damage. Reverent allegiance to a Sovereign Pontiff will go a long way in preserving things as they are, but there cannot be two Infallibilities—in China any more than elsewhere—and the appearance of rival claimants to the Dragon Throne under existing circumstances may destroy the whole superstition.

But this is not all. With the rapid decadence of the Manchus, with the exhaustion or absorption of the Tartar garrisons which were posted in every great city of the Empire, we cannot fail to notice how the native Chinese have been gradually coming to the front. It is not merely that the principal offices of State and the most important military commands are in their hands, but more than one of the high officials stands out a head and shoulders above his fellows, possessing abilities of the very first order, and displaying a degree of administrative energy which would prove equal to any emergency that might arise. The name of Li-Hung-Chang, the present Viceroy of Chihli, will occur to many of our readers, and there are others not inferior to Li, though less known to foreigners, among whom we may mention Tso-tsung-tang, Viceroy of Szechuen and Kansuh, who has lately been successful in suppressing a formidable Mussulman rebellion in the north-west. It is to such men as these that the country will have to look, if the Manchu family commit *felo-de-se* by internecine war, to save the State from that worse than the worst misgovernment—anarchy. Li keeps three arsenals going, and commands the purse of some of the wealthiest districts of the Empire, while he rules officially the metropolitan Province, and resides within 100 miles of the capital. It is to him, therefore, that our thoughts naturally turn as the most likely in the event of a crisis to be called on to preserve order. Under these circumstances it would be interesting, if it could be ascertained, to know how he stands affected towards foreigners. Li, it must be admitted, bears the reputation of being hostile to foreigners; but such an expression hardly conveys a definite meaning. It is said that the heavy armaments he is preparing are for the ultimate purpose of defying foreign nations, but we cannot seriously reproach a Statesman for desiring to place his country in a state of defence. His hostility to foreigners has further taken the form of commercial competition by the organisation of a steam fleet on the coast of China, for which several additional vessels are at the present moment being built in this country. Neither to this form of warfare, however, can we consistently take exception. We may add that Li-hung-Chang has resolved to open up the coal and iron mines of his province, and has commissioned an agent to obtain in England the requisite means and appliances. This is the movement that, above all others, the most progressive of foreigners have strongly urged on the Chinese, and their slowness to adopt it has been adduced as convincing evidence of the obstinacy of their prejudices. We can only say that so long as our enemy is content to fight us with such weapons, let us have a fair field and no favour.

COLLIERIES AND IRONWORKS IN CHINA.

(THE TIMES.)

Mr. Henderson, who has passed about thirty years in China, and who is now in England, has been commissioned by the mandarins in charge of the arsenals of Tientsin and Shanghai, in pursuance of instructions from his Excellency Li-hung-chang, Viceroy of the Province of Chihli and Superintendent of Trade for the Northern Treaty Ports, to procure the necessary plant for working the collieries and iron mines and for smelting and manufacturing iron in that province according to the most approved European methods. He has also been authorised to obtain the services of competent Europeans to direct the works. Attention has been repeatedly directed in *The Times* to the vast coalfields of China, and to the fact that steam coal, quite equal in quality to the best South Wales coal, abounds at Chaitang, in Chihli, about forty miles west of Peking. There is not at present a single coal-mine in China worked on scientific principles; there is neither steam-engine nor pump; and the smelting of iron is conducted only in the most primitive manner. Owing to the high prices which the Chinese are obliged to pay for foreign coal and pig iron—for the latter sometimes as much as £10 per ton—the authorities have determined to utilise some of their coalfields and deposits of ironstone which, as well as coal, occurs in great abundance in various Provinces of China, and to work them in the most systematic and advantageous manner. The field which has been

Digitized by Google

selected for commencing operations upon in the first instance is situated at P'ung C'hung, near Tre-chow, in the county of Ta-ming-fu, in the southern part of the Province of Chihli, and bordering on the Province of Honan. It would have been impossible to select any locality richer in coal, ironstone, and limestone, or better placed with regard to facility of access. The field is situated on a plateau bordering on and about 300 feet above the level of the great Plain of Chihli, and distant about twenty-five miles from some small rivers, down which the produce of the mines and iron works will be conveyed to Tientsin. To complete the chain of communication it is intended to construct a rail tramway from the mines to one of the rivers in question. It is proposed, in the, first instance, to meet the requirements of the national arsenals; but as soon as circumstances will permit, manufactured iron of all descriptions will be produced. In conclusion, it may be mentioned as a notable instance of neglect to utilise national resources, that the very locality in which the authorities are about to commence mining operations is referred to in an ancient Chinese history, some 2,000 years old, as being the spot where the loadstone was first discovered in China.

THE PACIFIC MAIL COMPANY INVESTIGATION

On the 18th Jan. Mr. Whitelaw Reid, of the *Tribune*, was examined by the Committee concerning his knowledge of the Subsidy. He had no positive information whatever. and it seems that his editorial allusions to various parties having received money were based entirely upon what he calls current rumour. He gave the Committee one or two suggestions which will lead to the summoning of other witnesses, who may, perhaps, give some information. He had been told by Captain Bradbury, and says Captain Bradbury's brother knows the same thing, that King had written a letter to the company after the passage of the Subsidy, demanding twenty-five thousand dollars extra compensation, and that the matter had been referred to Edwards Pierrepont as attorney. He said Captain Bradbury's brother had seen this letter from King, in which the latter alluded to the prison bars behind him. The Committee will take pains to test the correctness of this statement by summoning the proper witnesses. Mr. Reid also referred to an interview with Irwin, which he says left the impression on his mind that Irwin spent nine hundred thousand dollars, and in addition to that Congressman Parsons spent three hundred thousand dollars, making twelve hundred thousand dollars in all expended in procuring the Subsidy. Mr. Irwin disputes the correctness of Reid's statement of his interview, so far as it relates to Parsons. Mr. Reid said that the names of Mr. Dawes and Mr. Wood were connected with the Subsidy by current rumour in New York. At the request of Mr. Reid, he was granted a private conference with the Committee, in order that he might give them some clues to evidence which would be useless if made public. A member of the Committee stated that there were two or three suggestions which were new, and which might prove valuable, but declined to state what they were.—Mr. Rufus Hatch presented the Committee a long list of questions which he desired should be propounded to Mr. Reid. The Committee refused his request. His questions were such as the following:—"What is the circulation of the *Tribune*?" "Is it owned by an individual or by a corporation?" "How much of it do you own?" Is Jay Gould a stockholder in the *Tribune*?" And then the questions go on to cover the whole ground of the organisation of the new China line, and of the opposition to the Pacific Mail. The Committee say that their object is to find out what corrupt use was made of the money expended by the company in procuring the Subsidy, and they will not undertake to settle Mr. Hatch's controversies with other parties.

On the 19th the principal witness was Mr. Charles A. Wetmore correspondent of several papers on the Pacific Coast, who seems to have written despatches in which he made some slanderous assertions about members of the Committee, coined out of current rumour and a rather lively imagination. He was summoned by the Committee to put in their possession the information on which he based his despatches. He stated that two members of the Committee—Mr. Dawes and Mr. Beck—had become singularly silent and slow in the pursuit of news. It was discovered that he knew nothing at all about what either of the gentlemen had done or had not done to justify this assertion. In regard to Mr. Dawes he could make no explanation of it, but that Mr. Beck had become silent and slow because Mr. Schumaker was a Democrat. Being further pressed he volunteered the statement that somebody had told him that Mr. Beck received a cheque through Fant, who was recently exposed by Mr. Abert. Mr. Beck was greatly annoyed at this statement, and very properly sought to find out who was the author of it. Wetmore refused to tell, whereupon he was turned over to the House and adjudged to be in contempt. The witness subsequently sent to the House a letter of apology for his statements, and the opportunity was promptly seized to discharge him from custody.

On the 20th the Committee took under consideration a proposition to turn over to the grand jury the evidence elicited connecting William S. King with the corruption fund used to secure the passage of the Subsidy, in order that an indictment may be found prior to the limitation fixed by the statute. King disappeared upon the day on which evidence was elicited tracing to him $115,000 of that fund, and all efforts on the part of the Serjeant-at-Arms to secure his arrest have been unsuccessful. It is believed that King is now in Canada, beyond the jurisdiction of the United States authorities. There have been unusual and extraordinary efforts to secure his attendance, and also the attendance of A. H. Whiting.

On the 21st Mr. Irwin, who has been released from gaol, came before the Committee and purged himself from the contempt for which he was committed, by giving a list of names of the persons to whom he had paid money for procuring the passage of the Subsidy, and the amounts paid to each of them. All the names upon his list, with but one or two unimportant exceptions, have been heretofore connected with the Subsidy business. The large amounts which were evidently paid by him for distribution were $125,000 to King, $100,000 to A. H. Whiting, and $300,000 to Schumaker. Then there were several amounts ranging from $5,000 to $25,000, which brings the aggregate of the expenditures which Mr. Irwin accounts for up to about $700,000. He has not stated how much he received for his own services. Hatch received $20,000; Ingham, of the Chicago Inter-Ocean, $10,000; Forney, $25,000. Mr. Irwin's statement that he had paid $25,000 to Forney corroborates the testimony of McFarland. Irwin states that when he gave Schumaker. $275,000, just as he was leaving for California, Schumaker claimed the amount he was to receive, $300,000, and convinced Mr. Irwin of the correctness of that claim. He subsequently sent $25,000 from San Francisco, a fact which is otherwise in evidence, that he has no recollection of receiving this, but if he did receive it he disposed of it according to Irwin's directions.

D. W. Voorhees and Boyd Winchester were both examined relative to the published statements that they had deposited thousand-dollar bills with the Serjeant-at-Arms the day after the passage of the Subsidy, and both of them cleared themselves satisfactorily from any imputations of connection with the Subsidy corruption.

THE STRAITS SETTLEMENTS.

(MORNING POST.)

From accounts recently received of the condition of affairs in the Straits Settlements and the adjacent peninsula, it appears that Sir Andrew Clarke has been giving the native chiefs a convincing proof that they cannot be permitted to release themselves from their compacts with him, acting on behalf of the British Government, or treat his envoys or the messages of which they are the bearers with disrespect. On the 18th of November last his Excellency, having had occasion to address a letter to the Datu Bandar of Sunjie Ujong, who has of late been extremely troublesome, that ruler thought fit to treat the missive with contumely, and to threaten the messenger who conveyed it. Thereupon Sir Andrew Clarke took immediate steps for punishing him, which he did most effectually, as will be seen a little further on. But before entering on the narrative of this expedition, it will be necessary to go back a little into the history of the small Malay States which bound our settlement of Malacca, in order to elucidate, if possible, their mutual relations to each other and to our Government in the Straits, and to show the necessity that is laid upon us, for the safety of a portion of our colony, to compel the different chiefs to be of good behaviour. It will no doubt be remembered that in May last his Excellency visited Sunjie Ujong at the instance of the chief ruler of that country, in consequence of the confusion and anarchy then existing on the River Lingie, by which trade was completely at a standstill. On this occasion Sir Andrew Clarke destroyed some strong stockades at Bukit Tiga, which were the head-quarters of the piratical chiefs, and opened the Lingie for the conveyance of tin to Malacca and elsewhere from the rich mines of the country. In the proceedings at that time the Datu Bandar also figured discreditably. The origin of the disturbances which so seriously affected Sunjie Ujong will appear in the account which we now proceed to give of the small Malayan States on the borders of our own territory. Originally these States were nine in number, and they are supposed to have been established by members of the Menangkabowe family, from Sumatra, who settled in the interior of Malacca, and contracted marriages with the women of the country some time in the twelfth century, shortly after the foundation of the first Malayan Empire at Singapore. The States appear to have been tributary to the Empire of Malacca from their first establishment, and in later days, when Johore became the seat of Government, they were subject to it, being governed after a system enforced by the Sultan of that country, but probably inaugurated by his predecessors at Malacca. Under this system each State was presided over by a chief styled the "Punghulu," who was assisted in his office by four "Sukus," or chiefs of tribes. The Punghulus were elected from a particular family by the Sukus and people, but it is evident that the Sultan of Johore was consulted in the elections when any difficulty arose, and by him distinctive titles which are used up to the present day were conferred on these high officials, the spheres of whose government in process of time apparently were recognised as confederate States governed by their subordinate rulers, under the authority, which was scarcely exercised at all, of the Sultan above-named. By-and-by, five of the States were left under the direct rule of this prince, and Sunjie Ujong, Rumbowe, Johore, and Sri Menanti, which had taken the place of Naning in the Confederation, were placed under a ruler from the Royal family of Menangkabowe, who was created Eam Tuan Besar, or Great Ruler. It should be stated that prior to this, and whilst Naning was still one of the Confederate States, the Sultan of Johore had made over his rights to Sunjie Ujong, Rumbowe, and Johore to the Dutch, and it was in consequence of the general dissatisfaction with their rule that the States requested the Sultan to appoint the aforesaid Great Ruler. Five successive princes of the Menangkabowe family bearing this title reigned over the States, the last of whom was compelled to retire to Sumatra after a troubled and disorderly reign of six years. It would seem that their authority after all was more nominal than real, for they were not permitted to take any part in the actual government of the States, but were more like pageant princes; and it may be said that the system under which they were appointed was highly disadvantageous to the States. At the close of this dynasty, if so it may be termed, the States continued to be governed as they were before by their own Punghulus, except that the nominal headship of the Eam Tuan Besar having ceased, there was no one whom they or their neighbours recognised as the leading man of the four States collectively. It is supposed that prior to the establishment of the Menangkabowe rulers Sunjie Ujong was looked up to by the other States, for its chiefs were accorded the distinctive appellation of "elder brother" by the other three Punghulus. Nevertheless there was no manifest disposition at the time of the expulsion of the last Great Ruler to elevate the Sunjie Ujong chief, known as the Datu Klana, to the position of Eam Tuan Besar. This title was, however, usurped by one Rajah Alli, who on his mother's side

Digitized by Google

was grandson of the second regular Great Ruler, and was generally reputed to be one of the most able and ambitious of all the Malay chiefs. He had plotted against his uncle Rajah Assit, created Eam Tuan Muda by the third Great Ruler, and when in exile for his treasonable practices, went to Rumbowe, where the Rajah resided, induced him to retire in his favour for a time, and finally supplanted him in his dignity. This same Rajah Alli stirred up the opposition and rebellion against Rajah Labu, the last of the Royal Great Rulers, which finally obliged that prince to leave the country, but in the intrigues which he carried on at that time he was strenuously resisted by the Chief Ruler of Sunjie Ujong, Johore, and Sri Menanti, who had never recognised his position as Eam Tuan Muda, and combined in besieging him at Bandar in Rumbowe. Rajah Alli had therefore no reason to be amicably disposed to the chief of Sunjie Ujong, and it is probable that to the enmity thus begun may be due some of the complications between Rumbowe and that State which are disclosed in the subsequent history. On the flight of the above-named Rajah Labu, the Punghulu and Sukus of Lower Rumbowe declared Rajah Alli "Great Ruler," and his son-in-law, Syed Sabban, "Lesser Ruler;" but neither of these elections was considered valid by the rulers of the other States, and his authority was confined to Rumbowe. It was about this time that the Ruler of Rumbowe first derived any revenue from the tin mines of Sunjie Ujong, or, more strictly speaking, Lingie, which is a settlement owning allegiance to Sunjie Ujong. The chiefs of Rumbowe have also claimed to have jurisdiction over it as having been founded by men from their territory, but this claim the Lingie people have always repudiated. It may be well here to give a brief account of the founding of this settlement, and to understand this the better it will be requisite to glance at the geographical position which it occupied with regard to the two States which put forward pretensions to authority over it. Both territories are situated on the Lingie-river, which is divided into two branches at Sampang, about six miles from its mouth, Sunjie Ujong lying on the northern and Rumbowe on the southern branch of the river. About ten miles up the former, but on the opposite side of the Sunjie Ujong, is the settlement known as Lingie, formed originally by some Bugghese men from Rhio, over whom the Klana of Ujong appointed one of their number as Datu, which means head of a tribe or chief of a district. In course of time a Rumbowe man settled in Lingie, and having married one of the Datu's daughters, was subsequently, on the death of his father-in-law, placed in his position by the Klana of Sunjie Ujong, with the concurrence, according to some accounts, of the Punghulu of Rumbowe. The fact of this Datu having been a subject of Rumbowe and of others from the same State having joined the settlement, seems to be the origin of the claim of that State to Lingie. Be this as it may, the Rumbowe people have always endeavoured to share the revenues of Sunjie Ujong on the northern branch of the river, asserting that the whole of the left bank, on which Lingie is situated, belongs to them.

Naval and Military.

The following officers, who last served on the China station, have received appointments as under:—Lieutenant R. O. B. C. Brenton (in the Cadmus, from 1873 to 1874) to the Excellent, gunnery ship at Portsmouth; Lieutenant A. Cockran (in the Midge, from 1872 to 1874) to the Boscawen, training-ship for boys; Lieutenant S. A. Hungerford (in the Thalia, from 1872 to 1873) to the Cambridge, gunnery-ship at Devonport; Mr. G. Harding, Assistant-Engineer (in the Teazer from 1872 to 1874) to the Jumna, Indian troopship; Mr. L. Creagh, Gunner (in the Zebra, from 1870 to 1873) to the Penelope, coastguard ship at Harwich; Mr. W. Roskilly (in the Juno, from 1871 to 1873) to the Ganges, training-ship for boys at Falmouth; Mr. A. F. Organ, Carpenter (in the Princess Charlotte, from 1871 to 1872) to the Diamond, corvette, at Sheerness.

Brevet Lieut.-Colonel A. Wolridge, of the Royal Marines, who was present at the bombardment of the batteries at the Straits of Simonoseki, the entrance of the inland sea of Japan, and as brigade-major at the capture and destruction of the batteries, magazines, and barracks, and during the shore operations in 1864, has retired on pension, and is to be accorded the honorary rank of colonel in the Army.

The latest news from the Brazilian coast is dated Rio, the 5th Jan. The gun-vessel Dart, Commander Denny, was there. H.M.'s sloop Daring, Commander Hanmer, had arrived on the 23rd Dec., and gone on to the Pacific on the 2nd Jan. H.M.S. Newcastle, Captain R. Douglas, one of the detached squadron, reached Rio on Christmas Day, and sailed to rejoin Rear-Admiral Bandolph's flag on the 3rd Jan.

The Admiralty have directed that James Little, a private in the 24th company R.M.L.I., Plymouth Division, shall be promoted to corporal, "for the coolness and gallantry displayed by him on the occasion of the attack made by two piratical row-boats on the Midge's boats, on the 16th September, 1873, in the Laroot River."

Experiments are being made in all the manufacturing departments of the Royal Arsenal, with a patent fuel which is much used on board ship, and is understood to be adapted for forge furnaces. It is supplied in rectangular blocks, and a large quantity has been brought from the North to give it a fair trial.

The Vigilant, paddle despatch vessel, Lieutenant-Commander Hugh C. D. Ryder, *en route* for the China Station, called at Galle, where she touched the ground, and had to proceed to Trincomalee for repairs, which were expected to be completed on the 28th December, when she would leave for Singapore.

Deputy Inspector-General Morgan has arrived at Hong Kong, and has relieved Dr. Loney, R.N., in medical charge of the hospital. This last-named officer will return to England by next mail, and will, therefore, probably take up his appointment at Haslar about the 20th inst.

News has been received of the murder, by inhabitants of Bushire, of the interpreter of Her Majesty's ship Magpie, which has been engaged on service in the Persian Gulf. The interpreter, though a native and employed in a civil capacity, was serving under the British flag.

Rear-Admiral Edward Bridges Rice is named as the probable successor of Rear-Admiral Sir William King Hall, K.C.B., Superintendent of Devonport Dockyard, on the promotion, which may be shortly looked for, to Vice rank of the latter officer.

The Nymphe, screw-sloop, recently commissioned, has been unundocked at Sheerness. She will proceed to the Australian Station, calling at the Cape of Good Hope, and will relieve the Dido, which has been nearly four years in commission.

Lieutenant-Colonel Hadfield, of the Madras Invalid Establishment, who greatly distinguished himself in the Chinese war of 1841, has been awarded the good service pension rendered vacant by the death of Colonel R. S. Wilson.

Mr. John D. Deane, lieutenant of H.M.S. Duke of Wellington, late of the Avon, brother to Mr. Deane, superintendent of police at Hong Kong, has passed the extra examination qualifying him for navigating duty.

Mr. Ward Hunt, First Lord of the Admiralty, presided on the 29th ult. at the meeting of the Royal Institution, at which a lecture was delivered by Professor Huxley on "The Challenger Expedition."

The composite-sloop Egeria, Commander Turton, arrived at Aden on the 8th ult., and was to leave in a few days for Singapore to join the China Squadron.

Captain Walker, who served as a subaltern in the Ceylon Rifles, has joined the second battalion of the 15th Regiment, which has just left for India.

Miscellaneous.

MR. CONSUL SALTER ON THE YANG-TSZE.

A statement recently made by Mr. Colton Salter, formerly United States Consul for the treaty ports of the Yang-tsze, in relation to the antiquity of the practice of pisciculture in China, has been disputed by Professor Baird, the United States' Fish Commissioner. Mr. Salter, in replying, asks the scientific and commercial men of New York to aid him in organising an expedition for a thorough exploration of the Yang-tsze-Kiang, which, he observes, is over 3,000 miles long, and above Hankow (650 miles from Shanghai) is virtually closed to all foreign trade. He says:—"On that great river, the 'Child of the Ocean,' as the Chinese poetically term it, there are perhaps 100 cities with dense populations, all eager for trade. In one place on the river the pisciculatural nurseries line the banks for nearly fifty miles. Many drugs of great value are found; the so-called Turkey rhubarb; the Spanish fly, indigenous to the western provinces of China, sent across the plains of Asia centuries ago and planted in Europe. The castor-oil, so repulsive to the taste here, is as delicate there as the finest olive-oil, and is used for cooking fish. It is a wonderful land and full of mysteries. If Professor Baird will accompany me, I will show him in Southern China a cotton gin precisely similar to the one said to have been invented by the American Whitney. He will find all sorts of inventions and discoveries made forty centuries ago in Cathay, yet claimed to-day as the inventions of our race in Europe and this country. Even the familiar tobacco and potato, which Sir Walter Raleigh supposed were the sole productions of America, may be found growing wild in China, along with cotton (short staple), the sweet potato, the maize, white and yellow corn, and the familiar buckwheat, so dear to the average American (soaked in butter, fat, and syrup) in winter time, and so bad for his poor stomach. All these grains and cereals were doubtless carried over Behring's Strait by the nomad tribes of the great Mongolian plains in some far-forgotten period of the world's strange history, and the Chinaman of those ages became the ancestor of the American Indian to-day. In North China I can show Professor Baird a most ingenious adaptation of means to the end in the shape of a peculiar barrow, with the wheel over the centre of the place for freight,—perhaps a family of half a dozen or so, or a load of these so-called American cereals,—going to the market with these motive powers all working in perfect harmony—viz., a donkey ahead tugging at the bamboo rope, a sort of lateen sail to catch the breeze that is always blowing over the vast plains of Mongolia and Manchooria, and the patient Chinaman steering the unique affair, and aiding its progress, if necessary, by a trot of about four miles an hour. A few thousands spent now would be returned in millions in a few years. America ought to lead in China. At present we only drift along and lose golden opportunities daily."

MR. WILLIAM H. ASPINWALL, the well-known China merchant of New York, died a few weeks since, in the sixty-seventh year of his age. He was born in New York in 1807. His father, Mr. John Aspinwall, was one of the old firm of Gilbert and John Aspinwall, who were engaged in the dry goods trade for many years. The deceased entered the house of G. G. and S. S. Howland as a clerk, which position he occupied until 1832, when he was taken into partnership by the firm. Here it was that the foundation of the splendid fortune he acquired in after years was laid. In 1836 or 1837 the senior partners of the house went out of business, each leaving a cash capital of $100,000 in the concern. William E. Howland, son of the senior partner, and William H. Aspinwall then took charge, under the firm name of Howland and Aspinwall, which has since remained unchanged. As the business of the house on the Pacific coast was largely increased by the discovery of gold in California, Mr. Aspinwall directed his attention to the establishment of steam communication with San Francisco, and in 1848 he retired from active connection with the firm, and devoted himself wholly to this enterprise, and associated with it the building of the Panama Railroad. The Pacific Mail Steamship Company was successfully organised through his efforts, and the success of the Panama Railroad was also due, in a great measure, to his energetic advocacy of the plan and his untiring attention to the details.

COOLIE CIVILISATION.—Mr. William E. Knollys writes to *The Times*

Digitized by Google

as follows :—"The following extract from a letter received by me from Trinidad may not be without general interest, as showing the prosperity to which it is possible for Hindoo coolies to attain in our colonies :—'You will be surprised to learn that one of the coolie immigrants, of the name of Ajoone Saw, won almost all the races. He bought the two horses belonging to H.—Wild Dayrell and Little Dangerous—for $1,800, and among other stakes carried off the Governor's Cup and the Ladies' Purse; he won in all about $3,000, and was much complimented by the Governor. The same man bought the late Governor's carriage, and is driving two horses, and has servants in livery. The races referred to were held on the 29th and 30th of last December at Port of Spain, Trinidad. I see that Mr. Ajoone Saw's colours were 'blue body, orange sleeves, and black cap.' I think that when many hard things are being said of coolie labour it is well the bright side of the picture should be known as well, for Mr. Ajoone Saw is in every essential still a coolie, although the only disagreeable circumstance remaining to remind him of the fact is the necessity of producing his 'pass' when called upon by the police to do so."

THE RANGOON ROUTE TO CHINA.—Mr. Coryton, the late Recorder of Rangoon and Moulmain, writes to *The Times* as follows :—"The result of our N.W. China Exploration, if successful, will be to effect the purpose advocated by Mr. Salter, for the exploring party will no doubt return to Burmah *vid* Shanghai. Let us hope that no material jealousy will be allowed to impede this great work of opening up communication in this quarter for the good of all. Till now the French are, I believe, the only Europeans who have set foot in Tali. They got in there for a moment in 1868. I am bound to say that the only feeling I heard expressed about them in India was one of honest admiration at their pluck. We can all help each other in our own way. It is only by the aid of the admirable organisation of the French Catholic clergy in Indo-China and China that Englishmen and Americans have hitherto been able to make their way at all in this region. If American influence is greater on the Upper Yang-tsze than either ours or theirs, let us hope that at this critical moment it will be exerted in aid of our little convoy now on its passage through the wild scenery that lies between the Bay of Bengal and the headwaters of the Yang-tsze."

VOLATILE FLUIDS.—A patent has been taken out by Dr. James Lilburne (whose name will be familiar to our readers in the Far East as having served in the navy in China and Japan) for the Export and Stowage of Volatile Fluids in Hot Climates. This invention consists of a peculiarly-shaped bottle, which can be made in any size, and the top of which is hermetically sealed with blown glass. When required to be opened the top of the bottle can be easily removed with a diamond, and the contents can be at once used without danger of evaporation, the bottle having been previously immersed in a freezing mixture. Several consignments of Richardson's anæsthetic æther, chloroform, and other chemicals put up in these bottles have been exported from England to hot climates, some of which have been stored in cupboards at a very high temperature for several months, but in no case has the slightest evaporation occurred. The invention may be chronicled as a complete success, and the inventor may be congratulated upon the result of his investigations, both from scientific and commercial points of view.

UNDERWRITERS' LIABILITIES.—The following letter, from Messrs. Hollams, Son, and Coward, in reference to the *Delta* case, has appeared in the *Shipping Gazette* :—"The attention of our clients, Messrs. Sassoon and Co., has been called to a letter signed 'C. G.,' inserted in the *Shipping and Mercantile Gazette* of the 23rd ult., referring to the case of 'Sassoon *v.* Harris,' and we are desired by them to inform you that the writer has written under total misapprehension as to the facts of the case, and the claim made by our clients. The interest covered by the policy on opium, per *Delta*, was valued at £63,450, and the policy was for £30,000; our clients were thus uninsured to the extent of £33,450. The proportionate value of the opium lost was £42,750, and the total amount claimed from the Underwriters was £20,214 6s. 10d. This claim was in accordance with a statement prepared by experienced Average Adjusters in London, and the accuracy of the figures has never been questioned. Many of the Underwriters paid the claim without question, and our clients thus received about £8,000, leaving a balance of about £12,000, which they seek to recover in the above action. It will thus be seen that our clients' claim is based upon the well-known and ordinary rule, applicable to cases in which the assured are in part their own Underwriters."

Monetary and Commercial.

Tenders for £700,000 in bills on India were received at the Bank of England on the 3rd inst. The amounts allotted were—to Calcutta, £395,000; to Bombay, £300,000; and to Madras, £5,000. Tenders on Calcutta and Madras at 1s. 10d. will receive about 6 per cent., above in full; and on Bombay at 1s. 10 1-16d. about 4 per cent., above in full. The demand for remittances appears by these figures to be falling off slightly.

The quietness in the Manchester Market has continued, but in a rather lessened degree. A more active demand for cotton in Liverpool imparted considerable firmness, and a slightly improved inquiry has been noticeable in many quarters, business not, however, being materially increased, owing to the full prices required by producers.

Messrs. Morton, Rose, and Co. invite subscriptions for $2,000,000 (or £400,000) in Seven per Cent. Currency Bonds of the Delaware and Hudson Canal Company at the price of 95 per cent., or £190 per $1,000 bond. This issue is the balance of $5,000,000 required for reimbursing the company for £600,000 sterling of its debentures which were paid last year, for meeting other debentures arriving at maturity, and for erecting new buildings. The bonds are repayable in 1894.

Messrs. J. S. Morgan and Co. will receive applications for $3,000,000 (or £600,000) in U.S. Currency Six per Cent. Consolidated Mortgage Bonds of the Lehigh Valley Railroad Company. The price of issue is 88 per cent., or £176 per 1,000 dollar bond, and the money is required for the completion of the extension line to tide-water, near New York.

The tenders for the City of Auckland Six per Cent. Loan of £100,000 have been opened at the Bank of New Zealand, when it was found that a total of £497,700 had been applied for. All tenders at 98 and above will receive in full, and tenders at £97 15s. 6d. will receive about 50 per cent.

It is announced that the Agent-General for South Australia has disposed of the whole of the £600,000 South Australian Government Four per Cent. Bonds at and above the advertised minimum price of £90 per £100 bond.

The City of Paris New Lottery Loan is not likely to be much applied for here, but it is evident that the applications are large in France, for they are disturbing to some extent the course of the Money Market. A few particulars as to the nature and amount of this borrowing may, therefore, be interesting. The loan is for £10,000,000 nominal, or in 500,000 bonds of 500f. each, at the issue price of 440f. per bond, payable in four equal instalments. The bonds are to bear interest at 4 per cent., or 20f. per bond, and the loan is to be redeemed in seventy-five years by quarterly drawings commencing on the 5th of May next. At each of these drawings lottery prizes of 225,000f. will be given in sums of from 100,000f. down to 1,000f.

The new Bank of Indo-China, established by decree of the French Government, has a capital of f.8,000,000, in 16,000 shares of f.500 each, with f.125 paid. It is empowered to issue notes of f.1,000, f.500, f.100, f.25, and f.5, or of similar amounts in native money. The note circulation is limited to three times the amount of bullion kept by the bank. The head office of the company is in Paris, and two branches are to be established forthwith at Saigon and Pondicherry. Agencies may, under Ministerial authorisation, be opened in other places in French colonies, and in the open ports of China and Japan. The bank has a powerful board of directors, appointed by decree, to remain in office till the first general meeting of shareholders, in May, 1876. They are—MM. Hentsch (of the firm Hentsch, Lutscher, and Co.), president of the Comptoir d'Escompté; Girod, director of the Comptoir d'Escompte; Durrien, Viscount Paul Daru, Allard, Edouard Delessert, Gillet, Prevost, &c.

The half-yearly report of the Credit Foncier of England (Limited) shows an available balance of £41,587, out of which it is proposed to pay a dividend for the six months at the rate of 5 per cent. per annum, leaving £10,076 to be carried forward. No alteration has been made in the valuation of the company's investments. It is added that the profits would have been considerably larger but for the unsettled state of the money market in November and December, which caused the directors in prudence to restrict business.

The directors of the Merchants' Marine Insurance Company have issued their report for the year ending the 31st Dec. last. The underwriting account of 1872 is closed with a debit balance of £36,858 12s. 5d. After reinsuring all outstanding risks on the underwriting account, 1873, there remains a balance of £12,091 15s. 1d. The interest earned in 1874, including a profit on investments which have been realised, amounts to £5,058 13s. 7d., but, owing to the loss on 1872 and 1874, the directors recommend that the usual division of interest should be suspended.

The directors of the Home and Colonial Marine Insurance Company have issued their report for the year ending the 31st December. The underwriting account for 1872 is closed, and shows a net loss of £20,324 5s. 4d. There still stands at the credit of 1873 account, after the deduction of expenses, £10,395 12s. 1d. The net premiums for 1874 amount to £151,185 1s. 6d., and the losses and claims paid on account of the same, to £81,940 9s. 1d. No further dividend is recommended than that already paid in July last.

Subject to the audit of the accounts, the directors of the Telegraph Construction and Maintenance Company (Limited) propose paying a dividend of 15 per cent. (36s.) per share, in addition to the ad interim dividend of 5 per cent. already paid, together with a bonus of £5 per share, in certificates of a Trust to be formed of shares of the Brazilian Telegraph Company and ordinary shares of the Globe Company in about equal proportions.

Replying to a deputation of shipowners of the City of London who waited upon him to urge the introduction of a measure with regard to British shipping, the President of the Board of Trade stated that he intends to bring in such a Bill as early as possible during the session.

The Eastern Telegraph Company's traffic receipts for the month of January amounted to £37,730, against £37,037 in the corresponding period of 1874. The receipts of the Eastern Extension, Australia, and China Telegraph Company (Limited), for the month, amounted to £18,924, and to £20,717 for the corresponding period of 1874.

The Bar Silver, ex West India and Pacific steamers, has been sold at 57½d. per oz. The market is quiet at this quotation, the India Council Bills having gone at lower rates. Mexican Dollars have been placed at 56⅝d. per oz., this being the present quotation.

FREIGHTS AND CHARTERS.

Rates of freight for vessels on the several berths continue steady, and our quotations remain unaltered. In homeward business there is but little doing.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 65s. weight, 55s. meast. To Hiogo: 70s. weight, 65s. meast. To Nagasaki: 75s. weight, 70s. meast. To Shanghai: 50s. weight, 40s. meast. To Hong Kong: 50s. weight, 40s. meast. To Singapore: 50s. weight, 40s. meast. To Penang: 40s. weight or meast. To Colombo: 35s. weight or meast.

Per SAILING VESSELS.—To Yokohama: 40s. weight, 35s. meast. To Hiogo: 45s. weight, 40s. meast. To Nagasaki: 50s. weight, 40s. meast. To Shanghai: 35s. weight, 25s. meast. To Hong Kong: 35s. weight, 30s. meast. To Singapore: 25s. weight, 22s. 6d. to 25s. meast. To Batavia, Samarang, and Sourabaya: 27s. 6d. weight, 27s. 6d. to 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Singapore: £24. To Penang: £25, f.c. To Galle: £23.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Shanghai: 35s. To Singapore: 25s. to 26s. To Colombo: 25s. To Galle: 23s. to 24s. To Batavia and Sourabaya: 24s. to 25s.

From Birkenhead, per ton.—To Singapore: 20s.

CASUALTIES.

The Honigby, V. Lemven, from Newcastle to Java, with coals, has put into Falmouth, making about six inches water in four hours.

The Salvage Association have issued the following report:—Queen of the Colonies, Batavia to Falmouth; the ship is broken in the middle. The Commissaire de a Marine has been on board. It is hoped that the greater part of the rigging and sails will be saved, a considerable portion being already landed.

Information has been received that the str. Calabar, which left, Nov. 11, for Singapore, and on which 60 guineas had been paid at Lloyd's, has arrived at Alleppe, on the Malabar Coast.

MISCELLANEOUS.

ENTERED THE SUEZ CANAL.—Jan. 13, Esmeralda (str.), from Aberdeen, and left 14th, for Manila.

At PORT SAID.—Lotus (str.), from London, for Penang, Singapore, and China.

At SUEZ.—Jan. 30, Kon. der Nederlanden (str.), from Nieuwe Diep, and left for Batavia.

The Edeline, which vessel cleared from London, Jan. 13, for Singapore, sailed from Deal, Feb. 2.

At ASCENSION, DEC. 24.—Prince Rupert, from Bassein, for Queenstown; H.F.B.W. (barque), from Batavia, for Falmouth; Westminster, from Manila, for New York; Wemyss Castle, from Shanghai, for New York; William and Anna, from Samarang, for Falmouth; H.R.D.G. (Austrian barque), from Java, for Baltimore.

At TABLE BAY, DEC. 24.—Annie, Todd, from Manila.

LAUNCHES, &c.

THE P. AND O. FLEET.

THE P. and O. Company's steamer Deccan, Capt. Soames, has arrived in Victoria London Docks from Palmer's yard, on Tyne, after a thorough repair, including new boilers and compound engines. At the trial trip she accomplished the run from the Tyne to the Coquet and back, a distance of forty miles, in three hours. She will take out the Bombay mail on the 18th from Southampton. The China has been despatched to the Venice and Alexandria line after a complete repair. The Poonah it is expected will be ready for service, after lengthening and other repairs, about May. The Bangalore will shortly be home, and undergo a refit and alterations. The Candia has been sold out of the service. The vessels in Victoria Dock now are the Surat, Deccan, Peshawur, Delhi, Travancore, and Geelong.

TRIAL TRIP OF THE "FLAMINGO."—On the 30th ult. a party of gentlemen went on board this fine new screw steamer, built to the order of Messrs. Seater, White, and Co., of Leith, by Messrs. Barclay, Curle, and Co., shipbuilders and engineers, Glasgow, and accompanied her on a trial trip from the Tail of the Bank. The Flamingo ran the measured mile at Skelmorlie six times, when it was found that her average speed was 11½ knots—a result gratifying both to builders and owners. The Flamingo, which is 301 feet long, 33 feet beam, 25 feet deep, with a gross tonnage of 1,850, is specially fitted up for the East Indian and China trade. The engines, which are of the compound type, of 175 nominal horse-power, gave great satisfaction during the trial.

DISCOVERY OF AN ISLAND.—Notice is given that the Dutch colonial steamer Hertog Bernard, on her passage from Padang to Atchin, passed an isle not indicated on the chart. It is low, and extends north and southward six miles, lat. 0 2 S., lon. 97 36 E. Admiralty charts No. 2,760, west coast Sumatra; sheet 1, Dutch chart westkust Sumatra, Bl. 1.—The Rear-Admiral Commanding the Naval Forces in Netherl. India, F. L. Geerling.

THE China Trans-Pacific Steamship Company's steamer Vancouver arrived at Yokohama on the 28th ult. from Hong Kong, and left for San Francisco on the 30th ult.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful Paint known, is cheaper to use than White Lead, and adapted for all climates.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter. Each cask of Pure White Zinc is stamped "HUBBUCK, LONDON, PATENT." Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have violated their mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships, and Buildings exposed stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

or Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard, and certain Drier for White and Light Coloured Paint.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

CAUTION.—In April a native dealer at Hong Kong was prosecuted and convicted of a fraudulent imitation of Hubbuck's name and mark by placing them on some spurious goods shipped from London.

Edition of 1874. Just issued, large 8vo., pp. 724, cloth-8s., or bound in half morocco, 10s. 6d.,

THE HOMŒOPATHIC DOMESTIC PHYSICIAN.

A Medicine Chest, book enclosed, £3 10s. or £5 5s.

JAMES EPPS & Co., 48, Threadneedle-street, and 170, Piccadilly.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

CEYLON COFFEE ESTATES.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.
Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

E. M. SMITH, Manager.

THE MAILS, &c.

The P. and O. mail, bringing the above advices, was delivered, *via* Brindisi, this morning, its due date. The next inward (French) mail, with advices Yokohama 5th, Shanghai 8th, Hong Kong 14th, Singapore 21st Jan., which is due, *via* Marseilles, on Monday next, the 22nd inst., left Suez on the 8th inst., four days early.

The Great Northern Telegraph Company's cable between Wladavostock and Nagasaki has been repaired.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Baroda*, arrived Feb. 11.—From Singapore: Sir Henry Bulwer. From Shanghai: Rev. and Mrs. D. Ellinwood. To Venice.—From Galle: Mr. J. Smith. From Hong Kong: Mr. and Mrs. L. Grant. To Port Said.—From Singapore: Mr. and Mrs Vandesluis, and son

To Southampton, per P. and O. steamer *Pekin*, expected to arrive Feb. 22.—From Hong Kong: Mr. J. Gill, Mr. W. Chalmers, Mr. P. Caravdelli. From Singapore: Surg.-Major McNab, Mr. R. Findlay, Mr. J. Filsher, Mr. M. Connell, Mr. W. Younger.

Per steamer *Achilles* (Holt's line), expected to arrive in London Feb. 15.—From Penang: Mr. Neame, Captain Clark. From Shanghai: Mrs. Mackenzie, Mr. John Cormach, Mr. McGregor, Mr. A. McLeod, and Mr. G. Oughton.

PASSENGERS OUTWARD.

Per French steamer *Peiho*, Feb. 14.—To Hong Kong: Mr. Guillenim, Mr. and Mrs. Hutchinson, Mr. Gultrow, R. Arianjo Rozario. To Shanghai: Mr. Marsh, Mr. and Mrs. Volsch, Mr. W. Pardon, Mrs. Fryer, Mr. Creigh, Mr. Eustace. To Saigon: Mr. Perrier. To Singapore: Mr. Gunn, Mr. Adam. To Galle: Mr. H. Wiggin, Mr. G. A. Baumgartner. To Batavia: Mr. Hagedown.

Per French steamer *Meikong*, Feb. 28.—To Shanghai: Mr. Buissonnet, Mr. Ferguson, Mr. M. R. Mackellar, Mr. Gordon, Mr. and Mrs. Jerdein. To Hong Kong: Mr. Cartwright, Mr. Fairhurst. To Galle: Miss Holden.

Per French steamer *Sindh*, March 14.—To Shanghai: Mr. Evans, Mr. S. Marsh. To Hong Kong: Mr. W. M. Reeves. To Batavia: Mr. and Mrs. Erdman. To Galle: Mr. Tennant.

Per French steamer *Anadyr*, March 28.—To Shanghai: Mr. F. B. Johnson. To Galle: Mr. George Hayes.

Per P. and O. steamer *Surat*, from Southampton, Feb. 11.—To Yokohama: Capt. and Mrs. McDonald and two children. To Shanghai: Mr. P. M. Grant. To Hong Kong: Sub Lieut. Cameron, Surg. Major Ferguson, Mrs. Ferguson, Mr. D. R. Crawford. To Singapore: Mr. R. Lirde. To Ceylon: Mr. W. Rogers. Capt. and Mrs. Clarke.

Per P. and O. steamer *Baroda*, from Venice, Feb. 19.— To Hong Kong: Mr. and Mrs. Cardross Grant. To Singapore: Mr. R. S. Parr.

Per P. and O. steamer *Baroda*, from Brindisi, Feb. 22. - To Hong Kong: Mr. and Mrs. F. W. Mitchell. To Ceylon: Mr. Livan, Mr. J. M. Robertson, Jun.

Per P. and O. steamer *Peshawur*, from Southampton, Feb. 25.—To Yokohama: Mr. and Mrs. Troup. To Singapore: Mr. and Mrs. Innes, Mr. A. McBean.

Per P. and O. steamer *Lombardy*, from Venice, March 5.—To Ceylon: Mr. and Mrs. Duncan.

Per P. and O. steamer *Lombardy*, from Brindisi, March 8.—To Galle: Mr. Anthony Trollope, Mr. J. R. Hedgers.

Per P. and O. steamer, from Southampton, March 11.—To Hong Kong: Mrs. Maclean nd party.

Per steamer *Gordon Castle* from London, Feb. 14.—For Port Said: Mr. Evans Hicks. For Singapore: Mr. W. Voughen. For Shanghai: Mr. and Mrs. James Williamson and child.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present French mail brings advices from this port to the 29th Dec.; no later mail from London than that of Oct. 30 had arrived out. The following summary of news is from the *Japan Herald*:—

The Japanese soldiers had completely evacuated the island of Formosa on the 3rd Dec. The Chinese and Japanese fired a salute of twenty-one guns at the moment of the departure of the latter. The officers who accompanied H.E. Okubo to China were received at the Imperial Palace, on the 9th Dec., by the Emperor, who thanked them for the great victory they had gained over the Chinese. Great preparations are being made to *fête* General Saigo and the troops from Formosa, who are shortly expected.

Our political news during the period under review is very limited. Rumours that Soyeshima will rejoin the Ministry are current, and a certain amount of dissatisfaction is said to exist in several of the provinces, caused partly by the negotiations in China, and partly in consequence of the heavy taxation.

The Mikado held a grand review at Itabashi on the 7th Dec., at which the Foreign Representatives were present by invitation. About 7,000 men were under arms, and the manœuvres were very fairly executed. His Majesty also presented new flags to four regiments of the Imperial Guard on the 19th Dec.

The observers here of the Transit of Venus were highly favoured by the weather, the day having been cloudless. The Mexican party had two observatories here, and another was erected by Baron Von Oesterreicher, the captain of the Austrian corvette *Friedrich*, at which observations were made, and photographs taken. The U.S. and French parties at Nagasaki were not so fortunate, as the day was somewhat cloudy.

The native mercantile world is still in an unsettled state, not having yet recovered from the shock given to credit by the failure of Ono's Bank. The embarrassments have been so perplexing, and as the Government itself is the principal creditor, we hear that there is some probability of its coming forward to resuscitate the bank, rather than submit to the heavy loss which its suspension and winding-up would involve.

On the 20th Dec. the publishing office of the *Herald* had a narrow escape from destruction by fire. An office on the premises, in the occupation of Mr. E. Abbott, bill and bullion broker, had been closed at about four o'clock on the previous night. Next morning a volume of smoke was seen issuing from the window, and an alarm was promptly given. There was a good supply of water on the premises, and the fire was extinguished before it had well got hold of the building, but not before the contents of the office had been almost entirely destroyed. Mr. Abbott was uninsured. The origin of the fire is a mystery, but it is sup-

Digitized by Google

posed to have been the result of carelessness by somebody smoking; the fire had evidently smouldered during the entire night. Mr. Mac Donald's well-known house, "The Firs," on the Bluff, leading to Homoko, was completely destroyed by fire on the 17th Dec. The house was occupied by Mr. and Mrs. J. Hudson, and it was with considerable difficulty that they escaped with their infant child.

On Friday, the 18th inst., Chevalier von Schaeffer, Austro-Hungarian Minister Resident to Japan, had an audience of H.M. the Mikado, to present his letters of credence. The Minister's suite was composed of Mr. von Roretz, Chevalier von Siebold, and Baron Oesterreicher, Captain of the Austrian corvette *Friedrich*, who, together with Count de Batthiany, were also introduced to the Emperor.

The Emperor will receive the Diplomatic Corps on New Year's day, in accordance with annual custom. The Empress also, for the first time at the commencement of the New Year, will hold a drawing room.

The Prefecture of Police of Tokio has addressed the following circular to all the *cho* of Japan:—"Any person, in European costume, meeting his Imperial Majesty, will be obliged to salute the Emperor by holding his hat under his left arm, and lowering his right hand to his knees. Those who do not wear a hat will be obliged to lower both hands to the knees whilst bowing before the Emperor."

Mr. W. H. Litchfield, LL.B., Barrister-at-Law, has been admitted to practise in H.B.M. Provincial Court at Yokohama. Mr. W. Montague H. Kirkwood, of the Western Circuit, Barrister-at-Law, has been admitted to practise in H.B.M.'s Provincial Court in Yokohama.

A plan has been prepared by Mr. Brunton, M.I.C.E., for the Japanese Government, with the object of giving superior facilities for the discharge of ships, and improving the harbour of Yokohama.

The Japanese Government has nominated Machida, an officer of the 4th grade, as Commissioner for the products of Japan at the Universal Exhibition at Philadelphia, in 1875.

A rumour is current in Yedo that the Government is on the point of entering into negotiations with some European houses for the sale of the gold and silver mines which it possesses.

Small-pox is prevalent both in Tokio and Yokohama, and the Governor of the latter place has issued orders for compulsory vaccination.

Messrs. Bourne and Co. sold the lot No. 27, Bluff, comprising 1,825 tsutoes, to Mr. John Hudson, for $6,100. The house was formerly occupied by Mr. C. E. De Long.

Mr. Robertson, the Agent of the Oriental Bank Corporation, announces that the United States trade dollar will be taken from constituents in the ordinary course of business at par with the Mexican dollar. This move on the part of this powerful corporation virtually extinguishes the chance of the Japanese silver yen for general acceptance in China and India. The Japanese Government has been induced to pursue so timid and wavering a line of policy with respect to the yen, that the Americans have had the opportunity given them of stepping in with their new Trade dollar (in every respect a better coin than the Mexican), and having apparently an inexhaustible supply of silver, and excellent mechanical facilities for minting, they will henceforth compete with the Mexican dollar for the field of the East, leaving Japan altogether distanced. Her Mint will now be regarded as supplying local necessities only, its operations will be henceforward limited to Japan.

CHINA.

PEKING AND TIENTSIN.

The correspondent of the *North China Herald* writes as follows:—

There is little of interest to report, save that the Emperor has the small-pox. The disease made itself apparent the day of the Transit of Venus, a coincidence which will not pass unremarked by the superstitious Chinese. Rumour assigns extreme gravity to the attack, with what truth I am unable to say. I should think it more probable, however, that it is of the mild type which generally breaks out in China during the winter season. In the *Peking Gazette* of 14th Dec. there is a decree appointing Prince Tun to take the place of his Majesty at the Temple of Heaven on the 22nd Dec., the winter solstice, and this has been followed by a second edict, dated the 18th, in which it is announced that the two Dowager Empresses have at his Majesty's request consented to assume the direction of public business on his Majesty's behalf.

The weather continues unusually mild for the season. The first courier overland from Shanghai delivered his mail in twelve days. The French mail of Oct. 23rd reached Peking on the 17th Dec., having come up by sea per *Appin*, before the English mail of the previous week, which had been forwarded overland, had reached Peking. The river still continues open, and it is really hard to say how our weather will turn out for the next two months, as the winters during the last four years have completely changed from previous seasons.

The province of Chihli enjoys tranquillity, and the peasantry and labouring classes generally appear to be in very good circumstances this winter. The food of the people is cheap, and fuel—millet-stalks—is abundant. Trade, however, as far as foreigners are concerned, is far from being in a prosperous condition. The inland traders are every year becoming fewer, as they prefer going to Hankow to lay in their supplies of foreign goods. On the other hand, the Tientsin dealers prefer going to Shanghai to buying on the spot from the local foreign merchants.

No more has been heard regarding the intention of the Chinese Government to dredge the Woosung Bar, which you noticed in the *Herald* some weeks ago; but I understand that a tacit understanding has existed for some time past on the matter between the Chinese high officials and the Foreign Ministers, and that the work will most probably be undertaken next Spring. However, promises don't go for much in this country, unless they are seconded by some reminder or pressure, such as is only applied at long intervals at Peking.

In the *Gazette* there is a decree appointing Paou-keun a minister of state (Ta-heo-sze). Paou-keun is one of the chiefs of the Tsung-le yamun. The death of Juy-lin, lately the Governor-General of the Two Kwang, and a minister of State, created a vacancy in the Inner Council (Nuy-ko), hence the present appointment of Paou-keun. Regarding the late appointment of Li Chaou-tung as Customs Taoutai at Tientsin, it is said that official is on a mission to Formosa at present, and will not assume charge till the end of the Chinese year—the beginning of February.

The American party of astronomers have come down from Peking, and leave for Shanghai by the *Chihli* on the 22nd Dec. Their observations, despite the cloudy weather, were fairly successful. Ninety photographs were secured, and the egress contacts plainly marked and accurately observed.

M. Huber, Commissioner of Customs, and one of the Commissioners sent to Cuba a year ago to investigate the condition of the Chinese labourers there, returned to this port in the *Appin* on the 21st December. It is not known if he will take charge of the Customs here at once, or proceed to Peking, to report verbally as to the results of the mission. Mr. Twinem, therefore, continues in office as Commissioner of Customs.

Mr. C. Bismark has notified to the Consuls and public generally that he had been appointed German Consul at Tientsin, and that he has taken over charge of his office from Mr. Waeber, his Russian Majesty's Consul-General, who had been acting as German Consul.

SHANGHAI.

The present mail brings advices from this port to the 1st January; the P. and O. mail from London November 13 was received on the 31st Dec. The following summary of news is from the *Shanghai Budget*:—

The S.S.N. Co.'s steamer *Chihli*, which arrived on the 30th Dec. from Taku and Chefoo, is almost certainly the last steamer from the Peiho this season, as the C.C.N. Co.'s steamer *Taku*, the only merchant steamer remaining in the north, will probably not go beyond Chefoo, the news from Tientsin before the *Chihli* left Taku being that ice was forming on the upper Peiho. The *Chihli* was detained at Chefoo three days by severe weather. She brings as passengers Professor Young, Professor Watson and Mrs. Watson, Dr. Watson, Mr. Ranger, and others, composing the United States party who observed the Transit of Venus at Peking.

The referees of H.B.M. Supreme Court, in the case *St. Francois v. Cawdor Castle*, consisting of R. A. Mowat, Esq., Registrar, and Messrs. A. J. Little and M. Coryell, mercantile assessors, have resumed the taking of evidence in support of plaintiff's claim for damages, adjourned from the 23rd Dec. Evidence as to the claim for freight and for the value of the vessel having been previously taken, the minor items of the claim—viz., survey fees, wages, expenses of captain and crew ashore, passages home, &c.—were now considered, the Court and Mr. Robinson, plaintiffs' counsel, being assisted in the examination of the French witnesses, and Mr. Wainewright, counsel for defendants, in their cross-examination, by Mr. H. A. Beer. The Court then entered on the rebutting evidence produced by defendants as to the several items of the damages claimed, after which another adjournment took place till January the 6th—the length of the adjournment being caused by the necessary absence of one of the referees from Shanghai. It may illustrate the difference between two sides of a question to mention that, while Tls. 13,500 are said to be claimed by plaintiffs as the value of the *St. Francois*, one of the skilled witnesses for defendants estimated it at Tls. 6,500—less than one-half.

Our friends of the Temperance Society, bent on showing that they also could be extra merry at Christmas, and that without forms of good cheer that are ordinarily thought indispensable at this season, gave a special character to the usual Fortnightly Entertainment, which fell to be held on the evening of the 26th Dec. A number of ladies most kindly consented to give a tea to sailors and all others who chose to attend; which was followed by an entertainment which promised even to outshine its predecessors. Two recitations by friends (one, we believe,

Digitized by Google

though of well-known ability among his friends, now making his *debut* to a Shanghai audience), a song by one whose voice is often heard, and always welcome in the Temperance Hall, two songs by the Minstrels of the U.S.S. *Hartford*, a reading by Mr. P. Robertson, of the A.D.C., and two addresses, one by Mr. Shaw, the other by Rev. E. R. Barrett, B.A.,—it was no wonder that such a programme drew an overflowing audience.

Mr. Crownshields, chief officer of the ship *Horatio*, has succumbed to the effects of the burning he suffered in endeavouring to save the papers of that ship after she took fire on the 16th Dec. His sufferings were very great till the night of the 23rd, when unconciousness set in, and he died on the 24th. We observe the remains of the *Horatio* now in Old Dock, getting stripped of her copper, and having such parts of her upper works as remain, but are burned and charred beyond remedy, removed; the idea being, we believe, to make her solid framework the basis of a hulk. So far as we can judge, all from her deck downwards will be available for this purpose, and will certainly be as durable as any iron hull would be.

The ship *Conqueror* having been thoroughly repaired in respect of all damage suffered from her late fire, and having had her original cargo supplemented by sufficient to make good what had been destroyed or damaged put on board, sailed for New York on the 30th Dec.

The *North China Herald* supplies the following items of intelligence:—

The period since our last issue has been largely taken up by the Christmas holidays, and we have therefore comparatively a small budget of news to offer. Rainy weather on the 24th December wound up with a small snowstorm at night. After midnight the Settlement compounds and roofs were covered with snow, but the muddy streets refused a resting-place to the Christmas visitor. The weather since has been extremely variable, frost and ice alternating with rain and mud. Christmas day passed off very quietly in the Settlements. A large number of people had gone up country, and the cold kept the ladies more especially indoors. Service was held at Trinity Church, which was decorated on the occasion. Midnight mass was held at St. Joseph's Parish Church. A Christmas tree children's festival was held at St. Saviour's, Hongkew (Rev. Mr. Miller), on Christmas Eve, and service for children was held at Trinity on Monday (St. Innocent's Day) by Rev. Mr. Butcher.

Christmas Day was observed on board H.M.S. *Modeste* in true British navy style. As customary, the crew were permitted full liberty to do as they pleased on the lower deck, and in the course of a few hours the entire area was transformed in appearance as if the enchanter's wand had been called in requisition. The appliances of "grim-visaged war" were almost hidden by the profuse displays of bunting, evergreens, and flowers; the numerous messes being divided from each other by screens of flags of all colours, others being festooned from the beams overhead, or hung in graceful folds adown the wooden walls of the ship. The messes, too, vied with each other in the preparation and serving up of the Christmas dinner; and, while the more substantial roast-beef and orthodox plum pudding were provided in abundance, the choicer delicacies were not overlooked, these again being supplemented by a profusion of fruits and knicknackeries. The festivites were kept up unabatedly, music and song prevailing, and at night, when the entire scene was illuminated, the effect of the display of colour was extremely brilliant. The ship was visited during the day by parties of ladies and gentlemen, who were much interested in the novel and enjoyable scene it presented.

The North China Insurance Company, period 1872-74, give notice that a dividend of Tls. 300 per share, the equivalent of the paid-up capital, will be payable on and after the 5th Jan. The Chinese Coast Steam Navigation Company announce a dividend for the half-year at the rate of 10 per cent. per annum, payable on and after the 8th Jan.

The Shanghai Polytechnic Institution and Reading Room scheme is reported to be progressing very favourably, and to bid fair to realise the most sanguine expectations of its promoters. It is resolving itself into three departments, namely, first, a permanent exhibition of manufactured goods, machinery, and apparatus from Western countries; secondly, a lecture and class room for scientific purposes; and thirdly, a Chinese library and reading room. Many influential firms and companies have promised their assistance in England, where a co-operating committee is in the course of formation. We hear with pleasure that amongst other offers of assistance the P. and O. Steam Navigation Company have promised to forward from London, free of freight, such articles as may be presented to the institution. Among the recent subscriptions we are informed that his Excellency Shen, the Taoutai of Kiukiang, has contributed the sum of Tls. 200, and that Messrs. Boyd and Co., of Shanghai, promise the generous donation of Tls. 250. It is gratifying to notice that of the approximate sum of Tls. 5,000 which has been subscribed, about two-thirds have been given by native officials and gentry. This augurs well for the success of the scheme. The committee have been for some time actively engaged in negotiating for land whereon to erect suitable buildings, so that we hope ere long to see this praiseworthy undertaking fairly commenced.

Our Chefoo correspondent writes on 25th December:—

Christmas, with its many hallowed associations and pleasant memories, has come again, bringing joy and gladness to many hearts. The people of Chefoo have been highly favoured by a most beautiful bright day, and especially in having the new church so nearly completed as to hold service in it. About seventy-five persons met there for worship this morning. The people of this community have been rather unfortunate in regard to church building. The first one was erected about nine years ago, but of such a style as to be an eyesore to all who were not blind. No one passing by would ever have suspected such a building to be intended for a church. The interior was even still more wonderful to behold. After each heavy rain the walls were damp and the plastering stained or washed away in spots. In winter time, except with fair wind, the congregation often assembled to find a house filled with smoke, or were obliged to sit in a cold and cheerless state. Fortunately, the walls threatened to tumble down, and it was decided to erect a new church at an expense of about Taels 1,500. A contract was made with a Chinaman, who got most of the money, spent nearly a year in getting the foundation laid and a few stones prepared, and then concluded to give up the contract. After an unsuccessful effort to compel him to go on with the work, a new contract was entered into with Mr. Fuller. He has taken a long time to do the work, but he has finally erected a substantial stone building, which is no discredit to him. It is presumed that the little belfry, on the top of which is erected a rather clumsy looking cross of a blue colour, is intended for usefulness rather than ornament. The pulpit resembles a small box, so constructed as to place the preacher at a great distance above the people's heads. The stoves, as the fashion seems to be, are placed beside the pulpit, probably for the benefit of the preacher rather than for that of the congregation. The church, however, on the whole presents a handsome appearance, and is a credit to the port. The people here are under special obligations to the members of the Chefoo Club for the use of one of their rooms, in which Sabbath services have been held for nearly two years—a room which was always warm and pleasant in the coldest winter weather.—About ten days ago the lamps were lighted for the first time at the new lighthouse on Shantung Promontory, Commissioner Drew, accompanied by his wife, were present on the occasion, Mrs. Drew of course doing the honours.

REPORT OF THE CHAMBER OF COMMERCE.

The following are the principal paragraphs of the Report to be laid before the meeting of the General Chamber of Commerce, which is advertised to take place on the 5th January:—

The past year has not been an uneventful one as regards either the commerce of the port or the political events which have supervened, but the committee regret that no satisfactory solution has yet been arrived at of the difficulties which for some time past have tended to cripple more or less directly the foreign trade with China. The action of the local officials at Hankow, with respect to transit passes, and the inaction of the Tsung-le Yamen as regards the Woosung Bar, are glaring instances of that indifference of the Chinese Government to their own duties, and to the Treaty rights of foreign merchants, which has been a constant subject of complaint. In the case of the Woosung Bar, your committee have pleasure in recording the recent efforts of his Excellency Mr. Wade, and of his colleagues, to bring the Imperial Government to a sense of the urgent necessity for some immediate measures on its part towards clearing the approaches to this port. That these efforts have hitherto been unsuccessful, and that in spite of all that has passed, the highest native authorities should have declined to move in the matter, on the ground that the Woosung Bar is a natural and Heaven-sent defence to Shanghai, are deplorable facts, which need little comment. It is improbable, however, that such an excuse for disregarding an obvious and pressing duty will be accepted without protest by the Foreign Minister; and, now that the political complications with Japan are happily arranged, it may be hoped that the coming year will see some vigorous action inaugurated in the right direction. There is, indeed, reason for believing (from private information received by the Committee) that some decided steps, with a view to dredging the Bar, are seriously contemplated by the Imperial Government. Your Committee have allowed no opportunity to pass of forwarding the object in view, and as far back as 24th November, 1873, transmitted to Peking, through the Treaty Consuls, copies of all the documents relating to the survey of the Bar, &c., which were laid before the last general meeting of the Chamber.

In noting the events, which at one time threatened a rupture of the peaceful relations between this country and Japan, the Committee feel that they should not allow the opportunity to pass of expressing what they believe to be the universal feeling of satisfaction, in mercantile circles, that war has been averted; and of gratification that this fortunate issue was, perhaps, chiefly due to the wise influence exerted at a most critical moment by the representative of British interests at Peking. It having been deemed advisable that the Chamber should be represented at home by some authorised body, the following gentlemen were requested, and consented, to act as a London Committee—viz., Messrs. F. B. Johnson, A. Michie, F. D. Barnes, and J. S. Swire. At the approach of the new silk season in the spring of 1874, the Committee again called the attention of the Native authorities to this subject, through the medium of the Consular body. They also issued a circular addressed to native silk brokers and others interested in the matter, pointing out the injurious consequences which must result from a continuance of the former careless system of reeling. It is greatly to be regretted that the influence of these representations has not been more perceptible in the silk crop of 1874, and your Committee can only hope that, by steady persistence, they may effect some amelioration of the evils complained of. The most practical and efficient remedy would, doubtless, be afforded by foreign buyers refusing to purchase any silk bearing signs of too hasty or of fraudulent preparation.

The attention of the Chamber was called to the excessive duties charged on fancy cottons of a class not enumerated in the tariff, which,

Digitized by Google

if allowed to continue, would be liable to shackle the efforts of importers to introduce new descriptions of manufactures. The objection was not that an *ad valorem* duty should be charged, but that the Commissioner of Customs should be tied down to a classification which included, under the same head, goods that differed as much as 25 per cent. in value, the difficulty being that the difference was not in the quality of the articles, but in their dimensions, for which there is no provision in the tariff. The facts of the case were laid before H.B.M. Consul, with a request to bring the subject to the notice of the competent authorities.

The accounts for the year ending 30th June, 1874, are appended, and show a balance in favour of the Chamber of Tls. 2,714.57. Of this amount Tls. 2,000 are on deposit with the Chartered Mercantile Bank, the balance being also with same bank in current account.

HONG KONG.

Our advices by the present mail extend to the 7th January; the French mail from London, Nov. 20, arrived out on the 2nd Jan., and the following P. and O. mail of Nov. 27 was received on the 5th January. The following items of news are from the *China Mail*:—

The Colonial Government has, very wisely, published a list of Government officials and offices with the authorised equivalent terms in Chinese. We have embodied the list in our directory, though unfortunatety it came to hand too late to allow of all the mongrel terms hitherto in use being corrected, and it may therefore be hoped that the amended versions will in time be popularly availed of. But meanwhile, would it not be a good idea if a board *conspicuously* bearing the name of each department, in Chinese, were affixed at the doors of its office? The average coolie shakes his head in stubborn wont-understand-edness if the new terms be used in giving directions, and nothing but forcing them on his notice will be of any avail. The days of "Tai kot" and "Ping t'ow" should be numbered by this time and replaced by something that is not jargon.

We have to record the demise of Cowasjee Pallanjee Patell, who was one of the early residents and merchants of Canton. After paying a visit to his native place, Bombay, he returned to Canton, we understand, in 1844, and has ever since resided there and at this place. Though a firm adherent to his faith, he formed the acquaintance of several Christian clergymen, through whom he pecuniarily contributed towards any deserving object of charity. And although his circumstances enabled him to do so, the deceased appears not to have cared to return to his home to pass the evening of his days with his family.

The surviving Chinese passengers from the late P.M.S.S. *Japan* are holding a religious ceremony in the Sing Wong Joss house, in commemoration of their safe deliverance from the calamity. They are evidently still in possession of large sums of money, from the expensive way in which they celebrate the thanksgiving.

Captain Warsaw left in the *Douglas* on the 3rd for Swatow, where he will join the steamer *Yottung*, chartered to proceed from Swatow to search for the wreck of the screw-steamer *Japan*, and if successful in the search to buoy the wreck, with a view to obtain the treasure lost in her, if practicable.

H.M.'s ships *Elk* and *Avon* have finally left for home, *via* Singapore.

A correspondent at Amoy writes:—H.I.C.M.S. *Tsi-ngan* arrived on the 30th from Taiwanfoo, having on board Monsr. Giquel and Ye-tuk-shee, an official of high standing in the Foochow Arsenal. It is said that the former is on his way to Foochow to reorganise the establishment of the Arsenal, and prepare for building a fresh batch of vessels of a different style to those already afloat. The weather has been very variable, but the prevailing elements have been strong N.E. gales and rain till the New Year, which was ushered in with a remarkably clear sky. H.M.S. *Curlew* and H.I.C.M.S. *Tsi-ngan* were both obliged to make two attempts at going North. The *Growler* is expected to leave on the 7th for her monthly cruise to Takow, and will most probably extend her trip as far is Liang-Kiau. Mr. Phillips is expected by the next steamer from Foochow, to take the place in H.B.M. Consulate of Mr. Bristow, who was transferred some time back to Shanghai. Mr. Henderson, U.S. Consul, has left for a short trip to Shanghai, to accompany so far Mrs. Henderson, who goes home by the next steamer for San Francisco. Training is going on, and if we are to have races this year they will take place towards the end of February. There are still some four or five hundred troops on the course, but it is expected that by that time they will be gone. There are not many racing ponies here now, and I strongly suspect that if Foochow does not enter the races will dwindle into a few friendly matches. No news of our tigers lately, though parties are often going away with poor bleating goats as bait, to keep watch at night, and get wet and cold, and generally miserable. Shooting, too, this year, does not appear to be very good, I mean for the smaller game. The largest bags are those that come from Shanghai direct by steamer. Wild fowl are very wild, and pheasants are scarce.

SIAM.

—o—

BANGKOK.

A correspondent of the *Straits Times*, writing on the 5th January, gives the subjoined details of the political disturbances which have been briefly reported by telegram:—

Our Christmas has been passed in the midst of political excitement. On the night of December 28th a fire broke out in the gas works in the Supreme King's Palace, which was fortunately extinguished in a few minutes. Next morning, a rumour was heard that the retainers of the Wang Na, the Second King's troops, as foreigners call them, had mustered in dangerous force in their master's palace. The great body of Princes and noblemen immediately hastened to the Palace of the Supreme King as a volunteer guard, and those who had military commands called in their men, to the numbers of five or six thousand. For the first time I saw a full muster of the five hundred noblemen of the Royal Body Guard. The artillery organised by Nai To Guriwong, lately an officer in our own service, were conspicuous by their smartness and efficient appearance. The ex-Regent had but just left Bangkok for his country residence, and was forthwith invited to return and give his assistance. His Highness hastened back and had a long consultation with the Supreme King, foreign Ministers and others, after which he sent word to the Second King that he would visit him next day (January 2nd). The Second King received the message and fled from his palace to the British Consulate. His troops next day laid down their arms.

The Consuls of Treaty Powers were consulted, and I believe they concurred in approving the protection afforded by the British flag. The Siamese Princes and noblemen among whom I have been seeking for information all agree in one point—indignation that in their country any Prince should be able to endanger the capital by a demonstration, and on finding himself the weaker party step into the British Consulate and perhaps plot further under the shade of the British flag. It is undoubtedly a humiliation for them, and must influence the decision of the United Council of all estates of the Realm which meets to-day, to decide on the position to be in future held by the fugitive. It is rather unfortunate that our Consulate has been selected for the Royal Asylum. Taken in connection with the frequent visits of the British Acting Consul to the Second King's Palace previous to the outbreak, and with the known ties of the absent Consul General to the Second King, and the ill feeling long existing between him and prominent members of the Supreme King's party, there is an uneasy feeling that we British shall be meddling and muddling, and perhaps lead mistaken men to breaches of the peace. We must hope for the quick departure of the gunboat sent for by the Acting Consul-General, for a reassuring telegram from our Government, and a Consul free of all partisanship. Otherwise much of the rice crop will rot—prices will be extreme and trade paralysed. Already the markets are disorganised and supplies very short. Assuming, however, that nothing more happens than has happened, the event is in some respects satisfactory to foreigners as demonstrating very conclusively the strength of the Government and the weakness of the Opposition. It had been feared for some time past that the Government had given offence by its reforming policy, and was not so strong as could be wished.

The Wang Na or Second King concerned in this business is a son of the late Second King, but is of royal blood on his father's side only. His father died some years before the late First King, and the subordinate Royalty was not filled up. On the decease of the First King, the son of the First King was chosen to succeed as First King, and the son of the Second King to succeed—not to the full rank of his father, but to the position of Prince of the Second King's Palace. His father had the full Royal title of Somdet Phra, the same as that of the late and present Supreme King had; the present Wang Na has only the title Krom Phra, the same title held by two other princes at this day.

The Supreme Crown, of course, falls to the strongest, and I apprehend that a Second King succeeds by being on the spot with his forces. Nominally the sovereignty is elective, with a preference for princes of royal descent on the maternal as well as the paternal side, and the senior prince answering to this description is the most eligible. The electing body consists of the princes, officials, and people, of all who come to the audience. Neither the late nor the present Second King have had any active part in the Government of the country; their position has been ceremonial only, and they have not even been consulted about treaties they have signed.

The *Straits Times* appends to its correspondent's letter the announcement that H.M.S. *Hart*, stationed at Singapore, was at first ordered to proceed to Bangkok to protect British interests, but a later telegram announced that a gunboat would be despatched from Hong Kong; also that, at last advices, all danger of an outbreak was believed to have passed.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 14th Jan.; the French mail from London Dec. 4 arrived out on the 8th Jan., and the following P. and O. mail of the 11th Dec. was received on the 11th Jan. We take the following items of intelligence from the *Straits Times*:—

The Legislative Council has not yet concluded its sittings, though its labours are fast drawing to a close. Its last meeting

Digitized by Google

was held on the 4th Jan., and the next will be held on the 14th. The debates of the 24th and 28th Dec. were lengthy. In passing the estimates, an animated discussion arose on the question of allowing the Crown Solicitor to engage in private practice in addition to his official duties, the unofficial members opposing the principle of allowing private practice to Government officers; the Hon. Thomas Scott proposed to disallow it in this instance, but the motion was lost on a division, it being urged that it would be unfair to make an exception in the case of a single officer, while the privilege was enjoyed by others. There was also a lively debate on the question of imposing tolls on the bridge to be erected over the Prye River in Province Wellesley, and the opposition procured an important amendment in the Bill, whereby tolls cannot be imposed without an Order of the Governor in Council.

His Excellency Sir Henry Bulwer, Governor of Labuan, who has been recalled home, arrived here on the 3rd Jan. in H.M.S. *Charybdis*, and has since been the guest of Sir Andrew Clarke at Government House. Before leaving Labuan Sir Henry was waited upon by the Chinese residents of the place, who expressed their gratitude for the benefits he had conferred on the colony, especially by the abolition of certain monopolies, and testified their sincere regret at his departure. He proceeds home *via* Brindisi by the present mail. His Excellency will no doubt be very much missed in the colony for the energy, the firmness of character, the conciliation and the justice with which he has administered the affairs of the colony have brought it through by far the worst crisis in its history, and had generally induced the belief that another year under his guidance would have brought about a moderate share of prosperity founded upon a secure basis of increasing trade and development of its productive resources.

Some time ago heavy defalcations were discovered in the Victoria Land-office at Melbourne, amounting to upwards of £9,000. The chief clerk, named O'Farrell, absconded, and was pursued by Melbourne detectives to different parts of the South Seas, and recently it was discovered he had taken passage to Singapore in the E. and A. mail steamer *Somerset*. A telegram was sent to the Governor, and on the steamer's arrival she was boarded by police officers, who succeeded in arresting him. A detective officer arrived from Australia by the following mail, and the prisoner having been identified was, after preliminary examination, duly handed over to the detective, who left for Australia with his prisoner in the *Brisbane*.

H.M.S. *Charybdis*, while passing through New Harbour, grounded on the west end of the Meander Shoal. We understand there was no pilot on board at the time, but on signals being made a pilot went on board, the master-attendant and steam-tug *Weazel* soon followed, and she was got off without difficulty, and placed alongside the P. and O. Co.'s Wharf. It is very requisite that vessels of heavy draft should take a pilot in going through this dangerous harbour, especially as no dependence is to be placed on the buoys, which are continually shifting, and no one but those continually passing through can form any idea of the various sets of the tide in it. The *Charybdis* must evidently have been set on by the tide, which at the place she grounded runs directly on the reef.

The *Comercia* and *Porvenir Filipino* of Manila state that the winning ticket appertaining to the $50,000 prize obtainable during the Manila lottery drawing last month was amongst the tickets that had been returned to the Treasury as not having been disposed of. The ticket containing the winning number of the $10,000 prize was, according to the *Diario*, amongst those that had been forwarded to China.

We regret to have to record the death, at Bangkok, on the 24th December, of Mr. John Simons Atchison, a leading practitioner in our Supreme Court. Mr. Atchison was a lawyer of well known ability, who, moreover, took a prominent part in all public movements here, and his loss will be sensibly felt in the community.

New Year's Day was observed in the usual manner by sports on the Esplanade for natives and Europeans, and a regatta in the harbour, which were most successful, and afforded much enjoyment to all classes of the community.

The Governor has appointed Mr. J. G. Davidson Resident of Salangore. Mr. Davidson's intimate acquaintance with the political affairs of Salangore and Klang render his appointment to this post exceedingly appropriate.

PENANG.

Our advices extend to the 16th January; the P. and O. mail from London 11th Dec. arrived out on the 9th Jan. The *Penang Gazette* contains the following items of news:—

Recent events at Atchin have proved that we were correct in stating that Colonel Pel, the present commander of the Dutch forces, would probably follow a vigorous policy and attack the Atchinese in their strongholds. A rapid succession of decisive strokes is, according to our opinion, the only course that can be followed with any chance of success, and the late inundations no doubt compelled Colonel Pel to defer the execution of his "plan de campagne" until the close of last year. The various states on the north and east coast, although some of them may accept the terms which ensure them the privilege of being exempted from the blockade, will not consider themselves in reality under Netherlands supremacy, until the chiefs at Atchin Proper have either submitted, or their forces have been completely routed. On the 31st Dec. an attack was directed against Longbattah, where the Atchinese have been concentrating their forces they having made the most strenous endeavours to fortify the place, in order to be able to resist the attacks of the Dutch. The Dutch captured eight stockades and several pieces of cannon, and if this "coup" is only rapidly followed up by other victories of an equally telling nature, we may soon hope to see the termination of the war.

The Government has forwarded the plans for the proposed Town Hall for Penang to the Municipal Commissioners for their approval, and has asked them whether they will be prepared to grant a sum of money towards its cost, which is estimated at about $50,000. At the last meeting the Commissioners resolved to vote as much as the state of their finances could afford towards the erection of the Town Hall, provided they could legally do so, and on the supposition that Government intends to place the control of it when completed in the hands of the Board. Judging from the plans, Penang will have reason to be proud of the proposed building, which is to consist of a large central block, with two wings, one on either side, connected by means of covered ways with the main building, which latter will contain the Town Hall.

The captain of the s.s. *Sunda* surrendered to take his trial for "kidnapping" on the 4th Jan.; but as the police were not prepared to go on with the case, its hearing was postponed till the 14th Feb. The captain had to enter into fresh recognisances to appear on that date.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—The interval, although scarcely equalling the previous one in dulness, has shown but little change for the better, and most goods were saleable only at a concession in price. For the lower and medium qualities of 16/24 Yarn there was some demand, but better spinnings were neglected—28/32 had not realised previous rates. Shirtings were weaker, with scarcely any demand; while Turkey Reds and Velvets had been fairly saleable. In Woollens Plain and Figured Orleans were very difficult of sale, and Mousselines, owing to increased stocks, had been sold at lower rates. Blankets remained as last quoted. Quotations for Metals continued unchanged, but business had been very limited.

HIOGO-OSAKA.—The failure of the principal Japanese Bank in this district had been the cause of a severe financial crisis amongst the native merchants, in consequence of which business in imports was greatly depressed, and quotations, with one or two exceptions, were entirely nominal.

HANKOW.—Business had been extremely small during the interval; prices were unalted.

SHANGHAI.—The market during the greater part of the fortnight had been very quiet, owing in some measure to the holidays, but there had been but little disposition on the part of natives to make investments. Latterly, however, there had been rather more activity, but at somewhat lower prices.

HONG KONG.—The arrivals during the interval, besides the mail steamers, had been the s.s. Glenroy and Cassandra and ship Tamesa, bringing full supplies of manufactured goods for this market and the North. There had been a very quiet import market during the fortnight. The short spurt which we noticed in our last report soon died away, the dealers having meanwhile satisfied their wants. Another cause for the quietness which had prevailed was the intervention of the Christmas and New Year's holidays. Most of the up-country dealers had gone back to their homes, and there was an utter absence of demand; it was probable that the dullness would continue until they begin to buy for their New Year's requirements.

CANTON.—Lead had been quiet during the fortnight, and prices showed a slight decline from last quotations. Sales had amounted to 250 piculs common brands, and quotations were L.B. $8.10 to $8.15, W.B. $8.20 to $8.25 with a stock of 2,300 piculs of the former quality.

BATAVIA.—The market had continued extremely quiet, and transactions had been only effected to a retail extent.

SINGAPORE.—The market for Manchester goods had continued quiet during the fortnight, business had been limited, and quotations of most articles were unaltered. The quarterly return of stocks with importers shows a very moderate supply of the principal staples. There had been no alteration in the market for Metals.

PENANG.—The market was still very quiet; business had been on a limited scale and dealers were only buying to meet immediate requirements. Prices generally were unaltered.

EXPORTS.

TEA.

YOKOHAMA.—Telegrams reporting a slightly improved state of market in New York having come to hand, prices here had again rallied, and a large amount of business, considering the lateness of the season, had been done. The settlements since last market report amounted to 5,000 piculs, consisting principally of low medium and common grades; prices remained unaltered, but holders were firm, especially for classes

Digitized by Google

most in demand. Stocks contined heavy, being about 11,000 piculs of merchantable Teas.

HIOGO-OSAKA.—Business had been on a very limited scale.

HANKOW.—Settlements 131 chests. Export of Hankow district teas to 24th December, 1874, 54,101,854 lbs.; ditto 1873, 54,500,497 lbs.; decrease, 1874, 398,643 lbs.

KIUKIANG.—Black Teas: No local business to report. Export from the commencement of season to 23rd December, 1874, 21,933,201 lbs.; ditto 1873, 19,910,706 lbs.; increase, 1874, 2,022,495 lbs. Green Teas: About 14,000 half-chests forwarded to Shanghai on native account.

SHANGHAI.—Black: The settlements had been too small to call for any remark. Green: In the early part of the fortnight, telegrams from America were received reporting the introduction of a Bill in Congress imposing duty on Tea. The news caused more firmness on the part of the natives, and prices advanced 1 to 2 taels. Buyers showed little disposition to invest at the advance, and the market had weakened, many chops being offered at prices which were current before the rise. The following were about the prices paid: For Country Tea, Tls. 22 to 35 per picul; Pingsuey, Tls. 21½ per picul. Settlements, 29,296 half-chests. Stock, 95,960 half-chests.

FOOCHOW.—Transactions in Congou had been made to a moderate extent, considering the smallness of supplies, and latterly business in Oolongs for America had been resumed. Congou: Settlements, 13,700 chests, at Tls. 6 to 15½, and Tls. 16 for boxes. Common to fair common kinds had been settled at a decline of one-half to one tael, while for the few chops of the better grades still on offer, fully previous rates were demanded. Arrivals 1,200 chests. Souchong: No settlements. Oolong: During the latter part of the fortnight business had been recommenced for the United States, and settlements had amounted to 11,100 half-chests, at Tls. 17½ to 21½, showing a reduction for fine parcels of about Tls. 5 upon the opening rates. At the close holders were rather firmer, and buying had become somewhat restricted. Arrivals 2,500 half-chests. There had been no transactions in Scented Teas and Flowery Pekoes, and no further receipts from the country.

AMOY and TAMSUI.—The remaining stock of Oolong, with the exception of about 400 half-chests, had been settled at an advance of about one dollar per picul, and the season was considered closed. At the low prices obtainable at Tamsui on the 29th ult., little or no business was doing, and the season was virtually over. Total export to date 3,237,027 lbs., against 2,077,788 lbs. last year.

CANTON.—The intervention of the holidays during the fortnight had almost entirely put a stop to business, and the trifling transactions that had taken place do not call for special notice.

SILK.

YOKOHAMA.—Business had been unimportant—holders were freely offering their stocks, but, for the most part, refused to accept any material reduction, and, with continued unfavourable advices from home, buyers showed little disposition to operate. Stocks had further increased. Settlements from 1st July to date, 6,900 bales; against corresponding period—season 1873-4, 9,500, 1872-3, 8,800; 1871-2, 9,800; 1870-1, 1,650; stock, 1,600 bales. Silkworms' Eggs.—The total shipments had been in the following proportion:—For Italy, 832,000; France, 403,000; other countries, 65,000; making for this season a total export of 1,300,000 cards, against 1,425,000 cards last year.

SHANGHAI.—The active state of the market recorded in last report continued till the departure of the French mail on the 25th Dec., up to which time about 1,900 bales (including some 400 to 450 bales of Re-reels for the American market) were added to settlements. A large parcel of Tsatlees of the Cloud Dragon chop was reported as settled at Tls. 355 for Chay Ling, and Tls. 335 for Fun Ling; Cock and Worm, No. 4, Tls. 340; Kukee's Kin Jan, Tls. 342.5; Kin Hock, Tls. 312.5; Blue Peacock, Tun Ling, Tls. 302.5; Mai Foong, Elephant, Tls. 310; Pegasus, No. 3, Tls. 297.5; Hoo-chun Tsatlee Fan Seen and Choey Seen, at Tls. 270 and 290. Ching-yung-sing's Kah-Shing, King Ling, Tls. 285; fair Long Reels, Tls. 230. After the above purchases had been made, the market closed very firmly, and the increasing strength of holders, added to the cessation of business during the holidays, has restricted settlements for the past week to about 500 bales. The only quotable transactions were the reported sales of the Bird chop Tsatlee Foong Ling, at Tls. 280; Beautiful Woman Kin Sun, at Tls. 327.5, and Tien Chong Kee Phœnix, Foong Yuen, at Tls. 290; Kah Shing Tsu Cheen Yuen Gna Ling, at Tls. 300, and King Ling, at Tls. 275. Good market Leih Yangs have been taken at Tls. 230 to 232.5. Settlements for the fortnight, Chinas, 2,400 bales. Total settlements since 1st June, 1874, 58,700 bales, against 1873-74, 47,600 bales; 1872-73, 49,000 bales. Comparative unsold stock on this market 1874, 9,500 bales; 1873, 5,000 bales; 1872, 2,000 to 2,500 bales.

CANTON.—Settlements for the fortnight had amounted to 235 bales Tsatlees, chiefly No. 4, and lower grades, and 67 bales Loongkong. Prices had given way slightly, but the quotation for No. 4 Tsatlee was not lower than $335 to $340. The estimated stock of Tsatlee and Loongkongs still available for shipment to Europs was about 2,000 bales, of which about 800 bales were in Canton. In Re-reels, a fair amount of business had been transacted at rising rates. Fine Siiks were scarce. Stocks were estimated at—200 bales Loongkong, 600 bales Tsatlee Reels, 200 bales Kowkongs, 300 bales Cumchucks, Lack. lows, &c., and 400 bales of inferitr descriptions.

THE MAILS.

HEAVY PORTION OF LAST INWARD MAIL.—PORT SAID, FEB. 8.—The P. and O. steamer Peking sailed at 3.0 P.M. for Southampton, where she may be looked for about the 21st inst.

NEXT INWARD MAIL.—SUEZ, FEB. 8.—The Messageries Maritimes Company's steamer Anadyr, with the inward French mails from China and Japan, left here to-day for Marseilles.

INWARD MAIL DUE MARCH 8.—GALLE, FEB. 11.—The Messageries Maritimes steamer Provence, with the inward French mails from China and Japan, left here to-day for Aden and Suez.

OUTWARD MAIL OF FEBRUARY 5.—SUEZ, FEB. 12.—The P. and O. Company's steamers China and Malwa sailed hence at eleven this morning, for Bombay and Calcutta respectively, with the outward India and China mails of Jan. 2.—Feb. 5.

OUTWARD MAIL OF DEC. 25.—SHANGHAI, FEB. 10.—The P. and O. Company's steamer Kashgar, with the London mails of the 25th Dec., arrived here yesterday.

OUTWARD MAIL OF JANUARY 15.—GALLE, FEB. 8.—The Messageries Maritimes steamer Hoogly from Marseilles, Jan. 17, left here to-day for Singapore.

LATEST TELEGRAMS FROM THE FAR EAST.

THE ATCHIN WAR.

THE HAGUE, FEB. 8.—The Government has received a despatch from Atchin, dated the 3rd inst., announcing that on the 28th ult. the Dutch captured Mandarsa Poeti, only sustaining slight loss. The squadron returns to the West Coast. The health of the troops is very unsatisfactory.

THE HAGUE, FEB. 13.—The Government has received the following despatch, dated Atchin, February 4:

"Six of the enemy's positions have been captured without loss. An Iman was killed. The general health of the troops is unsatisfactory."

THE CHINESE THRONE.

SHANGHAI, FEB. 12.—Uncertainty exists respecting the succession to the Imperial Throne. Although the son of Prince Chun has been elected Emperor under the title of Kwang-Lew, it is thought possible that this arrangement may be upset should the Empress, now stated to be *enceinte*, give birth to a son, in which event the Empress mother and the Empress dowager would be appointed Regents during the Prince's minority. The rumour of the Empress's suicide, has not been confirmed.

OUTBREAK OF CRIMINALS AT SINGAPORE.

SINGAPORE, Feb. 15.—An outbreak occurred among the Chinese prisoners in the Criminal Gaol on the afternoon of the 13th inst., in which Superintendent Digby Dent was mortally wounded. He died yesterday. Sixteen warders were also wounded. Fifteen prisoners were killed and thirty-five wounded in the repression of the outbreak. Order is now restored.

LATEST INTELLIGENCE BY PACIFIC MAIL.

The Pacific Mail Steamship Company's chartered steamer *Altona* arrived at San Francisco on the 30th ult. from Hong Kong, *via* Yokohama. She left Hong Kong Dec. 28. On Dec. 30 and 31 and Jan. 1 a terrific north-east galé prevailed, in which the ship was hove to. Thence to Yokohama the weather was moderate. Arrived at Yokohama Jan. 6, and sailed again Jan. 9. On the 10th and 11th of January a cyclone from south-west to north-west and west prevailed. Lost two boats, shipped heavy seas, and smashed deck fittings, &c, Had bad weather to the 180 meridian, and thence to this port moderate weather. The passengers are: From Hong Kong, S. Meyer Hurlbut, and from Yokohama, A. Hall and R. S. Edwards. The following items of news have been telegraphed to New York:—

The China dates are, Hong Kong Dec. 28, 1874, and Shanghai, Dec. 31. The cruise of the United States ship *Saco* had been temporarily postponed in consequence of her services being required to search for the survivors of the Pacific Mail Steamship *Japan*. The *Saco* rescued nearly 150 of the wrecked passengers.

The *Pekin Gazette*, the Government official paper, continues silent as to the settlement of the Formosa affair. It is again asserted that all knowledge of the transactions, from beginning to end, has been withheld from the Emperor by Prince Kung and others.

It is estimated in Chinese unofficial papers that the Chinese expenditures for war preparations reached nearly 6,000,000 reals, for which there is now nothing whatever to show.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Feb. 11, at Deal, from Ilo Ilo, May Queen; 9, off Dungeness, from Batavia, for Rotterdam, Johanna Maria; 11, at Liverpool, from Bassein, Angela P.; at Queenstown, from Rangoon, Iron Crown; 9, at Hamburg, from Hong Kong, Johanna Marie; at San Francisco, from Hong Kong, Highlander; at New York, from Batavia, Iris; 12, at Liverpool, from Penang, &c., Nestor (str.); 11, at Texel, from Batavia, Conrad (str.); 14, at London, from Rangoon, Suzerain; at Queenstown, from Maulmain, Kenilworth; 13, off Scilly, from China and New York, Tartan (str.).

DEPARTURES.—Feb. 11, from London, for Shanghai, Eliza Shaw; for Singapore and China, Gordon Castle (str.); 10, from Shields, for Batavia, Equator; Dec. 17, from Valparaiso, for Saigon, Saint Jean; Feb. 11, from Liverpool, for Macassar, Beatrice Havener; for Penang, Singapore, China, &c., Nestor (str.); for Sourabaya and Batavia, Argo; 12, from London, for Singapore, East Lomond; 6, from Barcelona, for Manila, Emiliano (s.); 13, from London, for Batavia, Samarang, and Sourabaya, Nicollo Tommasco; for Singapore, &c., *via* Cardiff and Suez Canal, Braemar Castle (s.); for Singapore, Hong Kong, and Japan, *via* Suez Canal, Riga (s.); 9, from Royan, for Batavia, Deux Freres; 13, from Liverpool, for Singapore, Cyclone.

LAID ON.—At Liverpool, for Hong Kong, Midnight; for Singapore, Nellie Hastings.

SPOKEN.—Scindia (iron ship), London to Shanghai, Feb. 7, 48 N., 8 W.; M.F.Q.G. (Pons Ælu, barque, of Newcastle), Newcastle to Singapore, Feb. 4, off the Lizard; Great Britain, Singapore to Sunderland, 43 days out, 35 S., 21 E.; Lightorna, Batavia to Amsterdam, Nov. 18, 27 S., 66 E.; Main Skysail, Shanghai to New York, Dec. 27, 12 S., 10 W.

CASUALTIES.—A telegram from Batavia, dated Feb. 11, states that the Argo, from Sunderland to Java, has stranded off Anjer, and will become a total wreck. The new steamer Salak, which is to load for Batavia and Sourabaya, while going up the Clyde in tow yesterday, collided with H.M. gunboat Lily; she, however, received but slight damage, and proceeded to Glasgow. Advices from Manila received by telegram from Singapore, Feb. 12, state that the Bunker Hill (ship), from Manila to Boston, with sugar and hemp, took fire whilst loading, and was scuttled Feb. 2 to save her hull.

MISCELLANEOUS.—At Malta, Feb. 11, Oxfordshire, from Colombo, &c.; at Port Said, Pernambuco, from London, for Singapore and Japan; Sibylla, from London, for Colombo, &c.; Bengal, from London, for Singapore, China, &c.; Hong Kong, from London, for Singapore, China, &c.; at Suez, Menelaus; at Port Said, Gorm (str.), from London and Cardiff, for Ceylon; Ulysses (str.), from Liverpool, for Singapore, China, &c., Glenfinlas; from London, for Singapore, China, &c.; the Jongo Cornelis (Dutch barque), from Cardiff, for Batavia, with coal, which vessel put into Lisbon Jan. 11, with slight damage to rigging, sailed for her destination on the 3rd Feb., having repaired; passed Gibraltar, Feb. 8, Java from Nieuwe Diep to Batavia.

ENTERED SUEZ CANAL, JAN. 29.—Correze (French transport), from Toulon, and left the Canal 30 for Saigon.

The Venice (str.), Watson, for Hiogo, in leaving the docks on the evening of the 10th Feb. got tow rope of tug in her propeller; she was towed to Gravesend, and divers were employed during the night in clearing the rope; vessel proceeded on the morning of the 11th.

The Donna Maria (ship), of Liverpool, Bone, from the Tyne to Java, with coal, was in Yarmouth Roads Feb. 11, with nine of the crew refusing duty.

The Sindoro is twenty-seven days out from Aden *en route* to Batavia, and twenty guineas has been paid on her at Lloyds.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BERGAU—On the 1st Dec., at Kobe, the wife of J. Bergau, of a son.

KRAUSS—On the 4th Feb., at Shanghai, the wife of Alfred Krauss, of a son.

KESWICK—On the 24th Dec., at Shanghai, Mrs. Keswick, of a daughter.

LAIDLER—On the 30th Dec., at Shanghai, the wife of T. W. Laidler, of a daughter.

TRACEY—On the 10th Feb., the wife of Richard Edward Tracey, Captain, Royal Navy, of a son.

MARRIAGES.

GAYE—SIMPSON—On the 8th Feb, at St. Peter's Church, Brighton, Gerrard Gaye, son of the Rev. C. H. Gaye, St. Matthew's Rectory, Ipswich, to Margaret Sophia Simpson, widow of the late Charles Simpson, Preston, Lancashire.

HANNEN—LORRIMER—On the 9th Feb., at St. Mary's Church, Aylestone, near Leicester, by the Rev. Geo. W. Straton, Charles Hannen, of Westbourne-park-road, London, and Tientsin, China, to Catherine Felicia, second daughter of John Lorrimer, of Park-hill House, Aylestone. No cards.

DEATHS.

CROWNSHIELD—On the 24th Dec., at the Shanghai General Hospital, B C. Crown shield, first officer of the *Hoodia*.

GRANGE—On the 26th Dec., at Nagasaki, suddenly, Capt. Alexander Grange.

HEARD—On the 8th Feb., at Suez, on the passage home from Hong Kong, George Heard.

HEYWOOD—On the 2nd Jan., at Hong Kong, Burnett, the infant son of Henry and Ada Heywood, aged 8 days.

HUTCHINSON—On the 25rd Dec., at Canton, St. John Hutchinson, son of Dr. Hutchinson, of Scarborough, in his 26th year.

SKEY—On the 28th Dec., at Shanghai, Capt. J. C. Skey.

The London & China Telegraph.

LONDON: MONDAY, FEB. 15, 1875.

THE SITUATION AT PEKING.

The Times is not always the best authority in the world on matters Chinese, especially when it informs its readers that the late Emperor of CHINA "had only reigned three years" (meaning thereby, we must presume, the somewhat less than twenty-three months which had elapsed since Feb. 23, 1873), and contrives after a method peculiar to itself to crowd fifteen years in between Aug. 22, 1861, and Jan. 12, 1875; but the leading journal is undoubtedly right when it observes that, although "rumours" from the Far East are ordinarily of so attenuated a character as barely to merit even a passing notice, still the rumours which have been flashed to us from China within the last few days point to such momentous contingencies that if there be any foundation of truth in them they are worthy of the most serious consideration of Englishmen. The telegrams from China, which we published last week, may, and it is highly probable that they will, be of deep import to foreign interests in that Empire, if they are substantially correct, and it is much to be regretted that they—at any rate, that of Feb. 5—are so tersely worded; we suspect, however, that current events at Peking are just now almost as much a matter of mere speculation at Shanghai as they are in London or Paris, for we must remember that the difficulties of communication with the North are at the present moment very great, and that the only tolerably sure method of getting any intelligence at all is by means of the Customs mail *via* Chinkiang. The statement that the young Empress, the bride of October 16, 1872, has committed suicide must, we think, be received with a considerable amount of reservation, but even if it should turn out to be true, it is of no moment to foreigners, and will merely excite a passing feeling of pity. Neither does the fact that this baby or that has been proclaimed Emperor of China appear to be of particularly grave import to the outer world, except in so far as his probable surroundings for the next dozen or fifteen years are concerned, though we must own that with the limited amount of information before us we are puzzled to understand on what principle of law or right the infant son of Prince CHUN has succeeded to the vacant throne. Be that as it may, the future surroundings of the infant Son of Heaven do concern us very seriously, and here it is that we get at the really important part of the telegrams. We are told that the Empress Mother is again Regent, that LI HUNG-CHANG is appointed First Minister, and lastly, that Prince KUNG'S name is omitted altogether from the list of the members of the Privy Council. We are at a loss to perceive why the Empress Mother,—we presume the late EMPEROR'S *own* mother is meant,—should have been named Regent, and if it be true, it would appear to be of ill omen for the future, for she has the reputation of being a vindictive woman, and decidedly hostile to foreigners. Again, the appointment of LI HUNG-CHANG,—supposing that the telegram is correct, and that our old friend LI FUTAI is meant—to the chief executive office in the Empire is very noticeable from the fact of his being a Chinese, and not a Manchu; and, unless the leopard can change his spots, we fear that this nomination bodes mischief in the future. LI HUNG-CHANG has always had the reputation of being a cordial hater of foreigners, though he has shown himself willing enough to avail himself of their skill and services to suit his own ends. He is even now engaged in developing, by their aid, the mineral resources of the metropolitan province, with the scarcely-veiled purpose of rendering his arsenals, &c., independent of supplies from abroad. We must hope, however, that accession to power will lead him to consult the truer interests of his country, and to cultivate friendly relations with foreigners, with a view to developing its resources, and improving its condition generally.

It is idle, at the same time, to attempt to forecast what his policy will be, for he is a man of great ambition, and of undoubted energy and ability, and there is no knowing what the march of events will lead him to do; though, in this connection, it may not be out of place to call to mind the rumour, current in China a few years ago, that he intended, sooner or later, to seat himself on the Dragon Throne, and to establish a dynasty of his own. So great is his reputation in China, and so staunch is his military following, that such an attempt on his part would probably be successful at the outset; though whether he would be able to maintain his position is another question. We now come to the third main item of intelligence, viz., the exclusion of Prince KUNG from the new Government. This, indeed, is of great moment to us, and is a matter for deep regret, for, as we observed on a recent occasion, although he is, perhaps, not a man of extraordinary intellect, and is not very advanced in his ideas respecting the necessity which exists for radical reforms in the general administration of the Empire, still he has shown himself possessed of considerable sagacity, and is besides reasonably well disposed towards foreigners. Take him all in all, and judging, of course, from the slender knowledge which foreigners have of the ability of Chinese statesmen, he appears to be the fittest man for the post which he has held for so many years, and having due regard to the best and truest interests of the Chinese Empire, it was an act of suicidal folly to oust him from that post at the present critical juncture of affairs. The Prince is, however, described as possessing in an eminent degree presence of mind, calmness, and courage, and we cannot affect to suppose that, with the powerful party he has at his back, he will tamely submit to be permanently thrust into the background. We all remember his famous and successful *coup d'état* in the autumn of 1861, and we should fancy that it is not at all improbable that he may resort to the same means again to recover the position from which he has been now temporarily ejected.

Since the foregoing was in type telegrams have been received from Shanghai—and are given in another column—which affect the position at Peking, but we are able to state that no alarming information has been received at the Foreign-office from our Minister at Peking.

THE ATCHIN WAR.

THE predictions which we hazarded in a recent issue as to the course of events in Atchin seem not to have been far from the truth. The Dutch army of occupation has been materially strengthened, and more vigorous action has followed. At the latter end of last month aggressive operations were re-commenced, and, as a substantial result, another Atchinese stronghold fell into the hands of the invading troops on January 29th. Mandarsa Poeti—for that is the name of the fortification carried—may turn out to have been nothing more than an insignificant outpost, or it may have been an important centre of military operations; we know very little of the topography of Atchin, and the Dutch are as slow to supply information as they are torpid in their military manœuvres; but the first hypothesis is the more probable, for if the success had been a signal one the telegraphic trumpet would have been sounded with a louder blast. However that may be, the moral weight of a defeat is not to be lost sight of, and as each succeeding fort is reduced the spirits of the Atchinese will droop more and more, till in the end, like all Asiatic races, they will give up the struggle from mere despondency, even though there may be a good deal of fight left in them, and before their strength or means of resistance are by any means "played out."

Digitized by Google

They must succumb at last, and the sooner the end comes the better for the parties concerned, and for the mercantile world outside too. We have no sympathies with the aggressive conduct of the Hague, and the English Government certainly behaved very shabbily in deserting the Sultan of ATCHIN, and making him over to the Dutch in defiance of his ancient treaty rights; but now—at this period—it is useless to look back on the past; what we want to see is peace restored before the country has been turned into an uncultivated and uninhabited waste, and that is why we urge Holland to "put things through" with despatch. But this is not the whole case; "the health of the troops is very unsatisfactory," says the telegram received at the Hague. Of course it is; we know from other sources that the raw unacclimatised Dutch soldiers are dying by scores inside their closely-packed camp at the Kraton; and even the most highly-trained and choicest regiment in Europe would sicken and dwindle with almost equal rapidity if kept inactive, and therefore despondent, in crowded quarters, under an adverse climate, without proper sanitary arrangements or wholesome food. Add to these disadvantages the miasma of marshy swamps close by, and we shall see clearly that these Atchinese have good reason to feel that if they can but keep their own forces united and act a Fabian policy they may yet snatch their opportunity, for climate is fighting on their side. In a rocky channel with a falling tide, "go ahead full speed" may sometimes be the only safe word of command.

OUR Shanghai friends recently made the gathering of St. ANDREW the occasion of a little self-glorification, and have been telling one another that they are now "a mighty and increasing city, instead of a petty settlement." It affords us much pleasure to learn that they are so well satisfied with their own rate of progress, even in this progressive age; but still they must not be surprised if the outer world shows just a little unwillingness to accept, without any demur, their own estimate of themselves, for they have their shortcomings. This mighty and increasing city possesses a most useful institution, one that has done, and is still doing, good service in advancing our knowledge of matters relating to China and the Chinese, styled the North-China Branch of the Royal Asiatic Society, which, when it assembled the other day to hear a learned paper read, was not able to muster the bare *quorum* of members necessary for the transaction of the most ordinary routine business. From this melancholy fact we are afraid that the love of knowledge in "the mighty and increasing city" has not kept pace with its more material development, and that there is still something lacking there to enable it to compare itself with Liverpool or Leeds. Apart from this, the sparseness of attendance at the meeting alluded to was certainly not complimentary to the author of the paper—Mr. T. WATTERS—when we consider that the essay in question cost him much time and labour. The paper we refer to was on the Buddhist Sutra, *Miao-fa-Lien-hua ching* (in Sanskrit *Saddharma pundarika*), which is commonly translated "The Lotus of the Good Law," and, as far as we can gather from the brief summaries in the Shanghai papers, must have been—to quote one of them—"well "calculated to throw light upon the mysteries of the "Buddhist system, especially in some of its later phases."

IN a late issue of our paper we referred to a rumoured negotiation between the China Trans-Pacific Steamship Company, Limited, and a company to be founded under the auspices of the Pacific Railroad Companies. We understand that the Board of Directors of the China Trans-Pacific Company have had no negotiations whatever with the representatives of this scheme. The Company's vessels, *Vasco de Gama* and *Vancouver*, are at present under charter to the Pacific Mail Steamship Company, and it appears that this arrangement insures to the public the advantage of these fine vessels continuing the service. They have made their passages with a speed and regularity quite unapproached on the Pacific. We understand that Mr. E. M. DE BUSSCHE, who relinquished the position of managing director of the China Trans-Pacific Steamship Company in June last, has also resigned his seat at the Board of Directors, and that Mr. W. R. COULBORN has been elected to fill the vacancy.

WITH considerable regret we announce that Sir ANDREW CLARKE, the present Governor of the Straits Settlements, is to be removed from that post to assume one in connection with the Public Works in India. It is of course due to all public servants who prove themselves able and meritorious, that they be rewarded by promotion to higher and more lucrative appointments, but the public good should ever be held as the foremost consideration, and in the long run this will serve the interests of the servants of the Crown. The eminently satisfactory services rendered by Sir ANDREW CLARKE during his Governorship of the Straits Settlements during a little over one year, stand out so clearly that we cannot but condemn the policy of removing him when he is so much needed to carry out the measures which have been introduced in regard to the neighbouring States. We feel assured that the communities of those Settlements will join us in regretting the loss of one of the best Governors they ever possessed.

A PARAGRAPH went the round of the papers a short time ago to the effect that Sir EDWARD CREASY, Chief Justice of Ceylon, had signified his intention to resign his office on account of ill-health. This is at least premature. The state of Sir EDWARD CREASY'S health is undoubtedly not such as his friends could desire, but we are able to state that no step will be taken until the expiry of his leave in May next.

WE are sorry to state that Mr. MARGARY, who started from Hankow to meet the Western China Expedition, was attacked with dysentery at Chen Yuen Fu on 27th Oct. Dr. ANDERSON, one of the expedition, writes that the King of BURMAH received them very handsomely at Mandalay, and gave every aid to the expedition.

THE following members of the Eclipse Expedition proceeded by the P. and O. steamer *Surat*, from Southampton, on the 11th inst.:—To Ceylon, Mr. MELDOLA, Mr. REYNOLDS. From Venice, Dr. VOGEL. To Singapore: Mr. BEASLEY, Mr. SCOTT, and Dr. SCHUSTER.

A PARLIAMENTARY Paper has been issued containing the correspondence which passed on the subject of the Treaty concluded last year between the Indian Government and the King of SIAM. The Treaty has already appeared in our columns.

MRS. TEI WATANABE, wife of the Japanese Chargé d'Affaires at Vienna, was presented to his Majesty the Emperor of AUSTRIA on the 30th ult., and the Empress on the 6th inst. at the Court balls.

CARGOES AFLOAT.

—o—

SINGAPORE AND PENANG.

Per *Mary Nelson*, 320 tons black pepper, 25 tons white pepper, 1 ton gutta, 420 cwt. rattans, 194 cwt. hides, 310 tons sugar. *Emilio Rondanino*, 350 tons gambier, 150 tons saigo flour, 60 tons pearl sago, 75 tons black pepper, 25 tons white pepper, 23 tons gutta, 320 cwts. rattans, 380 cwts. hides, 13 tons india-rubber, 7 tons horns, 462 cwts. copal, 160 cwts. mother-o'pearls, 20 tons, tapioca. *Colombian* (str.), 40 tons gutta. *Lake Leman*, 665 tons gambier, 335 tons sago flour, 153 tons pearl sago, 7 tons black pepper, 10 tons gutta, 440 cwts. rattans, 1,546 cwts. hides, 20 tons india-rubber, 9 tons horns, 137 m. Malacca canes, 85 cwts. mother-o'pearls, 80 tons tapioca. *Excelsior*, 25 tons tin, 390 tons black pepper, 780 cwts. rattans, 120 cwts. hides, 290 tons sugar. *Amstel*, 740 tons gambier, 40 tons tin, 105 tons pearl sago, 555 tons black pepper, 50 tons white pepper, 1,080 cwts. rattans, 665 cwts. hides, 430 tons sugar, 900 cwts copal, 65 tons tapioca. *Alice Ritson*, 185 tons gambier, 155 tons sago flour, 140 tons pearl sago, 15 tons gutta, 220 cwts. rattans, 365 cwts. hides, 12 tons india-rubber, 14 ton horns, 11 m. Malacca canes, 35 cwts. mother o'pearls, 65 tons tapioca, 14 cwts. gamboge. *Asterope*, 30 tons tin, 300 tons black pepper, 25 tons white pepper, 240 cwts. rattans, 42 cwts. hides, 430 tons sugar. *Claudine*, 280 tons gambier, 220 tons sago flour, 60 tons pearl sago, 35 tons black pepper, 20 tons white pepper, 200 cwts. rattans, 5 tons horns, 33 tons tapioca. *L. J. Enthoven*, 200 tons gambier, 185 tons sago flour, 1,040 cwts. rattans, 7 tons horns. *Amsterdam*, 1,320 tons gambier, 445 tons sago flour, 160 tons pearl sago, 2,380 cwts. rattans, 575 cwts. hides, 120 tons tapioca. *Zeeburg*, 400 tons gambier, 325 tons sago flour, 480 cwts. rattans, 355 cwts. hides, 50 tons tapioca. *Lochleven Castle*, 405 tons gambier, 390 tons sago flour, 12 tons black pepper, 1 ton white pepper, 20 tons sapanwood, 175 cwts. hides, 70 m.

Digitized by Google

Malacca canes. *Andromeda*, 50 tons gambier, 480 tons sago flour, 65 tons pearl sago, 8 tons sapanwood, 320 cwts. rattans, 14 tons tapioca.

MANILA.

Annie, 380 tons sugar, 205 tons hemp. *Atma*, 385 tons sugar, 255 tons hemp. *Scawfell*, 400 tons sugar, 567 tons hemp, 9 tons sapanwood. *Sir Jamsetjee Family*, 600 tons sugar, 4 tons coffee, 535 tons hemp, 35 tons sapanwood, 600 cwts. mastic, 42 cwts. mother of pearls, 97 cwts. indigo, 23 tons tobacco, 583 mil. cigars, 257 cwts. hide cuttings. *Romeo*, 562 tons sugar, 114 tons hemp, 1 cwt. mother of pearls, 120 tons tobacco, 2,745 mil. cigars. *Mountain Laurel*, 800 tons sugar, 387 tons hemp, 10 mil. cigars. *Durham*, 190 tons hemp. *Cosmopolyta*, 625 tons sugar, 100 tons hemp, 3 tons sapanwood. *British Empire*, 732 tons sugar, 5 tons sapanwood. *Eugenio*, 945 tons sugar.

Naval and Military.

The troopship *Adventure* is reported to have arrived at Shanghai on January 31, *en route* to Yokohama, at which port she would embark the marines stationed there for the past three years, and proceed to England, *via* Suez Canal. It appears that the report of her arrival at Hong Kong on Dec. 22 from Yokohama was in error.

The arrival at Singapore is announced of H.M.S. *Iron Duke*, *en route* to England, with Admiral Sir Charles Shadwell on board; also of the ironclad *Audacious*, with Admiral Ryder, for the China station. The *Egeria* and *Vigilant* have also passed Singapore for Hong Kong.

The French corvette D'Assas, eighteen guns, Captain Brossard de Corbigny, proceeds to join the Indo-China squadron, and will rendezvous at Saigon.

The Indian Distinguished Service Reward, vacant by the decease of Colonel R. S. Wilson, Madras Staff Corps, has been conferred on Captain and Brevet-Lieutenant-Colonel A. J. Hadfield, Madras Invalid Establishment. Colonel Hadfield accompanied the 37th Regiment to China in the first war in 1840, was present at the taking of Cheunpee, and at the storming of the forts of the Bocca Tigris, in the Canton river; present in the action of May 25, 1841, before Canton, and engaged in the affair of May 30, when a large body of Chinese endeavoured to relieve the city. On this occasion, during a tremendous thunderstorm, the company of the 37th which he commanded was cut off from the rest of the force and surrounded by several thousands of Chinese troops; but, notwithstanding, the rain prevented the Sepoys from discharging their muskets, yet they repulsed every attack made upon them until an hour or two after dusk, when they were extricated from their perilous position by a detachment of Royal Marines armed with percussion fire-arms. For this affair he was mentioned in despatches; received the brevet rank of Major, and appointed honorary aide-de-camp to the Viceroy (Lord Ellenborough), and when Parliament voted their thanks to the Army and Navy engaged in this war special mention was made of his gallant conduct and of that of his company by the Duke of Wellington in the House of Lords, and by Lord Stanley in the House of Commons.

In the course of a paper on "The Unsurveyed World," read at the Royal United Service Institution on the 4th inst., by Staff-Commander T. A. Hull, R.N., the author called attention to the fact that in 1849, when greater interest was taken in surveying than at the present time, the ships engaged in that service produced not only nautical surveyors, but superior officers for the general service. As illustrations, he mentioned the case of the Herald, then with the Pandora, surveying the great bight of Panama, under Captains Kellett and James Wood. The captain of the Herald is now Sir Henry Kellett, K.C.B., lately Commander-in-Chief on the important China station. The author also mentioned that the present Commander-in-Chief in China, Sir Charles Shadwell, K.C.B., and Fellow of the Royal Society, was first lieutenant of the Fly, Captain Sir F. Blackwood, during the survey of the east coast of Australia and Torres Straits; while Admiral Ryder, the future Commander-in-Chief in China, received his early education as a sailor and navigator under Captain Richard Owen, in the Thunder, the surveying ship on the West India station in 1833.

We regret to announce that Captain Stanton, who served on the China and Straits Station in the surveying ship *Rifleman*, has in a fit of insanity wounded Captain Hallowes, R.N., and is now confined in an asylum.

The screw sloop Royalist, now fitting at Chatham for employment as a surveying vessel in the Eastern seas, is ordered to be rigged in a similar manner to the Sylvia.

Sub-Lieutenant S. W. Cameron, of the 80th Regiment, stationed at Hong Kong, has been promoted to the rank of lieutenant.

THE KING OF SIAM AND THE ENGLISH ASTRONOMERS.—With reference to letter in the *Athenæum* on the subject of the invitation sent by the King of Siam to English astronomers, Mr. D. K. Mason writes in reply, protesting against the insult offered to the King. He says:—"The character and bearing of the high officials of the Siamese Court are sufficiently well known to Europeans and Americans to negative any suspicion of 'meanness' in the provision to be made, as well as 'uncleanliness' or 'want of accommodation,' insinuated; while the letter of his Majesty is an ample guarantee for the honourable reception of scientific guests of his own from a country so friendly and so well appreciated as England has always been in Siam."

AUSTRIAN SEEDS FOR JAPAN.—The first ship-load of agricultural implements and seeds forwarded from Austria to Japan having miscarried through the foundering of the ship, the Austrian Minister of Agriculture has just despatched a second cargo, containing duplicates of exactly the same articles. The Japanese commissioners in 1873 were very much impressed with what they saw of Austrian agriculture in and around Vienna, and showed themselves particularly anxious to secure the objects in question for their own country.

THE Queen has received through the Earl of Carnarvon, the War Club of King Thakombau, which was in former times the symbol of Sovereignty in the Fiji Islands, and which has now been presented to Her Majesty, by the King, in token of his dutiful allegiance.

THE NEW EMPEROR OF CHINA.

(ECHO UNIVERSEL—PARIS.)

Under the powerful hand of Prince Kung, during the twelve years of his Regency, the relations of China with the West developed to an extraordinary extent. Whether he liked foreigners, or only submitted to the inevitable, Prince Kung acknowledged their superiority, and knew how to turn it to account. He availed himself of their services in all the branches of administration and in the army. With their help he reorganised the Customs, restored the finances, acquired an ironclad fleet, created an army on European principles, bought Krupp guns in Germany, Armstrong guns in England, and Gatley mitrailleuses in America, established arsenals and manufactures for arms and ammunitions; rebuilt on a stronger scale the fortifications on the eastern coast, which Anglo-French allies had so easily overcome; in short, provided his country with such ready means of attack and defence that European Powers, in the event of a war, would find China a much more redoubtable foe than in 1860. As long as Prince Kung remained in power, or maintained his influence at the Imperial Court, no danger of a rupture between China and Europe seems to have been apprehended. It is true that some people with a long experience of Chinese temper and its power of dissimulation have expressed some doubts as to the sincerity of the professed feelings of Prince Kung towards foreigners; but the Americans, who know China well, and who publish every year, in their diplomatic correspondence, so many curious and valuable documents on that country, are so far from suspecting the good faith of Prince Kung that they are exerting all their influence at Peking to get him appointed Regent a second time. It is, moreover, a matter of notoriety that the opposition with which Prince Kung had to contend during the latter part of the last reign was owing to his foreign sympathies.

Now, as far as we can ascertain from the summary information conveyed to us by telegraph, the Government of China has just fallen into the hands of that same opposition. True, the new Emperor is a nephew of Prince Kung; but he is an infant, and his father, Prince Chun, or Tun, is known to be hostile to foreign influences. The leading Minister in the new Government is another notorious enemy to foreigners. It is Li-Hang-Chang, the most renowned of the Viceroys of those southern provinces, where Europeans come more frequently in contact with Chinese. He had a large part in the suppression of the Taeping rebellion. He has had frequent contests with Europeans, and always tried his best, or his worst, to dupe them. His energy and ability, as well as his dissimulation, are undoubted. We do not exaggerate when we say that, were the supreme power to remain in the hands of that Mandarine and of Prince Chun, at the exclusion of Prince Kung, a terrible and bloody conflict might break out at any moment between China and Europe. There can be no doubt whatever in the mind of any man who has given some attention to Chinese affairs during the last fifteen years that a word from Peking suffices to doom all the European residents, all over China, to indiscriminate slaughter. The Imperial Government need not even give orders to that effect. Let Governors and Viceroys only give the hint to their subordinates, and we may have to relate horrors of which the Tientsin massacres, and the last rising at Shanghai can hardly give an idea. Those fears may seem to be exaggerated; but the English, who have greater interests at stake in China, and better means of information than we have, are expressing similar apprehensions. We think that it is time to call the attention of European Governments to the gravity of the situation. We may see, by the diplomatic correspondence recently published at Washington, that the American Government is already alive to the danger that may result from the armaments of China.

THE PACIFIC MAIL COMPANY INVESTIGATION.

On the 22nd ult. the Committee of the House of Representatives proceeded with Mr. Irwin's examination, and he made some important statements which promise to result in the solution of a part of the mystery. In the first place, there were three hundred thousand dollars paid to Mr. Schumaker. Schumaker was employed by Irwin. He was to work for the Subsidy, and the whole of the three hundred thousand dollars was contingent upon the passage of the Bill. He was the man, apparently, who had the contract to pass the Bill through the House. Irwin gave no instructions to Schumaker what to do with the money. He gave it to him as his own, and Schumaker was at liberty to keep it or buy Congressmen with it, as he chose. Mr. Whiting was paid one hundred thousand dollars because of his personal relations to Senator Cole. Cole was bound to support the Bill as a Pacific Coast measure, but he had such a coolness toward the Company that unless something was done he was not likely to take the labouring oar in the Senate in favour of the Subsidy. On the 25th ult. the examination of Mr. Irwin was continued, but it threw no additional light upon the expenditure of the money by which the Subsidy was passed. So far as the testimony affected Schumaker, it tended to strengthen the conviction that he was employed to bribe and corrupt members of Congress. Irwin seems to have been very careful to avoid any knowledge of what Schumaker did to induce members to vote for the Subsidy. He says Schumaker wanted to get out of the business, but nobody could be found to replace him in the House. Irwin also showed that a larger sum than the $750,000 was expended by him, though the amounts do not yet appear very clearly stated. The examination of the 26th ult. brought out no new points of any special importance; only it elicited the statement that Mr. John Roach was in Washington during the discussion of the Subsidy question—a fact which seems to have slipped from Mr. Roach's memory when he was last heard from. Irwin says

Digitized by Google

'Roach was working with me, but not under my orders," and he adds that Stockwell informed him that "Roach did everything to get the Subsidy through." All parties appear to have considered this as a very natural proceeding, since "Roach was to build the ships if the Subsidy passed."

By an almost unanimous vote (says the *New York Times*) the additional China Subsidy granted to the company by the now sufficiently notorious legislation of 1872 has been repealed by the House of Representatives. That is to say, the company retains the half million Sudsidy obtained for monthly China trips from Congress in 1865, but is likely to forfeit the extra half million granted in 1872, for the purpose of securing an extra line of iron-built American vessels, which were also to make monthly trips, and, together with the old line, to establish a semi-monthly mail service to China. The Senate's concurrence in the House resolution is hardly doubtful, any more than is the President's approval of it. The objection will be made by the company, and will, we suppose, be carried into the Court of Claims, that the repeal of the Subsidy involves an unconstitutional exercise of power, by impairing the validity of a contract. But there is the obvious reply ready, that fraud in the inception of a contract destroys its binding character, and we should imagine that the testimony taken by the Investigating Committee will be accepted as furnishing ample evidence of fraud. Moreover, the company failed to have their new iron steamers ready at the time agreed on, and apart from recent discoveries, that breach of contract would justify the Government in receding from their part of the bargain.

THE TEA TRADE.

Meetings have recently been held on what may be termed the "Weight Note Question." During the periods when heavy arrivals take place there is frequently great and unavoidable delay, owing to the impossibility of getting the numerous breaks of tea sorted and weighed, and there is no doubt the grievance to buyers has reached a point that it is imperative some measure should be adopted to relieve them. The wholesale dealers have submitted to importers a proposition that teas should not be offered for sale unless ready for delivery, with the option of throwing up such parcels at the end of seven days if the terms are not complied with. On the part of importers this latter clause is looked upon as dictatorial, and has led to open rupture. We, however, can see no objection whatever to importers declining to offer their produce until ready to be delivered, and this change might help to lessen the speculative nature of the business of importing. To saddle, however, the trade with further conditions must be deprecated by all; and as it is well known that wholesale dealers have also taken to importing, will such teas be subject to the terms that the trade demand, "Teas not to be offered (in the country) until ready for delivery?"

The following letters have appeared on the subject:—

"No one would suppose, from the manner in which the case is put before your readers, that it has been under friendly discussion between the importers and dealers for some weeks, and that, at least as regards the former, it is still *sub judice*.

"I claim permission, first, to say that the words 'the resolution (in question) has been come to as a means of bringing importers to a sense of their obligations,' conveys an impression absolutely erroneous as to the position of the importers.

"No one would suppose that the difficulty to be remedied lies not with the importer, but with the dock or warehouse keeper; and I think it is to be regretted that the good feeling which has so long subsisted between buyers and sellers should be jeopardised by groundless imputations.

"One other correction as to a matter of fact. You have been misinformed as to the terms of payment, which are, not 'three months after purchase,' but three months and some days in every case, up to three months and a half, for teas sold immediately on arrival.

"Now as to the question at issue.

"At a meeting of dealers in tea, resolutions were passed altering the conditions of sale, which were communicated to the importers, by whom they were discussed. An unanimous opinion was expressed that it would be impossible to conduct the trade upon such terms, and the direction in which, in their opinon, a remedy for the complaints might be found, was pointed out.

"A conference was held between committees of importers and dealers, at which the committee of the latter informed the former that they had no power to do more than request an answer yes or no to the resolution of the dealers.

"In reply, the dealers were informed that one at least of their resolutions was, on the face of it, impossible to be enforced. A copy of the resolutions of the importers was handed over and the Conference separated.

"Thereupon, it would seem, the dealers met, and, ignoring the suggestion of the importers, passed the resolution published by you.

"In regard to that resolution I will only say that, without questioning the right of any individual to refrain from buying, unless he can do so upon any terms he pleases to lay down, the importers being of opinion that any action tending to lengthen the terms of payment, or to afford ground for disputes, would be seriously prejudicial to the whole trade, I cannot think it probable that a contract so likely to contribute both to the one and the other, and, moreover, so one-sided, is likely to find general acceptance.—I am, Sir, your obedient servant,

"A MEMBER OF THE COMMITTEE OF IMPORTERS."

"Sir,—As one of the deputation appointed to confer with the Tea Importers, I beg permission to reply to the letter of 'A Member of the Committee of Importers' in to-day's Money Article, the entire bearing of which I repudiate.

"Clause 3 ignores the responsibility of the seller to be in a position to deliver goods he has sold, and attempts to transfer it to the warehouse-keeper whom he employs to house his produce.

"Any one unacquainted with the conditions of sale in Mincing-lane, on reading Clause 4, would infer that buyers receive nearly four months' credit, whereas, as a matter of fact, the terms of all tea contracts are cash before delivery and payment in full at the end of three months' prompt, whether the produce is delivered or not, and which, owing to buyers very often not being able to obtain delivery for three to four weeks, means payment on a fixed day, delivery at the convenience of the seller—a one-sided and unbusiness like mode of trading, often resulting in serious loss to the buyer, from his inability to fulfil his contract with his buyers. True, an extension of one, and, at times, two weeks, is conceded for inability to deliver at date of sale; but it is this extension that buyers seek to have cancelled in favour of the preferable course of importers not offering produce for sale until in a position to deliver within seven days from date of contract.

"It is this resolution as to which your correspondent informs you it was the unanimous opinion of importers that it would be impossible to conduct their trade upon such terms.

"The last clause leads to the inference that buyers seek to lengthen the terms of payment; this is ungenerous, no such idea having entered into the minds of buyers.

"No one can regret more than myself even the temporary rupture of our usual harmony in carrying on our commercial transactions; but, after four months' negotiations, no other course is open to us than the one we have adopted.—Your obedient servant,

"ARTHUR STEARNS."

The following letter is from a Tea Broker:—"Latterly there has been too good reason for the present complaints on the part of the trade. Competition between the docks and the wharves has reduced the remuneration of merchants to such a point that at the present moment I understand business is being conducted at an absolute loss. No wonder then, while this unhealthy competition lasts, tardy and slovenly work is the result. But beyond all this to induce merchants to warehouse at the discharging dock, no facilities are given to, if, indeed, actual difficulties are not thrown in the way of, the wharfingers by the dock companies. I think it behoves merchants to see that their goods are worked with more despatch and within a reasonable time. The steamers carrying for our trade carry on an average 50,000 packages, different marks, varying from 50 packages up to 1,000 packages each. A fair delivery then, we would suggest, would be half the parcel within eight days and the remainder within fourteen days."

Monetary and Commercial.

Little has occurred in the Manchester Market calling for special notice. The business has been on a very quiet scale all through. Here and there more enquiry has appeared, but the orders actually given out have been small. On the other hand, producers, generally speaking, hold firmly for their quotations, and no alteration is to be noted in the prices of either goods or yarns.

Subscriptions are invited for a City of Bucharest Loan for £384,000, in bonds of £100 each, issued at the price of £86 10s., bearing 7 per cent. interest, and redeemable at par by an accumulating sinking fund in thirty years. The service of the loan is secured on the municipal revenues, and, in addition, by a special guarantee of the unencumbered balance of the octroi duties; and the Bank of Roumania, in Bucharest, will receive the payments from the Municipality, and transmit the amount required to its London agency.

The appointment of Mr. Rowett, late partner in the firm of Holliday, Wise, and Co., and a member of the Legislative Council of Hong Kong, to an Inspectorship in the Hong Kong and Shanghai Bank, has, we understand, been withdrawn by the directors.

Messrs. J. S. Morgan and Co. will receive subscriptions for £460,000 sterling gold Six per Cent. Mortgage Bonds of the United New Jersey Railroad and Canal Company, bearing interest from the 1st March next. The price is par, or £200 per bond of $1,000.

The general meeting of the Home and Colonial Marine Insurance Company (Limited) was held on the 10th inst.; Mr. James Anderson (Anderson, Anderson, and Co.) in the chair.

The report stated that "the underwriting account for 1872, now closed, shows a net loss of £20,324. There still stands at the credit of 1873 account, after the deduction of expenses, £10,395. The net premiums for 1874 amount to £151,185, and the losses and claims paid on account of the same to £81,940. The directors do not recommend any further payment of dividend for 1874 beyond that already made in July last."

The report and accounts were adopted, and the retiring directors and auditors were re-elected.

The sixth annual meeting of the shareholders of the Thetis Marine Insurance Company has been held.

The Chairman said the position of the company was to be looked at from two points of view—first, with regard to their position towards their own shareholders; secondly, towards the public. Taking the last first, and comparing the position with this time last year it would be found that the amount uncalled and in the till was then £201,000, as against outstanding liabilities to the extent of £2,600,000, whilst at the end of December last the cash, &c., was £123,000, against liabilities of £772,000, a proportion which was now about twice as favourable, whilst the outstanding liabilities were of a much better class. If they looked to the accounts they would find that the rate of premiums was lowered, which meant that they had been taking a better class of risk, or, at all

Digitized by Google

events, one better suited to them. In the same way they would also find, with regard to the amount run off, which also showed the nature of the risk, that it was larger in proportion. Since the end of December 50 per cent. of the liabilities had run off.

After some little discussion the report was unanimously adopted.

At the meeting of the Credit Foncier of England (Limited), the directors' report, which recommended a dividend for the half-year at the rate of 5 per cent. per annum, was adopted.

The creditors of the Joint National Agency, Limited, and of Messrs. Bowles Brothers are offered bonds for full amount of claims, by instalments extending over ten years, with interest at 4 per cent.

In a case brought before Judge Fancher, in the Court of Arbitration, New York, for a claim of freight on tea from Japan, per *Pleiades*, owing to some dispute as to measurement, the Judge gave an award that the plaintiffs were not entitled to recover any additional freight on the teas in question beyond the amount specified in the bills of lading.

The Great Northern Telegraph Company's traffic receipts for the month of January were :—This year, f.265,751 ; last year, f.324,466.

During the week ending on the 6th inst. orders were issued by the Customs for the delivery of 3,705,875lb. of tea from the bonded warehouses in London. Of this quantity 2,179,662lb. were for home consumption, 547,660lb. for exportation, and 974,133lb. for removal coastwise to various outports, of which 179,175lb. were for immediate exportation. The total quantity delivered was greater by 344,463lb. than that delivered during the previous week. The tea duty last week paid in London amounted to £54,491 11s.

Messrs. Birley and Co., of Hong Kong, announce that Mr. Henry Liston Dalrymple and Mr. John Gordon Talbot Hassell have been admitted partners in their firm.

A sum of £98,000 in Japanese gold, brought by the last Southampton mail steamer, has been disposed of for Paris.

The market for Bar Silver is quiet at the last quotation of 57½d. per oz. ; the demand being chiefly for Spain. Mexican Dollars have realised 56⅜d., showing no change in price.

The amount of bullion by the P. and O. Company's steamer *Surat*, from Southampton on the 11th inst. was—in gold, to Galle, £1,990 ; in silver, to Bombay, £25,000 ; to Penang, £45,500 ; to Hong Kong, £6,560 ; to Hobson's Bay, £525 ; total in gold, £1,990 ; in silver, £77,585.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns have been issued for the month of January, showing a further large falling off in the exports of British and Irish produce. The exports for the month represented a total value of £16,986,760, against £19,472,467 in 1874, and £20,298,547 in 1873, the decrease on last year's amount being 12½ per cent. The total imports, on the other hand, were valued at £32,375,675, being an increase of 3½ per cent. upon the corresponding month of last year, when the total amount was £31,274,404, against £27,397,673 in 1873. Among the exports, cotton yarn has decreased about 9 per cent. in quantity, but as much as 22 per cent. in value ; cotton piece goods 6¾ per cent. in quantity, and 11 per cent. in value ; linen yarn decreased 24½ per cent. in quantity, and about the same in value ; linen piece goods show no material change, either in quantity or value ; woollen yarn decreased 25 per cent. in quantity, and 18 per cent. in value ; woollen cloths increased 14 per cent. in quantity, and about the same in value ; worsted stuffs decreased 9 per cent. in quantity, and 12½ per cent. in value ; iron and steel increased about 3 per cent. in quantity, but the value has decreased 12 per cent.; and coal, &c., decreased 14 per cent. in quantity, but as much as 38 per cent. in value. Among the imports, wheat has decreased 28¾ per cent. in quantity, and 46½ per cent. in value, viz., £1,355,868 in value, as against £2,536,275 in 1874 ; raw cotton shows an increase of 17⅜ per cent. in quantity, and 11 per cent. in value ; flax a decrease of 24 per cent. in quantity, and 19½ per cent. in value ; raw silk a decrease of 21½ per cent. in quantity, and 40¾ per cent. in value ; wool a decrease of 16 per cent. in quantity, and 14 per cent. in value. The imports of tea show the large increase of 164 per cent. in value, with a corresponding increase in quantity, but this is a wide variation incidental to the monthly comparison of such articles, and the quantity for home consumption, which is the better test, has only increased about 6½ per cent. In coffee there is a similar increase of 118 per cent. in quantity, and 88 per cent. in value, but the increase in the quantity entered for home consumption is about 11½ per cent. The most important fact as regards the imports thus continues to be the large decrease in the imports of wheat both in quantity and value ; and as regards nearly every item of the exports, although there is an important decrease in quantities, the decrease in values is considerably larger.

The following is an extract from these Returns of the figures which refer to our Export trade with China and the Far East :—

COTTON YARN.

To		For the Month ended 31st Jan. 1873.	1874.	1875.
China and Hong Kong	lbs.	610,530	1,413,800	1,168,100

ARTICLES OF IMPORT.

TEA.

Beyond the public auctions there has been little passing during the past week, the only feature of interest being the extraordinary increase in the deliveries, which must tell in favour of importers during the next few months. The following figures give the position to 30th June next:—

Stock in United Kingdom on 31st Jan., including all arrivals to date...	103,000,000
Cargoes afloat	17,000,000
To arrive of new Tayshan leaf and Indian tea—a liberal estimate	10,000,000
	130,000,000
Deliveries at 15,000,000 per month	75,000,000
Stock on July 1, 1875	65,000,000

Messrs. Capel and Co.'s Circular says:—Our market during the past week has been exceedingly quiet; the amount of business by private contract being smaller than ever known at this period of the year. At public auction the quantity offered has also been moderate, consisting mostly of Scented Teas, which have again ruled rather easier. Prices for Congous show but little if any alteration. *Congous.*—Red-leaf kinds: Siftings meet with a fair demand at about previous prices. Broken-leaf with good quality have also been saleable. Common to fair common sell cheaply at public sale; privately but little has been done. Fair to good Kaisows show no alteration; in fine to finest there has been but little done. Pak Lin kinds remain without change. Black-leaf kinds: Common have sold at public sale without change in prices. Fair to good medium sell only slowly at previous rates. Good to fine meet with a moderate demand, finest showing no change. New-make Canton kinds: The few sales made have been at former prices. Oolongs: Some sales under the hammer show a decline of ½d. to 1d. per lb. for fair to good qualities. Souchongs have been dull of sale, but there is no quotable alteration in prices. *Scented Teas.*—Canton kinds of Caper have been offered freely at public sale, old season's selling at 7½d. to 9d. for common to fair, new at 8½d. to 9¾d. per lb. for common, and 10½d. to 1s. 0½d. for fair to good, being again rather lower prices. Orange Pekoes sold at 9d. to 9½d. for common, and 1s. 2d. per lb. for good kinds. Privately, the finer kinds of long-leaf have been saleable. Foo Chow kinds: Capers remain dull of sale. Orange Pekoes sell slowly, even at the low prices current for common kinds. *Green Teas.*—The market shows but little change, but prices of fine Moyune Gunpowder were rather cheaper. Young Hysons maintain the recent advance. Ping Suey kinds also maintain the late improvement.

SILK.

Messrs. Kilburn, Kershaw, and Co. report as follows on the Silk Market:—

There is nothing new in Silk; a steady business is doing for consumption in Chinas at firm prices. The public sales advertised to commence on 23rd inst. will contain a considerable quantity of Silk "without reserve," among which will be some large parcels of Bengal filatures. Deliveries continue satisfactory, being from 1st to 11th inst.:—China 1,433, Canton 168, Japan 179, Bengal 88 bales. Total, 1,868 bales.

Messrs. Arles, Dufour, and Co.'s Lyons Circular says:—China Silk has again attracted the chief attention. Important contracts in Trams to arrive and for remote dates have been made between throwsters and manufacturers. For a long time past consumption had not been so favourable to Chinas. The demand bearing almost exclusively upon medium sorts, corresponding grades of raws, Tsatlee 4 and 4½, have been dealt in freely both on the spot and to arrive; prices have gained fresh firmness, and privileged chops realised an advance of from f.2 to f.3 upon quotations of September.

CHINA MATTING.—In auction, 150 rolls were offered, and a few lots sold at 40s. to 44s. 6d. for 4 by 4.

GALLS.—Early in the week 351 cases 2 bags China sold with a steady demand at 52s. 6d. to 53s., a lot or two at 55s. per cent. The price has since declined 2s. per cwt., 398 bags selling at 51s. 6d., with one lot at 52s.

HEMP.—The market has been very quiet, but no further decline in prices is reported.

PEPPER.—The auctions have evidenced a dull flat market for both Black and White. Of the former 1,110 bags Penang sold at 1-16d. to ⅛d. decline, viz., 5⅝d., with occasionally 5¾d. to cut in; 453 bags of this import were bought in, as also were 408 bags Singapore and 959 bags Siam. *White* has met no demand, and 618 bags Singapore were retired at 8d. to 8⅛d. per lb.

SUGAR.—The market has continued very quiet during the week, and prices have shown a declining tendency. Very few transactions are reported. The sales of East Indian kinds have been:—On the 5th inst. 507 baskets low date Penang sold after the auction on private terms; 1,896 bags were withdrawn. On the 9th 6,107 bags new landed unclayed Ilo Ilo taken out at 16s., and 985 baskets date Penang at 15s. 6d. to 16s. the cargo of Java, per Cedric, 2,000 baskets No. 16½, sold for Bristol at 25s. 9d.

TAPIOCA.—At the auctions 1,093 bags flake chiefly bought in, Penang at 3d. to 3½d.; a small quantity Singapore sold at 2½d., and 290 bags damaged Penang at 1⅞d. to 2⅛d. per lb.; of 358 bags Flour, a few lots sold at 2¼d.; 238 bags Pearl chiefly sold, fine large and medium at 21s., dull bullets at 20s. per cwt.

STICKLAC.—Sixty-four cases good but rather woody Siam were bought in at 105s. per cwt.

TOBACCO.—In public sale Thursday of 893 bales China a large portion sold, 4½d. to 8d.; 392 ditto damaged sold, 3d. to 6¾d. A good portion of 269 bales Japan realised 5½d. to 7¾d., a small portion 8d. to 8¾d.; 85 bales ditto damaged, 3¼d. to 6¼d.

TIN is again weaker, forward sales having been made at £90. Straits on the spot is quoted £91. Banca £98, Billiton, £93 per ton.

MESSRS. DENNY AND CO., of Dumbarton, have in hand two screw steamers for the Chinese Navigation Company, intended for their local service, either sea or river work. They are 225 feet in length, 34 feet beam, and 21 feet in depth, with engines of 220-h.p. nominal. They are intended to work up to a high speed. The first one will, it is expected, be ready to launch in May, and the second in July. When ready they will load out from the Clyde for Shanghai, taking machinery and stores for the Chinese Government.

THE paddle wheel steamer built by Messrs. John Elder and Co., Clyde, for the Shanghai Steam Navigation Company, will shortly be put on board a vessel in pieces, and conveyed to Shanghai, there to be put together.

THE third steamer for the China Trans-Pacific Company building by Henderson, Coulbourn, and Co., Clyde, has been delayed in her launch by strikes.

THE str. *Sumida*, recently launched at Sunderland, and intended for local trade in Japan, had her trial-trip, and is now laid on the berth in London for Yokohama.

THE passage of the steamer *Hankow* outward to Shanghai we are informed, was forty-seven days' steaming, not fifty-five, as given in the report in the *North China Herald*.

THE CHINA AND JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China, Japan, the Straits Settlements, &c. J. THOMSON, Chairman.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.
Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,
48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

THE course of studies is comprehensive and suited to modern requirements. The premises are well arranged, and healthily situated facing the sea. Distance from London, one-and-a-half hours by rail. Terms, 45 to 50 guineas. Pupils staying during holidays are charged 1 guinea per week extra.

References permitted to Parents of pupils, the Clergy and to F. J. ANGIER, Esq., at the office of this paper.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

GELLATLY, HANKEY, SEWELL, and CO., will despatch the following high classed, SCREW STEAMSHIPS as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Pen., Sing., H.K.,Shang. Yokohama & Hiogo	Africa ...	95 A1	2279	V.L.D.	Feb. 24
Pen., Sing., Hg.K., and Shanghai ...	Craigforth... Tartar...	AA1 100 A1	1109 2255	V.L.D. V.L.D.	Mar. 5 Mar. 15

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., Albert-square, Manchester; 1, Fenwick-street, Liverpool; 51, Pall Mall, S.W., or 109, Leadenhall-street, London, E.C.

Steam via the Suez Canal. Last shipping day, 24th February.

FOR PENANG, SINGAPORE, HONG KONG, YOKOHAMA, and HIOGO, the magnificent Clyde-built screw steam ship AFRICA, 95 A1, 2,279 tons gross register, 1,811 tons register, 250-h.p. nominal; 1,250-h.p. effective; J. GALLILEE, commander; Victoria Docks. This fine steamer, built by Messrs. Robert Napier and Sons, of Glasgow, and well known in the trade, is strongly recommended to Shippers.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall Mall, S.W.; 109, Leadenhall-street, London, E.C.

PENANG, SINGAPORE, HONG KONG, and SHANGHAI.—The magnificent steamer TARTAR, 100 A1 at Lloyd's 2,255 tons gross register, will load in the Victoria Docks, and sail about March 15. Has splendid accommodation for passengers.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., Albert-square, Manchester; 1, Fenwick-street, Liverpool; or 51, Pall-mall, S.W.; and 109, Leadenhall-street, E.C., London.

CEYLON COFFEE ESTATES.

THE safest, surest and quickest mode of realising Coffee Estates is by registering them with the undersigned, who is always prepared to buy or to sell.

Seventy already sold—fifty now on the register.

ALEX. BROWN Kandy.

ALEXANDER BROWN, ESTATE AND GENERAL AGENT

KANDY, CEYLON,

VISITS and reports on Coffee Plantations, estimates Crops, values Properties, buys and sells Lands, Goods, and Produce on Commission and tranacts all kinds of Estate and Agency Business.

THE LONDON AND CHINA TELEGRAPH.

THE SEVENTEENTH Volume of this JOURNAL commenced on the 4th day of January, 1875. Terms for advertising, 2s. 6d. per five lines, and 6d. for each additional line.

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, on the 18th inst., four days early. The next inward (P. and O.) mail, with advices Yokohama 12th, Shanghai 15th, Hong Kong 21st, Singapore 28th Jan., which is due, *via* Brindisi, on Monday next, the 1st proximo, will leave Suez to-day, being its due date.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Anadyr*, arrived Feb. 16.—From Yokohama: Messrs. Mezza, Sigrist, Jullien, Aravandina. From Shanghai: Messrs. McKenzie, Maclean, Mesny, Berthet, Blarez, Loceiro, Mr. and Mrs. Maitland. From Hong Kong: The Hon. R. Rowatt, Mr. Buchan, Mrs. Harvey. From Saigon: Mr. and Mrs. Laconture, Mr. Biers. From Singapore: Le Comte de San Januario, Senor Carvalho, M. Mesnier. From Batavia: Messrs. Van Lear, Heynaard, Van Granan, Brinsma, Abraas, Heyleger, Verburgt, Diffinbach. From Galle: Mr. Leechman, Mr. and Mrs. Schultze.

PASSENGERS OUTWARD.

Per P. and O. steamer *Surat*, from Southampton, Feb. 11.—To Yokohama: Capt. and Mrs. McDonald and two children. To Shanghai: Mr. and Mrs. F. J. Pornett, two children, and one second-class passenger. To Hong Kong: Sub Lieut. Cameron, Surg. Major Ferguson, Mrs. Ferguson, and two children, Mr. D. R. Crawford. To Singapore: Mr. R. Tiede, Mr. Lott, Dr. Schuster, and two second-class passengers. To Singapore and back: Mr. Beasley. To Ceylon: Mr. W. Rogers and two second-class passengers. To Ceylon and back: Mr. Melelola and one second-class passenger.

Per P. and O. steamer *Baroda*, from Venice, Feb. 19.—To Hong Kong: Mr. and Mrs. Cardross Grant. To Singapore: Mr. R. B. Parr. To Ceylon and back: Dr. Vogel.

Per P. and O. steamer *Baroda*, from Brindisi, Feb. 22.—To Hong Kong: Mr. and Mrs. F. W. Mitchell. To Ceylon: Mr. Swan, Mr. J. M. Robertson, Jun., Mr. J. R. Hedges.

Per P. and O. steamer *Peshawur*, from Southampton, Feb. 25.—To Yokohama: Mr. and Mrs. Troup, Mr. J. T. Griffin. To Singapore: Mr. and Mrs. Innes, Mr. A. McBean

Per P. and O. steamer *Lombardy*, from Venice, March 5.—To Ceylon: Mr. and Mrs. Duncan.

Per P. and O. steamer *Lombardy*, from Brindisi, March 8.—To Hong Kong: Mr. W. Paterson. To Galle: Mr. Anthony Trollope.

Per P. and O. steamer *Khedive*, from Southampton, March 11.—To Shanghai: Mr. O. Percival, Mr. P. M. Grant. To Hong Kong: Mrs. Maclean and party.

Per P. and O. steamer *Baroda*, from Brindisi, March 22.—To Shanghai: Mr. J. M Ringer. To Hong Kong: Mr. J. G. T. Hassell.

Per French steamer *Meikong*, Feb. 28.—To Shanghai: Mr. Bu'ssonnet, Mr. Fergusson, Mr. Gordon, Mr. M. R. Mackellar, Mr. and Mrs. Jerdein, Mr. and Mrs. G. Allers, Dr. Falconer. To Hong Kong: Mr. Pinckvoss, Mr. Cartwright. To Saigon: Mr. Leger Mr. Amè. To Galle: Miss Holden.

Per French steamer *Sindh*, March 14.—To Shanghai: Mr. and Mrs. Evans, Mr. S. Marsh. To Hong Kong: Mr. W. M. Reeves. To Batavia: Mr. and Mrs. Erdman. To Galle: Mr. Tennant.

Per French steamer *Anadyr*, March 28.—To Shanghai: Mr. J. B. Johnson. To Hong Kong: Mr. Fairhurst, Mr. Sydney Deacon. To Galle: Mr. George Hayes.

Per French steamer *Djemnah*, April 11.—To Saigon: Mrs. Langier and three children.

Per French steamer *Tigre*, April 25.—To Batavia: Mr. and Mrs. J. Hudig..

To Batavia, per Nederland Company's steamer *Voorwarts*, from Nieuwdiep, Feb. 13.—Mr. Van Lansberge (Governor-General of Netherlands India) and wife, Mr. and Mrs. T. F. Levysohn, Mr. and Mrs. B. Japikse, Messrs. A. C. A. J. Morean, A. Stenvers, G. A. Hoogenstraaten, J. Schontendorp, Pzn., T. E. Scheltema, H. C. A. van Eldik Thieme, Mr. and Mrs. G A. de Lange and four children, Mrs. van der Werff, Mrs. Verbeek, Mr. and Mrs. C. J. W. Rynen and four children, Mrs. M. van den Bosch, Mr. and Mrs. Zeper and three children, Mrs. M. C. Huber Noordt Calkoen and child, Mrs. M. J. Hamaker, Messrs. C. A. van Sypenstein, W. Hamaker, T. C. Phillippeau, J. M. Abandenon, Mr. and Mrs. E. Bosch, Messrs. A. A. G. de Petit, J. R. J. P. Cambier, G. C. Mirandolle, Mrs. Bleckman, Mrs. C. P. Reckers, Mrs. J. B. Bode, Messrs. T. A. de Man, W. J. L. Wynand, S. van Hulstyn, J. J. Mees, L. E T. Vlierboom, W. Hiemstra, P. Dibbetz, M. R. E. Ahn, J. B. Verhez, A. H. W. de Gelder, W. L. G. T. P. Cramer von Baumgarten, G. A. Ramaer, G. T. F. Gaillard, T. P. Jonxis, H. C. de Vos, Praesteunck, T. T. Reekers, A. L. Dykman, A. H. Stadnitsky, H. W. Cowan, T. W. Stoutjesdyk, P. T. H. Campen, J. C. C. Six Dykstra, A. J. Beaudoux, T. Maeker, Fitter, Mrs. Francis, Mrs. Westerbeck, eleven subaltern officers.

Summary of News from the Far East.

CHINA.

PEKING AND TIENTSIN.

The correspondent of the *North China Herald* writes as follows:—

Considerable uneasiness has been felt throughout Peking during the past week, owing to the news that the Emperor has been attacked with small-pox. The disease declared itself on the 9th inst., the day of the Transit of Venus, and shortly afterwards was reported as having assumed a severe type. The *Peking Gazette* of the 14th contained the first public intimation of his Majesty's illness, in the shape of a decree appointing the seventh Prince, youngest of his Majesty's three uncles, to offer the winter solstice sacrifices at the Temple of Heaven.

The observations of the Transit on the 9th Dec. were very successfully made at the French, Russian, and American observatories. Although the morning proved cloudy, and the sun was at intervals obscured, the four important periods of contact were all successfully recorded. The French astronomers succeeded in taking nearly 150 perfect photographs. At the American observatory about 90 were secured. The Minister Chung How was present at the French Legation throughout the observations, in which he appeared to take great interest; and he invited the astronomers a day or two afterwards to visit the old Jesuit observatory, where he acted as cicerone to the interesting scientific relics which form one of the best known "sights" of Peking. A similar compliment was paid to the American astronomers.

It is reported that Li Tsung-shi, Viceroy of the Liang Kiang, has applied for leave to retire, owing to bad health. In the event of his request being granted, it is thought not improbable that he will be succeeded by Tseng Kin-tsuen, a younger brother of the late Tseng Kuo-fan. There seems to be a fatality connected with the post of Viceroy at Nanking; no one appears able to hold it long without being either murdered, dying, or falling sick.

CHEFOO.

A correspondent writes from this port as follows :—

Father Christmas has come upon us in very genial guise, for the 25th Dec. was more like a fine spring day than such as is generally considered appropriate to his advent. As may be supposed, festivity has been the order of the season, and this year there has been no exception to the rule, when at the house of one of our leading merchants—a gentleman no less famed for his universal hospitality than for the splendour of his entertainments—we passed a most enjoyable evening. The guests were numerous, and the fun was kept up until an *early* hour, every one seeming loth to leave such pleasant quarters.

On the 25th, service was held for the first time in the new chapel, and was conducted by the Rev. Messrs. Greenwood and Scott, clergymen of the Church of England, in presence of the largest congregation we have ever seen in Chefoo. I believe this is the first Christmas service at this port which has been performed by ministers of that Church ; and everything that care and choral effect could do to make it complete was most thoroughly carried out. And here let me remark on the obligations under which the community are placed to the different members of the choir, and more especially to the ladies, who, sparing neither time nor trouble, rendered possible the production of the fine vocal and instrumental music with which we were favoured.

The chapel has been a long time in attaining completion, and that it has done so even now is mainly due to the great generosity of two gentlemen of this community, one of whom made a most munificent donation at the outset, while the other, besides subscribing liberally at first, eventually advanced the funds still wanting for the completion of the building. The edifice, without being possessed of marked architectural grandeur, yet presents an amount of chaste and symmetrical simplicity which justifies us in describing it as a pretty and tasteful structure, doing credit alike to the architect and the community. I am only echoing the general wish when I express the hope that ere long there will be sufficient money forthcoming to pay off the debt, and put up the remaining necessary fittings, for the perfect carrying out of the Church service.

H.I.G.M.S. *Arcona* is looked for daily from Nagasaki. She has gone there for the purpose of comparing and obtaining observations, with a view of fixing the position of Chefoo. It is said that she will make another trip to Japan and back before taking her final departure from our port. The astronomers are still very busy, and we hear they purpose remaining until the middle of February.

There is a great dearth of news at present, and we hear of nothing startling in the business world. There are a number of vessels in the harbour, a rather unusual circumstance at this time of the year. The *Bridgetown*, an English vessel, six months out from England, is daily looked for.

SHANGHAI.

The present mail brings advices from this port to the 7th January ; the French mail from London November 20 was received on the day this mail left. The following summary of news is from the *North China Herald* :—

The annual meeting of the Shanghai Chamber of Commerce has been held, R. I. Fearon, Esq., chairman, when the report and accounts were passed. The new Committee appointed are Messrs. W. Keswick, E. Cunningham, C. J. King, A. Hennequin, F. Nissen, M. Gubbay, F. H. Bell, J. A. Taylor, E. H. Lavers, and J. G. Purdon. The questions discussed were the compilation of Stocks of Imports, a proposal for the establishment of a Pilotage Board, Reuter's Telegrams and Transit dues.

The Chinese Imperial Loan, which we announced as forthcoming a few weeks since, has been advertised by the Hong Kong and Shanghai Bank. It is for £627,615 altogether, but the first issue is to be for £539,748 ; security, certain portions of the Imperial Foreign Maritime Customs Revenue, which have been assigned to the Bank in trust for the bondholders. Interest, 8 per cent. per annum ; 3-20ths of principal repayable in Foochow on 19th June, 1876 ; and 1-20th every six months till 1884. The issue price is 95 per cent. at exchange 4s. 1¼d. per dollar, or 5s. 7d. per tael—$462.94, or Tls. 340.30 per £100 bond.

The P.M.S.S. *China*, concerning the safety of which some rather disconcerting rumours were prevalent during last week, arrived safely at Yokohama on the 30th Dec. It will thus be seen that the *China* was a week overdue between San Francisco and Yokohama, a period sufficiently long in these times of successive disasters at sea to excite some degree of apprehension, although a considerable detention in crossing the Pacific at this season is by no means unusual.

A Notice to Mariners by the Engineer-in-Chief to the Customs intimates that the new first-order light on the N. E. Shantung Promontory is now in operation. It is elevated 200 feet above the level of the sea, and in clear weather the white light should be visible at a distance of twenty-one nautical miles.

Professor Young, of the American Transit of Venus party to Peking, has delivered a lecture on the Spectroscope and its contributions to Astronomical Science, in the Masonic Hall, which was fairly attended. It would have been better, however, had the front room, which was used on the occasion of the previous lecture of the course, been employed again, the acoustic properties of the large hall being unfavourable to public speaking. Professor Young gave an exhaustive and able exposition of his subject in simple but clear and forcible style, and illustrated it happily both in a verbal manner and by diagrams drawn on the blackboard. At the close a hearty vote of thanks was awarded the lecturer, on the motion of Dr. Macgowan, seconded by Mr. Forbes.

The Shanghai Temperance Society have received two valuable presents during the past week. The first is a handsome billiard table, from Captain Harmon, of the steamer *Hupeh ;* the second, a cheque for Tls. 100, from W. Mesney, Esq., of the Chinese Military service, stationed at Chen-too-foo, but at present residing at Hankow.

The text of the despatch by Mr. Seward, U.S. Consul-General, which was referred to in our notice last week of the Annual Report on the Commercial Relations between the United States and Foreign Nations for 1873, has been published. It is a thoughtful and suggestive review of the position of our relations with China, present and to some extent prospective, and as such it will be read with much interest.

Dividends have been notified for the half-year ending 31st Dec., by the following Companies :—Yangtsze Insurance Association, 7½ per cent.; Shanghai Steam Navigation Company, 3 per cent.; Shanghai Gas Company 5 per cent.¶

The hearing of the case of the French brig *St. Francois* against the steamer *Cawdor Castle* has been brought to a close before R. A. Mowat, Esq., sitting at Registrar, and Messrs. A. J. Little and M. Coryell, as Merchant Assessors. The owners of the brig were represented by Mr. Robinson, and those of the steamer by Mr. Wainewright. The Court and Assessors took time to consider their award.

At the Supreme Court, before Sir Edmund Hornby, Chief Judge, James Malone, late captain of the schooner *Alexandra*, sued Mr. Joseph Walton, the owner, for $264, balance of wages due, and $550 as per account stated, for disbursements, &c., and the cost of a passage from this port to Australia. Mr. Hannen appeared for the plaintiff, and Mr. Wainewright conducted the defendant's case :—

Mr. Hannen, in placing the case before his lordship, said the main facts to go upon were that the plaintiff was engaged by the defendant at Adelaide in May last year, and was subsequently made captain of the vessel at a salary of £15 per month. The ship was to go to Freemantle and Singapore, and back to the Colonies. The plaintiff was engaged for six months, and according to the terms of the articles to be discharged in the Australian Colonies. If he were discharged in a foreign port, then a passage was to be provided for him back to Australia. This was endorsed upon the articles. The other claim was for expenses incurred on shore, and for money paid by plaintiff on defendant's behalf. Plaintiff had been discharged at Shanghai after having fulfilled the terms of his agreement, but the defendant had refused to pay or provide him with a passage or refund the amounts he had disbursed. The case for the defence was that plaintiff was engaged by the defendant in the first instance as superintendent of riggers, while the vessel was on the slip at Adelaide, on the 23rd May, 1874, at the rate of £14 per month (captain's pay). On the 15th of June plaintiff's name was placed upon the register as captain at £15 per month. The ship went from Freemantle to Singapore, and on to Shanghai. Defendant always transacted all shore business, except entering and clearing the ship, shipping men, &c. Defendant, in giving evidence, also swore that his agents in Adelaide, Elder, Smith, and Co., had told him that an agreement had been signed by them in conjunction with Capt. Malone, but that the latter had since told him he had torn it up ; and again, that he (the defendant) had never seen the articless or the clause in writing providing for the plaintiff's passage home. He discharged the captain for personal reasons, and because he did not suit him, but not until after he had served his term of agreement, viz., six months. He had agreed that if the plaintiff was discharged within the six months from the date of signing articles, he would give him one month's pay and £10 towards his passage money.

After both counsel had addressed the Court on behalf of their respective clients, his Lordship reserved judgment.

The sum of $175 has been collected by the exertions of Captains Peters and Thomson, of the British ships *Inverness* and *Omba*, from some of the vessels in harbour, on behalf of the crew of the *Horatio*, who lost their property in the fire which destroyed that ship. The U.S. Consul, Mr. O. B. Bradford, has distributed the money in suitable proportions.

A seaman of the United States corvette *Kearsage* has been drowned under peculiar circumstances. The man was seen by a policeman on duty on the Bund coming from the direction of the French Settlement in a jinricksha. He got out when opposite Messrs. Russell and Co.'s, and walked along the jetty to the pontoon, followed by the jinricksha man. From words he overheard the constable walked along the jetty towards them, and suddenly hearing a plunge in the water, he hastened forward, and saw the seaman clinging to a cargo boat, the force of the current quickly dragging him under. The constable sprang on to the cargo boat, and tried to reach the poor fellow, but could not, for he soon disappeared, and was of course drowned. The constable got into a sampan and made a thorough search at the spot, but found only the unfortunate man's cap, which bore the badge of the *Kearsage*. At the U.S. Consulate, before Mr. Bradford, a de-

Digitized by Google

position was made by the police constable, who, in addition to the facts mentioned above, said he saw no indication of drunkenness on the part of the deceased, and that the jinricksha coolie was not near him when he fell into the river.

A case of successful highway robbery has been reported at both the English and French police stations. It appears that a French gentleman while proceeding homewards along the French Bund from a party was violently assaulted by a Chinaman, who struck him a severe blow across the face with a bamboo, knocking him down. While he was on the ground, the thief robbed him of his watch, chain, and trinkets, valued at $42. The number of the watch is known, and this may possibly lead to identification and recovery. The unfortunate gentleman also had his hand much hurt in endeavouring to defend himself.

FOOCHOW.

The advices from this port extend to the 10th January. We extract the following items of intelligence from the *Foochow Herald*:—

The second section of the telegraph line to Amoy is now completed, and remains intact. We think that the company's agent—Mr. Henningsen—ought to be complimented upon having so far carried out the work entrusted to him—despite much underhand opposition. The Shanghai papers advise us of General Raasloff's departure for Peking. As his Excellency has been specially instructed, by the Danish Government to enforce the fulfilment of the alleged agreement between the Chinese Government and the Great Northern Telegraph Company, his advent will put matters in a clearer light. The country people are everywhere civil and friendly to the company's *employés*. It is satisfactory to know that the Tsung-li-Yamen have at last accorded permission to the Viceroy to give his official sanction to the work, if he approves of it. We trust that this is not a *ruse* to throw the responsibility of rejection on a subordinate officer.

With reference to the recent *Kwang-tung* junk collision case, we understand Captain Pitman gave notice of appeal against the judgment, but was informed that there was no appeal against the decision of the Court. It seems strange that when appeals are admitted against many of the highest tribunals of the land there should be no appeal against the judgment of a Mixed Court, with no one but Her Majesty's Consul and a Chinese Mandarin, neither of whom can have the slightest idea of navigation, sitting upon it. This is especially hard in a case where so large a sum of money is at stake.

M. Giquel has left this port for Takao, in order to confer with Commissioner Shen-Pao-Chen in regard to contemplated works at the Arsenal; also to superintend the mounting of the big guns—recently received from Europe,—on the newly-erected batteries in the neighbourhood of Takao and the Pescadores. We are informed that M. Segonzac—the sub-director—will shortly return from Formosa, to take charge of the Arsenal during the director's absence.

The steam-launch recently purchased by the Lekin officials is lying snugly at anchor in front of Messrs. John Forster and Co.'s hong, and, so far as we know, has been in the same comfortable position ever since she changed hands. It is possible that the high price of coal may have deterred the present owners from placing the craft on the active list.

Training for the race meeting next month is being pushed forward with much vigour. The ponies are looking well, and, taken altogether, are about the best lot ever seen on the Foochow course. There is said to be a lamentable dearth of jockeys, but we doubt not that recruits will be brought forward from Shanghai and Amoy.

We notice that the arsenal at Pagoda Anchorage has been walled in. No doubt this has been done with a view to concealing from the vulgar gaze the stupendous resources of that grand establishment for the useless expenditure of public money.

A fire has occurred in the city, near the south gate, but was fortunately extinguished before much damage was done.

HONG KONG.

Our advices by the present mail extend to the 15th January; no later mail from London had been received. The following items of news are from the *Hong Kong Daily Press*:—

The departure of that highly respected and deservedly esteemed servant of the Church, the Ven. Archdeacon Gray, M.A., for England from Canton, has led to the preparation of an address and testimonial of plate, which were presented at the Concordia Hall by the Church Committee of Shameem, on behalf of the subscribers. There were present on the occasion—Sir Brooke Robertson, C.B., H.B.M. Consul (in the chair), A. M. Gepp, Esq., R. Howie, Esq. (trustees of Christ Church, Canton), Revs. John Chalmers, M.A., Dr. Andrew Happer, &c., Messrs. Thomas, Kleinwächter, Crace, Brown, &c., in all about 120 ladies and gentlemen. It happened unfortunately, through various reasons, that many persons had no opportunity of participating in the subscription for that object at the time the list was closed in order to telegraph to London for the plate. For this reason, as well as because there have been additions to the residents in the meantime, it was especially fit that the whole community should unite in a collective farewell address to one who has lived and laboured in their midst for the long period of twenty-two years. Not only has the Venerable Archdeacon most acceptably discharged the duties pertaining to the incumbency of Christ Church, Canton, but he has also constantly conducted services at Whampoa on Sunday evenings, and during the period of hostilities, between 1856 and 1861, undertook extraordinary services at Hong Kong and Canton in connection with the army and navy. Feeling strongly that the close of such a career should be marked by the frank and cordial acknowledgment of those who have witnessed it, and that they should invite the sympathetic accord of those whose briefer residence precludes an adequate estimate of the value of such services, some of the older residents—the Rev. John Chalmers, M.A., the Rev. Dr. Andrew Happer, and Mr. Nye—set on foot a movement which resulted in the preparation of the address, which was signed by the gentlemen above-named and about ninety other Canton residents. It should be mentioned that the Church Committee also signed and participated in the address.

The Hon. R. Rowett leaves for Europe by the present mail. Mr. Rowett has, for the last four years, been connected with many important movements in the colony in his position of member of the Legislative Council, chairman (for some time) of the Hong Kong and Shanghai Bank, &c., and we are only expressing a general sentiment when we say that in his departure we are losing a most valuable public man. He has always manifested a desire to further the general good of the community, and has rendered valuable assistance in supporting measures to this end, ably and fearlessly, in the Council. We can ill afford at the present time to part with an unofficial member of Mr. Rowett's stamp, and it may be a long time before his seat is occupied by as faithful a public servant. During his residence in the colony he has made a large circle of friends, and both those who have known him in his private and public capacities unite in expressing regret at his departure.

The *Gazette* prints the subjoined despatch, received from the Earl of Carnarvon, conveying the expression of Her Majesty's sincere regret for the sufferings occasioned by the typhoon of 23rd September:—

SIR,—I submitted for the perusal of the Queen your despatches describing the violent hurricane of the 23rd September. In returning the despatches to me, Her Majesty has expressed to me her sincere regret for the sufferings which have been occasioned by this sad calamity. —I have, &c., CARNARVON.

Mr. Brereton, on the part of the Chinese Government, has appeared in the Police Court, to explain why the absconding witness in the *Spark* piracy tragedy did not appear to answer the charge brought against him. He said it was with no intention to evade the law. The fact was the defendant went on board H.I.C.M. gunboat *Ching-on*, and from over excitement in the case began to spit blood. The captain, who secured him in the sum of $400, took him to Canton, where he lived, for the purpose of getting medical advice. He would appear in Court as soon as he was able. He asked that the case might be remanded till the 18th Jan. His Worship expressed his pleasure at finding Mr. Brereton had ascertained the cause of the non-appearance of the man, and said he did not intend ordering that the $400 deposited in Court in lieu of security be forfeited till he got an explanation from him. He would, therefore, remand the case till the 18th.

A library of rare and valuable books has been submitted to public auction by Messrs. Lane, Crawford, and Co. It comprised works in general literature, history, law, theology, art, natural history, poetry, and fiction; and included, among others, a complete set of Audubon's "Birds of America," with 500 coloured plates, many choice books of engravings, Lodge's Portraits of 240 illustrious personages of English history, three sets of encyclopædias, Shaw's Zoology, in twenty-seven volumes, copiously illustrated; Campbell's "Lives of the Lord Chancellors;" Prescott's, Channing's, Macaulay's, Addison's, Bacon's, and Emerson's works.

H.M.S. *Iron Duke* left for England on the 13th Jan., and was saluted by the shore battery, by the French corvette *Montcalm*, the German frigate *Elisabeth*, the Austrian frigate *Friedrich*, and the Russian corvette *Ascold*, and she in turn re-saluted them all. The bands of each played national and appropriate airs, and hearty cheers were given on all the vessels. "Home, Sweet Home," was played on board the *Iron Duke* as she steamed away, and the rigging, yardarms and mastheads of the fleet were manned. A number of Chinese in the sampans joined in the salute with crackers.

The following account, duly certified, of the average amount of bank notes in circulation in Hong Kong, during the month ending 31st December, 1874, is published in Saturday's *Gazette*:—

Banks.	Average Amount.
Oriental Bank Corporation	$322,598
Chartered Mercantile Bank of India, London, and China	751,102
Chartered Bank of India, Australia, and China...	581,456
Hong Kong and Shanghai Banking Corporation	1,919,973
Total	$3,575,129

Digitized by Google

Progress is being made in the raising of the sunken steamer *Leonor*. In fact, she is so far in shore that patches can now be made to enable her shortly to be pumped out and floated. Seventeen bodies have been recovered, of course unrecognisable after the time they have been under water.

(FROM OUR OWN CORRESPONDENT.)

JAN. 14.

There is a rumour afloat that the distillery works, which have been so great a cause of pain to many, may change hands. A well-known essence distiller of Singapore is said to be in treaty with the mortgagees, who have a lien on the works and plant. I have my own ideas on the subject. Under the present management, or as it is at present conducted, the affair can never pay, and I fear that it is possible the mortgagees, who are the virtual proprietors, may spoil their chance of getting rid of the concern by insisting upon terms too hard for the gentleman who is said to be in treaty with them.

The feeling of dissatisfaction with the condition of affairs of the Hong Kong and Shanghai Bank has not diminished. Mr. Rowett, the new temporary sub-manager in London, goes home by this mail to take up his appointment. The feeling of the public appears to be that though people are glad that the choice of the directors has not fallen upon a worse man than Mr. Rowett, yet that it is a pity that a person totally free from any conceivable suspicion of bias should not have been selected, especially in the present condition of the company. Mr. Rowett goes home by this mail, and takes with him the hearty goodwill of the community.

The captain and officers of the *Japan* have left for San Francisco in the *Alaska*.

Mr. Chatterton Wilcox arrived in the *Sarpedon*, and has assumed the editorship of the *Daily Press*.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 21st January. We regret that our usual files of newspapers, &c., have not come to hand.

THE MAILS.

PRESENT INWARD MAIL.—MARSEILLES, FEB. 16.—The Messageries Maritimes Company's steamer Anadyr, with the inward French mails from China and Japan, arrived here to-day at 11 A.M. She brings 110 passengers and a general cargo, including 436 bales of silk, 2,104 packages of tea, 636 packages of sundries, and specie to the value of £28,880 for London, which part of her cargo will be forwarded to its destination per company's steamer Euphrates, due in London on or about the 1st March.

NEXT INWARD MAIL.—SUEZ, FEB. 19.—The P. and O. Company's steamer Mirzapore, with the China mails, arrived here to-day.

HEAVY PORTION OF LAST INWARD MAIL.—GIBRALTAR, FEB. 16.—The P. and O. Company's steamer Peking, with the India, China, and Australian (heavy) mails, left at 7 P.M. for Southampton, where she may be looked for on Sunday morning, 21st inst.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Feb. 18, at London, from Colombo, &c. (via Havre), Chyebassa (str); 19, at Falmouth, from Pasaroeang, D. Mc. B. Park; 15, off Hirtshals, from Cheribon, for Copenhagen, Rota; 16, at Texel, from Batavia, Ferdinand and Louis; — at New York, from Amoy, Anita; from Batavia, Florida.

DEPARTURES.—Feb. 18, from London, for Colombo, &c., *vid* S.C., Eldorado (str.); for Penang, Singapore, Hong Kong, and Shanghai, via S.C. ÆGean (str.); 17, from Sunderland, for Anjer, Clara Babuyan; 18, Bussorah; 5, from Philadelphia, for Yokohama and Hiogo, Rainbow; 19, from London, for Hong Kong, Golden Spur; for Singapore, Hong Kong, and Shanghai (*vid* S. C.), Glenfalloch (str.); from Deal, for Batavia, Donna Maria, after repairing; 19, from Sunderland, for Singapore, Mecca (str.); from Liverpool, for Batavia, &c., Lorinda Barstæ; for Anjer Point, Sea.

LAID ON.—At London, for Colombo, &c. (via Suez Canal), Chyebassa (str.) At Liverpool, for Shanghai, John Parker. At London, for Hong Kong, Lucia. At Liverpool, for Singapore, Bertie.

SPOKEN.—Forest Rights, Batavia to Falmouth, Jan. 13, 21 N., 37 W.

At PORT SAID.—Feb. 18, Java (Dutch str.), for Java.

CASUALTIES.—The Duke of Buccleuch (str.) has a rent in her side about twelve feet long and two feet wide. Extra steam pumps are to be put on board to assist in clearing the vessel; on the 19th the tide ebbed nearly three feet lower than on the day previous, enabling the cargo to be worked out much longer than usual; no alteration in position of vessel.

Advices received from Mauritius, by telegram from Aden, dated Feb. 17, state that the Mary M. Francis, schooner, Francis, from Cheribon to Baltimore, which put in there Dec. 12, leaky, had discharged her cargo and gone into dock; she was stripped, caulked, and re-metalled, had re-embarked the sound portion of her cargo and would proceed shortly on her voyage.

** *Companies omitted in the above list will be included if the particulars are forwarded.*

COMMERCIAL POSTSCRIPT.

The following communication from Mr. Jackson, the acting manager of the Hong Kong and Shanghai Banking Corporation, is in course of issue to the shareholders :—

Having just received a telegram from Hong Kong, giving the figures of the balance-sheet for the year ended 31st December last, I deem it my duty to place the information in the hands of the shareholders in Europe with the least possible delay. I accordingly annex an abstract statement of the accounts as audited and adopted without dissent at the meeting of shareholders held in Hong Kong on the 18th inst. On reference to the items in the balance-sheet it will be seen that the reserve fund now stands at $100,000, and that the amount at credit of profit and loss account, viz., $120,000, has been carried forward in new account,—thus leaving

Paid up capital	$5,000,000
Reserve fund	100,000
Marine insurance reserve	35,000
Balance at credit of profit and loss ...	120,000

While it is a matter of deep regret that a second time in the history of the Bank the Directors have determined not to declare any dividend, and write so much off the Reserve Fund, I must leave this important matter to be explained in the report, which will shortly be in your hands. In the telegram just to hand I am assured that the most ample provision has been made for *all possible losses*, which statement the shareholders may fully rely upon.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

GILMAN—On the 16th Feb., at Shanghai, the wife of Frank Gilman, of a son—Walter Stuart.

HARTON—On the 4th Jan., at Foochow, Mrs. William Henry Harton, jun., of a daughter.

SMITH—On the 19th Dec., at Babatnon, Leyte, Philippine Islands, the wife of R. Calder Smith, of a daughter (Helen).

SWEETING—On the 20th Jan., at Newera Elliya, Ceylon, the wife of E. C. Sweeting, of a son.

MARRIAGES.

ANNETT—DUBOIS.—On the 16th Feb., at St. George's, Hanover-square, T. A. Annett, only son of the late T. F. Annett, of Lyons, to Nina, eldest daughter of Emile Dubois, of Léognan, near Bordeaux.

BUTLER—STRAIGHT.—On the 17th Feb. at St. Mary's, Chelmsford, by the Ven. Archdeacon Mildmay, George Butler, recently of Shanghai, second son of the late James Butler of Broomfield, Essex, to Octavia Mary, second daughter of William Straight, of Guy Harlings, Chelmsford, Essex. No cards.

CORYELL—BENETT.—On the 31st December, at St. Joseph's Church Shanghai, by the Rev. Father Desjacques, Miers Coryell, to Marie Leontine Benett.

EKMAN—THORBIORNSOE.—At Taku on the 19th Dec., by the Rev. J. Innocent, Carl Ekman, of Taku, to Anna Thorbiornsoe, of Gottenborg, Sweden.

HANNEN—LORRIMER.—On the 9th Feb., at St. Mary's Church, Aylestone, near Leicester, by the Rev. George W. Straton, Charles Hannen, of Westbourne-park-road, London, and Tientsin, to Catherine Felicia Lorrimer, second daughter of John Lorrimer, of Park hill House, Aylestone.

PATERSON—COLEY.—On the 16th Feb., at Christ Church, Highbury, by the Rev. J. Chapman, John Mansfield Paterson, of Ceylon, to Fanny, third daughter of the late Charles William Coley, of 21, Aberdeen-park, Highbury.

DEATHS.

DENT—On the 16th Feb., at Mentone, Lancelot William Dent, of Fernacres, Bucks, second son of the late Thomas Dent, aged 31.

DENT—On the 14th Feb., at Singapore, in his 31st year, Digby Henry Dent, second son of the late Rear-Admiral C. C. Dent and of the Lady Selina Dent, late a lieutenant in the Royal Marine Light Infantry, and Superintendent of H.M. Convict Prisons in the Straits Settlements. Killed in the suppression of an outbreak among the Chinese prisoners at the gaol of the above-named place.

HELMS—On the 7th Feb., at l'Avant Poste, Lausanne, Switzerland, Vera Ewen, the infant daughter of L. V. Helms, of Sarawak, Borneo, aged seven months.

TRACEY—On the 17th Feb., at 42, Westbourne-park road, Janet Douglas, the beloved wife of Richard E. Tracey, Captain Royal Navy. Friends will accept this intimation.

Miscellaneous.

CONSULAR CHAPLAINS.—TREASURY MINUTE.

My Lords refer to a letter from the Foreign-office stating that the Earl of Derby would suggest whether it would not be giving effect to the recommendations of the Committee on Consular Chaplains, if in dealing with the cases of the chaplains specified by the committee they were allowed to reckon a certain number of years additional towards their pension over and above the period which under ordinary circumstances would be granted to them upon the abolition of their posts; and adding that Lord Derby's suggestion for the grant of an additional number of years' service must be taken subject to the restriction that the sum granted should not exceed 40-60ths, or two-thirds of the full amount of salary. Lord Derby further recommends that the chaplains whose cases are specially recommended by the Parliamentary Committee for consideration should, if they intend to return immediately, or have already returned, to this country in consequence of the abolition of their posts, be allowed the cost of their journey home, as well as that of their family. My Lords concur generally in the recommendations of the Earl of Derby, and are pleased to direct that in calculating the compensation allowances to be granted to the chaplains at Hamburg, Leghorn, Lima, Rio, Pernambuco, Valparaiso, Oporto, Monte Video, and Batavia, a special addition of five years shall be made to the number of years which they would have been otherwise severally entitled to reckon for pension under the regulations specified in the letter from this Board dated the 4th of November, 1873, which is subject, nevertheless, to the restriction imposed by the 7th section of the Superannuation Act, 1859, that no such compensation allowance shall exceed two-thirds of the annual emoluments on which it is based. In any case in which a chaplain receives a larger

Digitized by Google

addition of years on account of abolition of office than ten, exclusive of the five years which are added on account of the professional character of his office, a special minute stating the special grounds for granting such allowance will be laid before Parliament in accordance with the provisions of the said 7th section of the Superannuation Act, 1859. My Lords are further pleased to direct that each of the chaplains specially recommended by the Select Committee of the House of Commons who intends to return immediately, or has already returned, to this country in consequence of the abolition of his post, shall be paid the whole of the expense of his own journey from his post, and one-third of that of his family, the number being limited to five persons besides himself, of whom one may be a female servant.

JAPAN AND THE GREEK CHURCH.—A correspondent of the *Weekly Review* writes:—"Of all forms of Christianity, the Greek Church seems to be the most popular among the official class in Japan. The ceremonial of the Greek Church is as dramatic and dazzling to the eye as Buddhism, and finds great acceptance among these Orientals. 'Father' Nicolas, the present head of the Greek-Russian Mission, is building a magnificent church—the finest in Japan—a favour that has been granted to no other nationality, a proof of Russia's great influence here. The assistants are all natives, and his long residence here, his wonderful skill in the language and thorough knowledge of Buddhism, which he studied in a Buddhist convent for years, give him great influence, especially as he is backed up by his Government, which has secured for him full liberty of residing in whatever part of the Empire he chooses." To this it may be added that the Romanists have a numerous mission, of over fifty priests, in Japan, but they are not popular either with the people or Government. They have also a mission in the centre of the capital, which they owe to the power of France. Their work at present seems to be chiefly among their old convents. They have a school of about fifty pupils preparing for the priesthood, and are extremely cautious of aggressive work.

The Prince Imperial passed his examination, and left the Royal Military Academy at Woolwich on the 16th inst. He was seventh in proficiency of the cadets receiving commissions, and first in fencing and riding. The Empress was present in deep mourning. The Duke de Bassano, Marquis de Fiens, Count Clari, Countess Clari, Duke of Cambridge, Field Marshal Gough, Viscount Sydney, and a distinguished party of officers and civilians were present. The customary ball at the end of the session has been held in the Academy, when farewell was taken of the Prince and the other students who have completed their course. The Prince, it is said, will continue his studies privately, and probably will receive permission to be attached to some regiment.

MILITARY EXPENDITURE IN THE COLONIES.—A Parliamentary return has been issued of "the probable amounts that will be repaid by the several colonies, and paid into the Exchequer as colonial contributions in aid of military expenditure." The total colonial contributions for this purpose are £233,100, of which £121,000 is contributed by Ceylon, and this sum, it is stated, is proposed as the future contribution of the colony, £51,000 by the Straits Settlements, £27,000 by the Mauritius, £20,000 by Hong Kong, £10,000 by the Cape, and £3,500 by Natal. The total amount included in the Army Estimates for military purposes in the colonies is £1,752,535, against £1,734,977 last year.

EMBEZZLEMENT FROM THE CHARTERED MERCANTILE BANK.—Alfred James Price has been committed for trial on a charge of embezzling several sums belonging to his employers, the Chartered MercantileBank of India, London, and China. It was stated that having received a sum of £284 7s. 6d. for a draft on the company's branch at Colombo, he retained £200 of the money, paying in only £84 7s. 6d., and altered the entries respecting the draft to correspond with the reduced amount. In another case the prisoner was said to have retained £300 out of a sum of £850.

A DEPUTATION from the Glasgow Chamber of Commerce has waited upon the Marquis of Salisbury, and presented a memorial praying for the immediate revision of the tariff and the early abolition of the duties on cotton piece goods imported into India. The deputation was headed by the President of the Chamber, Mr. Matheson, and accompanied by Mr. Ramsay, M.P., the Lord Provost of Glasgow, Mr. Whitelaw, M.P., Dr. Cameron, M.P., Mr. A. Orr-Ewing, M.P., Mr. George Anderson, M.P., Mr. W. Holms, M.P., and Colonel Mure, M.P.

CAPTAIN OWEN GREEN, Quartermaster, half-pay, late 82nd Foot, has been granted a good service pension. Captain Green served in the China war, including the taking of Amoy, Chusan, and operations in the rivers.

A TELEGRAM announces that the *Sindoro*, upon which twenty guineas was paid at Lloyd's last week, arrived at Kenkoolen on the 17th inst., and will be towed to Batavia by the *Amboyna* (str.). Has broken propeller shaft.

INDIA AND THIBET.

The following remarks on the trade with Thibet are gathered from a recently published Government report on the condition of India :—

The prohibition of trade between India and Thibet is solely due to orders from Peking. The local officers in Thibet would, it is said, gladly facilitate direct intercourse, and even now there is a considerable traffic through Sikkim, carried on by Thibetan and Bhutea merchants. There are several passes *via* Sikkim into Thibet. Two of these are much used by the Thibetan peasants, who bring down cattle to graze in Sikkim ; and also by the inhabitants of the Lachin-Lachung valley, who twice a year carry wood into Thibet and bring back loads of salt. A good road is quite practicable, though it would be expensive.

In 1871 a native pundit, trained as an explorer, made his way from Darjiling into Great Thibet by the Tipta-la pass. He describes this route as difficult, and the ground to the north of it as very elevated and barren. In the month of September he reached the Choto-Dong lake, a fine sheet of water about twenty miles long by sixteen, and 14,700 feet above the level of the sea. The water is excellent, though the lake has no outlet. The traveller next made his way to Shigatze, a large and important town, and shortly after reached the Great Shakia Monastery, on a tributary of the Sang-pho, or main river of Thibet, 13,900 feet above the sea. After some further wanderings the pundit crossed the snowy pass Thung-lung-la, 18,460 feet above the sea, to the town of Nilam. Nilam contains 250 houses, and is ruled over by two jongpons appointed by the Thibetan Government. North of the passes the country is tolerably level, but to the south the ground is very rugged and broken. From Nilam the road follows the Bhotia-kosi river into Nepaul, crossing that river fifteen times, by means of three iron suspension and eleven wooden bridges. In one place there is a chasm which is so perpendicular that the path is supported by bars of iron and slabs of stone, stretching from peg to peg and covered with earth for one-third of a mile. The pundit's route, 844 miles long, took him completely round Mount Everest.

There is another route to Thibet through Bhutan ; and further east in the territory of the friendly Bhutea Rajas exists a more promising line still. There is a great fair held twice a year in connection with this last route at Udelgiri. The Thibetans are an eminently commercial people. Every person in authority, including even the Chief Llamas of the monasteries, keeps an agent, and carries on trade on his own account. Besides this a large number of Mussulman traders from Kashmir are located in the capital. The inhospitable nature of the country, which produces few things required by the rest of the world, makes bullion an important article of export. Mines of silver and gold abound. Silver especially is plentiful near Lhassa, but the authorities prohibit the working of the mines there, from a superstitious fear of impoverishing the country and causing the men to degenerate. There is no restriction on working gold mines, and this metal is reported as abundant at Thok Jalung (32° 30′ N.) and under the lofty peaks of Aling Gangri.

Trade with China is carried on by the great road between Tatsianlu and Lhassa. The Chinese import into Thibet tea, cotton fabrics, thread, porcelains, and Yunnan ponies, and receive in return silver, salt, blankets, and other woollen goods, furs, drugs, and musk. Brick tea is the main import. This is made mostly near Ya-tsow, in Tze-chuan, from a hedge-row tree fifteen feet high, with a large coarse leaf. Four bricks of 5 lbs. each are bought at Ta-tsian-lu for 6s. 4d., and sell at Lhassa for £1 4s. to £1 8s., fetching much higher prices of course in spots more distant from the capital. Here, then, is an opportunity for our Assam tea-planters if they could but get the trade routes opened up. The Missionaries calculate the annual supply of tea to Thibet at about 6,000,000 pounds. Chinese cottons are largely imported, but even now at Lhassa Indian goods are beginning to supplant them. Silks of gaudy colours fetch about their own weight in silver. Large quantities of the latter metal find their way into China every year, and strange as it may seem, among the ingots are great numbers of English rupees, melted down, but still preserving their original shapes. The fact is the Thibetan traders who come down to our frontier fairs carry back our money in exchange for their goods. The Thibetan musk all goes to China, yet the best quality of it is produced in the Mishmee hills, near our own frontiers, and the trade ought, therefore, to come into English hands. Salt is abundant all over Thibet, and is produced by solar evaporation in shallow pits. We know very little of the trade to the north with Tartary, but it is supposed to comprise gold lace, silks, gems, carpets, saddles, horses, and a very large kind of sheep. English woollens are much sought after in Thibet, but have to contend against importations from Russia. Flowered calicoes are used for lining walls. The missionaries frequently found tin plates, evidently of English manufacture. There is an immense demand for indigo, which realises a profit of from 50 to 100 per cent. The fact is, indigo cannot be obtained from the producers in small quantities, and as the dye is universally used, the large traders who buy it up for retail purposes command a practical monopoly. A piece of coral as large as a pea fetches its weight in gold, and the prices augment with the size, the darkest colours being most esteemed. Rice is imported for use among Chinese residents. The most easterly great prospective trade route is that *via* Sudiya through the Mishmee country, and the unknown region beyond to Batang and Szechuan. This line has been already attempted by Mr. Cooper, "the pioneer of commerce," but, by orders from China, the Thibetan authorities were ready for him at Batang, and stopped his progress before he got in sight of their gates. If this road could once be opened, large quantities of cows and sheep, ghee and wool, the real wealth of Thibet, would find their way into India, and our own import trade into Central Asia might indefinitely expand. At present all we can do is to wait the turn of events. An annual fair is held at Sudiya, to which the Mishmees and other hill tribes repair, taking our wares home with them in exchange for their finest products. Thus this fair, while it extends the knowledge of our manufactures, cements the friendly feelings of the mountaineers, and is therefore extremely important as the forerunner of future direct commercial intercourse between Assam and the west of China.

THE NEW EMPEROR OF CHINA.

(DAILY NEWS.)

A telegram announces that the enthronement of the new Emperor of China will take place on the 25th of this month. Up to our own day China might be said to be out of the world. We are all familiar with "Far Cathay;" and in the supposed allusion to China in Isaiah under the term "Land of Sinim," it states that those coming from it "shall come from far." In spite of this remoteness, the interest produced by the details of the late Emperor's marriage was great; and more recently an equal interest was felt in the news of his death, as well as in the reported, it may be hoped untruly reported, suicide of his Empress. In addition to this, we find that the characters of the leading men who have influence in Chinese politics are not unknown to us; and their policy is discussed, and the probable result of their getting into power is canvassed, as if they were no farther away than Westminster or Versailles. Hien-feng, the father of the late Emperor, died when still a young man. Rumour ascribes his death to dissipation. He had made a hurried flight from Peking in 1860 when the allied English and French forces approached. With his harem and his son he remained at Zehol in Mongolia till his death, which took place little more than a year afterwards. The young boy was then declared Emperor. His mother, who was not the Empress, was raised to that dignity, and she and the other Empress took upon themselves the part of Regents. They acted in this capacity for about ten years, and earned during that time a reputation for judgment and discretion. In audiences they sat concealed behind a screen, where they could hear, and when they came to any decision it was conveyed to the Emperor, who was visible in the Hall, and he used the "Vermilion Pencil," which instrument gives force to Imperial decrees. Prince Kung was at the head of affairs during nearly all this period, and it may be difficult to say how much of the credit is due to him or to the two old ladies. An Emperor of China is so surrounded by an elaborate ritual of ceremonial, and placed so apart from all human beings, that whatever character he may possess has little or no chance of being manifested. The Chinese themselves describe this isolated position by saying that he is "as solitary as a god." When a boy the late Emperor was said to be dull and rather stupid. He made but poor progress with his classics, and had even to be bribed into learning his day's lessons. Those who have had stolen glimpses of him, as on rare occasions he left his palace and was carried in his chair, describe latterly that he looked more like a corpse or a mummy than a living being. Such an individual could not have had much influence in State Councils, and his death would not be likely to be desired by those near him who were ambitious in their hopes of power. The death or dethronement of the "Son of Heaven" does not belong to the plans of even the most powerful and successful of Chinese politicians. The suddenness of the news that the young Emperor was dead has naturally suggested suspicion here in the West. If any crime has been committed, it will be a deviation from the ordinary course of Chinese history. The still recesses of the Great Palace in Peking no doubt present ample facilities for deeds of the kind hinted at, and the "Hall of Secure Felicity," or the "Palace of Steadfast Purity," might easily be made to belie their high-sounding and flowery names. One feels more sympathy for the young Empress now condemned to seclusion. Her father is, to use the nearest corresponding term, a Duke and an educated man. The high degree of Chwang-Yuen was carried off by him in the "College of the Forest of Pencils" at Peking. His daughter also bore the reputation of being educated, and of having literary tendencies. Stories indicating high spirit, and something like pluck, were current about her.

The character of the child who is declared to be the occupant of the "Dragon-Throne" will be of but small importance for many years to come. Those around him who wield power attract more attention, and the reported downfall from authority of Prince Kung probably indicates important changes. It must be said to Prince Kung's credit that for the ten years during which we may consider him to have been the head of the State everything went on smoothly. He came into office when the country had more than one trouble to distract it, and he has long kept it in almost perfect peace and tranquillity. The existence of the Foreign Ministers in Peking was an entirely new aspect of the "outer barbarians," with whom Prince Kung had to make himself acquainted, and to organise relations. This he accomplished, and gave satisfaction to the Legations; and to him is also due the merit of solving the Audience question, which had many awkward aspects. Li-Hoong-Chang, who seems to have come to the foremost place in the new arrangements, bears a name well known in China. He took a prominent part in the suppression of the Taeping rebellion. For some time past he has been the Governor of the Province of Pei-Chili, in which Peking is situated. For years back he has been raising troops and doing his best to get them drilled as far as possible in the European manner. The suburbs of Tientsing, his usual head-quarters, have been swarming with "braves" since he came there. The arsenals in various parts of the country are also due to his energy. In these places are produced rifles, cannon, war vessels, engines ammunition, and generally speaking nearly all the materials of war. Under his immediate supervision the Taku forts have been put in order, and strongly armed with Krupp guns. There are other forts and camps on the Peiho which have been coming into existence at the same time. In any part of China where the tools of war are being produced should you inquire what department of Government the works are under, the name of Li-Hoong-Chang is sure to be given you as the authority they work by. When we see at the head of affairs an active and able man such as he is, who has been seemingly for years engaged in works of preparation, and whose course of conduct suggests that he had only been waiting his time, we naturally are anxious to know what is likely to be his policy. Unfortunately, on these points our means of probable conjecture are as yet but slight. He is supposed by the Europeans to have a fair share of all the exclusive ideas of the mandarin class—which means opposition in every way to the "Foreign Devils," and to all that belongs to them. Whether the warlike forces he has been organising are for defence against the foreigners or for carrying out his purposes among his own nation, is a question which cannot be answered; but if he retains his position in Peking, it is not likely to be long before we may see straws moving, and they may give us some indication about the direction of the wind.

THE GOVERNMENT.

The following is a list of the chief officials in the several departments of the present Administration :—

The Premier	The Right Hon. Benjamin Disraeli, M.P.
Lord High Chancellor ...	Lord Cairns.
President of the Council ...	The Duke of Richmond.
Lord Privy Seal	The Earl of Malmesbury.
Vice-President of the Council	Viscount Sandon, M.P.
Chief Commissioner of Works	Lord Henry Lennox, M.P.
Postmaster-General ...	The Right Hon. Lord John Manners, M.P.
Chancellor of the Duchy of Lancaster...	Colonel the Right Hon. T. E. Taylor, M.P.
Judge-Advocate and Paymaster-General	The Right Hon. Stephen Cave, M.P.
Deputy Judge-Advocate General	Mr. Jas. C. O'Dowd.
THE FOREIGN OFFICE.	
Secretary of State	The Earl of Derby.
Under Secretaries	The Hon. Robert Bourke, M.P. Lord Tenterden, C.B. (Permanent).
THE COLONIAL OFFICE.	
Secretary of State	The Earl of Carnarvon.
Under Secretaries	Mr. James Lowther, M.P. Mr. R. G. W. Herbert (Permanent).
THE HOME OFFICE.	
Secretary of State	The Right Hon. R. A. Cross, M.P.
Under Secretaries	Sir H. Selwin-Ibbetson, M.P. The Hon. A. F. O. Liddell (Permanent).
THE WAR OFFICE.	
Secretary of State	The Right Hon. Gathorne Hardy, M.P.
Under Secretaries	The Earl of Pembroke, the Hon. F. A. Stanley, M.P., Capt. Vivian (Permanent).
Surveyor General of Ordnance	Lord Eustace Cecil, M.P.
THE TREASURY.	
First Lord	The Right Hon. Benjamin Disraeli, M.P.
Chancellor of the Exchequer	The Right Hon. Sir S. Northcote, M.P.
Junior Lords	Viscount Mahon, M.P., Sir James Elphinstone, M.P., Mr. Rowland Winn, M.P.
Secretaries	Mr. W. H. Smith, M.P., Mr. William Hart-Dyke, M.P., Mr. R. W. Lingen, C.B. (Permanent).
THE ADMIRALTY.	
First Lord	The Right Hon. George Ward Hunt, M.P.
Other Lords	Admiral Sir A. Milne, Rear-Admiral Sir G. P. Hornby, Lord Gilford, Sir Massey Lopes, M.P.
Controller	Rear-Admiral W. H. Stewart.
Secretary	The Hon. Algernon Egerton, M.P.
Permanent Secretary ...	Vernon Lushington, Q.C.
Naval Secretary	Rear-Admiral Robt. Hall, C.B.
THE INDIA OFFICE.	
Secretary of State	The Marquis of Salisbury.
Under Secretaries	Lord George Hamilton, M.P. Sir Louis Mallet, C.B.
THE BOARD OF TRADE.	
President	The Rt. Hon. Sir Charles Adderley, M.P.
Secretaries	Mr. George Cavendish Bentinck, M.P. Mr. T. H. Farrer (Permanent).
THE LOCAL GOVERNMENT BOARD.	
President	The Right Hon. George Sclater-Booth, M.P.
Secretaries	Mr. Clare S. Read, M.P., Mr. H. Fleming, Mr. Jno. Lambert, C.B. (Permanent).
LEGAL.	
Attorney-General	Sir Richard Baggallay, Q.C., M.P.
Solicitor-General	Sir John Holker, Q.C., M.P.
IRELAND.	
Lord Lieutenant	The Duke of Abercorn.
Commander of the Forces...	Lord Sandhurst.
Chief Secretary	Sir M. H. Beach, M.P.
Under Secretary	Mr. Thos. Haviland Burke.
Lord Chancellor	The Right Hon. J. T. Ball.
Attorney-General	Mr. Henry Ormsby, Q.C.
Solicitor-General	The Hon. D. R. Plunket, Q.C., M.P.
SCOTLAND.	
Lord Advocate	The Right Hon. Edward Strathearn Gordon, Q.C., M.P.
Solicitor-General	Mr. William Watson.
THE ROYAL HOUSEHOLD.	
Lord Chamberlain	The Marquis of Hertford.
Lord Steward	Earl Beauchamp.
Vice-Chamberlain	Viscount Barrington, M.P.
Earl Marshal	The Duke of Norfolk.
Master of the Horse ...	The Earl of Bradford.
Master of the Buckhounds	The Earl of Hardwicke.
Captain Hon. Corps of Gentlemen-at-Arms	The Earl of Shrewsbury.
Capt. of Yeomen of the Guard	Lord Skelmersdale.
Treasurer	Earl Percy.
Comptroller...	Right Hon. Lord Henry Somerset, M.P.

Naval and Military.

Rear-Admiral Cumming will have had his flag flying considerably over the usual period when the time arrives for him to haul down, but the Commander-in-Chief on the China station is still more fortunate, his term of service having been completed as far back as August last. We hear the "local rank" of vice-admiral, granted to Rear-Admiral Sir Charles Shadwell, will be retained by him until he arrives on the home station; and as this carries pay with it, the gallant Admiral may be congratulated on the many delays which occurred in obtaining a suitable ship for his relief.

Colonel E. W. D. Bell, V.C., C.B., commanding the Brigade Depôt at Wrexham, has been selected to succeed Colonel Elrington in command of the Belfast District. Colonel Bell served in the Eastern campaign of 1854-55, including the battle of Alma, where he personally captured and secured the first gun taken from the Russians, also at the battle of Inkerman and siege of Sebastopol, and was complimented for distinguished conduct. He subsequently served in the Indian Campaign of 1857-58, including the operations across the Gomtee, and siege and capture of Lucknow.

The officers of the Royal Marine Battalion, returning from Japan in the troopship Adventure, consist of Colonel Richards (in command), Captians J. D. Broughton (Paymaster), S. T. Bridgford (Control Officer), E. B. Snow, A. H. H. Walsh, Arthur Hill, Edward O. B. Gray. Lieutenants. G. A. Hesseltine (Musketry Instructor), T. E. Hungerford (Quarter-master), J. H. Sandwith (Adjutant), S. A. St. John, Osborn, Tracey, C. S. F. Fagin, F. B. Drury, Barry, S. L. Denny, Stewart Polkinghorne, A. C. Smyth, F. M. Faulkner, and Alfred G. de B., Nepean.

The subjoined appointments have been made to the China squadron:—Lieut. H. P. Warren (1873), to the Charybdis; Lieut. C. K. Purvis (1873), and Lieut. C. E. Reynard (1873), to the Audacious, additional for disposal.

An outrage upon an Englishman by the inhabitants of the Pellew Islands was recently reported, and orders have been given for Her Majesty's ship Blanche to call there before returning to England to pay off.

Major C. F. Amiel has assumed command of the 80th Regiment at Hong Kong, Lieut.-Colonel H. C. Smith having come to England on medical certificate.

Brevet Lieut.-Colonel H. J. Hicks, of the 14th Brigade of Royal Artillery, who has served in China, is about to receive the command of a battery.

GERMANY.

—o—

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, FEB. 16.

On Saturday evening Herr Rudolf Moring, one of the three Members of Parliament for Hamburg, attended a meeting of his electors, to give an account of his stewardship during the session just closed. It lasted, he said, for seventy-six days, and held fifty-seven plenary sittings, 153 committee sittings, as well as forty of the committee for petitions, of which there were no less than 1,172 presented. Forty Bills were laid before Parliament by the Bundesrath, twenty-eight of which were passed, and seven treaties with foreign States were ratified by the House. The Bill for the Regulations concerning Civil Procedure met with the general approbation of the members, but this was not the case with the Constitution of the Courts of Law, which evoked much diversity of opinion. The confirmation of the International Postal Treaty he considered as a great boon to all nations, as it would tend to facilitate and increase mutual commercial relations. The Bill for the Organisation of the Landsturm was severely censured by the so-called Centre party, as they pretended to believe it was intended as a mask to prepare Germany for offensive war; nevertheless it was passed by a large majority. The Bill for the Protection of Trade-marks is admirably adapted to silence the many well-founded complaints that resounded in all parts of the Empire. With regard to the Budget the feeling prevailed that it was desirable to limit the matricular contributions from the different States as much as possible, and it was therefore resolved to reduce this item in 1875 by the surplus amount of 1874. The Army Budget which was laid before the House for the first time created some apprehension of a conflict between the Government and Parliament, but fortunately these fears were groundless. A momentary conflict between the House and the Prince Chancellor, caused by the arrest of a Member of Parliament, the Catholic Priest Majunke—during the session, gave rise to a good deal of expression of feeling; but it soon passed over, and the question was settled to the satisfaction of all parties. There is every reason to hope that the new railway law and a uniformity in the tariffs of charges will promptly put an end to the calamitous interruptions of commercial intercourse so loudly complained of everywhere. The Bill for granting exemptions for the payment of Imperial taxes met with much opposition, and was finally withdrawn for the present. The very liberal grant placed on the estimates for the dotation of the Imperial Marine Observatory, with its seat at Hamburg, cannot fail to have a most favourable and practical effect on our foreign trade and navigation as well as our shipping interests. The law for compulsory civil marriages and the appointment of registrars of births, deaths, and marriages, which has been in existence at Hamburg for ten years, though only as a permissive act of legislation, will have but little effect on our local circumstances. During the debate he had energetically endeavoured to insert the clause of having a coroner's inquest on all cases of deaths, as practised at Hamburg, but could not succeed; so that we must now bring our local legislation into harmony with the new laws by supplementary enactments.

With regard to one of the most important measures of the session,—the Bank Law—Herr Moring expatiated very diffusely, and seemed to go into the details of the subject *con amore*. He first explained to the meeting that, according to the laws of the different States, there were no less than thirty-three Banks of Issue in Germany, with many different privileges and concessions for various periods of time, some of them lapsing in 1956, and one—the Anhalt-Dessau Bank—for an indefinite term, so that it may run on to all eternity. These banks may be divided into five classes, as follows:—1. The Bank of Prussia with a concession liable to be withdrawn at any time on notice being given, and this has been done, as it is to be reorganised and become the Bank of Germany; 2, the older Prussian Banks holding concessions that lapse at eight different periods; 3, the Thaler Banks; 4, the Florin Banks; and 5, the Hanseatic Banks (Bremen and Lubeck). The objections made to the lesser banks of issue, generally known as the "Robber's Banks" (*Raubbanken*) were chiefly that they paid a commission to their agents to put their uncovered notes in circulation in the adjoining States to a most enormous extent, and suck out their blood, with but little chance of their ever coming back for presentation. It was shown that in more than one case these banks refused to take their own notes in payment for a bill due, and required payment in coin or Prussian notes. Even the administration of the Bank of Prussia was not entirely free from reproach, as in 1873 they had far too many notes in circulation, and did not raise the rate of discount in time to prevent the financial crisis of that year. The object of the new Bank Law is to counteract all the evils at present existing, and confine the circulation of notes issued by the banks of the duodecimo States to their own limited territory, instead of inundating other States with their paper of doubtful value. For this purpose a special clause is inserted in the Bank Law, rendering it incumbent on the Bank of Prussia to take in payment the notes of the other German Banks, but with the proviso that they shall not be put in circulation again, but sent to the banks that issued them, for redemption and amortisation. In this way the banks must keep a stock of coined money on hand, and be prepared to redeem their own issues, which it is to be hoped will have the effect of killing them off one by one, either by inducing them to renounce their privilege of circulating their worthless paper, or causing them to liquidate, being no longer in a condition to pay their shareholders large dividends as hitherto. On the first introduction of the Bill a general demand was made for the creation of a Reichs Bank. The motion made by Dr. Harnier, that bank notes were not to be considered as a legal tender, that the notes should be exchanged for gold when presented at the Central Office for their full value, that torn or damaged notes should no longer pass from hand to hand by the public, but that the Bank be bound to exchange them for new ones, or gold coin at the option of the holder—these and his other proposals met the full approbation of the House, and are embodied in the Act of Parliament. As notes are not cash, the liability of the German Banks to the Central Government for the right of issuing paper is incontestable. He himself (Herr Möring) would have preferred to see the originally proposed, but struck out in committee, one per cent. duty replaced, and he had done what he could to that effect though without success. The amount now fixed by the law (5 per cent.), might appear to be excessive, but it is fully compensated by the advantage of using notes for discounting purposes, as well as the manner of dividing the clear profits among the shareholders. The Bank of England, with a fixed limit of fifteen millions sterling, pays annually £185,000, which is about 1 1-5th per cent. for duty. With the elastic contingent given to the Reichs Bank—a new experiment for Germany—it is hoped to enable that institution to render prompt assistance at any time when an expansion of the circulating medium is required, as the banks will be in a condition to increase the amount of their uncovered notes on payment of the maximum duty of 5 per cent. A long debate ensued on the sum fixed on as the limit of issue to be allowed for the Reichs Bank, and he was of opinion that the amount (250 million Reichsmarks) was a fair and liberal allowance. With regard to the important paragraph, eighteen of the Bank Law, he had earnestly done his best to support the petition of the Hamburg Chamber of Commerce, and recommended the re-insertion of that first clause making it incumbent on the banks to establish branches or agencies for exchanging bank notes in all cities where the population exceeded 100,000 souls. But he found such opposition from the other members of the committee that he was obliged to give up all hope of succeeding. The motion made by his colleague, Dr. Wolffson—member for the third electoral district of Hamburg—to bind the Central Bank to exchange notes for gold on the day of presentation, met with greater support in committee, but was thrown out in the plenary sitting of the House on the ground that the Bank could not be expected to pay the charge of transporting gold in the interest of gold exporters. He thought this part of the question was of no material importance; as under all circumstances the bank must have a filial establishment at Hamburg, but it was obvious that in ordinary times it would not be much used for the encashing of bank notes. In the interests of the administration of the Imperial Finances it had been deemed advisable to entrust the Reichs Bank with the cash operations of the Government. The placing of the Chancellor at the head of the Bank was absolutely required, as he is the only person directly responsible to the Empire. As Hamburg is a place of such great commercial importance the branch bank here will be assisted and advised by a council composed of Hamburg merchants and bankers. As a guarantee for the stability of the Bank the monthly statements of its finances will be published in the usual manner. Taking into consideration the commercial state of affairs at Bremen, permission has been granted to the Bank there, as an exception to the general rule, to discount bills at six months and make advances for the same period, instead of the usual three months. The compensation of 15,000,000 marks to Prussia for giving up the Bank of Prussia is, without doubt, a high figure, but not too high when one considers that Prussia hitherto gained annually some three million marks of revenue, and that no law could have compelled her to give up what she now voluntarily consents to resign.

The explanations made by Herr Moring were most favourably received by the meeting, and at the instigation of Herr Joh Halben, who occupied the chair, they passed unanimously a vote of thanks and confidence for the efficient services rendered by Herr Moring as one of the representatives of Hamburg in the German Parliament.

Herr Carl Bismark, hitherto Interpreter of the German Legation at Peking, has been appointed by the Emperor to be Consul for Germany at Tientsin.

Herr Albert Barckhausen is appointed Vice-Consul for Sweden and Norway at Bassein under the Consulate of Rangoon, by Royal Patent dated Stockholm, February 1, 1875.

COMMERCIAL.

There has been a brisk demand for teas at firm prices, and the following sales have been made by importers for delivery on arrival: *Per Sylvia* from Foochow, 619/4 chests, 4,842/8 do. Congou; per *Therese* from Canton 460 packages of Imperial: and per *Schwan* from Foochow 683/4 do., and 1,082/16 do. Congou, as well as 843 packages Souchong. Rice is still difficult to obtain at former rates, and some descriptions are higher; market firm and looking up. There is a fair demand for Cassia at previous prices. Pepper is improving, and deliveries satisfactory; Singapore is quoted at 62 to 63 marks, and Penang 59 to 60 do.

Hamburg Banks improving, and shares mostly higher.

SHIPPING.

ARRIVALS.—Olympia (str.), from China and Singapore; Johanne Marie, from Hong Kong.

SAILED.—Kolga to Hong Kong; Peter Godeffroy, to Tahiti.

Contrary to general expectation the frost has returned with great severity, and the Elbe is full of floating ice, which drifts up and down with the tide. It does not, however, prevent steamers from going or coming, but is dangerous for wooden sailing vessels even when in tow of steam tug-boats. The steam ice-breaker has not yet been put in requistion, but is making preparations for another short campaign.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, FEB. 17.

The members of the Second Chamber have resumed their legislative business, but up to this moment nothing has occurred worthy of notice. To-morrow a special credit will be asked for to cover the expenses of the voyage of the new Governor-General, and some other Bills will be brought forward about which I will send you some particulars by next post. The topic of the day is still the letters written by the Count Van Zuylen, ex-Minister for Foreign Affairs, in which he raises the cry of "No Popery." I need not say that this *evénement* is most welcome now that politics have come to a complete standstill, and now that no more political capital is to be made out of the rumours that Prince Bismark is contemplating the annexation of our country. A good deal has been said about this during the last month. In the meanwhile the sections of the Second Chamber are examining the Fortress Bill, which is to provide us with a complete system of defence at a cost of fifty millions. It is very doubtful whether the Chamber will approve this Bill, not because it will involve such an outlay, but because it is by no means quite certain that the proposed system is sound. Although our newspapers are silent with regard to the question whether Holland will follow the example of England, and decline participation in the Conference at St. Petersburg, the question is greatly discussed by the foreign press. Perhaps it is a matter of enormous interest, but I cannot see why. As matters stand now, it seems rather to be a question of *complaisance*, and our Government might have declared that it would send delegates to the Conference simply out of personal respect for the Emperor Alexander, and with the condition that the Government were not to be bound by any decision resulting from the deliberations. The public here care little whether we participate in the Conference or no.

The February number of our leading Liberal periodical, *De Gids*, contains an article by General Booms, criticising the tactics of General Van Swieten during the second Atchin expedition. I will give you the outlines of this essay. The writer begins by demonstrating that General Van Swieten has made a mistake in his appreciation of Atchin and the Atchinese, and that he was consequently careless in his strategy. He was of opinion that the foe was one of little strength, and therefore he was content with a minimum of troops and one-third of those he had he left at Padang, without making any use of them for a long time. After every partial success he halted instead of pushing forward, and when the Kraton was captured he was content without making his victory a decisive one. It seems that Van Swieten was of opinion that the foe, after having lost their principal fortress, would submit; but this hope was vain. When the Atchinese proved that they were not conquered, that they had no idea of submission, any prudent commander would have come to the conviction that an easy victory was impossible. General Van Swieten, however, was of another opinion; he thought that he had done his duty and fulfilled his task. General Knoop—the author says—was quite right when he said that the second expedition was only a half-success. A year has elapsed since the Kraton was conquered. Since that time the enemy have in turn besieged us; and after several bloody engagements, in which thousands of our soldiers have been sacrificed, we are still "waiting for the submission of the Atchinese." These few lines will give you, I hope, an idea of the spirit of this article, which is very hard upon General Van Swieten and his friends.

The last mail brought us more bad news from Atchin. The leading Liberal paper thinks that the Government must be adopting the policy of the ostrich, which hides its head in the sand when danger is approaching. By the steamer *Voorwarts* another detachment of 400 soldiers has started for Atchin. They did not seem to display any enthusiasm towards their mission. Some of them, indeed, committed petty thefts, in the hope that they would be imprisoned, instead of having to embark; but their trick was not allowed to be successful. Some weeks ago I told you that it was impossible to find volunteers for the service, and a new measure, by which a sort of pension is promised to relatives of those who die in the service of the country within a year, is now held out as an inducement to recruits.

Mr. J. W. Van Lansberge has left the Hague, *via* Paris, for Naples, where he will wait for the arrival of the steamer *Voorwaarts*, on her voyage to Batavia. The Minister of the Colonial Department and several authorities accompanied the newly-appointed Governor-General to the railway terminus.

According to a communication from the direction of the Society for the Welfare of the Atchinese, a sum of f.4,553.48½c. has been contributed to the fund to establish a training college for schoolmasters in Java. This is most certainly a very trifling amount, but perhaps the future will give better results.

I am happy to state that in a few days the tragedy, *Vorstenschool*, by "Multatuli," will be placed on the stage at Utrecht. Our eminent author and poet will be present at the first representation.

Within a few weeks a mail service will be opened between Flushing and Harwich.

AMSTERDAM, FEB. 18.

The Bill asking a special credit to cover the cost of the voyage of the new Governor-General to Java was approved of in to-day's sitting.

The news from Atchin, published in last mail's papers, is most distressing. The state of the troops is described as horrible.

The Second Chamber has passed, by 44 against 21 votes, the Bill for the construction of a railway between Sourabaya, Passaroeang, and Malang in Java on Government account.

PRODUCE MARKETS.

The market for Colonial produce has remained unaltered. The transactions have been limited to direct wants, but the stock in second hands being very small, a revival of trade will most probably set in very soon. The Money Market remains well provided.

COFFEE.—The Trading Company will on the 17th inst. offer for sale 84,812 bs. Java, chiefly green and greenish quality.

TEA.—In waiting for the forthcoming auctions the transactions have been very limited, and no first hand parcels have changed hands.

SUGAR.—The market is unaltered and dull. Some small transactions have taken place for export to Belgium and the north. The imported lots are stocked, but nevertheless prices are still declining. Large lots can only be sold at a decline of f.3 to f.4. Refined meets with no demand.

RICE.—At this moment no cargoes are in the market. Cleaned sorts meet with some demand for direct consumption.

SPICES.—No transactions in Nutmegs and Mace, the market being very dull. For Cloves some demand has prevailed at advancing prices. The quotations for Nutmegs are: No. 1, 195c. to 200c.; No. 2, 185c. to 190c.; No. 3, 160c. to 165c. Mace, D, 200c. to 202c.; E, 193c. to 195c. Cloves, No. 1, 114c.; No. 2, 113c.; No. 3, 112c.

JAVA TOBACCO.—There are no transactions of any importance to report. A lot of 742 bs. Java Tanah Wangie Malang has been sold.

COTTON.—The market has improved slightly, and some business has been done.

JAVA INDIGO.—Trifling lots have been sold at fluctuating prices.

BANCA TIN remains very dull. The last quotation was f.55¼ to f.55. Billiton, of which large parcels have been sold, is quoted at f.54 to f.53¼. The markets abroad are all reported very dull.

SHIPPING.

ARRIVALS.—Feb. 10, at Brouwershaven, from Rangoon, Persia; 11, at Brouwershaven, from Batavia, Johanna Maria; at Texel, from Batavia, Conrad (str.), Johanna en Willem; 12, at Flushing, from Batavia, Philips van Marnix.

DEPARTURES.—Feb. 13, from Texel, for Batavia, Voorwaarts (str.); 15, from Texel, for Atchin (via Newcastle), Ernestine.

PASSENGERS INWARD.—From Java, per steamer Tromp: Mr. A. Numans and family, Mrs. J. Numans and family, Miss Meerburg, Mr. Hautman and family, Mr. Millne; per Conrad (str.): Messrs. G. C. Sterk, W. S. van Mensch, C. A. van Randwyck, H. J. Roeland, H. E. Eenhuyzen, J. H. H. d'Arnaud Gerkens, J. G. van Dongen, J. F. R. Pex, J. Vasseur, Pauls, Quien, David Nairn, G. v. Bel, P. J. H. Van den Burgh, S. G. van der Meer, Mr. D. C. H. Voogt died on the passage, Messrs. B. de Groot, H. L. Köning, G. Haye, J. A. Baron van Geen, C. Nortier, A. P. J. Tegelberg, A. P. Tadema, Miss C. M. E. Begeman, Miss M. Waubert de Puisseau.

From Java per steamer Conrad: Messrs. G. C. Sterk, B. de Groot, W. T. Van Mensch, Konig and two children, G. Haye, A. J. Baron Van Geen, Mr. and Mrs. C. Nortier and four children, Mr. and Mrs. Van Randwyck, Mrs. C. M. E. Begemann, Mrs. M. Waubet de Puisseau, Mr. and Mrs. A. P. J. Tegelberg, Mr. and Mrs. H. J. Roeland and four children, Messrs. A. P. Tadama, H. C. Eenhuizen, T. H. H. d'Arnaud Gerkens and two children, T. G. Van Dongen, T. Vasseur, J. F. R. Pex, G. L. Quien, D. Nairn, D. C. H. Voogt, Mr. and Mrs. Pauwees and two children, Messrs. G. Van Bel, T. G. Van den Meer, Van den Burg.

Literature.

The Chinese Mandarin Language, after Ollendorff's New Method of Learning Languages. By CHARLES RUDY. Vol. I. Geneva: H. Georg. London: Trübner and Co. 1874.

The fact that the Ollendorff method for learning English has already been adapted to at least a dozen different languages has been an important consideration with M. Rudy in making it the *substratum* of the work, the first volume of which is now before us. The advantage of this, he says, is considerable, since persons knowing any single one of these languages can learn Chinese, even though they be ignorant of English. This may be true enough in theory, but we are inclined to think that the

Digitized by Google

modus operandi would be somewhat cumbersome. With regard to his statement that "a means is also thus afforded to the Chinese themselves of learning, by way of comparison, all the European languages, to which the Ollendorff method for learning English has been applied," we must candidly own that we are sceptical as to the feasibility of the idea. That the book itself will be found very useful by Europeans, when making their first essay to learn the Chinese language, we do not doubt for a moment, and in fact we should ourselves have been glad of the assistance afforded by it, when some years ago we were placed in a room with a Chinese teacher, who did not know a word of English and had hardly even seen a foreigner, and were told to take our first lesson in Chinese. In those days neither Mr. Edkins' valuable "Progressive Lessons," nor Mr. Wade's more pretentious and elaborate *Yü-yen Tzu-êrh Chi* had been published; with the exception, perhaps, of Dr. Medhurst's *Chinese Dialogues*, beginners were entirely without the numerous aids which now smooth the path of the student in the elementary stage, and the appearance of M. Rudy's volume would have been hailed with joy by many, but still it would have been necessary to use it with caution, for the phrases are not always to be relied on, and occasionally betray their foreign origin. The system of pronunciation, too, which he has adopted, appears to us—and we make the remark with due deference to the authorities quoted by him—to be open to grave objections, for it is needlessly complicated, and in more than one instance absolutely misleading. With reference to the tones, M. Rudy has not thought himself justified in following Dr. Lobscheid's wise example in omitting to note them; but having resolved to mark them, he has acted judiciously in imitating "Mr. Meadows, who, for greater simplicity, replaces by numbers the five diacritical marks," used by Morrison, Medhurst, Prémare, and other sinologues. He had better have left them out altogether, for no learner can hope to acquire a correct intonation of the Chinese language without hearing it spoken by natives, and we certainly do not think that his definitions and rules will enable the unaided student in Europe to reproduce them.

This first instalment of M. Rudy's work is divided into twenty lessons, illustrated by fifty-six exercises; there are also eighty-one "observations" scattered over the lessons, in which much useful information is conveyed; and the rules and notes at the bottom of the pages are not the least valuable feature in the volume, although the author disclaims "any attempt at displaying scholarship" therein. As M. Rudy invites the friendly counsel and suggestions of critics and sinologues, we would strongly advise him in any future volume, or in another edition of this volume, to curtail the number and length of the exercises, as they appear to us to be needlessly copious, and constant repetition and reiteration, though undoubtedly useful to a certain extent, become painfully wearisome to the learner, when carried too far. We would also advise M. Rudy to be more careful in correcting the proof-sheets of future volumes, for *four* pages of acknowledged errata are out of all reason in an educational work like the one before us, and it is disheartening to a beginner to be obliged to set to work, in the first instance, by correcting his teacher's mistakes. It had occurred to us to offer a few hints as to matters of detail in connection with the pronunciation adopted, and some of the Chinese expressions given as examples, but our space will not admit of our doing so, and in conclusion, we will only point out to our readers that the third volume promises to be particularly useful and interesting, for "it will be accompanied by a small treatise on Chinese letter-writing, and the composition of various commercial documents, illustrated by numerous specimens, together with an English and Chinese vocabulary of all the different words contained in the entire work,"—the last being an especially useful, but commonly neglected, feature in elementary books on the Chinese language.

In a recently published memoir Father David, a Roman Catholic missionary, who spent many years in exploring the interior of China, points out as quite erroneous and ridiculously inadequate some recent statistics, according to which the population of the Celestial Empire would barely exceed 100,000,000 of souls. Father David says that population cannot be put down at less than 300,000,000 millions. That figure is arrived at in this way:—In the least populous province of China, viz., Kiang-Si, there is an average of 4,000 inhabitants per district; as Kiang-Si contains no less than 4,345 districts, the total for that province reaches 17,380,000 souls. As there are, in the Chinese Empire, eighteen such provinces, many of which are larger and more densely inhabited than Kiang-Si, the total number for the whole of the country cannot be under 300,000,000. The writers who estimated the population of China at so low a figure as 100,000,000 must have based their calculations on the state of some of those districts where civil war and famine have worked such frightful havoc, and carried off from a half to four-fifths of the population.

The monthly meeting of the Royal Asiatic Society was held on the 15th inst., J. Ferguson, Esq., in the chair. A paper was read by the Rev. J. Long, on "Eastern Travels and their Utilisation for Oriental Research." The paper pointed out the political value at the present time of the Government of India being acquainted with the feelings and opinions of the masses in India as one of the guides to a just administration. It then referred to Eastern proverbs as the key to much of the social life of the people, and especially of the women shut up in zenanas. Proverbs were also the coins of antiquity, opening out a vista into the inner life and guiding us when history failed. The lecturer then pointed out the importance in the present transition state of the Eastern mind of collecting, interpreting, and publishing all relating to the proverbs of the East, in relation especially to ethnological and sociological questions, and the facilities presented in India for carrying out this plan through the agency of the Asiatic Societies, the directors of public instruction, and the editors of native periodicals and newspapers. References were made to the progress in Russia regarding proverbs, and an outline of the heads of proverbial research was given from the Russian work of Snegrief, which was applicable *cæteris paribus* to India. Enquiries on the archaisms of proverbs may throw light on the connection between the Dravidian and Turanian languages, on the origin and affinities of the aborigines of India, on the connection between the Tonkrit and Sanskrit languages. Proverbs fill up a gap where coins and manuscripts are wanting; they are also of great use in giving foreigners a higher opinion of the intelligence and observation of the common people, and in forming a link between the book taught and book ignorant classes. The rising vernacular literature of India is marked by the freer use made of the illustrations by proverbs, and in teaching and preaching to natives proverbs supply a store of most valuable illustrations to make Scripture truth more accessible to the masses. Illustrations were given by quotations from Bengali, Telugu, and Russian proverbs. A paper was also read by Mr. J. F. Dickson, of the Ceylon Civil Service, in illustration of three pictures exhibited by him, portraying Iatakas, or passages in the life of Buddha. There were copies of paintings on the walls of Buddhist temples, and were given to inculcate the practice of charity, and the resistance of worldly desires. Mr. Dickson's explanations were listened to with great attention.

At the next meeting of the Geographical Society, to be held this evening, a paper will be read by Mr. E. L. Oxenham, entitled "The Inundations of the Yangtsze-Kiang."

The *Geographical Magazine* for February contains an account of the voyage of the *Challenger* from the Cape of Good Hope to Melbourne, by Captain J. E. Davis, R.N., a paper on "The Nicobar Islands," and an account of "The Islands of St. Paul and Amsterdam in the Indian Ocean."

The *Oriental Magazine* for February, although dealing chiefly with India, contains some very interesting notes of a visit made by an old China resident (Mr. Edkins) to Japan, and "Notes from the Journal of a Tour in the North of China in 1873," by Dr. James Legge. The February number may be considered an excellent one.

THE TRANSIT OF VENUS.

(FROM A CORRESPONDENT.)

PEKING, DEC. 16, 1874.

The observations of the Transit of Venus at this place, for which such extensive preparations had been made by the French and United States Governments, took place in a very satisfactory manner on the 9th inst. Some anxiety was felt at an early hour in the morning, owing to the appearance of clouds, and at intervals during the forenoon the sun was for some length of time entirely obscured; but by a most fortunate chance, the intervening clouds were dispersed by puffs of wind at precisely the necessary moments for accurate observation. The four "contacts" were all recorded most successfully, the first impingement of the planet on the solar disc taking place about one minute later than the calculated time, as shown by the chronometers used. The chief interest of the occasion was centred in the French Observatory, owing to the extreme perfection of the instruments employed and the scientific qualifications and enthusiasm of the astronomers, MM. Fleuriais, Blarez, and Lapied—though, unhappily, M. Blarez was incapacitated from work by the serious illness with which he has been attacked. Commandant Bellanger, captain of the gun-vessel *Couleuvre*, now at Tientsin, was present as an extra assistant. In addition to visitors from the different Legations, the Minister Chung How, of the Foreign Board (and lately Envoy to France), was present throughout the observations, in which he took great interest. By means of the extraordinarily elaborate machinery for solar photography which forms part of the French apparatus, nearly two hundred photographs of the transit were secured, of which about two-thirds are pronounced perfect.

The American observers, Professors Watson and Young, with some assistants, had established their very fine set of instruments in the enclosure attached to a private residence, where they have been hard at work for some two months past in preliminary observations. They succeeded in obtaining about one hundred photographs of the transit, but of a less perfect nature than the French. Owing to the clouds, the spectroscope experiments failed entirely. A day or two after the transit took place the two parties of astronomers were conducted over the ancient Jesuit Observatory on the Wall of Peking by Chung How.

LONDON: MONDAY, FEB. 22, 1875.

THE LOSS OF THE "MONGOL."

WHILE, as it is needless to say, we are undesirous in any way to increase the pain which must be felt by the relatives and friends of the late captain of the steamer *Mongol*, we feel it a duty to protest against the grounds upon which the Naval Court of Enquiry at Hong Kong have refrained from expressing any opinion as to the loss of the vessel. When, as is set forth very concisely in the finding, a magnificent steamer leaves a port in perfect order and within a couple of hours from her departure is totally sunk through striking upon a well-known rock, with the loss of eighteen lives, we submit that a Naval Court of Enquiry is called upon, however painful the duty, to express an opinion, and a tolerably definite one, too. Their refraining from so doing cannot in any way benefit the captain's memory, but, on the contrary, leaves an opening for the most adverse surmises; while a most appropriate occasion of strongly reprobating the recklessness on the part of ship-masters which has of late been so conspicuous has been allowed to slip. However painful it may be to say so, we do not hesitate to express our opinion that the broad facts of the case are sufficient to condemn the late master. He had no right to be anywhere near where he was when the accident occurred, and if even this error can by any possibility be explained, he cannot in any way be justified in going at full speed when he knew that a dangerous rock was in his immediate neighbourhood. It would obviously have been the part of the Naval Court to express some such view as this of so clear a case. They might have made some reservation in favour of a man who could no longer be heard, and have in justice suggested any explanation that could possibly be conceived, but in refraining from expressing any opinion at all they have simply failed to perform the duty they undertook as members of the Court of Enquiry. This weakness on their part cannot fail to have precisely the opposite effect to that desired, namely, increasing instead of diminishing the severity of the comments which will be made upon this lamentable affair.

SIR WILLIAM FREDERICK DRUMMOND JERVOIS, K.C.M.G., C.B., has been appointed Governor of Singapore, in succession to Sir ANDREW CLARKE, who goes to India as Public Works Member of the Governor-General's Council. The new Governor is a Colonel in the Royal Engineers, and for some years past has held the appointments of Deputy Director of Works for Fortifications and Secretary of the Defence Commission at the War-office. He served at the Cape of Good Hope during the Kaffir War of 1846-47, and made a military sketch of 2,000 miles of Kaffirland, 1,000 of which he surveyed during the war. For this service he received a medal. In the year 1856 he was appointed Assistant-Inspector of Fortifications, and subsequently Deputy Director of Fortifications. Colonel JERVOIS has designed and carried out the fortifications and harbour defences at Portsmouth, Plymouth, Pembroke, Portland, the Thames, the Mersey, Cork, and other places, and was for some years a member of the Commission on the Application of Iron Armour to Ships. He was sent on a special mission to the Government of Canada in 1864; also on missions to Bermuda, Halifax, Malta, and Gibraltar, and was specially employed by the Government of India to report on the defences of the harbours of India, including those of Aden and British Burmah. He was nominated a Companion of the Bath in 1863, promoted colonel April 1, 1867, and appointed Knight Commander of the Order of St. Michael and St. George in 1874.

WE cannot understand on what principle the Government of the Straits Settlements has acted in stopping the private practice of Government servants learned in the law. It appears that the Attorney-General, Mr. BRADDELL, was the first put under that ban, but he was compensated with £500 per annum—a dead loss to the Government; but other servants of the Crown have not in like manner been compensated, and hence the injustice and hardship. As an example, we may mention the case of Mr. GOTTLIEB, who at considerable expense studied in England and passed the Bar; of course, under the impression that not only would he be more eligible to discharge magisterial duties, but that he would be able by private fees to recoup himself the outlay incurred in so qualifying. The whole thing is so unlike the Governor's sense of justice that we trust he will not leave the matter as it now is, but will devise some means of putting it right before he leaves. A more decided case of making "fish of one and flesh of another" cannot well be conceived.

WHATEVER may be the precise merits of the action taken by the shareholders of the Hong Kong and Shanghai Bank in Hong Kong with reference to the appointment of Mr. ROWETT—upon which for the moment we refrain from expressing an opinion—one point is obviously suggested by it, and that is how far such action amounted to an expression of want of confidence in the Directors. It is certainly very unusual to find special action taken by shareholders with reference to a matter which is always left within the discretion of the Directors of any institution; and it is open to question whether it would not have been more in order and more to the interests of the Bank to have reserved comment until the next meeting of the shareholders. Any action taken in advance must tend to weaken the force of what could be done in the ordinary course of business at the next meeting.

WE note with pleasure that the Shanghai General Chamber of Commerce have appointed a Home Committee to watch over the matters which they wish to forward. There is so much difficulty in obtaining men here capable of impressing facts connected with our commercial interests in China upon the Government and upon others interested in them, that a step in that direction now taken cannot fail to be productive of useful results, if proceeded with with discretion and energy.

OUR New York advices report that the directors of the Pacific Mail Steamship Company are holding consultations to devise some means of raising $450,000 wherewith to meet maturity obligations, and that it is proposed to sell the company's real estate in San Francisco. The Committee of the House of Representatives has made no further progress with the investigation which has been going on for some time past with reference to the company's Subsidy.

M. DUCROUX, Councillor-auditor at the Court of Appeal of Saigon, Cochin-China, has been appointed by the French Government Judge at the Tribunal of First Instances of Cayenne, French Guiana, in lieu of M. RAVEL, who goes to the Court of Saigon as Councillor-auditor.

WE are enabled to announce that Sir H. BULWER, who arrived home by last mail, is on leave of absence, and has not resigned the Governorship of Labuan.

THE *Gazette* notifies that Mr. KNOX, now Her MAJESTY'S Consul-General in Siam, is appointed Agent and Consul General there.

SIAMESE POLITICS.

ACCORDING to recent information received from Siam, the SECOND KING was still on the premises of our Consulate at Bangkok, and at a meeting of the Foreign Consuls held inside the MAJOR KING'S palace, the protection afforded to the person of the subordinate Monarch had met with general approval. Prominent among the telegraphic intelligence recently to hand is a statement that Sir ANDREW CLARKE has been requested to intervene with his friendly offices to adjust the dispute; and we have reason to believe that Sir ANDREW has accordingly gone up to Bangkok, but, under instructions from home, not to take any action unless specially called upon by our Representative in Siam to interfere.

One of the duties imposed by Siamese usage on the SECOND KING is that of hurrying to the scene of any conflagration that may chance to break out in the capital. The immediate presence of some such high authority is found to be necessary on such an emergency, because subordinate officials shrink from the responsibility of cutting down contiguous dwellings so as to prevent the spread of the fire. When the arrest of the subordinate Monarch had been resolved on, advantage was taken of the foregoing circumstance, and a messenger was sent to announce to his Majesty that within the walled enclosure of the FIRST KING'S Palace a fire had suddenly broken out. Had the stratagem succeeded there is a long passage between two gateways leading into the Major Monarch's private compound, and in this alley the SECOND KING'S palanquin might readily have been stopped. Such—according to one local report—was the scheme to be followed in securing the Monarch's person. The step was an unfortunate and a reprehensible one. We are very glad that it miscarried. The SECOND KING, it would seem, had his suspicions; at any rate he left his Royal colleague to put out his own fire, and two days after these events shifted his quarters quietly to the British Consular grounds. This must have been rather embarrassing for the FIRST KING'S advisers. They certainly have set their own Palace on fire, there can be little doubt about that; but they should not play with political lucifer-matches, for some among them will not only burn their own fingers badly, but when the conflagration is finally got under they may find the material damage a good deal heavier than they anticipated. At the same time, if we deplore the outbreak of political squabbles in Siam, if we condemn, without shrinking, the imprudence of those who acted with ill-advised precipitation; if, lastly, on account of the multifarious commercial interests at stake, we urge that no time should be lost in settling disputes and restoring tranquillity, we are very far from advocating high-handed interference, either by ourselves or any other foreign nation, in the internal quarrels of the Siamese. We deprecate any attempt to coerce the Cabinet Councils of Bangkok. We have already expressed our view that the SECOND KING is entitled in survivorship to the supreme throne, and we are certain that the devolution of the Siamese Crown is not hereditary, but, within certain limitations, elective. That being so, the subordinate Monarch probably has right on his side when he declines to be a party to any premature and unconstitutional attempt to deprive him of his expectations; yet after all we cannot lose sight of the principle that it is for every independent nation to settle for herself on the form of government which best pleases her, and to choose those rulers whom she may most fancy as the repositories of executive power. Public opinion, popular sentiment, are non-existent in Siam; but there are some well recognised parties among the nobility there, and in the present dead-lock the views most prevalent with the aristocratic order may be relied on to turn the balance in favour of one faction or another. The ex-Regent may be reinstated in power, or the Supreme KING and his courtiers may prevail; whatever be the result, it is our business to assent to it, provided British interests sustain no injury thereby. Riot, bloodshed, or civil war we ought of course to do our utmost to repress, because neither we nor any other foreign nation can trade securely under such a state of things, or be assured that our Treaty concessions will be duly respected and carried out; but when we see that the divisions in the Siamese Council are in a fair way of being adjusted—and there is some ground for supposing that this result will speedily be attained—we need do little more than wait till the tempest abates and the troubled waters return again to their tropical calm. Of course if the good offices of either Great Britain or any other foreign Power are *invited* by the principals in the dispute the case is altogether different. Something in this direction appears already to have been done, otherwise we are at a loss to explain the meeting of Consuls at the FIRST KING'S Palace; but as for the overtures to the Governor of Singapore, these must not be too hastily taken as an appeal to England; they may merely be the one-sided—and well-known—stratagem of a particular faction, who hope by this device to extract an opinion from Sir ANDREW CLARKE in conflict with the policy of the resident British Consul, whatever that may be. The KING'S party of course want to win the trick if they can, and they perhaps think that if they cannot carry the British Consul with them, they may as well nullify his influence, and at least render him powerless to oppose, by planting a division between the Colonial-office agent and the Foreign-office representative.

In our last issue we inserted a letter by a correspondent of the *Straits Times*, giving a version of the Siamese disturbances somewhat different from our own. The letter was evidently one written by a supporter of the Supreme KING'S advisers, and it was very proper to publish it, that both sides may be heard. But every line of it only confirms our own impression of the case; and the endeavour to ignore the coronation of the SECOND KING, which took place in December 1868, does not strengthen the credit due to the other parts of the letter.

SIR D. B. ROBERTSON ON TRADE IN CHINA.

IN the course of his Report on the Trade of Canton for the year 1873, to which we recently alluded, Sir D. B. ROBERTSON makes some remarks upon the condition of trade in China, which appear to us to be worthy of more than a passing consideration. Her MAJESTY'S Consul had the disagreeable duty to perform of reporting a material decrease in the trade of the port, and he takes the opportunity of calling attention to some of the causes which have contributed to this undesirable state of things. "That trade should be free," he observes, "to all who "have the means of entering into it cannot be questioned, "nor can there be any doubt that freedom develops its "resources, and benefits either the seller or the buyer, but "when competition is introduced, the balance is in favour "of the former;" and it is undoubtedly owing to these causes that of late years the Chinese merchants have reaped more benefit from the trade than foreigners have, and to such an extent has this been the case that "there appears to be some truth in the saying that 'the trade of China is not worth following.'" Competition, however, is not the only thing against the foreign trader; probably his greatest enemy is the perfect organisation of the Chinese in all matters that relate to trade. It is well-known that "every trade in China of any importance has "a guild, and its members are bound under heavy "penalties to obey the laws of the society;" and by these powers of combination the Chinese practically command the market, and do as they like. If combination be evidently and notoriously so advantageous to the Chinese, why, it may naturally be asked, cannot foreigners also resort to it? This, however, is a question which it is easier to ask than to answer, though conflicting interests and nationalities go far to explain the reason, as well as the want of that strong clannish feeling which exists among the Chinese, and which often rises superior to mere money considerations. Combination among foreigners has been tried, it is true, at Foochow and Shanghai, but it failed miserably, owing to their being essentially deficient in that power of cohesion which is so notable a *trait* in the Chinese character. One or two weak spirits, thinking, doubtless, to gain an advantage over their fellows, drew back from their engagement, and spoiled the arrangements which had been carefully made, and which, if faithfully carried out, would have taught the Chinese merchants a severe lesson. "There is a weak point," however," says Sir D. B. ROBERTSON, "in "the (Chinese guild) system, which, if taken advantage of, "seriously affects it." The Chinese teamen are not capi-

Digitized by Google

talists, as a rule, and to carry on their operations they are obliged, like foreigners, to resort to their banks for funds, on which they have to pay exorbitant interest, never less than 12 per cent. on the best security. This being the case, it is obvious that if foreigners could only be induced to refrain from buying for a sufficient length of time, prices must go down, for the interest of the teamen's loans would be rapidly mounting up, and if they did not sell, their anticipated profits would soon be turned into losses.

Another evil consequent on competition and high prices is deterioration in qualities. Teas are hastily and imperfectly prepared to meet sudden demands; "they are loaded "with iron filings and refuse-matter to give them weight, "and mixed with cactus and other leaves, and in some ". . . there is scarcely a tea-leaf in the whole com- "position." Again, it is doubtful whether "tea-tasting" is carried out on judicious principles; it is hard to say, remarks H.M.'s Consul, whether sufficient care is taken by merely picking out a few chests from the bulk and examining them, for there can be no question that a great deal of spurious tea finds its way home. "It is hopeless, however, "to expect that a remedy for the evil will be found in "China, and to lay the blame upon the Chinese producers "and teamen; . . . perhaps the most reasonable view "to take of the deterioration is that it is a fault of system "rather than individuals, and the correction must be found, "in the first instance, at home." In connection with it there is one argument "which admits of no doubt of fact, "that is *conviction by a magistrate*, the effect of which has "already made itself apparent, . . . and would, if "frequently repeated, seriously damage the interests of "spurious tea, and give the home consumer something "like a pure article for his money."

In the matter of silk there has also been a great deal of underhand dealing in China, and though in this respect detection is easier than in the case of tea, "the addition of "water to give weight is of constant occurrence, and old "rags, matting, and such like, are often substituted in the "bales in place of hanks of silk which have been ab- "stracted." Sir D. B. ROBERTSON, however, is of opinion that in both these matters to which we have referred, "the anti-spurious movement at home will have the most "beneficial effects, and cause an improvement in the quali- "ties of both tea and silk," and in the interest of all concerned, we sincerely hope that such may prove to be the case, for the present condition of affairs is, on all grounds, open to the gravest objections. A word in conclusion with regard to the trade in English piece goods. This, as is well known, is a large one, and, as H.M.'s Consul observes, "would perhaps be larger but for the practice which pre- "vails of heavy loading and sizing for the purpose of "adding weight to and putting a face on the goods; why "such a practice is followed appears to be inexplicable, "for the Chinese are perfectly aware of it, . . . and "not only does this sizing affect the market value, but "it also tells against the importer, for large quantities become mildewed *in transitu*, and are sold at auction "for what they will fetch. It seems, however, to have "become a speciality of the Manchester market, adopted "during the American war, when cotton was scarce and "dear, and is now continued as a part of the manufacture." Unless the practice here alluded to be speedily discontinued, the trade in English piece goods will be most seriously damaged, for the Chinaman, much as he likes a cheap article, will not unnaturally prefer his own faulty but durable cotton fabrics to worthless rubbish imported from abroad.

Correspondence.

THE DISPUTE IN THE TEA TRADE.

(To the Editor of the *London and China Telegraph.*)

SIR,—A dispute having arisen between the importers and dealers in tea, with reference to the time taken for delivery of teas bought, and some correspondence having taken place in the columns of a leading journal with regard to the question, I shall be glad to be allowed to inform the trade through your columns that, in the opinion of many of our leading merchants and brokers, the whole matter rests with the wholesale dealers themselves. On the arrival of a vessel the dealers are all anxious to get the *first* sight of the samples, the competition now existing in the country being such that it is of great importance to each wholesale dealer in London to have samples to offer to his country customers out of the *last* arrival, and this before his neighbours are in the field. Such being the state of the trade, when samples are offered on the market out of vessels only just in the docks, the dealers bid for the goods, knowing at the time they do so that it is utterly impossible that the bulk can be out of ship; it therefore follows that in so acting they have only themselves to blame for any delay in obtaining delivery. Let the dealers as a whole decline to bid for tea until they see there is a reasonable chance of getting a fair delivery, and we shall hear no more of this unfortunate dispute. As the dealers always sample the teas they are buying, and thus see for themselves that in the majority of cases only two or three packages are warehoused, they cannot plead ignorance of the facts above referred to.—I am, &c.,

A MERCHANT.

"DE MORTUIS NIL NISI BONUM."

(To the Editor of the *London and China Telegraph.*)

SIR,—I observe with much pain a paragraph in your impression of the 13th ultimo having reference to the life and death of a gentleman belonging to H.M.'s Consular Service. In justice to the memory of the deceased I trust you will find space for what follows. I knew the gentleman named from boyhood, and I was his medical attendant in China for several years. When I tell you there is reason to believe that the deceased suffered from an obscure disease of the brain, which for years stultified his wonderful acquirements and capabilities, and that what you term "the extraordinary life he has led for the last five years," and to which "he has at last succumbed," was probably the evolution of this disease, I think you will regret as much as we all here do the insertion of the paragraph in question. I am willing to give you all credit for sincerity in the course you have been pleased to take in this matter, but you must pardon me for remarking that I question its propriety, on the grounds alike of expediency and of good taste.—I am, &c.,

China, Dec. 31, 1874. J. R. S.

CHINA CONSULAR REPORTS.—SHANGHAI AND CHINKIANG.

The Consular Reports upon the trade of Shanghai and Chinkiang for the year 1873 have been issued this week from the Foreign-office, and we subjoin our usual summary of the statements set forth.

Mr. Medhurst reports that the value of the import trade of Shanghai for the year was Tls. 52,283,955, against Tls. 57,062,288 in 1872, Tls. 57,469,457 in 1871, Tls. 52,453,448 in 1870, and Tls. 55,197,642 in 1869. With reference to these figures Mr. Medhurst writes:—

The past year has proved disastrous in an unusual degree to the foreign trade of this port. In no single instance can a comparison with the results of previous years afford occasion for congratulation, unless, perhaps, as regards a salutary abatement in overtrading which has distinguished 1873, and which may be pointed to as an evidence of growing prudence on the part of manufacturers and importers, promising, it may be hoped, a better state of things to come. It is encouraging, at any rate, to note a marked diminution of the heavy stocks on hand which have hitherto so much encumbered a free and normal flow of business. And although a material, though temporary, check may thereby be opposed to the progressive expansion of British trade with China, which, as a general advantage, is too often advocated in the face of local stagnation and loss abroad, this diminution of imports must be regarded with satisfaction as a remedy for the excessive supply which was choking trade, lowering prices, ruining importers, and favouring pernicious practices calculated to throw a lasting discredit on British goods with a people noted for rooted prejudices like the Chinese. The mildew evil which increased during the year, and made its appearance in other fabrics besides grey shirtings, has seriously affected the trade, and other adverse causes have newly arisen, over which foreigners had no control, to add their paralysing effect to the existing depression.

The total value of imports from all countries in 1873 shows a decrease of 4,778,333 taels, as compared with that of the previous year. A greater fall has, perhaps, never yet been recorded, and the aggregate of imports for this year is thereby thrown back even below the ruinous year of 1870. Of the decrease Great Britain bears nearly the whole burden, while India, Australia, and the Continent of Europe are the only countries which can boast of an increase. It is worthy of remark that the imports from Australia more than doubled those of the United States.

The year opened with reasonably moderate stocks, and a fair prospect of increasing activity in trade. A brisk demand continued until the Chinese new year, and large shipments were made to the northern ports by the first steamers able to get up. But from this period a fatal inaction began to set in and stagnation ruled for months; week after week the same dreary tale of flat, dull, dragging markets, low rates, and diminishing consumption filled the trade circulars, and loss and disaster became everywhere the prevailing topic. Not that this can be set down as an altogether new feature in the trade. It has been the invariable result more or less of ventures in piece goods, and year after year some special reason has been assigned which, in its turn, has given way to another. In the meantime the importing merchant has exemplified a truly marvellous capacity for living upon losses, while the manufacturers and native consumer have benefited by his helpless position. Three local causes have been adduced as having, during the past year, operated fatally

Digitized by Google

against an expansion in trade; floods in the north, drought in the central provinces, and an unusually abundant cotton crop in the neighbouring districts of this port. Add to these the failure of several large native hongs, and we have enough disturbing influences to account for the great falling off in the trade under its present narrow limits. Interest rose as high as 20 per cent., inland markets became overstocked, and the purchasing power of dealers was reduced to a very low ebb.

But it would be absurd to suppose that these influences could alone suffice to check the consumption of 57,000,000 taels' worth of goods among the flourishing and thickly populated regions which are fed by Shanghai as a depôt—for all the surplus stock which now lies choking the few accessible marts inland, for want of purchasers, ought naturally to flow off to other districts and become absorbed. The real obstruction to a free indraught of goods has been pointed out by the Shanghai Chamber of Commerce, and consists in an irregular and excessive taxation imposed on the movements of commerce, and the want of speedy and cheap means of internal transit. The Transit Pass system was arranged with the Central Government at Peking, whither the bulk of the duties on foreign goods finds its way, much to the detriment of the Provincial Governments, which have to collect their revenues within the limits of their own several provinces. It cannot therefore be a matter of surprise that the Provincial Mandarins should oppose a system of trade which withdraws from them a large portion of their supplies. While foreign steamers and Manchester goods reduced the local revenue by displacing junks and native fabrics, the local Governors gained no benefit by the change. They saw the rich receipts which immediately followed upon the opening of the foreign trade drawn off to Peking, and their own resources crippled by its existence. In self defence they raised barriers, and imposed duties on foreign goods moving inland, and now they have multiplied these obstructions to such an extent that the very natives themselves are joining foreigners in vigorous protests against the system. The Peking Government, on the other hand, had benefited very greatly by foreign commerce ; it had been able to dispose of a large revenue arising out of a trade which it had been its policy to oppose from the first, and has profited by its existence to strengthen its own resources by building arsenals and increasing its military efficiency. The result, then, of the Transit Pass system has been to check the advance of foreign goods into the interior to deprive the Provincial Governments of a part of their proper revenue, and to strengthen the hands of the Imperial Government for hostile purposes.

I am convinced that if the provinces were allowed their fair share of advantage from the foreign trade our goods would more readily penetrate to the farthest limits compatible with cheapened means of transit. An important element is herein suggested in any measures that may be taken to throw open the country. Let but the trade be freed from its tributary bondage to Peking, and let the local Governments be permitted to draw their fair share of benefit therefrom, and there can be little or no doubt that foreign goods will find many new outlets.

As regards the export trade the figures are also unsatisfactory. The total value for the year 1873 is estimated by Mr. Medhurst at Tls. 64,814,710, against Tls. 66,934,353 for the preceding year, thus showing a decrease of Tls. 2,119,643. The export of tea is set down at Tls. 19,375,356, against Tls. 23,936,291, a decrease of Tls. 4,560,953 ; and of silk at Tls. 26,241,405, against Tls. 23,290,370, an increase of Tls. 2,951,035. The Report offers the following remarks on this head :—

The falling off is attributable mainly to the decrease in tea export of 4,560,935 taels, and in rice export of 3,931,948 taels, making a total decrease as regards these two staples alone of 8,492,883 taels. A further diminution is also observable in the export of cotton, nankeens, and wax, to the extent of about 260,000 taels. The export of silk, on the other hand, exhibits an increase in value of 2,951,035 taels, and this, aided by a similar advance in the export for the year of cuttle fish, ginseng, hemp, medicine, sugar, copper cash, and sundry merchandise, so counteracts the large decrease above-mentioned as to reduce it to much smaller proportions. If a comparison be instituted between the exports and re-exports of native goods for the year 1872 and 1873, distinguishing foreign ports from Chinese, it will be seen that in 1873 an increased value of goods was exported to foreign countries, and a decreased value to native ports ; whilst as regards re-exports, a largely diminished quantity went to foreign countries, and an increased amount was sent coastwise.

The principal part of the increase in export to foreign countries will be found to fall to the lot of the Continent of Europe and the United States, their exports for 1873 being valued at 7,582,694 taels, against 5,815,548 taels, recorded in their favour for 1872. The decrease in re-exports to foreign countries seems to be about equally divided between Great Britain and the United States, the falling off in the former case being estimated at 2,284,716 taels, and in the latter instance at 2,773,762 taels. The declension in the quantity of tea sent through Shanghai will, of course, account to a great extent for this difference. As regards exports to Chinese ports, the decrease appears to be divided amongst Newchwang, Chefoo, Hankow, Kewkiang, Takow, Amoy, Swatow, and Canton, the share of the two last alone amounting to 2,449,518 taels, or about half a million in excess of the entire decrease for the year. The increase in the re-exports coastwise is divided amongst the following ten ports out of fourteen, namely, Hong Kong (for ports), Tientsin, Chefoo, Hankow, Kewkiang, Ningpo, Foochow, Tamsuy, Amoy, and Swatow ; of these Tientsin and Hankow absorb nearly two millions of the increase. Hong Kong (for the ports) and Swatow another half-a-million each, and the remainder divide the difference. The exports and re-exports of native goods hence coastwise will be found to have fed the Chinese ports during the past year in somewhat of the following proportions :—

In exports Hankow takes the lead with a good third out of the aggregate value of nine-and-a-half millions of taels, Canton and Tientsin take three millions between them. Another million falls to the share of Swatow, and about 800,000 to that of Hong Kong (for Chinese ports). Amoy, Foochow, Chefoo, and Newchwang follow next with about a quarter of a million each, and the remainder is divided between the rest of the ports. In re-exports Tientsin occupies the foreground, receiving over nine-tenths out of the whole quantity sent away ; Hankow follows next with nearly another fourth ; Canton and Hong Kong are the next largest consumers, taking together two millions and three-quarters ; Ningpo and Chinkiang receive between them about one million and three-quarters ; Kewkiang, Swatow, and Foochow over a million and a-half ; Newchwang and Chefoo a quarter of a million each, leaving the rest to the ports of Amoy, Taku, and Tamsuy.

The export of tea for the year 1873 compares unfavourably, as I have remarked, with that of the previous year, the total decrease being estimated at a value of 4,560,935 taels ; nearly the whole of which is to be accounted for by the diminished re-export of green tea brought hither from Ningpo. As regards the returns they show that the aggregate quantity exported hence during 1873 amounted 55,957 bales, against 54,865 bales sent away during the previous year. But a sensible decrease appears in the exports to Great Britain, and, as will be seen by the following figures, the proportion received by the Continental ports relatively to that taken to England goes to prove that direct exports to France and Italy is gaining the ascendency over shipments as heretofore through London :—

	1872. Bales.	1873. Bales.
Great Britain	37,293 ...	33,987
Continent	11,420 ...	16,411

The only other material decrease perceptible falls to the share of the United States, which only took 2,922 bales in 1873, against 3,909 bales in 1872. The dealers in the staple, both foreign and Chinese, complain itterly of the disasters which have marked their business during the twelvemonth.

A slight increase is exhibited in the gross import of opium during 1873, as compared with that of the previous year. The totals may be set down as follows :—1872, piculs 41,008 ; 1873, piculs 42,601. This difference may be accounted for, in some measure, by the fact that the Port of Hong Kong has been practically blockaded by the Customs' revenue cruisers, and consequently a large portion of the drug, which was formerly introduced surreptitiously into China from that colony, had to be carried into consumption during the year through more legitimate channels. The gross increase seems to have had the effect of likewise raising the net import into Shanghai, which has been 12,560 piculs in 1873, against 12,067 piculs in 1872. An increased distribution likewise appears in favour of some of the coast ports as distinguished from others.

The amount of native-grown opium is now so considerable, and it competes so seriously with the imported article, that any report on the subject would be manifestly defective that did not take this competition into consideration. Yet the difficulty of procuring any definite or reliable statistics, as regards the native industry and its results, render it impossible to do more than draw general inferences fromsuch information as may be derivable either from partial observation or common report. These inferences would lead to the conclusion that the native cultivation of the drug is being developed at a rapid rate, and this is confirmed by the fact that the consumption has of late largely increased, whereas it is well known that the import of the Indian drug has been stationary, or nearly so, for several past. The usual edicts deprecating the cultivation of such a pernicious drug at the expense of cereals and other crops, and prohibiting its culture under heavy penalties, has continued to appear from time to time, and influential Chinese functionaries have not failed, as heretofore, to urge the Crown to take steps towards rescuing the country from the too certain ruin which must be the consequence. But all to no purpose ; the drug is so highly prized as an alterative, and the desire for it as a sedative is so general amongst all classes, whilst the local Executive are everywhere so easily bribed into connivance, that the cultivation is persisted in, and it will, no doubt, continue to extend until effects are produced which must eventually exercise a vital influence upon the interests of the country at large. The result as regards the rival import from India cannot be doubted. The supply, as I have remarked, has for some time past been limited to about an equal rate year by year ; and, as it is a maxim in commercial economy that a trade which does not increase must, of necessity, tend towards the opposite direction, it follows that the only too probable event we have to look forward to is a gradual decline and extinction of our share in the trade, wherever the Chinese shall have learnt how to grow and prepare their produce so as to bring it on a par with the Indian staple.

This is a question which merits serious consideration in connection with Indian finance. The subject has, I believe, and very properly, attracted more than usual attention of late on the part of the Indian Government, and, as you are aware, I have recently ventured to suggest the expediency of at once appointing a Commission of Inquiry, composed partly of officers conversant with the cultivation in India, and partly of gentlemen in the Consular service familiar with the people and language of China, and who might be delegated to make researches throughout the Chinese provinces with a view to establishing the actual truth as regards the extent of cultivation and its probable effects ralatively to the Indian product. I still hope that such a commission may eventually be instituted, and I believe it might further be useful not only in eliciting valuable information as to the extent to which the drug is consumed in various parts of the country, and its influences upon the people at large, but in establishing a mass of facts with regard to the inland fiscal system, as to the working of which we at present possess but a very vague idea.

As might be expected, the general depression of trade has affected the tonnage of the port very seriously. Of British vessels entered and cleared in 1873 there was a total of 1,511, with a tonnage of 934,900, against 1,961, of 1,076,639 tons, in 1872. The steamers entered in 1873 were less by 52, and those cleared by 56, with a difference in tonnage respectively of 18,200 tons and 22,500 tons. Of sailing vessels there were 179 less entered, and 160 less cleared, amounting in tonnage to 54,300 in the former, and 46,700 in the latter. The

Digitized by Google

same general decrease is noticeable among other nationalities, and more particularly the German, which has fallen off to the extent of thirty per cent.

As has been remarked in a former Trade Report, the apparent superiority of the American trade is mainly due to the number of coasting and river steamers of large capacity which are entered and cleared over and over again during the year. But in the number of sailing-vessels the American flag finds employment only to the amount of one-third of the tonnage under the British flag, while the Germans scarcely secure one-seventh of the latter amount.

Under the head "General Remarks" Mr. Medhurst gives some valuable information and suggestions. The substance of his remarks is as follows :—

The Returns, as now compiled by the Customs, afford ample means of estimating the shares taken in the import and export trade of Shanghai by foreign countries; and it is interesting to note therefrom the commercial position taken up by Great Britain and her dependencies relatively to other nationalities, as well as the progress made by each during the year, as compared with the previous twelvemonth. In illustration of these features I append a few comparative statements, from which the following deductions may be drawn :—1. Of the 52,000,000 of taels' value of foreign imports which Shanghai receives, Great Britain and her dependencies contribute over 47,000,000, and of the exports and re-exports of native produce, estimated at an aggregate value of nearly 65,000,000 of taels, one-half goes to England and her colonies. Her share, however, in supplying Shanghai with foreign imports during 1873 appears notably smaller than that taken in the previous year, whilst other countries have advanced their contributions by nearly one-third. 2. In re-exports of foreign goods England holds but a subordinate position, Japan being the country which mainly helps to swell the amount put down as the proportion appertaining to other countries. The Chinese ports take, of course, the most important place under this heading, although it will be observed that their proportion has considerably decreased during 1873 as compared to the previous year. 3. In exports and re-exports of native produce the Chinese ports likewise rank high, fully a third of the aggregate value of 64,000,000 of taels falling to their share. 4 and 5. In exports of tea and silk Great Britain and her colonies must, as always, hold a high place; but, as has already been noticed under the head of "Silk," the continental proportion for 1872 has taken a notable start, which it appears likely to maintain.

The overtrading in 1872, commented on in last Report, has been to a large extent corrected in 1873, but its injurious effects appear to be still deeply felt in almost all branches of foreign trade. The general result of mercantile operations has been loss, and not profit, to the merchant, and the aggregate of these losses has been again very large. It is satisfactory, however, to observe that this adverse result is not, as it clearly was in 1872, mainly chargeable to the imprudence of those who carried on the trade, but may rather be traced to the changing conditions which must from time to time affect commercial calculations It soon appeared, however, that the consumers of China silk in Europe required a more important concession in price, and the London market has throughout the year been drooping, until values have been reduced to a lower point than has been known for fifteen years past.

Imports of manufactured goods from England have been moderate, but the consumption in China has been disappointing. It has not only ceased to augment, but in one of the great staples, T-cloths, it has diminished to an almost alarming extent. Mildew as has been suggested, bears the whole blame for this untoward result, and the warning of the Shanghai Chamber of Commerce to Manchester in December, 1872, that loss of trade would be a certain consequence of the shameful adulteration of cotton goods, is called to mind. But the class of goods affected is not the class in which the greatest adulteration takes place. It is, however, the class which directly competes with Chinese fabrics, and China cotton has been cheaper in 1873 than since the American war broke out in 1861. The wholesale impoverishment, by a series of destructive floods in the north, of the populations of vast territory, has also had its effect. This trade, like the English silk trade, is suffering from the reaction from speculative inflation. Intelligent Chinese ascribe the stagnation of foreign trade to the alarming progress which opium cultivation is making throughout the country; the easy production of the drug, and the remunerative returns it gives, they declare tends to engross the attention of agriculturists, and to sap nearly every other industry. I look upon this suggestion as important, and I cannot but think that it indicates, at any rate, one source of the blight which seems to be affecting branches of the trade with China. A general conclusion from the above premises may be arrived at, that foreign trade in China is not expansive. The English people are too apt to take it for granted that the trade with China is capable of indefinite expansion if only prices can be kept low; but the experience of every day more and more proves that this is not and cannot be the case. The resources for the conduct of a vast trade undoubtedly exist, but development is choked by irregular and excessive taxation, and the want of cheap and speedy means of internal transit, and until these counteracting influences are modified or removed it is hopeless to expect anything but a partial and sickly growth at best.

In this connection it has been observed with truth that there is a remarkable lack of variety in exports for such a vast producing country as China, and of a total of exports to foreign countries amounting to 77,500,000 taels, no less than 70,000,000 taels have to be put down to the two articles of tea and silk; of the other 7,000,000 taels the only items of importance are cassia, about 700,000 taels, and sugar, about 1,800,000 taels. No trade of China is probably saddled with greater obstructions than that in sugar; no country is better adapted for its growth than South China and Formosa, and, in addition, there is practically unlimited command of supplies of labour. So vexatious are the restrictions imposed, that the trade is kept within the narrowest limits. What is true of one article is true of many. There are numerous productions of China which would meet a ready sale abroad, but fiscal exactions prevent their being purchased at the ports at rates which would pay to export them, and in consequence neither China nor the world gets the benefit of them. Without exports a country can scarcely continue to import, and hence arises a general stagnation.

In distinguishing the amount of duties paid by each flag, it will be seen that Great Britain maintains her usual position in the trade by contributing more than two-thirds of the entire revenue for the year, but the payments for 1873 show a decrease, as compared with those of the previous twelve months, of 200,000 taels. The declension is noticeable under each head save that of coast trade, and in transit duties the reduction amounts to nearly one-half of what it was previously. America follows next in importance, but with a slight increase in her total share for the year, being the difference between a falling off under the head of exports, and an augmentation under all the other heads, more notably that of coast trade. France is the next largest contributor, and she too boasts of an advance, which in her case amounts to fully one-third of her previous year's share. The remaining 200,000 taels, out of three and a quarter millions, is divided between Germany and sundry other flags, the noticeable features being that Germany's share has declined by fully a fourth, and that the China-owned steamers have commenced to occupy a respectable place in the list of contributors for the year of nearly 30,000 taels.

The question of the Woosung Bar, notwithstanding the important bearing which it has upon the commercial success of this port, still remains, I regret to say, *in statu quo*. The obstruction is slowly acquiring increasing capacity for mischief, and the detention of vessels at the mouth of the river and their partial discharge is now becoming a matter of such daily occurrence that it ceases to attract attention, save to occasion more and more regret that the Chinese Government should continue to be blind to the claims of a question of such vital importance to their own and to foreign interests alike.

My relations with the Chinese authorities continue to be of the most friendly character. I find much difficulty, nevertheless, in inducing them, in civil cases between British subjects and Chinese where considerable amounts are involved, to free themselves from the natural bias which they have towards their own people, and to adjudicate on the broad basis of equity and common sense. The failure to secure a decision in an appeal case which was submitted to Her Majesty's Minister at Peking and the Tsung-li Yamen, about sixteen months ago, has suggested to me the possibility of having such disputes determined by arbitration of British and Chinese merchants sitting conjointly, rather than by a formal hearing, and the Taoutai has expressed his approval of the proposition. It remains to be seen how far this alteration will work.

The Report concludes with a collection of tabular statistics, occupying no less than twenty-eight pages of the Blue-book—giving comparative details of the trade and shipping of the port.

Mr. Allen's Report upon the trade of Chinkiang states that the imports for the year 1873 were to the value of £3,566,764 (the imports of British and British-Indian produce amounting in value to £2,783,540), against £3,937,982 in 1872, showing a decrease of £371,218, about nine per cent. The value of the export trade is estimated at £257,532, against £1,083,480, being a decrease of £825,948. We extract the following observations from the Report :—

The whole prosperity of this port depends on the facilities it possesses for forwarding goods into the interior for consumption. Chinkiang itself is by no means a rich or populous city at present, though there is but little doubt that it will become so in the course of time. The town and suburbs contain about 70,000 or 80,000 inhabitants, of whom an unusually large proportion consists of coolies, very small shopkeepers, and the like. The native hongs and stores are neither numerous nor extensive; the official establishments, civil and military, do not support a large number of writers and hangers on of all grades, and Chinkiang does not contain many houses belonging to rich gentry or to retired mandarins. We do not find here the handsome streets of large shops, which are seen in cities like Canton or Ningpo, nor is there by the river banks a forest of masts, such as exists at Shanghai, and at the mouth of the Han. The great bulk of the trade between foreigners and Chinese is in the hands of natives, who come down to this port from towns up the country, principally north of the Yangtze, to buy their merchandise, and take it away with them, paying for it partly in sycee at the time, and the balance when they have sold their goods. The great falling off in the amount of piece goods imported in 1873, as compared with the imports of 1872, has had two causes assigned to it. The first cause given is the good rice harvest of 1872, and the demand for this grain in the south of China, which state of affairs did not exist the following year. The other reason given is the withdrawal of the permission to foreigners to bring native goods to Chinkiang under transit pass, without their undertaking to export them to other ports or to foreign countries.

An account of the trade in native produce brought down to this port under transit pass, and of the underhand practices connected therewith, has already been given by Mr. Brenan. I need only mention again that, in 1872, it was the custom of nearly all the merchants at this place to sell to Chinese traders transit passes on native goods to be brought from the interior as the property of these merchants. The goods on their arrival were sold to Chinese in Chinkiang, and were either consumed here, or sent to other places in the neighbourhood by junk, the foreign merchant having no concern with them from the moment he had handed over his transit pass. This very easy way of making money, and the commissions to be made on the shipments of rice in 1872, induced various persons who had not much chance of a livelihood elsewhere to start in business here. Several persons left the out-door staff of the Imperial Maritime Customs to become, so-called, merchants and commission agents; and an American, who was anxious to save himself the fees charged by the United States' Consul for stamping applications for transit passes, took an Italian into partnership, so that the transit passes which this firm sold to the Chinese might be taken out free of charge. During the past year, since the Chinese authorities have

Digitized by Google

ceased to issue transit passes on native produce, unless the foreign merchant who takes them out satisfies his Consular authority that the goods are *bonâ fide* his own property and intended for export, trade has been on a much securer basis, the worse class of foreign trader has become smaller here, and I think that we may say that there are good prospects for Chinkiang in 1874, and ensuing years. 1,004 outward transit passes were issued in 1872, and 969 in 1873; of these there are still over 700 which have not yet been returned, much to the annoyance of the Intendant of this circuit, who has twice written to ask that foreign merchants be notified that all outward transit passes are to become void if not used before the end of the current Chinese year.

But, although any frauds on the Chinese revenue cannot be too strongly condemned, it is impossible to avoid noticing the utterly rotten system of taxation which prevails in this province. The Chinese have not yet discovered, apparently, the enormous waste occasioned by keeping up the innumerable barrier stations in every direction. Merchants here justify themselves in selling transit passes to natives on the ground that the Chinese Central Government profits by the transit dues paid at the Foreign Customs, to say nothing of the fact that the trade in piece goods and other European productions is increased. Writers in the Shanghai newspapers abuse the barrier officials, as if they were the persons to blame for this unsatisfactory state of things; but all seem to forget that any permanent good can only be secured by pressure at headquarters. It must be remembered that Intendants of Circuit, and all other local officials, combine the duties of revenue officers and administrators of justice, and that the same abuses as exist in the collection of Chinese revenue are to be found in their administration of justice, in European ideas the more important matter of the two. To reform those two sets of evils would require a revolution, not only upsetting the existing Government, but changing Chinese ideas. Such a revolution may be sudden, or its course may gradually become stronger and stronger year by year, until the desired changes are effected; but in either case it is not a prospective advantage to be hopefully anticipated. All we can hope for is that the Central Authorities at Peking may deem it profitable for the Imperial revenue that in certain districts goods may be forwarded to Treaty ports at a lower rate of transit duty than has hitherto obtained. Were this done in Kiangsu the trade of Chinkiang would soon be doubled, and the Imperial revenue proportionately increased. Before leaving this subject, I may mention that over and above the import duty of 30 taels per chest of opium, a Lekin tax of 38 taels is levied on each chest, and at Huai-Kuan a further tax of 128 taels, making nearly 300 dollars in all. I need scarcely say that under these circumstances smuggling is very rife here.

Politically, Chinkiang has been perfectly quiet during the past year and there has been no trouble with the local officials. The number of the foreign community has slightly decreased during the past year. There are rather more than fifty foreigners in Chinkiang, all told. The foreign concession now presents a much better appearance than it did a few years back, and about half the lots are built on. The native town and suburbs are busy and flourishing, although I do not notice much building going on. The salt junks, which hitherto lay just opposite to Chinkiang, have lately moved to Icheng, about twelve miles higher up the river, which will, no doubt, cause the town, or large village which had sprung up on the north bank, to be deserted. No steps have as yet been taken to develop the mineral wealth in this neighbourhood, but it is stated that the Chinese are making arrangements to reopen the coal mines near Nanking under entirely native supervision, though nothing definite has been settled.

In conclusion, to sum up the substance of this Report briefly, I may lay down two propositions: 1st, that trade in Chinkiang in 1872 was abnormally prosperous for two reasons, one, the grain export, and the other, the facilities for bringing down native produce under transit pass, and that, when these two causes ceased simultaneously, the natural result was a sudden decrease in the trade; and 2nd, that this decrease is only temporary, doing no real harm to legitimate trade, which will steadily increase, subject at the same time to such fluctuations as may be occasioned by good or bad harvests, the opening of coal mines, and the like.

Monetary and Commercial.

The directors of the Indo-European Telegraph Company have issued their report for the past year. The receipts amounted to £79,466 2s. 8d.—an increase over the corresponding period in 1873 of £24,568 18s. 6d. The Government have agreed to reduce the minimum rent payable by the company from £12,000 to £6,700 per annum, and to give permission to carry South Russia messages over the wire. The directors add that they have succeeded in their negotiations with the India Office upon the question of the Persian Debt. The net profit available for the year amounts to £24,413 1s. 8d., and a dividend at the rate of 5 per cent. is recommended for the past six months, in addition to the interim distribution last June.

The directors of the Merchant Banking Company of London (Limited) have resolved to declare a dividend at the rate of 12 per cent. per annum for the half-year ended the 31st December last, to transfer £25,000 to reserve fund, thereby raised to £100,000, and to carry forward £3,979 16s. 2d. to next account.

An interim dividend of 8s. per share for the half-year ending December 31, 1874, being at the rate of 8 per cent. per annum, has been declared by the directors of the Anglo-Californian Bank (Limited).

We understand that the action which Mr. Edward Norton, of Norton, Lyall, and Co., Hong Kong, came home seventeen months since to institute against the owner of the s.s. *Parana* for breaches of charter-party on a voyage from China to Australia and back has, after a trial before Mr. Arthur Wilson, the arbitrator, appointed by the Court of Exchequer lasting twenty-one days, resulted in an award in the plaintiff's favour. The damages are referred to the arbitrator for assessment. It will be remembered that, in June, 1873, the captain and agents of the *Parana* sued Messrs. Norton, Lyall, and Co. for seven months' charter money, and obtained a verdict, it being the last cause tried before the late Mr. Justice Ball, and immediately preceded the memorial resulting in that gentleman's resignation. The owner (Mr. Malcomson) being resident in Ireland, refused to appear to Messrs. Norton, Lyall, and Co.'s cross action, taking advantage of a certain clause of the Common Law Procedure Act regarding Irish and Scotch defendants, which had been inadvertently imported bodily into the Hong Kong Ordinance. This question of absent defendants was raised in the Hong Kong Legislative Council by the Hon. Richard Rowett, and it has, we believe, since been rectified by the new code recently introduced into the colony.

During the week ending on the 13th of February orders were issued by the Customs for the delivery of 3,197,804lb. of tea from the bonded warehouses in London. Of this quantity 2,051,896lb. were for home consumption, 383,616lb. for exportation, 3,791lb. for stores, and 758,501lb. for removal coastwise to various outports, of which 75,177lb. were for immediate exportation. The total quantity delivered was less by 508,071lb. than that delivered during the previous week. The tea duty paid in London last week amounted to £51,297 8s.

The suspension is announced of Mr. James Holroyd, of the firm of James Holroyd and Co., woollen merchants and manufacturers, of Leeds and Barnard Castle. The unsecured liabilities amount to about £50,000, and the assets, it is believed, will represent the same total.

Bar silver has been sold at 57½d. per oz., which may be considered as the present quotation. Mexican dollars have been sold at 56⅜d. per oz.

ARTICLES OF IMPORT.

Depression has continued to be the chief characteristic of the Produce Markets, for notwithstanding the comparative cheapness of money, there has been a general want of confidence, and with few exceptions prices have undergone some reduction. Tea has been dull; Silk steady and firm. Sugar is flat, and Eastern kinds again lower. The demand for Plantation Coffee has been active, and prices close higher, but Native kinds are cheaper. Rice has been dull of sale at cheaper rates. Sago, Sago Flour, and Tapioca are lower. All kinds of Pepper, Ginger, Mace, and Nutmegs have also declined, but Cloves are dearer. Cotton has been quiet, and sales have been effected slowly at easier rates. Hemp is quiet; Coir Yarn 10s. to 20s. lower; Cutch and Gambier are slightly lower; Cocoanut Oil is unchanged; Tin has again declined.

TEA.

Messrs. Capel and Co.'s Circular says:—The market still remains in a dull and inanimate condition, although the amount of business has been rather larger than that of the previous week. Prices for common black and red-leaf Congous have been rather easier at public sale, also common Scented Capers; other descriptions showing no material change. In public sale 15,811 packages were sold without reserve on the 15th to 17th inst.; and yesterday, 3,798 packages were also sold without reserve. The deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	2,063,465	1,665,929
Coastwise	615,333	735,974
Exports	455,800	329,884
Total delivered	3,134,598	2,731,787

Congous.—Red-leaf kinds: Siftings sold at auction from 7d. to 7¼d. per lb., being previous prices. Broken-leaf kinds have sold a shade lower. Common to fair common have been sold from 10½d. to 11½d. per lb. Good common from 1s. to 1s. 0½d. per lb., free from dust. Fair Kaisow kinds have been dull of sale, also good medium to good quality. A few fine have been sold from 1s. 8d. to 1s. 10d. per lb., finest being difficult to move. Pak Lin kinds remain much as before. Black-leaf kinds: Common have sold at public sale from 9¾d. to 10½d. per lb., good common 11d. to 11½d. per lb. Fair medium kinds from 1s. 1d. to 1s. 2d. show ½d. per lb. decline. Good medium have been sold from 1s. 3d. to 1s. 5d. per lb. There has been a moderate demand for good to fine from 1s. 6d. to 1s. 10d. per lb.; finest show no change. Oolongs have sold at public sale at the decline last quoted: 1s. to 1s. 3d. per lb. for fair, 1s. 5d. to 1s. 5½d. for good kinds. Souchongs: Medium kinds sold at auction from 1s. 1¾d. to 1s. 4½d., fine from 1s. 9d. to 1s. 9½d. per lb., being about previous prices. *Scented Teas.*—Canton Capers: Business has been done to some extent both privately and at public sale. Common Capers, at auction, sold ¼d. to ½d. per lb. lower. Fair to good at previous low rates. Canton Orange Pekoes have sold at previous prices. Foochow Capers have sold at 1s. 0½d. to 1s. 1½d. at public sale, being again rather lower. Foochow Orange Pekoes: Common kinds sell slowly, even at the low prices current. Medium kinds sold ½d. to 1d. per lb. lower at auction, good to fine remain as before. *Green Teas.*—The market is rather irregular, and business mostly confined to public auction. Prices for finer kinds remain much as before, but common to medium rather lower. Some Hysons sold at easy rates.

SILK.

There is no change to notice in the position of the market; the demand for Chinas and Cantons continues on a fair scale, and full rates are obtained. Japan Silk, with the exception of Oshu and Kakeda, is still neglected, the approaching public sales having no doubt a deterring influence on buyers. Deliveries 1st to 17th inst. inclusive. China, 1,969 bales; Canton, 250 bales; Japan, 284 bales. Total 2,503 bales.

COFFEE.

The market has been decidedly firm, liberal supplies at public sale selling readily at gradually improving prices. The result of the Dutch sale was considered satisfactory, and additional support was imparted to this market. Plantation Ceylon, which still attracts the greatest interest, has been offered by auction with all possible despatch; but the total supply has been less extensive. New crop has consisted chiefly of good and fine coloury qualities, which have sold briskly and close fully 3s. higher; grey kinds and old crop have fluctuated, but close 2s. dearer. Middling now quoted 100s. to 103s. 6d. Native has been in less demand, and good ordinary has declined to 84s. The present quotations for Plantation show a total recovery of 2s. 6d. to 4s. for the fortnight, and are only 1s. to 1s. 6d. below the opening sales in January. The current rates are as follow:—Plantation, triage, 82s. to 91s., small grey to coloury, 92s. to 97s. 6d., low middling grey, 97s. 6d. to 99s. 6d., middling coloury, 100s. to 103s. 6d., good middling to fine middling, 104s. to 107s. 6d., good to fine bright and bold coloury, 108s. to 112s. 6d., choice, 113s. 6d. to 115s. 6d., pea-berry, 120s. to 124s. Native, small, 78s. to 80s. 6d., good ordinary, 84s. to 84s. 6d., fine ordinary even yellowish, 85s. to 86s., good to fine bold, 92s. 6d. to 95s. 6d., pea-berry, 102s. 6d. to 107s.

The total arrivals of Ceylon since December amounted to 17,432 casks and tierces, 12,300 barrels and bags, of which 14,716 casks and 12,000 barrels and bags have been sold by auction.

The Dutch Trading Company's public sale, being the first this year, was held on the 17th inst. in Amsterdam; 88,460 bags Java, &c., were offered and sold at irregular prices, good ordinary varying from ½c. above valuations, closing at 53c. to 53½c. The price for good ordinary at the November sale was 56¾c. to 57c., and at the February sale last year 71c. to 71½c. The following is the result in detail:—

	Bags.	Valued at.—Cents.	Result.—Cents.
No. 9 ...	5,174 ...	53 ...	52½ to 53½
10 ...	2,304 ...	53½ ...	53¾ to 54
23 ...	1,389 ...	58 ...	59¼ to 59¾
29 ...	3,289 ...	60 ...	61¼ to —
51 ...	10,528 ...	52¼ ..	51¾ to 52¼

SUGAR.

No improvement can be reported in the state of the market, either as regards prices or extent of demand, with the exception of crystallised Demerara, which has again been pressed forward, and after declining to the lowest prices on record, viz., 23s. for heavy to 25s. for fine, has been taken off readily by the grocers, and prices have slightly recovered. As the present condition of the refined trade is not encouraging, refiners have taken only moderate supplies, but West India being relatively scarce is maintained. Fine grainy kinds are also about steady, but white crystals remain dull. Low and ordinary brown kinds have been difficult of sale, and only a small business has been done at a further decline of 6d. per cwt. Floating cargoes have been in slow demand at about former rates.

Penang.—Grocery qualities offered by auction brought from 21s. 6d. for heavy to 24s. 6d. for fine grainy, being their relative value. Date is neglected, and prices have declined to 15s. for baskets. *Manila* has been neglected, and sales can only be effected at a further decline, unclayed Taal and Ilo being quoted 15s. to 15s. 6d., but in the absence of business no actual reduction can be reported. Fine grainy and crystallised kinds continue depressed. The transactions comprise 1,000 bags unclayed Ilo at 15s. 6d., good at 16s. In auction 6,107 bags unclayed Ilo Ilo were bought in at 16s. *Jara:* On the spot 870 baskets 18,660 bags fine white, No. 16½ to 17½, sold at 25s. 6d. Also three floating cargoes for the United Kingdom, viz., the Cedric 2,000 baskets, No. 16½ at 25s. 9d., the Indus 3,700 baskets 500 bags No. 15½ at 25s. 7½d., and a landed cargo of white, about No. 17, at 25s. 6d. *China* and *Siam:* No sales.

COCOANUT OIL.—Sales privately have not been of much importance; fine Cochin in hogsheads has been sold at £44, and Ceylon in pipes at £38 to £37 15s.; at the latter price 40 tons were recently sold. In public sales 82 casks of Ceylon were bought in, yellow to good in pipes at £37 15s. to £38, middling in hogsheads at £38.

COIR GOODS.—Larger supplies have been brought forward at the auctions as follows:—Yarn 700 bales 358 tons, Fibre 261 bales 100 tons, and Rope 1 ton. The good even qualities of Yarn met a steady demand, and sold at previous rates, but all common and coarse below £28 per ton, of which the bulk consisted, were dull of sale, and prices declined 10s. to 20s. per ton. Fibre has further declined fully £3 per ton. 143 bales Ceylon *Yarn* sold, medium at £28, good to fine at £36 10s. to £41 10s., very fine at £46. Of 218 tons ditto in dholls barely one-half sold; low coarse and ordinary at £20 10s. to £24, good ordinary to medium at £24 10s. to £26 15s., good medium to good even at £28 10s. to £32, fine at £34 5s. to £37 5s., one lot very fine at £43 15s. Of 94 tons Ceylon *Fibre* about 70 tons sold, ordinary short and red mattress at £14 to £15, low at £7 10s. to £7 15s.; 6 tons Bristle partly sold at £21 to £22 10s. *Kitool Fibre:* At auction 8 tons Ceylon chiefly sold from 7d. for inferior, to 9½d. for fair.

CHINA MATTING.—150 rolls sold, sound at 33s. to 44s. 6d. per roll; also 69 rolls (fancy patterns) at 40s. per roll.

CUTCH.—At auction of 1,400 boxes 150 casks Pegue 300 boxes fair (Cock brand), of new import, sold at a decline of about 1s., at 28s. to 28s. 6d., the remainder (import 1868 to 1869) being bought in at 27s. to 29s. per cwt.

CAMPHOR has continued very quiet, and the only sale reported during the fortnight has been 150 cases China at £3 15s. per cwt.

DRAGON'S-BLOOD has been quiet at the previous value.

EBONY.—Market unaltered. At auction 37 tons (294 logs) Ceylon of new import were bought in at £11.

ESSENTIAL OILS.—*Cinnamon* scarce, and fine still wanted; good sweet sold last at 6s. 6d., bitter 1s. 8½d., leaf, low to good, 1½d. to 4d. *Citronelle* quieter; about 10 cases sold at 1⅞d., and 100 cases afloat at 1 11-16d. *Lemongrass* slightly easier, sales at 3d. *Anniseed* steady; about 30 cases sold at 8s. 7½d. to 8s. 9d., single cases recently at 9s., and 20 cases reported afloat at 8s. 7½d. *Cassio* continues dull and very plentiful; small sales at previous figures. *Nutmeg* quiet and plentiful; good sold in retail at 8d.

GUMS.—*Benjamin* unchanged; 12 cases Siam sold, 1 case good at £18, rest block brown at £10; about 30 cases Sumatra sold, fair 2nds at £8 to £8 17s. 6d., 3rds 32s. to 39s.; *Copal* continues firm, and business done in hard at up to 38s. *Damar* firmlyheld. *Gamboge* steady; about 8 cases mixed pipe and block, a little drossy, sold at £10.

GUTTA-PERCHA has continued very dull, but small sales have been effected from time to time at the previous value.

GALLS.—The decline noted last week has not been recovered; small sales of China have been made at 51s. 6d. per cwt. for good quality.

GAMBIER is also rather cheaper; early in the fortnight block changed hands in moderate quantities at 26s. 6d., but sales have since been

Digitized by Google

made at 26s. For arrival 100 tons by steamer, near at hand, have since been sold at 25s. 3d. to 25s. 4½d. ex ship. Cubes are in larger supply, and at auction 2,360 bags free were offered; chiefly sold at and since, fine pale at 39s. to 40s. 164 bales pressed bought in at 35s.

GALANGAL ROOT.—The market has been steady at the previous value.

HEMP.—Within the past few days there has been a slight improvement in the demand for Manila, and about 2,000 bales have been sold at £29 to £32 10s. per ton.

INDIA-RUBBER.—Market steady; 225 cases Borneo at auction partly sold at 1s. 2¼d. to 1s. 3d.

ISINGLASS.—At the auctions of the month, held on the 16th inst., there were 66 cases Penang offered, of which over three-fourths were sold, leaf at 3s. 8d. to 5s. 2d. for fair to fine, and 2s. 7d. to 2s. 11d. ordinary to middling, with low at 1s. 6d.; pipe 3s. to 4s. 3d. middling to good pale, 2s. 6d. to 2s. 10d. middling mixed with dark rough; purse 11d. to 1s. 8d. middling to very good, 6d. to 7d. ordinary.

JAPAN WAX.—A considerable business has been transacted in the interval. Some 400 to 500 cases have been sold privately at 50s. for good cake and saucer; and about 1,000 cases at auction met with more demand than was anticipated, and brought a slight advance, prices realised being for fine cakes 52s. to 52s. 6d.; very good 51s. to 51s. 6d., and good hard saucers 51s. 6d. per cwt.

MUSK is again easier. The sales embraced 44 caddies and tins Tonquin, of which half sold at 33s. to 36s. for fair to good even well-shaped pods; 16s. to 16s. 6d. fair rough and bally; 7 tins Grain sold firmly at 49s. to 51s. per oz.

ORCHELLA.—At auction 40 bales from Singapore sold, badly to 3rd class, at 15s. to 20s., and 34 ballots Ceylon at 40s.

PEPPER.—*Black* has continued dull, and at the close is ¼d. per lb. cheaper; about 2,500 bags have changed hands; Singapore at 6½d. to 6d. per lb.; Penang at 5¾d. to 5½d.; Siam 5½d.; 25 tons Singapore, January shipment, afloat at 5¾d., and 50 tons West Coast Penang at 5½d.; *White* has been very dull, with scarcely any transactions on the spot. Afloat 20 tons January-February shipment at 8d.

PLUMBAGO.—At auction 1,137 barrels Ceylon met a fair demand, and 800 barrels sold, lump at lower prices, but chips and dust at former rates, superior bold clean selected lump at 19s. 6d., common to good small ditto 13s. to 17s. 6d., fair to good chips 10s. 6d. to 11s., common to good dust 7s. 6d. to 9s. per cwt.

RHUBARB.—The market for China is firmer, and fine and good kinds are scarce; supplies have sold privately and at auction, on slightly advanced terms, viz., fair partly brown to good fair 2s. to 2s. 10d., middling to good middling 1s. 2d. to 2s., ordinary wormy to low middling 6d. to 1s.

RICE.—An undecided tone has prevailed, and on the spot prices have been irregular, new white Bengal of fine quality selling from 12s. 10½d. to 13s. 6d. ex quay, being full rates, but soft grain is cheaper. New crop cargoes after being in better request at a slight recovery are now slow of sale. In auction Rangoon has been sold at 8s. 10½d., Madras at 9s. Of 4,258 packages Japan 1,500 packages damaged sold at 8s. to 8s. 6d., 3,000 bags cleaned Necransie sold at 10s. 3d. to 10s. 9d., and 450 bags cleaned broken from Rangoon at 9s. 3d. The sales on the spot have been as follows:—3,500 bags old white Bengal at 10s. 6d. to 11s. 9d., 200 tons fine white SR just arrived at 13s. 6d., 100 tons ditto at 12s. 10¾d., both ex quay; 3,501 bags Askoolie at 10s. 4½d. to 10s. 9d., 6,000 bags Madras at 8s. 7½d. for ordinary to 9s. 9d. for good; 20,000 mats Japan at 9s. 3d. to 10s. 3d., 5,000 bags old Burmah (famine rice) at 8s. to 8s. 6d. ex quay, and 1,000 bags Necransie at 9s.

RATTANS.—At auction 6,414 bundles from Rangoon sold at 9d. to 4s., including damaged; 7,105 bundles from Sarawak were bought in; 11,304 bundles damaged Singapore sold at 7d. to 1s. 8d., and 1,963 bundles Penang at 3s. 9d. per 100 canes.

SPICES.—*Cinnamon:* 13 bales sold without reserve at 7d. to 1s. 10d. 15 cases broken at 1s. 4d. to 1s. 8d., and 53 bags chips at 2¼d. *Cassia* 54 bags coarse Vera sold at 26s. 6d. to 29s. 6d., also 64 cases wild at 21s.; 121 cases grey China buds of fresh import were bought in at £6 to £6 10s. *Cloves:* 48 cases Penang were bought in at 2s. 3d. *Nutmegs:* 32 cases 94 boxes Penang were all disposed of at barely previous terms, fine bold average 64 to 65 nuts to the lb. at 4s. to 4s. 1d., 79 to 76's at 3s. 5d. to 3s. 7d., 114 to 108's at 2s. 9d. to 2s. 10d., 140's at 2s. 7d., limed 136's to 121's at 2s. 3d. to 2s. 4d., 150's at 2s., defective at 1s. 8d. to 1s. 9d.; and 8 cases 5 boxes Java, 87's at 3s. 1d., 116's at 2s. 8d., 124's at 2s. 6d. *Mace:* Of 47 cases 19 boxes Penang 47 cases were sold at fully 1d. per lb. lower, low middling red to fair bright at 2s. 9d. to 3s. 1d., good ordinary at 2s. 7d. to 2s. 8d., ordinary 2s. 1d., pickings at 1s. 8d. to 1s. 9d. per lb.

SAGO continues dull of sale, and at auction of 1,262 bags about 950 bags sold at a decline of about 6d. per cwt., fair to good small at 16s. 6d. to 17s., grey medium at 16s. 6d. *Flour* is also lower. Privately about 1,500 bags Singapore have been sold, damp and musty at 12s. 6d. to 13s., middling to good at 13s. 10½d. to 14s. 3d. In auction 1,272 bags Singapore were bought in at 14s. to 14s. 3d. Of 435 bags Borneo the sound was bought in at 14s. 6d., but 369 bags damaged were sold at 12s. to 13s.

SOY.—40 casks China have been sold at 1s. 9d. per gallon.

STAR ANNISEEDS.—The market has been firmer; all offering at £5 10s. has been sold, and small sales have since been effected at £5 15s.

SHELLS.—No change in value. Sales of Manila and Mother o'Pearl at £11 15s. The next public sales are fixed for the 23rd inst.

SAPANWOOD has continued scarce and firm; at auction 10 tons fresh Ceylon sold at £13 12s. 6d.

STICKLAC is very quiet.

TAPIOCA.—Of 1,522 bags Singapore about 1,100 bags sold at a decline of ⅛d. per lb., good small white at 2d. to 2⅛d., fine bold 2¼d to 2⅜d., fair 1⅞d., old at 1⅞d. to 1⅞d. Of 800 bags Penang the sound was bought in at 2½d. to 3d., but 300 bags damaged sold at 2⅛d. for first class. *Pearl Tapioca:* 899 bags were chiefly sold at easier rates, bullets at 20s., good large at 21s., good medium at 20s. to 21s. *Flour:* Of 862 bags Penang and Singapore 60 bags sold at 2¼d., the remainder bought in at 2⅛d. to 2⅛d.

TOBACCO.—At public sale one bale Java sold at 4d., 161 bales Japan at 4d. to 7d., and 343 bales ditto damaged at 4d. to 5¼d.

TIN.—A fair business has been doing for consumption at a further decline, and some speculative sales have been made for forward delivery; the arrivals continue large. The current quotations are—Straits on the spot £90, afloat £89, Banca £97, Billiton £91 10s. per ton.

VEGETABLE TALLOW.—92 casks Singapore were either withdrawn or bought in at 45s. 6d.

ARTICLES OF EXPORT.

METALS.

IRON.—Welsh: Rails, £7; Bars, £9; Staffordshire Best: Bars, £10 5s. to £11; Nail Rods, £10 5s. to £11; Hoop, £11 15s. to £12 10s.; Sheets, £12 10s. to £13 10s.; Scotch Pig, No. 1 £3 16s. to £4 12s.; Swedes, Bars, Hammered, £17 5s. to £17 10s.; Swedes, Steel in kegs, ½ and ⅝ in., £19 10s.

YELLOW METAL.—Sheets, 4 by 4 ft., 8¼d.; Sheathing and Rods 8¼d. per lb.

TIN.—English Refined, £97. Tin Plates: Charcoal I C, per box, 36s. to 40s.; Coke, 27s. 6d. to 33s.

LEAD.—WB, £23 10s.; do., other brands, £22 15s. Spanish soft, ex ship, £21 15s. to £22; Sheet, £24; Shot (kegs extra), £26 10s.; to £27; White do., £29; Red do., £25 10s.

SPELTER.—Silesian, £23 15s. to £24.

QUICKSILVER.—In bottles of 75 lbs. each, £21.

Messrs. French and Smith report:—This market is quite stagnant. Iron quiet. Copper dull and inactive, and Chili Bars rather easier. Tin Plates less in demand. Lead quiet. Quicksilver reduced to £21 per bottle.

MANCHESTER GOODS.

The Manchester Market has been characterised by a languid feeling in almost all departments, and the orders given out have been on a small scale at current prices, producers having steadily declined to reduce their quotations. Towards the close there has been some disposition shown to make slight concessions; little business, however, has resulted, and the tone is very quiet.

BRACKENHOLME (schooner), China to Hamburg, 17 days out, Jan. 29.
M.F.Q.G. (Pons Æli, bq.), Newcastle to Singapore, Feb. 4, off the Lizard.
GREAT BRITAIN, Singapore to Sunderland, 43 days out, 35 S., 21 E.
LIGHTORAA, Batavia to Amsterdam, Nov. 18, 27 S., 66 E.
MAIN SKYSAIL, Shanghai to New York, Dec. 27 12 S., 10 W.

FREIGHTS AND CHARTERS.

Rates remain without any material alteration since our last issue, and continue low; the berths are well supplied, both with sailing vessels and steamers. There is but little doing in homeward business. Coal rates are unchanged.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 50s. weight, 50s. meast. To Hiogo: 75s. weight, 75s. meast. To Nagasaki: 75s. weight, 70s. meast. To Shanghai: 37s. 6d. weight, 35s. meast. To Hankow: 60s. weight or meast. To Hong Kong: 37s. 6d. weight, 35s. meast. To Singapore: 37s. 6d. weight, 35s. meast. To Penang: 37s. 6d. weight, 35s. meast. To Colombo: 35s. weight or meast. To Batavia: 65s. meast. To Sourabaya or Samarang: 70s. meast.

Per SAILING VESSELS.—To Yokohama: 35s. weight, 40s. meast. To Hiogo: 40s. weight, 45s. meast. To Nagasaki: 50s. weight, 40s. meast. To Shanghai: 30s. weight, 25s. meast. To Hong Kong: 30s. weight, 25s. meast. To Singapore: 25s. weight, 22s. 6d. to 25s. meast. To Batavia, Samarang, and Sourabaya: 27s. 6d. weight, 27s. 6d. to 35s. meast. To Colombo: 25s. weight, 22s. 6d. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Yokohama: £37. To Shanghai: £35. To Hong Kong: £26 to £28. To Singapore: £26. To Penang: £25, f.c. To Galle: £23.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Shanghai: 35s. To Hong Kong: 33s. To Singapore: 25s. to 26s. To Colombo: 25s. To Galle: 23s. to 24s. To Batavia and Sourabaya: 24s. to 25s.

From Birkenhead, per ton.—To Singapore: 20s.

CASUALTIES.

Advices from Havre, dated Feb. 13, state that the Talia, of Barcelona, Alsina, from Bordeaux to Saigon, was wrecked near Santander, previous to the 3rd Feb.; crew saved.

The Altona (str.), Hore, which arrived at San Francisco, Jan. 30, from Hong Kong, reported having experienced a very heavy N.E. gale on the 30th and 31st Dec., and 1st Jan.; on the 10th and 11th Jan. she experienced a cyclone from S.W. to N.W., when she lost boats, and shipped some heavy seas, smashing deck-fittings, &c.

BLACKWALL.—[By tel. received Feb. 17, at 2.8 P.M.]. The Duke of Buccleuch (str.), of Barrow, Captain Russell, for Colombo, via Suez Canal, and the Marmion (str.), of and for Leith, were in collision this morning off the South West India Docks; the Duke of Buccleuch was struck on her port side and has sunk near Blackwall Point; tugs in attendance on her.

BLACKWALL.—[By tel. received Feb. 17, at 3.20 P.M.]. The Duke of Buccleuch (str.) lies across the river, with her head in deep water and her stern near the shore; the tide is now leaving her.

BLACKWALL, FEB. 17, 4.47 P.M.—The Duke of Buccleuch is full of water from stem to stern; will be covered at high tide; can go on discharging but slowly. Thames Conservancy in charge.

6 P.M.—Tide has ebbed low enough to enable them to get at the cargo of the Duke of Buccleuch, which is being discharged into barges towed alongside for the purpose; will telegraph the state of the vessel early to-morrow morning.

The Duke of Buccleuch (str.), still lies in the same position, and at high water her masts and funnels only are visible; at low water her cargo is being discharged into barges.

The Donna Maria (ship), Bone, from Shields to Batavia, which vessel was in Yarmouth Roads, Feb. 11, with nine of crew refusing duty, has anchored in the Downs with upper maintopsailyard carried away.

The new steamer Salak, which is to load for Batavia and Sourabaya, while going up the Clyde in tow on the 14th, collided with H.M. gunboat Lily; she, however, received but slight damage, and proceeded to Glasgow.

Advices from Manila, received by telegram from Singapore, Feb. 12, state that the Bunker Hill (ship), from Manila to Boston, with sugar and hemp, took fire whilst loading, and was scuttled Feb. 2 to save her hull.

The Jonge Cornelis (Dutch barque), from Cardiff, for Batavia, with coal, which vessel put into Lisbon Jan. 11, with slight damage to rigging, sailed for her destination on the 3rd Feb., having repaired.

The Cerwyn (str.) has sailed from Falmouth to Bristol, with part cargo, ex Antipodes, from Ilo Ilo.

MISCELLANEOUS.

At GIBRALTAR.—Feb. 10, Rangeat (str.), Harrison, from Plymouth sailed for Penang; Olympia (str.), Paulsen, sailed for Shanghai.

PASSED GIBRALTAR.—Feb. 8, Java, from Nieuwe Diep to Batavia.

Off TARIFA.—Cleopatra, Druscovitch, from Maulmain for Trieste.

At PORT SAID.—Gorm (str.), from London and Cardiff, for Ceylon; Ulysses (str.), from Liverpool, for Singapore, China, &c.; Glenfinlas, from London, for Singapore, China, &c.

PASSED PORT SAID.—Feb. 13, Torrington, Blacklin, from Southampton and Rotterdam, for Java.

At SUEZ.—Ajax, from China, Singapore, &c.; Colombo, from Colombo, &c.

PASSED ASCENSION.—Dec. 24, H.F.B.W. (barq.), from Batavia for Falmouth; Jan. 2, William and Anna, from Samarang for Falmouth; 7, H.R.D.G. (Aust. barq.), from Java for Baltimore; all not arrived, as reported in our issue of the 5th inst.

At ADEN.—Feb 12, Rajpootana (str.), from London, and left same day for Colombo, &c.

LAUNCHES, &c.

MESSRS. JOHN ELDER AND CO. have launched a screw-steamer of 1,230 tons B.M., and of the following dimensions:—Length between perpendiculars, 245 feet; breadth (extreme), 32 feet; depth of hold, 21 feet. As the vessel left the ways she was named the Rajanattianuhar. This vessel has been built to the order of Messrs. D. R. Macgregor of Leith, for their China trade. The engines, which are to be supplied by the same firm, are upon the compound principle, of 180-horse power nominal, having two inverted cylinders, direct acting, with all recent improvements, and to exert a power of nearly 900 indicated horse-power which is expected will give the vessel over eleven knots speed.

THE Sumida (str.), Captain Brown, built by Robt. Thompson, Jun., of Sunderland, for the Japanese Government, is now loading for Yokohama. Her dimensions are:—Length 286 ft., breadth 33 ft., depth of hold 22 ft., 1,412 tons gross, 896 nett register. She has been engined by Geo. Clarke, of Sunderland, with direct-acting compound 200-horse power nominal. On her trial trip she attained a speed of 14 knots. She has fine accommodation for first-class passengers and natives.

A NEW line of steamers from Glasgow and Liverpool to Bombay is to be established, the proprietors being Messrs. Henderson Bros., of the Anchor Line of Transatlantic steamers. The break-up of the Atlantic Steamship Owners' Conference and the consequent reduction of rates in that trade have induced Messrs. Henderson to establish the new line, and a number of vessels hitherto engaged in the New York trade have been set apart for the service.

THE new steamer Djemnah, belonging to the Messageries Maritimes, it is expected will be ready to take out the mails and passengers from Marseilles on April 11. We have already given a description of this magnificent steamer.

THE China Trans-Pacific Steamship Company's steamer Vancouver arrived at San Francisco from Yokohama and Hong Kong on the 18th inst.

THE Shalimar, Captain Walker, will leave in a few days for Cardiff, to load coals for Yokohama, where she will be employed in coasting.

12, RUE CASTIGLIONE, 12.

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

Per P. and O. steamer *Khedive*, from Southampton, March 11.—To Shanghai: Mr. O. Percival, Mr. P. M. Grant. To Hong Kong: Mrs. Maclean and party, Lieut. H. B Warren, Lieut. C. K. Purvis, Lieut. C. E. Reynard.

Per P. and O. steamer *Baroda*, from Brindisi, March 23.—To Shanghai: Mr. J. M. Ringer. To Hong Kong: Mr. J. G. T. Hassell, Mr. T. J. Gardiner.

Per P. and O. steamer *Thibet*, from Southampton, March 25.—To Galle: Rev. and Mrs. McLean.

Per Pacific Mail Company's steamer *Colorado*, from San Francisco, Feb. 1.—For Yokohama: Rev. C. Rubio, B. C. Gowing, U.S.N., D. D. V. Stuart, U.S.N., L. E. Bixler, U.S.N., Wm. Little, U.S.N., G. W. Stivers, U.S.N., A. C. McMeehan, U.S.N., John P. Wallace, U.S.N., Gen. R. H. Allen, U.S.A., wife, daughter, and servant, L. Samie, E. W. Clark, Shiro Okamoto. For Shanghai: J. M. Kelly, Miss Annie J. Kelly, A. C. Gibson, C. C. Blakeslee. For Hong Kong: Thirty-two Chinese.

Per steamer *Viking*, from London Feb. 27.—For Penang: Mr. C. Vogeding, Mr. E. Ballhalder. For Singapore: Mr. J. F. Knox (H.B.M. Consul in Siam), and Miss Knox. For Shanghai: Mr. Lowrey, Mr. Jones.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The Pacific mail steamer *Alaska* arrived at San Francisco on the 16th Feb., bringing Yokohama advices to the 24th of January. The subjoined summary of news has been telegraphed to the New York press:—

The Chinese officials at Foochow still affect to hold authority over Lew Chew, notwithstanding the renunciation by the central Government of Peking. A messenger from Lew Chew to Foochow has been compelled, with the crew of his ship, to perform submissive ceremonies at the Custom-house of that port. This course, if persisted in, will certainly lead to complications between China and Japan, as the latter empire declares she will no more permit the Chinese to humiliate its subjects than Formosa savages to slaughter them with impunity. A rumour is in circulation of a fight in Formosa between the Chinese and the savages.

The steamships recently purchased by the Japanese Government for transporting troops to Formosa, &c., are to be used to establish a regular mail line between Yokohama and Shanghai. A steamer will be despatched weekly, commencing February 3 with the *Tokio Maru*. The ports touched at will be Kobe, Simonoseki and Nagasaki.

It has been determined that in the approaching treaty revision the Japanese Government will waive for the present the question of territorial jurisdiction; but will strenuously insist upon assuming entire control of the tariff, the right to which is now denied by British representatives.

The iron steamer *Berlin*, lately running between ports on the Inland Sea, under Japanese management, has been destroyed by fire. The crew and passengers are reported lost. No particulars have been received.

Two subordinate officers of the Foreign-office have been sent to Siam to investigate the expediency of establishing diplomatic and commercial relation with that kingdom.

The Japanese Envoy to Korea returns to that country next month with important proposals from the Government.

A semi-official announcement is made that in May next the Japanese Government will call in all the kinsatsu, or old style paper money, and replace it with new Treasury notes.

The English and French troops, so long maintained at Yokohama in defiance of the wishes of the Japanese Government, are now making preparations for immediate departure.

On the morning of January 15 two separate movements of

Digitized by Google

earthquake, each of nearly four minutes' duration, were felt. No damage, however, was done.

Small-pox continues to prevail to an unusual extent. Many foreigners are suffering, among them soldiers in the British camp.

NAGASAKI.

On the 1st January the administration of the Post-office, hitherto conducted by the American Government, was transferred to the Japanese Authorities. The new Post-office has been erected on the corner of a lot to the north of the custom-house, and is two stories high. The front entrance is guarded by a wall and fancy railing, and on ascending a few steps the visitor enters the lobby. On the right hand are boxes for foreigners, and on the left a similar number for the natives, all numbered in plain figures. Two letter receptacles are also underneath the delivery windows. At the extreme end of the lobby are doors leading into the general distributing-room, which is about 32 by 40 feet and 15 feet from the floor to the ceiling. Adjoining this apartment is the private office of the foreign conductor, and on the left an office for the Japanese officials. A winding staircase leads to the upper storey which consists, of commodious private chambers and consultation rooms. Although the building is not quite finished, still it is sufficiently so to permit of business being conducted.

On the 26th Dec., while the German man-of-war *Arcona* was leaving the harbour, she collided with the steamship *Nanzing*, carrying away the taffrail, stern-davits, and a portion of the upper deck. Immediately after the collision a boat was lowered from the war vessel and sent back to the *Nanzing* for the purpose of ascertaining the extent of damage done. It was a fortunate circumstance she was not more in the way, or it might have disabled her from going to sea for some time to come. It is thought the *Arcona* did not answer her helm properly.

Of late the weather has become rather chilly in Nagasaki, necessitating the plentiful use of stoves. On the 28th Dec. the first snow shower of the season fell, it was nothing more than a sprinkling, however, but it may be taken as an indication that the depth of winter is approaching.

Christmas Day was well observed at Nagasaki, both ashore and afloat. The vessels in the harbour, says the *Sun*, were neatly decorated with foliage from the neighbouring hills. Of course it was a free day for the sailors, and numbers being ashore, found their way to the grog-shops, in the absence of a Temperance Hall. Sundry free fights between seamen of different nationalties were the result, and some of the men of the *Mosquito*, who have behaved themselves in a very creditable way during their stay in Nagasaki, with a few exceptions, lost all control over themselves, and went so far as to threaten to pull down the Garibaldi Hotel about the ears of the landlord.

CHINA.

—o—

PEKING AND TIENTSIN.

The correspondent of the *North China Herald* writes as follows :—

A memorial in the *Peking Gazette* of 15th December shows that the Chinese still maintain a semblance of suzerainty in their relations with Loochew, although the Japanese have formally taken the islands under their protection. True, the junk with tribute arrived at Foochow at the end of last year, before the Formosan difficulty arose ; but a year before that it had been officially intimated to foreign Powers that the Sovereign of the islands had been reduced to the position of an ex-daimio and assigned a residence at Yedo. The departure of the junk on her return voyage is now noticed ; and according to precedent, the duties on Chinese merchandise shipped by her have been remitted. In acknowledgment of the graciousness of the "Sacred Ruler" to the men from afar, however, the Envoy, followed by his attendant officials and the crew of the junk, has had to perform the ceremony of the *kotow* at the Custom-house !

In the *Gazette* of the 24th December an edict announces the appointment of Chung-how, one of the chiefs of the Tsung-le Yamun, to fill the post of Right Vice-President of the Board of Finances, in addition to that of Vice-President of the Board of War. A decree in the *Gazette* of the 18th December, as I have already written to you, appointed Paou Keun, one of the chiefs of the Tsung-le Yamun, a Minister of State. In the *Gazette* of the following day another decree appoints him a chief of the Board of Magistracy ; and at an audience on that day he presents his thanks for the former appointment.

In my last letter I mentioned that the Prince Tun, one of the uncles of the Emperor, had been, by Imperial decree on the 14th December, appointed to represent his Majesty at the Temple of Heaven, on the observance of the sacrificial ceremonies at the winter solstice. In a decree in the *Gazette* of the 22nd December it is stated that for the purpose of thoroughly re-establishing his health his Majesty will abstain from the transaction of public business till the 11th of the 2nd moon of next Chinese year (our middle of March, 1875) ; and in the *Gazette* of 24th December it is announced that the Empresses Dowager will meantime represent his Majesty.

Early on the 26th Dec. snow began to fall at Tientsin, with the wind blowing strongly from the north-east. This weather continued till about noon, when the wind veered to the north-west, and the snow ceased. A couple of hours later it was blowing a strong gale from the north-west, with the thermometer rapidly falling, till at daylight on the 27th it stood at seven degrees Fahrenheit. The river off the settlement was covered with ice about an inch in thickness. Since the 26th it has continued to freeze, and people are walking across the river on the ice, and sledges have begun to run on it. We have, in fact, our proper Tientsin winter weather, such as we used to have before the summer inundations of the last four years in this region.

The Governor-General, his Excellency Li Hung Chang, left Tientsin on the 23rd Dec. for Paouting-foo, the capital of the province, where he will stay till next spring. Of course, during the 100 days for which the Emperor abstains from public business, his Majesty will not grant audiences to foreign Envoys ; and as the Empresses-Dowager do not receive those Envoys, the Danish Minister will not be able to have an audience till next April at earliest.

Since Christmas-eve the usual social banquets of this festive season have been the order of the day ; having, I should mention, been properly introduced by an avalanche of good things.

SHANGHAI.

The present mail brings advices from this port to the 15th January ; the P. and O. mail from London November 27th was received on the 11th January. The following summary of new is from the *North China Herald* :—

Two judgments were delivered by Sir Edmund Hornby at the Supreme Court on the 9th Jan. The first is in the case Chay-a-Sahichi *v.* Mourilyan Heimann and Co., appealed from the Consular Court at Hiogo, as to which his lordship reverses the decision of the Court below. Being of opinion that a breach of charter-party had been committed on which some damage may have been sustained, his lordship remits the case back, to be reheard on that point, the plaintiff being at liberty to adduce evidence of damage. Each party (for reasons stated) to pay their own costs of the appeal, but costs in the original cause to depend on the result of the new trial.—In the case Malone *v.* Walton, his lordship allows plaintiff, late master of the *Alexandra*, 12s. 6d. beyond the amount paid into Court by defendant, the owner of the vessel, each party to pay his own costs.

The report and award by the Registrar and Merchant Assessors on the reference in the *St. Francois v.* the *Cawdor Castle* has been issued. The report contains also the reasons upon which the Court sustained Mr. Robinson's contention that the owners of the *St. Francois* were justified in treating the sinking of their vessel as a total loss, in refusing to receive her back if raised and repaired, and in claiming that the defendants should pay them the full value of the brig, her freight, stores, crew's wages and expenses. The plaintiffs claimed Tls. 17,236.53, and are allowed Tls. 11,929.41, the principal deductions being on the estimated value of the vessel and on the freight claimed for the sandalwood which remained in her at the time she was sunk.

At the Mixed Court, on the 9th Jan., was resumed, before Geo. F. Seward, Esq., Consul-General, U.S., and H.E. the Taoutai of Shanghai, with Dr. Yates acting as interpreter, the remarkable case "C. E. Hill *v.* Yang Taikee." It is a claim for no less a sum than Tls. 54,000, with interest for eleven years, arising out of the chartering of a steamer, the *Keorjeor*, or *High Bridge*, during the Taeping rebellion. The evidence adduced was in a way a narrative of the measures taken, by means of the "Ever-Victorious Army," to suppress the Taiping rebellion in this province. On the 12th the Consul-General made a *vivâ voce* statement with regard to the two arbitrations held by arrangement with Woo, the then Taoutai of Shanghai, with a view to the settlement of the claims of Americans and Europeans who had served with the army.

The minutes of the French Municipal Council meeting of 22nd December are largely of a routine character, although at the same time they form a report of useful municipal activity Various proposals of the Committee of Works were approved, relative to the carrying out of the system of drainage, the planting of trees, the metalling of the Yangkingpang bund, &c. An application by jinricksha owners, that wheelbarrows should be placed under the same restrictions and regulations with their vehicles, and a letter from the other Municipal Council, relative to the reconstruction of Yankingpang bridge No. 4, and the rectification of the line of the Creek bund, were referred to the delegates of both Councils for arrangement. The Council decided to appoint an arbitrator to act with one nominated by Mr. Hanssen in settling terms for a piece of land required for widening the Rue du Consulat. It was resolved to submit to the chief engineer of the fire department certain proposals by Mr. Viguier, harbourmaster, regarding signals in case of fire in the anchorage. The Chairman was requested to address the Belgian Minister, with a view to obtaining the return of documents deposited at the Belgian Consulate as proofs in the Godaert case.

A very serious accident has occurred on the river in the sinking of a Chinese passage boat by collision with the steamer

Digitized by Google

Europe, involving an estimated loss of fifteen lives. The *Europe* was coming to an anchor below the harbour limits about 7 P.M., and her engines had been stopped some few minutes, preparatory to letting go the anchor. Miscalculating their position probably in the darkness, and misjudging the force of the tide, the boat people rashly attempted to cross her bows, and their boat came into collision with the starboard bow of the steamer, or with the descending anchor, and was at once sunk. A boat was immediately lowered from the steamer, in charge of the second officer, and picked up two of the unfortunates before they were carried astern of the ship. Ten others were recovered, but although the boat pulled some distance down the river and a careful search was made, no more could be found. One of the rescued was in an insensible state, and though every effort was made to restore animation when the vessel was reached, it proved in vain. Dr. Burge was sent for, but before he could arrive the man was quite dead. The people saved were all passengers, and they state that seeing the danger, they advised the lowdah of the boat to put about, but he replied "No fear; I can cross her bow."

We regret to hear of another outrage on a foreign resident, by a rowdy Chinese. As a European lady and gentleman were setting out for an afternoon walk, and were about turning into the Foochow from the Szechuen-road towards the Bund, a Chinaman jostled them and suddenly struck the lady across the eye, inflicting a severe wound. He then ran away, and succeeded in escaping from his pursuer, the lady's husband, who was divided between the necessity of attending to the sufferer and the desire to secure the fellow. Unfortunately there were no police in the vicinity.

There was a very good but rather severe hunt on the Hongkew side on the 9th Jan. The start was from a point off the Woosung-road, about a quarter of a mile from the rifle butts, and the tract of country beyond was traversed and re-traversed till a course was laid for home, just opposite the S.S.N. lower wharf. A large number of people had as usual made the direction of their afternoon drive or walk depend on the movements of the hunt, and from 2.30 to 3.30 there was a steady exodus from all parts of the settlement to a common centre on the Yangtszepoo-road. A widish and well-filled creek was selected as the rubicon, and was boldly charged by the first arrivals, Mr. Vincent on Caradoc winning the light weights. The names of horse and rider were of good omen, Mr. Vincent conquering in the local contest on the namesake of the animal which, the mail tells us, has won world-wide fame by carrying a certain Lieut. Zubowitz from Vienna to Paris, a distance of 800 miles, in fifteen days. Mr. Turnbull won the heavy weight prize again on Steam Whistle.

The annual meeting of the Mih-Ho-Loong Hook and Ladder Company was held on Jan. 11. The officers of the past year—Mr. Rice, foreman; Mr. Groom, 1st assistant; Mr. Tobin, 2nd assistant—were re-elected by acclamation. Dr. Henderson was re-elected surgeon, and Messrs. Low, Pryer, Welch, and Hawtrey were chosen as a committee. The accounts were then discussed and passed, after which the rules as amended were read, but although these were approved, it was found there was not a sufficient number of members present to render their adoption valid, as by the old by-laws the votes of two-thirds of the company would be necessary to enable any alteration to be made. It was therefore proposed and carried that a copy of the new rules should be circulated, to be signed by the members, and that if a sufficient number of signatures were obtained, the rules as amended should be adopted. At the meeting of the Mih-ho-loong Rifle Company, Messrs. Rice, Mackenzie, Groom, Dunman, Hawtrey, and Cheverton were elected committee. The accounts for 1874 were then read and passed. Some discussion took place as to the advisability of holding the annual ball, and the votes of the meeting being unanimously in favour of it, a committee was chosen, and it was resolved to give the ball as usual, at an early date.

The first battalion drill of the S. V. C., under the command of Major Hart, has taken place, in the Consular Compound. About ninety rank and file mustered at the appointed time, and were put through some rather severe but serviceable field movements, the drill lasting more than an hour. At the conclusion of the evolutions, Major Hart expressed gratification at the way they had been performed, and hoped to see a better turnout on future occasions.

On the 12th January, at the Masonic Hall, Professor Watson, of Michigan College, chief of the United States expedition for the observation of the transit of Venus, delivered a lecture on that subject and its relation to the problems of astronomy. The lecture was given under the auspices of the Shanghai Temperance Society, being one of the winter series. Mr. C. P. Blethen occupied the chair, and notwithstanding unfavourable weather an audience of nearly 200, including a large proportion of ladies, was present. The subject was treated in a popular manner, and was illustrated by diagrams on the blackboard, drawn by the professor as he proceeded, as well as by copies (by Mr. Saunders, of Shanghai) of three of the ninety-nine photographs of the transit taken in Peking, showing the first and second contacts and the appearance when the planet was fairly on the sun's disc. It is impossible to give even an outline of the lecture within the limits at our disposal, and it can only be said that those present received a rare intellectual treat. At the close of the lecture vote of thanks to Professor Watson was proposed by Mr. Taintor, and seconded by Mr. Wylie.

We have pleasure in announcing that the King of Denmark has conferred on Mr. Seward, U.S. Consul-General, the high decoration, "Commander of Dannebroge," in recognition of the services Mr. Seward has rendered to Danish interests in China. The King has also conferred on Mr. Edmund Pye (of Messrs. Elles and Co., Amoy) the decoration of "Knight of Dannebroge."

The delegates of the respective Companies of the Shanghai Fire Department attended at the Municipal Council room on the 8th Jan., for the purpose of electing a chief and district engineers for the year. The voting resulted in the re-election of the old officers, Mr. Robert Mackenzie, as chief engineer; Mr. C. J. Ashley, first district engineer; Mr. B. A. Clarke, second ditto; and Mr. A. Charrier, third ditto.

The remainder of the hull of the late ship *Horatio*, after having all the charred portions of her timbers removed, and replaced by new, is now being decked over, so as to make it available either for a pontoon or a hulk.

The steamer *Leven*, lately purchased by the China Merchants Company, is being fitted out for her intended occupation at the Taku bar. A hurricane deck is being built fore and aft, thereby greatly increasing her cargo space.

Fire broke out in the sailroom (forward) of H.M.S. *Curlew* on the 11th Jan., but was extinguished before serious damage was done.

NINGPO.

There has been an occurrence at this port which has caused intense excitement among the Chinese population. It appears that three natives were engaged in some occupation at a distance of about three miles from the west gate, when they were fiercely attacked by a tiger, the animal's onslaught being so sudden that escape was impossible. One of the unfortunate men was killed on the spot, and the other two seriously wounded; but while the animal was occupied with the dead body of their late companion, these managed to make good their escape, and hastened into the city. The circumstance was reported to the Che-hien on the following morning, and he at once ordered out a detachment of two hundred braves, to endeavour to capture the animal or destroy it. The detachment scoured the adjacent country, and fortunately found the tiger about two miles from the north gate, when it was shot dead by one of their number. They returned with their prize to the city in the evening, and its appearance excited the utmost curiosity. In size it is said to be as "large as a full-grown donkey," and it is beautifully striped. Speculation is rife as to how such an animal could have found its way through so populous a region as that surrounding Ningpo, in which the existence of wild beasts has been unknown probably for very many years.

HONG KONG.

Our advices by the present mail extend to the 21st January; the French mail from London Dec. 4 was received on the 17th Jan., and the following P. and O. mail of Dec. 12 arrived out on the 19th January. The following items of news are from the *China Mail*:—

The appointment of Mr. MacLean as Travelling Inspector of the Hong Kong and Shanghai Bank has given undoubted satisfaction to the shareholders, but it would be idle to assume that a similar feeling is entertained regarding the appointment of one of the late directors to the post temporarily of sub-manager in London. We have received several communications on the subject, and, so far as we understand, the main objection is one of principle. An unusually depressed state of trade and exceptionally ill fortune during the past few years have combined to render the Bank's operations less profitable than heretofore, and of necessity the directors are debited with a certain amount of responsibility for the result. However little they may deserve distrust it is felt, even by their best friends, that it would have been better to select some gentleman not hitherto identified with the management for the vacant post at home. On the other hand, we can see much to make the advice and aid of one who has been a successful business man in Hong Kong of value, and it is quite credible that the directors thought more of that than of the outcry which, under the peculiar circumstances of the case, might be raised. Mr. Rowett has earned a good character in the Council for independence of thought, and a refusal to allow personal feelings to restrain him from adverse comment when he deemed it necessary, and there is no reason to suppose he would act in another way in a new position. The directors have probably made a mistake in selecting one of themselves, but they might have done worse as regards the selection individually. It remains to be seen how the appointment will be viewed by outside shareholders, but we suspect they will pretty much agree with the opinions expressed by the more moderate section of the resident shareholders.

The directors of the Hong Kong, Canton, and Macao Steamboat Company (Limited) have issued the following Report to the ordinary half-yearly meeting of shareholders:—

Digitized by Google

The accounts herewith presented show that, after paying commissions, running expenses, salaries, premia of insurance, repairs, and all other outgoings to the 31st December, and including $1,525.28, brought forward from the last account, there remains a profit of $58,101.64, which, they trust, will be found satisfactory, considering the depression of trade in general and the events which have affected the working of the company. The directors recommend that this amount should be distributed as follows, viz.: to pay a dividend at the rate of six per cent. on the paid up capital for the half-year, $36,000, to their own remuneration $2,500, leaving $19,601.64 to be carried forward to a new account.

In reviewing the period covered by this Report, the directors regret to have to state that the *Spark*, while on her voyage from Canton to Macao on the 22nd August, was taken forcible possession of by a band of pirates, who were on board disguised as passengers. They killed the captain, mate, and purser, and several of the crew, severely wounding many others. The directors offered a reward of $2,000 on behalf of the company for the apprehension of the pirates, and they have to state that one pirate has been convicted and hanged in Hong Kong, and several have been beheaded in Canton. They have taken measures to guard any such surprises by increasing the number of Europeans on board and the efficiency of the armament of each boat, and have issued strict orders to all commanders regarding the discipline to be observed. The *White Cloud* was, after the piracy, placed on the Canton and Macao line until she was lost in the typhoon of the 22nd September. The circumstances attending the loss of this steamer have become known through the public papers. The Marine Court of Enquiry held here blamed both the captain and chief officer, and they are no longer in the Company's employ. The steamer was valued at $71,000, and insured for $30,000. It has been found to the interest of all concerned to salve the machinery, boilers, &c., and then dispose of the wreck by auction. The Company's interest in the property salved, together with the amount recoverable from the insurers, is estimated at $40,000, and is included in the assets; the balance, or loss, of $31,000 has been carried to debit of Depreciation Account. To replace the *White Cloud* tenders were invited for the construction of a new hull, with joiner's work and everything complete, with the exception of machinery, boilers, and furniture. The directors, after consultation with Mr. McMurdo, Marine Surveyor, decided to accept the offer of the Patent Slip and Dock Company for $50,000 as the cheapest and best. The keel has been laid, and the vessel is expected to be ready in five months. Besides the loss of the *White Cloud*, typhoon damages to the *Powan*, *Poyang*, and the Company's wharf at Hong Kong to the extent of $5,000 have been paid for, and included in the accounts now presented. Repairs to the wharf, estimated at about $3,500, are still going on. Of the repairs to the *Poyang*, about $900 will be recovered from the underwriters.

In consequence of opposition on the Canton line, the *Powan* has been run as a night boat, and the directors have deemed it expedient to discontinue the subsidy of $2,500 per month to Mr. Quok Acheong, and have notified him accordingly, offering to allow him $1,000 per month for six months longer. He has not accepted this offer, and has proposed a continuance of the agreement for $1,800 per month, which the directors have not acceded to, trusting that the efficiency and regularity with which the company has hitherto conducted the service will warrant the support of the public against all opposition.

The directors regret that ill health has compelled their chairman, Mr. George F. Heard, to resign his seat at the Board; Mr. Richard Rowett has also resigned in consequence of leaving China. The directors have nominated Mr. Albert F. Heard and Mr. Adolf Andre to fill the vacancies in the Board, which nomination will have to be confirmed at the meeting.

The Bishop of Victoria purposes on the 20th February to open a day school in connection with and on the premises known as St. Paul's College. The teachers will, we are informed, be Mr. A. J. May, late assistant master of St. John's College, Hurstpier-point, Sussex, England, and Mr. Kwan Yun Fat, formerly assistant master in the Government Central School in this colony, who will be aided by two Chinese assistants. The number of pupils will for the present be limited to forty, but they will be taken from all nationalities, Chinese and non-Chinese, provided only they belong to respectable families. They must, moreover, bring a certificate that they have studied Chinese in some school for the period of at least one year. As regards the course of instruction, it will, we are informed, embrace the ordinary branches of an English education, with the addition of Chinese. There will of course be daily instruction in the Christian Scriptures.

With much regret we record the death of Mr. Leonardo d'Almada e Castro, late chief clerk in the Colonial Secretary's office, and Clerk of the Councils, Mr. d'Almada e Castro was appointed clerk in 1843, and entered the public service in the office of the Chief Superintendent of British Trade in China in 1837. The deceased gentleman was widely known, and deservedly respected, even outside his immediate circle of friends, for his urbanity and willingness to oblige.

Mr. Justice Snowden has been engaged in the investigation of an interpleader suit of Ho Asam *v.* Leung Shing. The action arose in connection with the discovery and raising of the launch *Early Bird*. The plaintiff, while raising the barque *Corea*, discovered the launch first and had the place buoyed. Meantime the defendant entered into a contract with Messrs. Hook and Co. to raise her for $500. The plaintiff put in a claim as original salvor, and Messrs. Hook and Co. paid the amount in dispute into Court. After hearing a deal of evidence, judgment was given in favour of the plaintiff for $250; the remaining sum was awarded to the defendant, the subsequent salvor who finally raised her.

The Supreme Court has been again engaged with the case of Yow Yuk Hung *v.* Tse Kai Tung. After the case was completed on both sides, the counsel for each made an able address to the Court. After his lordship's summing up and laying down the law of the case, the special jury returned a verdict for the defendant with costs.

A gentleman who represeuts the Calcutta Opera Troupe has come to Hong Kong to see if arrangements could be made for a series of performances in this colony. As, however, he wants a guarantee of $19,000, and the secretary of the City Hall expressed serious doubts of his obtaining it—while the agent refused to consult any of the leading houses on the matter—he has given up the idea. It was supposed in Calcutta that 310 persons to guarantee $64 apiece could be found in Hong Kong without difficulty.

The forthcoming races will, we hope, produce good sport, if nothing else. There are not many horses in training, and those which are in training are more like Jerusalem ponies than anything which has yet appeared on the turf at Wong Nai Choong. It might be better to encourage racing, but the turfites perhaps know their own business best.

We learn from the Hong Kong and Shanghai Banking Corporation that Mr. Adolf Andre has taken Mr. Rowett's place as deputy chairman of the Board. Mr. F. D. Sassoon takes his brother's (Mr. S. D. Sassoon's) seat as director.

The Chinese have sent a deputation to the Governor to protest against the proposed registration of householders. Mr. Hayllar, Q.C., has also addressed a forcibly-worded letter to the Colonial Secretary protesting against the passing of the Bill.

Captain Warsaw, late of the ill-fated Pacific Mail steamship *Japan*, was presented with an address, signed by the leading mercantile firms, prior to his departure for San Francisco, expressive of sympathy and confidence.

(FROM OUR OWN CORRESPONDENT.)

A grand reception was given to Monsignore Raimon, on his arrival in the *Hydaspes* by the Catholic community. The Romans, no doubt, thought that they had as good a right to a bishop as had the Church of England folks, and they prided themselves upon making an ovation to the vicar of the Holy Father. The reception, however, was barely noticed in one of the evening papers, and passed over in utter silence by the others. The *Hong Kong Times*, however, the morning paper, gave an elaborate account of the proceedings. Malicious tongues ascribe this to the willingness of the journal in question to gain the support of the Catholics, who among the Eurasians are a large if not a wealthy body.

There is much talk, in whispers at present, of approaching failures of some German firms. If these rumours should be ill-founded I might injure the people referred to by mentioning their names. If well-founded, I shall know the truth shortly, and will keep you informed.

CANTON.

The *Chinese Mail* publishes the following account of the procession which took place at the ceremonial attending the transfer of the remains of the deceased Viceroy to Peking :—

On the 11th Jan. the ceremony of transporting the remains of the late Viceroy took place. All the officials in the provincial city took part in it, and they numbered several thousands. The different Consuls were also present. The coffin was borne from the Vice-Regal Yamun along a straight route to Fatshan, taking the passage of the Southern Gate. Along the entire route, shopkeepers, and others offered sacrifices to the remains of the deceased by the burning of incense and Joss paper. The streets were lined with soldiers, and at the turns of street corners soldiers were specially deputed to keep the road clear. The Manchu and Tartar soldiers followed the procession and brought up the rear, the five regiments of the Viceroy's garrison leading the van.

At the head of the procession was a large red silk flag borne by eight men, and the length of it was about two *cheong*. This huge flag bore an inscription in gold letters of the late Viceroy's titles in full. Following this were 70 pairs of Meritorious Tablets, on which were written the different offices the late Viceroy had been holding during his lifetime, and all the marks of honour conferred on him. Next to these came the paraphernalia emblematic of the Viceroy's authority, and those of the General and Lieutenant-Governor, both of which offices the deceased had held before. Then came a stage sedan, the cushion of which was made of tiger skin, and it was borne by eight military officers of rank. Following this were two paper horses and one paper camel. Then came quite a number of small boys, each carrying a square tray painted in vermilion colour. Each tray contained a valuable curio covered over with a glass shade. Then came four divisions of Priests, followed by three or four "Wan Min San," which were presented to the Viceroy by the people in acknowledgment of his able administration. Then came some more Meritorious Tablets, succeeded by bearers of the Viceroy's insignia and seals. Then came the Canonical Title conferred on him by the Emperor after his death, as also the Imperial Edict authorising the transport of the coffin to Peking for burial. Some more Meritorious Tablets were followed by a wooden stand, on which was carved the head of a dragon, and standing in the centre was a live cock, the feathers of which were perfectly white, while its legs were of a black colour. This bird preceded immediately the massive coffin, which was borne by more than 30 men. The covering of the coffin was made of red silk and inscribed with gold letters. The widow was borne in a chair made of white cloth; she alone was

Digitized by Google

exempted from going on foot. The rest of the mourners, including the civil and military officials of all ranks, walked behind her chair. The number of musicians and bearers of different articles exceeded 1,000.

The authorities are determined to put down the Wai-Sing lottery, and wherever it was carried on, officers were sent to put it down, and to seize the stakes as forfeitures to the Government. Recently a mandarin named Woo returned from Satow village with a large sum of money. This was the third sum levied from this village. Other officers likewise reported their arrivals from Toong-koon and Shak-lung with similar forfeitures. This species of gambling is nearly eradicated, and the only place where it flourishes is Macao, but this is not within Chinese jurisdiction, therefore nothing can be done to stop it. It is, however, rumoured that the Chinese authorities are going to bring pressure to bear on the Chinese who open such establishments there, by making their relations responsible for their acts or to produce the men themselves. The authorities can obtain the names of all those who are engaged in the gambling, and no doubt they can give great inconvenience to the parties. If the rumour be true the Wai-Sing will have to be carried on by the Portuguese, and then the mandarins will not be able to touch them.

Preparations for working the lead and coal mines in the Canton province are said to be in an advanced state.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 28th Jan.; the French mail from London, Dec. 18, arrived out on the 19th Jan., and the following P. and O. mail of the 25th Dec. was received on the 25th Jan. We take the following items of intelligence from the *Straits Times*:—

The Legislative Council has met twice since last mail, and the session is virtually over. The Council will not, however, be formally prorogued on account of the sittings having been prolonged beyond the year, and has merely adjourned *sine die*; thus, the session being continuous, such matters as have not been finally disposed of may be again taken up at the point to which they have been already advanced. The business transacted during the fortnight has not been of great importance. A very necessary amendment has been made in the law regarding the registration of titles for land whereby registration of a transfer may be effected without producing the original grant. This is especially necessary in cases where the ground has been divided up into small lots, rendering it impossible for the holders of lots to produce the original grant on a resale. The Final Supply Bill, 1873, re-appropriating some $212,000 to cover excesses on certain heads during that year, gave rise to some discussion in connection with a paragraph in the treasurer's report, asserting that the cost of living had increased, and on that account forecasting a probable increase of salaries. The Hon. Mr. Shelford disputed the assumption as erroneous, contending that the necessaries of life were not dearer now than in 1867, when the salaries were adjusted, and arguing that increase in efficiency of the officers—which was not apparent—should be the proper ground upon which to base an application for increased emolument.

The Sultan of Perak, following in the wake of the Sultan of Salangore, has issued a general proclamation inviting people to come and settle in his territory and develop its agricultural and mineral resources, under the protection of the British Resident. Land is offered free of costs or taxes for three years, and minerals may be worked according to the laws and customs of the country —presumably on paying a royalty of one-tenth of the produce. Recently the present and ex-Sultan have formally met and amicably adjusted their differences, and great feasts were held in honour of the reconciliation, which drew together a large concourse of the chiefs and people. The Resident (Mr. Birch, our late Colonial Secretary), deeming the presence of a British man-of-war at such a time desirable, to further the maintenance of goods relations between the British and native Governments and at the same time strengthen his influence over the people, asked that a vessel might be sent for that purpose. H.M.S. *Hart* was accordingly detailed for this service, and left this on the 16th Jan. for Perak, returning on the 26th. Mr. J. G. Davidson, of the Singapore Bar, who has been appointed Resident of Salangore, will shortly proceed to that territory to assume the duties of his office.

The annual general meeting of the Singapore Chamber of Commerce has been held at the Exchange Rooms, and after the election of office-bearers and a committee for the current year, the commission for landing, storing, and reshipping cargoes of vessels coming into this port in distress was by resolution fixed at 1 per cent. for valuable cargoes, such as tea, and 2½ per cent. for less valuable cargoes, such as sugar, rice, or Singapore cargo. It was also resolved to authorise a charge of 1 per cent. for invest moneys on mortgage or other securities.

An inquiry has been ordered by the Government into the case of the survivors of the British ship *Euxine*, who, it will be remembered, drew lots and killed and partly devoured one of their companions a few hours before their rescue by a passing ship. They had been at large here, but in consequence of this order were arrested on a charge of murder. The case has not yet come on for hearing before the police magistrate. The men will be defended by counsel.

Rear-Admiral Sir Charles Shadwell arrived here on the 24th Jan. from Hong Kong, in his flagship, H.M.S. *Iron Duke*, and is awaiting the arrival of the *Audacious*, the flagship of his successor, which left Galle on the 17th, and is hourly expected. The *Iron Duke* is homeward bound. H.M.S. *Avon*, Captain Powlett, from Hong Kong, anchored in the roads on the 13th Jan. The *Avon* is now on her homeward cruise. The other vessels in port are H.M.S. *Charybdis*, *Vigilant*, and *Hart*.

The Governor and Lady Clarke last week visited his Highness the Maharajah of Johore, at his residence at Tanjong Putri, where they were most hospitably entertained. The Maharajah is endeavouring to develop the resources of his country, which is rapidly increasing in importance and prosperity and its revenues steadily augmenting.

The news from Atchin is meagre. The Dutch forces had succeeded in capturing several important stockades from the Atchinese at Longbatta, which were inimical to the safety of the Dutch stronghold. This is now said to have been rendered secure, and the successes of the Netherlanders have, the despatches state, so dispirited the people of Pedir, one of the most hostile States, that they desire to tender their submission.

A Macao Chinese prisoner named Lee Ah Kim, one of the Salangore pirates, who was sentenced in 1871 in Penang to penal servitude for life, has escaped from the Criminal Prison. An examination of his cell proved that the prisoner, who was, we understand, locked up alone at night, had escaped through the ventilator in the roof, and made his way unseen over the wall on Stamford road. A reward of $50 is offered for his apprehension.

On the 26th Dec. we reported that a gang of ten Chinese from Campong Glam, who had gone to Pulo Dammar for the purpose of committing a robbery, had been arrested by the Malays there and handed over to the police. The whole gang have been brought before Capt. Douglas. The evidence for the posecution, which was very strong, was further strengthened by the incoherent and conflicting statements made by some of the prisoners The Magistrate committed them all for trial at the crimina session.

Commercial Report.

(For dates see first page.)

IMPORTS.

CHEFOO.—Messrs. Wilson, Cornabé, and Co.'s Report says:—Business generally has been fairly active. Cotton Goods, Grey Shirtiugs, and T-Cloths have been in fair inquiry, but rates have, if anything, declined a little. Drills have been saleable in small lots at rates which show some margin on Shanghai quotations. Spots, Brocades, and other Fancy goods have been neglected. Metals: Iron has been in but little demand, and we scarcely expect to see any improvement till after the Chinese New Year. Lead is much wanted, with no stock in the place, but supplies are shortly expected.

HANKOW.—Business had been on a very small scale during the fortnight—and had been almost entirely confined to Grey Shirtings, rates showing little or no change.

SHANGHAI.—The market during the fortnight had again been devoid of animation, and there had been little change. Cottons: Grey Shirtings were without alteration, and the market was very quiet. T-Cloths showed some improvement in the earlier part of the fortnight, but had since relapsed, and the market closed quiet; a fair business, however, had been done. White Shirtings: Common goods quiet, but for 64 to 66 reed the market was rather stronger. Drills remained without alteration, but American Sheetings showed an advance. In Fancy Cottons there had been no change to note. Woollens.—Camlets: There had been some enquiry for CPH, other chops were unsaleable. Plain Orleans were rather higher. Long Ells had declined, and, in the absence of business, quotations were nominal. Spanish stripes were a trifle easier.

FOOCHOW.—The sales had been as follows:—T-Cloths: 7 lb., 600 pieces at $1.70 to $1.85 per piece. Lead: L. B. and Co., 1,000 pigs at $8.50 per picul.

HONG KONG.—The arrivals during the interval, besides mail steamers, had been s.s. Montgomeryshire, Sarpedon, and Fleurs Castle, bringing full supplies of manufactured goods for this market and the North. A very quiet market had existed during the interval, but there were signs of returning activity in the fact that the up-country dealers were beginning to arrive. In the meantime importers were firm, and as dealers had only been buying when they can meet with cheap parcels for their immediate requirements, there had not been much business in progress.

CANTON.—Lead was in no demand at the moment, whilst at Hong Kong sales were being effected at 20 to 30 cents higher than comparative quoted rate. LB and soft brands were nominally worth $8.10, and WB and Hole chop $8.30 per picul. Quicksilver was quoted at $218 per picul, and was expected to go lower.

BATAVIA.—Business in Piece Goods as usual at the season of the year, had been on a restricted scale, and no revival was expected until after the close of the Chinese New Year holidays.

SINGAPORE.—There had been a moderate demand for some descriptions of Grey Cottons, but generally the market had been quiet, the

Digitized by Google

near approach of the Chinese holidays always affects business at this season of the year.

PENANG.—A slightly better enquiry had been manifested for some descriptions of goods but at no improvement in rates. During the Chinese New Year's holidays, which this year extend from about the 1st to the 10th Feb., the markets will be almost entirely closed.

EXPORTS.

—o—

TEA.

HANKOW.—Settlements and shipments on native account nil.

The export of Hankow district teas to 24th December,
1874 ... ... 54,101,854 lbs.

The export of Hankow district teas to 24th December,
1873 ... ... 54,500,497 „

Decrease, 1874 ... ... 398,643 lbs.

KIUKIANG.—Black: No business to report. Green: Arrivals showed a marked falling off, only 2,000 half chests having come to hand during the interval.

SHANGHAI.—Black: The settlements reported had amounted to only 532 chests, and showed no change in value; stock, 450 chests. Green: The demand had been steady, and teamen have succeeded in working prices up until at last they had established an advance of 2 taels on fine teas, and about 1 on medium and common chops. The stocks had been replenished by arrivals from the country, and a considerable quantity of tea which had been stored here waiting a favourable turn in the market had been shown. The amount on offer exceeded largely what had usually been in stock at this time of the year. The crop was likely to be in excess of that of last season by some 50,000 packages. Pingsueys, on account of their low prices, had attracted a little attention, but they were not generally in favour. The following were about the prices paid:—For country tea, 26,058 half chests at Tls. 20 to 36.5.0 per picul; Pinsuey, 4,380 half chests at Tls. 23.3.0 per picul. Settlements, 30,438 half chests; stock, 82,580 half chests.

FOOCHOW.—During the interval a large business had been done in Oolongs, and small purchases of Congou had continued to be made. Congou: Settlements 4,000 chests at Tls. 6 to 19, the latter price being paid for boxes,- former values being fully maintained. Arrivals nil, and no further receipts were expected from the country. Oolong: In the early part of the interval a considerable business was transacted in fine parcels at irregular rates, showing in some instances an advance of about two taels on former quotations. The teamen continued firm holders of cargo grades, and only small transactions were reported at Tls. 12 to 14 for common, and Tls. 15 to 16½ for fair to good. Settlements 22,100 half-chests at Tls. 12 to 22½. Arrivals 2,000 half-chests. Souchong, Scented Teas, and Flowery Pekoe: In these kinds there had been no transactions, and no further receipts from the country. The export to Great Britain, the Continent of Europe, and the Cape of Good Hope amounted to 60,864,554 lbs., against 54,376,201 lbs. at the same time last year. To America, 2,149,402 lbs., against 3,189,551 lbs.; to the Colonies, 13,395,547 lbs., against 12,473,401 lbs. last year.

CANTON.—Messrs. Deacon and Co.'s Report says:—Our last was dated the 22nd December, and since that time, nothing was transacted in Tea, until a few days ago, when some 3,100 boxes Scented Caper were settled at Tls. 16.5, which shows a slight decline on previous rates. Some 1,200 boxes short leaf Scented Orange Pekoe have also been taken within the last week at Tls. 14.5, but they are said to be for either the Australian or Continental markets. It is reported that several of the Tea Hongs are in difficulty, and are not expected to tide over China New Year; this will prove that season 1874-75 has been equally unremunerative to manufacturers as well as shippers.

SILK.

SHANGHAI.—Shipments by the French mail of the 8th Jan. amounted to 810 bales, consisting chiefly of common to medium Tsatlees at a slight advance on former ruling rates, and including Kukee's Kin-hock at Tls. 320, and Yellow Elephant at Tls. 307½. For this mail 500 to 600 bales are reported for Europe, mostly market Tsatlees at last mail's prices; and 150 to 200 bales for America, chiefly Re-reels at old rates, but including a few bales of Dragon chop No. 3 Tsatlee at Tls. 390, and Kahings, Ching-young-shing's Tinghow and Gnaling, at Tls. 335 and 305, and Dong-yue's Pangling at Tls. 315. Stock had been reduced by most of the Taysaam sorts having been taken for native consumption. Settlements for the fortnight, Chinas, 1,600. Total settlements since 1st June, 1874, 60,300 bales, against 1873-74, 48,700 bales; 1872-73, 50,900 bales. Comparative unsold stock on this market 1875, 8,000 bales; 1874, 4,500 bales; 1873, 2,000 bales.

CANTON.—A moderate but steady business had been in progress during the fortnight, and purchases amounted to 520 bales of all kinds. Of this quantity, about 450 bales were Tsatlee, chiefly of the lower grades, and the remaining 70 bales Loongkongs of various descriptions. Prices showed little if any alteration. Good No 4, Tsatlee was scarce, and holders asked $340 to $345 per picul for best district Silk of that classification. The export of the season was estimated to reach about 8,000 bales against 9,500 bales last season.

THE MAILS.

—o—

PRESENT INWARD MAIL.—BRINDISI, FEB. 25.—The P. and O. Company's steamer Nizam, with the homeward India and China mail, arrived at 2, and the mail left at 2.30 P.M. for London.

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, FEB. 22.—The P. and O. Company's steamer Mirzapore left at 6 P.M. to-day for Southampton, where she may be looked for about the 7th March.

NEXT INWARD MAIL.—SUEZ, FEB. 24.—The Messageries Maritimes steamer Provence, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles, at which latter port she may be expected on the 4th March.

INWARD MAIL DUE MARCH 15.—GALLE, FEB. 19.—The P. and O. Company's steamer Pera, from Australia, and the Gwalior, from China, with the homeward China and Australian mails, arrived here yesterday. The Mongolia leaves for Suez to-day.

HEAVY PORTION OF NEXT OUTWARD MAIL.—SOUTHAMPTON, Feb. 25.—The P. and O. Company's steamer Peshawur sailed to-day with the heavy India and China mails, and a full cargo. She took out ninety-six passengers, and twenty-seven proceed by the corresponding steamers from Venice and Brindisi, making a total of 123. The Peshawur goes through the Canal to Calcutta, passengers for Bombay changing steamers at Suez.

INWARD MAIL DUE MARCH 22.—GALLE, FEB. 26.—The Messageries Maritimes steamer Tigre, with the inward French mails from China and Japan, left here to-day for Aden.

OUTWARD MAIL OF JAN. 8.—SHANGHAI, FEB. 23.—The P. and O Company's steamer Sunda, with the London mails of the 8th of January, arrived here to-day.

OUTWARD MAIL OF JANUARY 29.—GALLE, FEB. 23.—The Messageries Maritimes steamer Iraouaddy, with the outward French mails from Marseilles, on the 31st of January, left here to-day for Singapore.

TELEGRAMS FROM THE FAR EAST.

DESTRUCTION OF TELEGRAPH CABLES IN CHINA.

COPENHAGEN, FEB. 22.—The Great Northern Telegraph Company has received a telegram from China stating that the land line from Foochow to Amoy has been destroyed by persons hostile to the construction of telegraphs. The material was also destroyed or carried away, but the members of the telegraph staff remained unmolested.

INUNDATIONS IN JAVA.

THE HAGUE, FEB. 24.—An official despatch states that there have been great inundations in several parts of the Island of Java.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Feb. 25, at Bristol, from Java, Sharperton; at Amsterdam, from Batavia, Dahlia (str.); 26, at Liverpool, from Manila, Yrurac Bat (str.); at Queenstown, from Sourabaya, Petunia; at New York, from Amoy, Picciola; 27, at Deal, from Colombo, &c., Kingstown (str.).

DEPARTURES.—Feb. 25, from London, for Hong Kong, Hervatska; from Cardiff, for Hong Kong, Gustav; 26, from London, for Colombo, &c. (via S.C.), South Tyne (str.); for Penang, Singapore, China, and Japan (via S.C.), Viking (str.); from Liverpool, for Singapore, China, &c. (via S.C.), Deucalion; for Manila, Aurrera (str.); 27, from London, for Yokohama, Suma (str.); from Liverpool, for Hong Kong, Queen of the Seas.

LAID ON.—At Liverpool, for Rio Janeiro and Batavia, Batavia.

SPOKEN.—Ville de Bruxelles, Bangkok to Marseilles, Feb. 1, 30 N., 31 W.

The Bussorah, Gibb, from Sunderland, having shipped another crew, proceeded, Feb. 24, from Grimsby for Anjer; the refractory men (seven in number) have been committed to prison for ten weeks.

ADEN, FEB. 26.—The Hong Kong (str.), London to China and Japan, struck on a sunken rock off Abdelkuri and foundered. A lady passenger—Mrs. J. Walter—and five children drowned. Mate, chief and third stewards, fourth engineer, and butcher drowned; eighteen men arrived; captain and seventeen men and second boat missing. The Hong Kong sailed from London on Jan. 22.

At NAPLES.—Feb. 23, Voorwarts (str.) V. Roggen, from Nieuwe Diep, for Batavia.

At ADEN.—Hampton (str.), McMoutry, from Java, and left, Feb. 24, for Rotterdam; Killarney (str.), sailed Feb. 24, for Singapore.

MISCELLANEOUS.—At Port Said, W. H. Atkinson (str.), from London, for Colombo, &c.; Venice (str.), from London, for Penang, Singapore, China, &c.

JEDDAH.—[Suez, 27th Feb., 7.45 P.M.]—The Ulysses (s.), from Liverpool to China, when entering on the 17th Feb., stranded reef, and on the 20th remains fast—16 feet (? water in) main compartment—two steamers assisting; every prospect of floating; injury to vessel unascertained, but sufficient to prevent resumption of voyage; greater portion of cargo safely discharged; serious damage improbable; fuller details telegraphed; Holt, commander controlling arrangements; telegraph instructions immediately to Suez.

CASUALTIES.—The Viceroy (str.), from London to Colombo, &c., lost rudder and rudder-post at mark 20 feet, in heavy gale, 420 miles S.E. of Malta; she was towed into Alexandria by the Lorne (str.).

PORT SAID, Feb. 27, 2.15 P.M.—The Ulysses went ashore between two rocks at Jeddah, Feb. 17; discharged her cargo, 400 tons damaged; main hold full of water; the Mercury, tug, leaves Suez this evening with steam pumps. Nestor (str.), due here, will follow with Holt's agent; other appliances will take on 500 tons of cargo of Ulysses.

WE observe that CHUNG HOW has been appointed Right Vice-President of the Board of Finances at Peking. It will doubtless be recollected that this official came into prominent notice in connection with the Tientsin Massacre, the circumstances showing beyond any question that if it was not possible to prove that he was actually implicated in the matter, it was due to his neglect to take proper precautions that the outrage was possible. Subsequently he was appointed a special Ambassador to France, where he arrived during the war, had an interview with M. THIERS at Versailles, duly talked that venerable Statesman over, and returned to China, if not triumphant, at least safe and sound. His promotion to an important office at Peking is therefore somewhat noteworthy. He has been taking great interest in the Transit of Venus and other similar matters; but it is worthy of note that up to the very day of the Tientsin Massacre CHUNG HOW was considered the most markedly friendly official towards foreigners in China, and the value of such friendship was illustrated in a rather unexpected manner on the 21st June, 1870. We suspect therefore, that the members of the French Legation will not attach so much importance as might otherwise be the case, to the interest which he manifested in the astronomical observations.

THE Shanghai Chamber of Commerce in the report presented at its meeting in January last, again calls attention to the detriment to the trade in British manufactures which is being brought about by the practice of "heavy sizing," or, in other words, adulterating the goods. The matter has been spoken of so frequently that it is almost beyond hope that it will produce any effect upon the Manchester manufacturers, who seem determined to go on in their more than questionable practices until they have raised up so serious an opposition that they will find it difficult, if not impossible, to hold their own by a too late return to the honest system of manufacture by which they originally obtained their status in the East, and by which they will most assuredly be alone able to sustain it. It is time that the Manchester Chamber took the subject up again, and made a *bonâ fide* effort to arrive at something better than the plausible pretexts in favour of adulteration which were uttered the last time the matter was discussed by that body.

MR. J. F. KNOX, H.B.M. Consul-General in Siam, left by the steamer *Viking*, which sailed on Saturday last.

THE will with two codicils of Mr. Robert Benson has been proved by Mr. William Benson, the brother, Mr. C. R. Moorsom, and Mr. J. M. Moorsom, the surviving executors, the personal estate being sworn under £90,000. The testator provides for his wife, Mrs. Eleanor Sara Benson, having the use of his furniture, with £400 per annum for her maintenance and comfort, during her life or widowhood; to each of his executors he leaves £300, and upon trust to his daughter £5,000; the residue of his property he divides as follows:—Two-fifths to each of his sons, and the remaining fifth upon trust for his daughter. The deceased was a member of the firm of Robert Benson and Co., King's Arms-yard, Moorgate-street.

THE EMBEZZLEMENT FROM THE CHARTERED MERCANTILE BANK.—Alfred James Price, who was last week committed for trial on a charge of embezzling several sums belonging to his employers, the Chartered Mercantile Bank of India, London, and China, was again brought up on the 24th ult. when another charge was gone into. The evidence went to show that in one instance he took £200 and in another £300 out of the moneys paid to him for the foreign drafts, and it was said that the entire defalcations were between £3,000 and £4,000, from which, however, might be deducted £500 which the defendant had deposited in lieu of an indemnity bond.

THE P. and O. steamers now in dock are the *Khedive*, *Geelong*, and *Travancore*. The *Delhi* sailed yesterday, and will take out the Bombay mail of the 4th inst. from Southampton. The *Khedive* will follow with the Calcutta mail of March 11th. The *Bangalore* has gone north, to receive new boilers, &c.

JAMES WEST, PUBLISHER,
2, COWPER'S-COURT, CORNHILL, LONDON.

The London & China Telegraph.

LONDON: MONDAY, MARCH 1, 1875.

THE HONG KONG AND SHANGHAI BANK.

"I AM assured that the most ample provision has been "made for all possible losses, which statement the share-"holders may fully rely upon," are the neat and appropriate words in which Mr. JACKSON, the manager of the London branch of the Hong Kong and Shanghai Bank, concludes a circular address to the shareholders, setting forth that telegraphic information has been received from Hong Kong that the meeting of shareholders on the 18th inst. adopted, without dissent, a statement of accounts showing that the reserve fund was reduced to $100,000, that the balance at credit of profit and loss was $120,000, and that, finally, "for a second time in the history of the Bank," the directors had determined not to declare any dividend. This last-named fact, besides being interesting in a historical point of view, has a somewhat direct influence upon the butchers' and bakers' bills of confiding home shareholders, who have invested their all in this lamentably mismanaged institution, and who will scarcely feel consoled for being for a second time disappointed in not receiving a dividend, by being for a third time assured that the "most ample" provision has been made for all possible losses. It is not surprising that Mr. JACKSON should feel compelled to supplement this rather tautological expression by a declaration scarcely less tautological, that the shareholders may "fully rely" upon this statement. We do not object to these little embellishments merely upon grammatical or artistic grounds, but upon much more weighty considerations would have preferred to be informed that all liabilities were provided for to being "assured that the *most* "*ample* provision has been made for *all possible losses*, which "statement the shareholders may fully rely upon." It may be that the directors having twice told the shareholders that all contingencies had been taken into account, and having had twice to admit that the statement was not in accordance with the facts, should have been led by a natural gradation through the three degrees of comparison, and having years ago commenced by stating that the liabilities were provided for, have gone on to stating next that they were "amply provided for," and finally, that they were "most amply provided for." This process of reassuring shareholders, which unfortunately admits that they expect they will not be fully disposed to believe their statements, speaks boldly either for the faith of the shareholders or the credibility of the directors; and it is a somewhat interesting question which of the two facts they desire to indicate—do they intend to convey the impression that the shareholders are less confiding, or that they themselves are less to be believed than other people? Either admission is, to say the least, unfortunate, and leads inevitably to the same conclusion, namely, that for some reason or another there does not exist that confidence between the directors and shareholders which is obviously necessary for the satisfactory conduct of the affairs of the Bank. The repetition of the old statement, that all the liabilities have been disclosed, must come with singularly small effect after the same statement has been made twice before, and has proved to have been false—we do not say intentionally false—but, beyond the possibility of denial, false in fact.

Is this the conduct of their business to which the shareholders in Hong Kong are prepared to submit without dissent, and is it impossible to find directors who will be, we will say, a little more vigilant as to the affairs of the Bank, and ascertain with a littl more accuracy what is its actual position at a given time? The origin of the present state of things is stated, by men well able to judge, to date as far back as the "resignation" of Mr. KRESSER, and the shareholders were guilty of a dereliction of duty in not demanding fuller explanations of the state of affairs at that time, and have repeated the omission at every subsequent meeting. They have encouraged the directors in their neglect, and now reap the results of their apathy. The very wretchedness of the statement now telegraphed is in some sort a guarantee that at last the directors have "made a clean breast of it," but it speaks very badly for the manner in which public institutions in Hong Kong are managed, that a straightforward declaration of the position of the Bank has only been wrenched from the directors when—whether advisedly or not we do not now say—but when, as a plain matter of fact, the shareholders had taken a course of action deliberatively expressive of a want of confidence in them, and after the celebrated case of WHITTALL *v.* BELL had startled them into the knowledge that there is a point at which neglect, incompetency, or misrepresentation on the part directors will render them personally liable.

THE CHINA TELEGRAPH CABLES.

A VERY curious, and at the same time a most unfortunate, coincidence has happened in regard to this matter, for in the brief space of five days we have heard of the successful completion of the second section of the line, and of the destruction of the whole work. The *Foochow Herald*, received by last mail, was somewhat exultant, and naturally so, at the satisfactory progress that was being made, and expressed a confident hope that General RAASLOFF'S arrival at Peking would bring about a fulfilment of the alleged agreement between the Chinese Government and the Great Northern Telegraph Company; it further affirmed that the country people were everywhere civil and friendly to the company's *employés*, and that the Viceroy had received permission to give his official sanction to the work. At the same time our contemporary guardedly remarked, "We trust that this is not a *ruse* to throw the responsibility of rejection on a subordinate officer." This week, we regret to say, telegraphic news was received in London, *via* Copenhagen, that the line had "been destroyed by persons hostile to the construction of "telegraphs. The material was also destroyed or carried "away, but the members of the telegraph staff remained "unmolested." This intelligence is most unfortunate and disappointing, for matters were beginning to wear a cheerful aspect, and it almost seemed as if the thin end of the wedge had been successfully inserted in the outer crust of Chinese prejudice, and that FENG-SHUI'S ghost had been laid for ever, as far as telegraphs were concerned; nevertheless, annoying as this *contretemps* is, we venture to think that the foolish act on the part of the Chinese will afford the foreign diplomatic body at Peking a golden opportunity, if they can only be induced to act in concert in so very important an affair, for procuring the definite and unmolested admission of telegraphs into the country. General RAASLOFF alone, we fear, may not be able to accomplish this end, but the united pressure of the *Corps Diplomatique* ought, at this juncture, to be able to carry the matter through successfully, and we would express a hope that the respective Governments of the Treaty Powers may see the opportunity we allude to, and instruct their representatives accordingly.

WE understand that M. LEGER, who has held a post at the office of the Minister of Finance in Paris, has been appointed the Manager of the new Indo-China Bank at Saigon, and proceeded by the last mail to that port. M. MICHELOT, who has been managing the Saigon branch of the Comptoir d'Escompte, will act as Sub-Manager, and will also liquidate and close that branch on the opening of the new Bank. We have omitted to notice that the dividend declared by the Directors of the Comptoir d'Escompte for the half-year was f. 20 per share, equivalent to 8 per cent. per annum.

WE hear that the withdrawal of the Pacific Mail Company's Subsidy has been confirmed by the United States Senate.

PROGRESS AT OSAKA.

IN Mr. Consul GOWER'S Report on the Trade of Hiogo and Osaka during the year 1873 we find some noteworthy information, supplied by Mr. Vice-Consul ANNESLEY, with respect to the progress which has been made at Osaka, and which is the more remarkable, as the place had only been open for six years to foreign trade and influences at the time when the report was drawn up. Osaka, as is well-known, is one of the most important cities in the Japanese Empire, and contains more than half a million inhabitants, besides a large fluctuating population. Whether, however, it will eventually answer as a Treaty port, it is, perhaps, premature to hazard a conjecture; at present, at any rate, it certainly does not figure very favourably in the Trade Returns. But this is not the point to which we propose to refer on this occasion, our object being rather to call attention to the advances which have been made there by the Japanese in the adoption of various adjuncts of Western civilisation in matters classed under the heads of *Industries* and *Public Works*. Osaka possesses, it seems, a large arsenal, where all kinds of warlike *matériel* are manufactured, and the works in this establishment are entirely carried on by Japanese artificers; a steam paper-mill was in course of construction at the end of 1873, guaranteed to turn out a ton of paper daily. Several other kinds of foreign machines have been introduced into Osaka; among these are knitting, spinning, and weaving machines, a shoe and boot-making machine, a steam machinery for the manufacture of grey shirtings (unbleached), which is in full operation at Sakai, in the neighbourhood, and a large steam oil-pressing machine, which produces a considerable quantity of oil made from rape-seed cake. A brewery, too, on an extensive scale is at work, and brews beer of a fair quality from American hops. This liquid, adds Mr. ANNESLEY, is much consumed by the Japanese, and must be taken, we presume, as a clear proof of the progress which Western habits are making in the country. Glass-blowing is carried on to a small extent, but not very successfully; cheap kerosene lamps are made at Osaka, and it seems probable that they will soon supersede the paper lanterns and smoking oil-lamps used by the natives in lighting up their dwellings. Turn we now to Public Works. The Japanese Government, we are told, have erected on the opposite bank of the River Kizu, facing the foreign settlement, a large building, intended as a City Hall, in which the local Government offices, except the Customs, are to be collected. This is described as an imposing-looking edifice, and was originally designed by Major KINDER; the Japanese, however, have carried out the details according to their own notions, and are said to "have ignored all the principles of modern architecture." The municipal buildings, Mr. ANNESLEY reports, are nearly completed, and they will consist of a municipal hall, with accommodation for the municipal police, well-built houses for a Shand and Mason fire-engine, and last, but not least, a red brick prison, with a covered prison yard. Some iron bridges have been constructed, under foreign superintendence, and Mr. ANNESLEY further states that the small foreign settlement continues to be well lighted and kept in good order, the streets being well-paved and clean, while trees planted on both sides afford an agreeable shade in summer. Not much has been done of late to facilitate the navigation of the river beyond some occasional dredging, and this ought to be constant to enable the ferry steamers to run. The Japanese appear to have it in contemplation to develop the neighbourhood of Osaka, for "some foreign "engineers have been surveying the Ajikawa as far as "Kiôto, with the view of deepening this river sufficiently "to admit of steamers of light draught navigating the "whole length up to that *fu*, and also to construct a canal "connecting the river with Lake Biwa. . . . This un-"dertaking, if carried out, would place the west coast of "Japan, together with many fertile districts of commercial "importance, within easy reach of Osaka and Hiogo." In educational matters, too, the Japanese are not by any means backward at Osaka, for the place now contains seventy-two primary schools, one college, and one academy, attended by some 10,000 pupils. Six English teachers are employed at the college and academy; and there is also a school for girls under the care of a foreign instructress. Having thus enumerated many matters, which prove that the Japanese at Osaka are progressing rapidly, and, indeed, perhaps too rapidly, Mr. ANNESLEY reserves to the conclusion of his notes a statement which is greatly to their discredit, and which shows incontestably that they are utterly ignorant of the fundamental principles of free-trade. "I am informed," he says, "that an octroi duty of one per "cent. is levied by the Japanese authorities on all goods "in charge of Japanese passing to and from the Foreign "Settlement. As this tax directly affects the free-trade and "interests of foreigners, it is very desirable that it should "be abrogated." In conclusion, we may remark that the number of foreign residents at Osaka, of all nationalities, increased from sixty-four in 1869 to 129 in 1873, while the numbers at Hiogo in the same years were 185 and 415.

CEYLON.

RECENT files of Ceylon papers contain the closing speech of the Governor to his Legislative Councillors, and a summary of the year's occurrences in that prosperous little island. Ceylon is fortunate in possessing a ruler who is at once an able administrator, an energetic chief of the State, and an ardent promoter of learning in all its aspects. Mr. GREGORY not only finds time to visit the most interesting provinces under his government, but gives the utmost attention to new projects for the development of local interests, and, moreover, enters warmly into matters connected with archæology, literature, and history. He has dismissed his Council in a speech teeming with reassuring statements as to the prospects of the colony, and gratifying figures in regard to the past. The revenue for the year just elapsed was stated at £1,280,000, whilst that for the current year is estimated at £1,281,700, from which amount his Excellency has appropriated £277,600 for public works, in addition to £15,500 for railway extension. We are not informed of the sum voted for purposes of education; but we do not forget that there is, beyond the above-named amount voted for public works, a very large outlay on roads under the provisions of the Thoroughfares Ordinance by means of local labour. The re-assertion by the Governor of his resolve that no fresh railway should be undertaken that did not promise a remunerative return is highly judicious, and one that we trust will not be easily set aside by idle clamour. The important work of the breakwater has been fairly commenced, and now that the working plant for that purpose had reached the colony, good progress will be made in what may be regarded as the foundation of the future greatness of Colombo as an Eastern steam port.

The work of the local legislature has partaken pretty much the character of that of the Imperial Parliament, useful without claiming the distinction of being sensational or brilliant. An ordinance for the punishment rather than the prevention of coffee stealing has been passed, which, though not meeting with general approval, may serve at any rate as a basis for some more practical legislation a year or two hence, when the defects of the present Bill will no doubt be made manifest. A law for the management of branch or grant-in-aid roads appears likely to work satisfactorily, as it is formed on the principle laid down many years ago by Mr. WALL, then an unofficial member of Council, of allowing the power of assessment to local committees instead of to the revenue officers, too often very ill informed on the subject. There have also been ordinances enacted for providing funds for the Colombo Breakwater, for a railway to Morotto, connecting that industrial centre with the capital, for railway extension in the interior, and for supplying water to the towns of Galle and Kandy. It is to be hoped that in his anxiety to further the interests of the large coffee districts to the south of Kandy his Excellency will not be unmindful of the very important coffee industry in another direction—that situated to the north of the mountain capital, in and around Matele, Hunasgiria, Kallibokke, and the Rangalla districts. The country in this latter direction is so devoid of engineering difficulties, the work of laying a line of rails would be so inexpensive and expeditious, that we are amazed to find it shelved for so long a period, whilst other and more costly lines are in serious contemplation.

We are glad to learn that native interests have not been forgotten amidst the loud outcry for planters' railways and

Digitized by Google

planters' coffee stealing ordinances; the irrigation scheme has been fairly worked; many minor tanks have been repaired under the operation of village councils, and though the health of certain districts has not been good, Government has exerted itself to remedy this evil. We should, indeed, be glad to see a little more timely action in these matters, but when we find the affairs of an important province like that of the western division of the island entrusted to an officer whose declining years demand repose rather than work, we cease to marvel at any shortcomings in administrative action.

The commercial and planting status of the island, though not all that some would desire, cannot fairly be made a matter of complaint. If the import market is overstocked with unprofitable goods importers have the remedy in their own hands. If merchants find they cannot realise a profit in coffee bought costing 120s., who have they to blame but themselves? The present market quotations for coffee in London leave a splendid margin for the grower, but not for over-confident speculators. It is true that there have been short crops in Ceylon, but this is a drawback to which all colonies are occasionally subject: were "bumper crops" the rule in the article of coffee all the world over, where would prices be? In our opinion, the late figures realised for Crown forest in Ceylon for coffee planting tell an unmistakable tale of prosperity, and if the decline in the coffee market at home causes the abandonment of purchase of crops before they are grown, none will have greater cause for rejoicing than the coffee planters of this very flourishing island. With an able and energetic Governor and a Secretary of State with statesmanlike views, there is every reason for believing in the future prosperity of Ceylon.

THE ADULTERATION OF TEA.

The following important provision as to the adulteration of tea is appended as a final clause to the new "Sale of Food and Drugs Bill:"—

From and after the 1st January, 1876, all tea imported as merchandise into and landed at any port in Great Britain or Ireland shall be subject to examination by persons to be appointed by the Commissioners of Customs for the inspection and analysis thereof, for which purpose samples may, when deemed necessary by such inspectors, be taken and with all convenient speed be examined by the analysts to be so appointed, and if upon such analysis the same shall be found to be unwholesome, mixed with other substances, or exhausted tea, the same shall not be delivered unless with the sanction of the said Commissioners and on such terms and conditions as they shall see fit to direct either for home consumption or for use as ship's stores or for exportation; but if on such inspection and analysis it shall appear that such tea is in the opinion of the analyst unfit for human food the same shall be forfeited and destroyed or otherwise disposed of in such manner as the said Commissioners may direct. Tea to which the term "exhausted" is applied in this Act shall mean and include any tea which has been deprived of its proper quality, strength, or virtue by steeping, infusion, decoction, or other means.

From the foregoing we may see that the Government have found themselves unable to resist the complaint urged by the retail grocers in this country, that it was unjust to punish them for selling unwholesome or adulterated tea, which was, after all, only in the same condition as when it passed the Custom-house authorities. Henceforth, therefore, Official Inspectors will make it their business to see that no teas really unsound, or unfit for consumption, escape into the hands of speculators in our home markets. Of course, there will be some considerable expense connected with the discharge of these new functions and the appointment of salaried professionals for that purpose, but after all, considering that tea is nearly as universally consumed as salt, the British public will not be inclined to grumble on that score, provided that the work is effectively performed. The fact is, there is hardly anybody who knows so little what he is about as the unhappy British tea-dealer. We do not refer to the large well-recognised firms, but to the smaller grocers scattered all over the land. They do not understand wherein the difference between good tea and bad tea lies, and if they did it would profit them nothing, for what their customers want is something cheap, and something that will stew down into a good strong brown infusion. We can, however, see one or two points in which care must be exercised should the Government proposal pass into law. Disputes may arise, and litigation ensue, should a tea in fairly sound condition when unshipped be detained for any time in bond, and during the detention, from damp or other causes, turn out too unwholesome to be consumed. Then, again, suppose on a future change of Government some popular administrator abolishes the duty on tea? Is the whole army of analysts to stand or fall with the sixpence a pound, or, *vice versâ*, is a burdensome restriction on a great industry to be for ever riveted round our necks on account of the adulterant tricks of the "heathen Chinee?" Lastly, we may, perhaps, expect that the new system would tend somewhat to enhance the prices of tea. At all times a risky, speculative, and uncertain trade, the merchants in China would now find themselves with a new element of danger to face. If they buy up the cheaper sorts and poorer qualities of tea, there would now be the chance that these shipments may reach home in a more or less unsound state, and be actually excluded from any sale at all. It would be far wiser to purchase only the better and more high-priced stocks, and this is what we may expect to be the prevailing practice. The very cheap teas will not be sent on to the English market at all. We question whether our working classes will altogether relish this.

CARGOES AFLOAT.

—o—

SINGAPORE AND PENANG.

Per Mary Nelson: 320 tons black pepper, 25 tons white pepper, 1 ton gutta, 420 cwt. rattans, 194 cwt. hides, 310 tons sugar. Emilio Rondanino: 350 tons gambier, 150 tons sago flour, 60 tons pearl sago, 75 tons black pepper, 25 tons white pepper, 23 tons gutta, 320 cwts. rattans, 380 cwts. hides, 13 tons india-rubber, 7 tons horns, 462 cwts. copal, 160 cwts. mother-o'pearls, 20 tons tapioca. Colombian (str.): 40 tons gutta. Lake Leman: 665 tons gambier, 335 tons sago flour, 153 tons pearl sago, 7 tons black pepper, 10 tons gutta, 440 cwts. rattans, 1,546 cwts. hides, 20 tons india-rubber, 9 tons horns, 137 m. Malacca canes, 85 cwts. mother-o'pearls, 80 tons tapioca. Excelsior: 26 tons tin, 390 tons black pepper, 780 cwts. rattans, 120 cwts. hides, 290 tons sugar. Amstel: 740 tons gambier, 40 tons tin, 105 tons pearl sago, 555 tons black pepper, 50 tons white pepper, 1,080 cwts. rattans, 665 cwts. hides, 430 tons sugar, 900 cwts. copal, 65 tons tapioca. Alice Ritson: 185 tons gambier, 155 tons sago flour, 140 tons pearl sago, 15 tons gutta, 220 cwts. rattans, 365 cwts. hides, 12 tons india-rubber, 14 tons horns, 11 m. Malacca canes, 35 cwts. mother-o'pearls, 65 tons tapioca, 14 cwts. gamboge. Asterope: 30 tons tin, 300 tons black pepper, 25 tons white pepper, 240 cwts. rattans, 42 cwts. hides, 430 tons sugar. Claudine: 280 tons gambier, 220 tons sago flour, 60 tons pearl sago, 35 tons black pepper, 20 tons white pepper, 200 cwts. rattans, 5 tons horns, 33 tons tapioca. L. J. Enthoven: 200 tons gambier, 185 tons sago flour, 1,040 cwts. rattans, 7 tons horns. Amsterdam: 1,320 tons gambier, 445 tons sago flour, 160 tons pearl sago, 2,380 cwts. rattans, 575 cwts. hides, 120 tons tapioca. Zeeburg: 400 tons gambier, 325 tons sago flour, 480 cwts. rattans, 355 cwts. hides, 50 tons tapioca. Lochleven Castle: 405 tons gambier, 390 tons sago flour, 12 tons black pepper, 1 ton white pepper, 20 tons sapanwood, 175 cwts. hides, 70 m. Malacca canes. Andromeda: 50 tons gambier, 480 tons sago flour, 65 tons pearl sago, 8 tons sapanwood, 320 cwts. rattans, 14 tons tapioca. Celæno, 310 tons gambier, 40 tons sago flour, 35 tons pearl sago, 190 tons black pepper, 35 tons white pepper, 26 tons gutta, 300 cwts. rattans, 785 cwts. hides, 3 tons india-rubber, 48 m. Malacca canes, 10 cwts. benjamin gum, 375 cwts. mother-o'-pearls, 70 tons tapioca. Guiseppina N.: 610 tons gambier, 35 tons sago flour, 50 tons pearl sago, 120 tons black pepper, 280 cwts. rattans, 700 cwts. hides, 12 tons horns. Yrurac Bat (str.): 45 tons gambier, 420 cwts. rattans, 15 tons tapioca.

MANILA.

Annie: 380 tons sugar, 205 tons hemp. Atma: 385 tons sugar, 255 tons hemp. Seawfell: 400 tons sugar, 567 tons hemp, 9 tons sapanwood. Sir Jamsetjee Family: 600 tons sugar, 4 tons coffee, 535 tons hemp, 35 tons sapanwood, 600 cwts. mastic, 42 cwts. mother-o'pearls, 97 cwts. indigo, 23 tons tobacco, 583 mil. cigars, 257 cwts. hide cuttings. Romeo: 562 tons sugar, 114 tons hemp, 1 cwt. mother-o'pearls, 120 tons tobacco, 2,745 mil. cigars. Mountain Laurel: 800 tons sugar, 387 tons hemp, 10 mil. cigars. Cosmopolyta: 625 tons sugar, 100 tons hemp. British Empire: 732 tons sugar, 5 tons sapanwood. Eugenio: 945 tons sugar. Etta Loring, 400 tons sugar, 375 tons hemp, 10 tons sapanwood. Durham: 500 tons sugar, 740 tons hemp, 3 tons sapanwood. Yrurac Bat (str.): 990 tons sugar, 390 tons hemp, 25 tons sapanwood, 225 tons tobacco, 245 mil cigars. Remus: 650 tons sugar, 350 tons hemp, 4 tons sapanwood. Stefano: 1,110 tons sugar, 130 tons hemp.

THE CHINA TELEGRAPH CABLES.

The *Pall Mall Gazette* says:—The news which has just reached us by telegram from Copenhagen of the destruction of the newly-constructed line of telegraph from Foochow to Amoy affords another instance of the use which the Chinese Government is in the habit of making of local mobs. On the first news of the landing of the Japanese troops in Formosa the Viceroy of Fuhkien engaged the Great Northern

Digitized by Google

Telegraph Company to construct an overland line from the Amoy anchorage to his Yamen at Foochow Foo. At first the work went gaily on, and encountered no sort of opposition from the people. But at an unfortunate moment the Russian Minister at Peking heard of it, and thereupon claimed on behalf of his Government his right of making a line from Peking to Kiachta by virtue of a former agreement by which the Chinese Government had promised to sanction the construction of this line in the case of any similar concession being granted to any other treaty Power. This gave rise to numerous negotiations, and meanwhile the work was brought to a standstill, but before any decision had been arrived at the Danish Minister General Raasloff, arrived at the capital prepared to support the cause of the Great Northern Telegraph Company. And so good an advocate did he prove that a few days since we were informed by a Shanghai telegram, dated February 16, that General Raasloff had obtained from the Chinese Government recognition and protection for the line. This put the Peking authorities in a dilemma. They were obliged to accede to the equitable claims of the Danish Envoy, but by so doing they laid themselves open to the demands of the Russian Minister. Out of this difficulty there was only one way. Let the mob be called in, and in the name of outraged Fêng-shui let them put an effectual stop to the work of the troublesome foreigners. It was done, and we now learn that the line "has been destroyed by persons hostile to the construction of telegraphs."

ITEMS FROM PARIS.

(FROM OUR OWN CORRESPONDENT.)

We find the following in a letter from Peking, 15th December, published by the *Dix Neuvieme Siècle*:—The Emperor has just fallen ill. Of course, Venus is answerable for the mischief. Men look wise and say that all the stir made in heaven by that planet was sure to bring trouble on earth. As nobody in China cared about the Transit of Venus before Europeans came, it follows that Europeans are the primary cause of the imperial illness. That is Chinese logic. Since the outbreak of the disease, four days ago, every person entering the precincts of the palace is obliged to wear a piece of red satin, as a sash, or in some otherwise conspicuous manner. It would puzzle all the doctors in Europe to find out the reason why. There it is. The seed of the small-pox is sown in the human body by a goddess of the name of Tzen-Noun-Niang-Niang, just in the same way as green peas or other seeds are sown in the ground. Thence the pimples shoot forth. When they do not blow open, but take a bluish tint instead, the flower —that is, the patient—dies. Now, flowers in China are credited with a great liking for red, and are believed to expand in the vicinity of that most beautiful of all colours. The piece of red satin worn by all servants, high and low, princes or eunuchs, is intended to attract the attention of the pimples and to make them blow open at the cheerful sight. Another piece of gossip from the palace. The young Emperor had the happy thought of having his portrait painted before his illness, but I am assured that the artist was forbidden to look on the Son of Heaven. All that he could do was to try and catch by stealth, now and then, a glimpse of the celestial face. I should not care to guarantee the likeness, under the circumstances.

M. Charles Bousquet, a French advocate from the Paris Bar, had been called to Yedo in 1872, and entrusted with the mission of reforming and codifying Japanese civil laws. His contract with the Japanese Government was for three years, but the completion of this term drawing near, and the Government of the Mikado wishing to secure M. Bousquet's services for some more time, his engagement has just been renewed for another year.

Four Courts of Appeal, with final jurisdiction, are being established in Japan, at Yedo, Osaka, Nagasaki, and another town inland. These Courts will shortly be at work.

We hear from Constantinople that Saradangji-min-Moalha-Ryoden-Rajah, Ambassador of the King of Burmah to the Persian and Russian Courts, arrived in Bagdad early in January, on his return journey from Persia. According to his own statement, he had heard such dreadful accounts of the climate of Russia, that he had resolved to turn back without setting foot on Russian soil. But then, direct advices from Teheran suggest that the behaviour of the Burmese Ambassador gave great displeasure at the Persian Court, and that Russian Government sent him an intimation to stay away and to dispense with his visit to St. Petersburg. The truth of the matter seems to be that the political mission entrusted to the Ambassador by the King of Burmah was of such a nature that his proposals could not be entertained by either Persia or Russia.

A company of Japanese acrobats, who have been performing at the Folies-Bergerie, Paris, for some weeks, under the style of "The Mikado's Own Company," have been invited by the police authorities, on a complaint, it is said, of the Japanese Embassy there, to drop that self-assumed high-sounding title, and are now advertised simply as "Yedo Performers."

The French transport ship *Turn*, under command of Frigate-Captain Desnouy, left Saigon on the 22nd January for Toulon.

We read in *Le Temps*, with reference to the recent treaty between France and Annam:—"Tonking will be opened to trade, either French or foreign, in the first part of March. The Annamese keep the right of making treaties of commerce with any other nation, to which they may grant all the privileges France enjoys, or ought to have enjoyed, alone. Wherever the protection of the tricolour extends, foreign Consulates and agencies may be established, without the first occupiers, that is, the French, reserving to themselves the slightest advantage over the new comers." We should be surprised, indeed, if King Tu-Duc was to complain of the modest part France has assumed in this business. She certainly could have obtained from him much better conditions, considering that a French ship, the *Bourayne*, destroyed the pirate junks by which a great part of his dominions was blockaded, and that we are going to make him, in order that he may keep Tonking under submission, a free present of five steamers, 1,000 guns, and 500,000 cartridges. Who would not suppose, from such liberality, that French arsenals are full to repletion?

The Italian Government has just received from the Consul of Italy at Yokohama a box of tea-seed from the province of Yamosino. The seed has been collected, for the greater part, at Ugi and in its vicinity. It has been distributed among various agricultural establishments in Italy for a trial. There have been already experiments made by the agricultural committee of Caltanisetta, in Sicily, with seed sent from Japan expressly for the purpose. The experiments have been so far successful as to give hopes of acclimatising the tea-plant in that region under favourable conditions.

M. Fernand de Bousignac, Chancellor of second-class at the French Consulate of Hong Kong, is sent, in the same capacity, to the French Consulate of Bombay, by a decree of 19th February last. His place is filled at Hong Kong by the appointment of M. Boulouze (Gabriel Joseph), formerly head clerk in the Chancery of the French General-Consulate of London.

THE SUEZ CANAL.

(THE ECONOMIST.)

It is an event of some interest, we think, in connection with the history of a remarkable undertaking, that the shares of the Suez Canal Company have this week been admitted to a quotation on the London Stock Exchange. The construction of the Canal was for years opposed by Lord Palmerston on political grounds, because the privileges originally conceded to a French Company were so extensive as to authorise, or appear to authorise, the establishment on Egyptian territory—the highway between England and India—of a French colony of some magnitude, which would be in possession of one or two strong military positions. Lord Palmerston's opposition ceased on the firman for constructing the Canal being so modified as to limit the powers of the Company to its avowedly mercantile objects: but the previous contest left behind the impression that England was opposed for selfish reasons to a great work of civilisation, because it would tend to destroy her maritime supremacy for the benefit of France and other Mediterranean States. In the event, however, as is now notorious, the chief use of the Canal has been by English shipowners, the proportion of English ships passing through the Canal being seventy-one per cent. of the total. The idea that the English Government or people were opposed to the Canal on account of any fear for their commercial position was, in truth, a baseless imagination of the continental mind, which totally miscalculated what the commercial effect of the Canal would be. The promptitude with which English merchants and shipowners prepared to use the Canal as soon as it was about to be opened was the best proof that they at least never had any thoughts of its leading to their displacement by foreign rivals, and their continued use of the Canal subsequently proves that they were right. It is this undertaking which is now to be domesticated in England, after having been exclusively owned in France and Egypt, and we have no doubt much interest will come to be felt in it on account of its great utility to English trade. In respect of the present causes of the value of the property, the history of the company is, moreover, as remarkable as its political history. M. de Lesseps's original calculations of profit were, no doubt, gross delusions. The Canal was planned at a period when the principal use contemplated for it was by sailing vessels, for the only classes of steamers then known were so costly to work that they were not to be counted on in any numbers. M. de Lesseps calculated in these circumstances that the annual tonnage using the canal would run up to 6,000,000 tons, and in this there was a double error. As has since been proved, it has not answered for almost any sailing vessels to use the canal; and just before the opening the whole annual tonnage between Europe and the East, instead of being 6,000,000 tons, was barely 3,000,000 tons. If no change had happened while the Canal was being constructed, the shareholders would have been left at the end with a useless property. But the progress of mechanical invention has singularly favoured M. de Lesseps, because there are now fleets of steamers with "compound engines," capable of going long voyages with little fuel, and by this class of vessels, which hardly existed ten years ago or more, the Canal is used—not to the extent of anything like 6,000,000 tons, but still to a moderate extent, the total annual tonnage being now over 2,000,000 tons, with every likelihood of increase. The Canal is consequently a growing property, and the 500f. shares are now quoted on the Paris Bourse at about 580frs., or about 17 per cent. premium, though, of course, we give no opinion, without a fuller statement of our reasons, as to whether this particular quotation is justified. On this head we may take some credit for the accuracy of our own predictions. When challenging M. de Lesseps's estimates, just before the opening of the Canal, we pointed out that instead of a tonnage of 6,000,000 tons annually at the opening, the shareholders would be very fortunate if they had 1,000,000 tons, but owing to the existence of steamers with compound-engines, the Canal would, in time, come to be largely used. Already, at the end of five years from the opening, this condition of affairs is beginning to exist, the tonnage using the Canal in 1873 being 2,085,000 tons, while there is a steady improvement. The annual receipts from tonnage alone, exclusive of about £80,000 additional from the company's domain, now amount to about £1,000,000, and the working expenses, including debenture interest, to about £700,000, so that nearly 5 per cent. is already earned on the shares, which is a very good position for a company with an absolute monopoly, a certainty of growing business, and comparatively small working expenses, to possess. For the information of our readers we may add that the shares admitted to quotation are 400,000 of 500f., or £20 each, making a share capital of £8,000,000; but there is a prior debenture charge of £4,000,000, with an additional amount of about £1,280,000 borrowed on the security of the shares of the Kedive of Egypt, about three-eighths of the total. Last year also some years' unpaid interest coupons on the shares were funded and are to be redeemed with interest out of future profits, but we do not know exactly what this charge amounts to. The Canal itself cost several millions more than the above sums to construct, or about £16,000,000 in all, the Egyptian Government having paid a large indemnity to the Company when the latter surrendered some of those privileges originally granted, in which it was thought lay the political dangers which Lord Palmerston sought to avoid.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BAYLIS—On the 29th Jan., at Bombay, the wife of Alfred Baylis, of the P. and O. Company's service, of a son.
BORELHO—On the 11th Jan., at Hong Kong, the wife of Antonio Alexandriono Heytor Brtelho, of a son.
BOEDDINGHAUS—On the 23rd Feb., at Nagasaki, the wife of C. E. Boeddinghaus, of a daughter
BROWN—On the 16th Jan., at Canton, the wife of T. Marsh Brown, of a son.
CHING—On the 21st Feb., at Bicligar, near Sittingbourne, Mrs. Comyn Ching, of a daughter.
MCVEAN—On the 27th Dec., at Tokio, Japan, the wife of C. A. McVean, of a son.
MARTEN—On the 21st Feb., at Blackheath, the wife of W. T. Marten of a son.
MORRISON—On the 15th Jan., at the Oriental Bank Corporation, Badulla, Ceylon, the wife of Charles Morrison, of a daughter.
PARKHILL—On the 6th Jan., at Canton, the wife of Samuel Parkhill, Imperial Maritime Customs' Service, of a daughter.
ROPER—On the 13th Jan., at Nagasaki, the wife of Alfred Roper, of a daughter.
SHAND—On the 23rd Feb., at Lee, Kent, the wife of A. A. Shand, of Yedo, of a daughter.
SPENCE—On the 14th Feb., at Thistle Court, Galle, Ceylon, the wife of P. G. Spence, of a son.
WADE—On the 5th Feb., at the British Legation, Peking, the wife of Thomas F. Wade, C.B., H.B.M.'s Minister in China, of a daughter.

DEATHS.

BEDWELL—On the 15th Feb., on board the s.s. *Achilles*, Perceval Archibald, second son of the late Perceval Bedwell, of the Chancery Registrar's Office.
CASTRO—On the 15th Jan., at Hong Kong, Leonardo D'Almada E. Castro, aged 60 years.
FRIEDERICHS—On the 22nd Feb., at Penang, Straits Settlements, suddenly, Jacob Edward Friedrichs. Friends will kindly accept this intimation.
GRANGE—On the 26th Dec., at Nagasaki. Alexander Grange, shipmaster, aged 59.
LOCH—At sea, between Bombay and Aden, on his voyage to England, per P. and O. s.s. *Lombardy*, Lieut.-Col. Charles A. Loch, Bombay Light Cavalry, son of the late Admiral Francis E. Loch, aged 44.
MATTHEWS—On the 8th Feb., at Mill-hill, West Cowes, after a long and painful illness, borne with Christian resignation, Thomas George Matthews, second son of Robert Henry Matthews, of Commerce House, West Cowes, aged 35 years. The deceased, who was highly respected, was captain of the *Imogene*, one of Messrs. Howard and Co.'s ships, of Hong Kong.
PAPPS—On the 19th Feb., at 5, Percy-circus, W.C., of bronchitis, Charles Henry Papps, aged 78.
SHRUBSALL—On the 14th Feb., at Venice, on board the s.s. *Malta*, William Charles Shrubsall, of the P. and O. Company's service, aged 47.

Naval and Military.

Lieutenant-General Lemon, C.B., Royal Marine Light Infantry, died at Plymouth on the 22nd inst., in the sixty-eighth year of his age. He entered the service in 1829, and took part in the operations on the coast of Spain in 1834, and in the China expedition of 1842. During the China war in 1857 he commanded the provisional battalion of marines before and at the storming of Canton. He was also in command of the 1st Marine Battalion at the attack and capture of the bridge and village of Shektsing in January, 1859, and subsequently assumed command of the brigade of marines, which he commanded throughout the expedition to the North of China and at the attack on the Peiho forts, where he was severely wounded in the head. The deceased officer became Major-General in 1865, and Lieutenant-General two years later. At the time of his death he was the senior officer of his rank.

We hear from the Iron Duke, late flagship on the China station, that they expect to take a high place in the return of prize-firing for the year 1874, the practice having been exceptionally good. This system of prize firing undoubtedly works much benefit by stimulating a healthy competition between the ships of the fleet, and Captain Hood may congratulate himself on the success of the scheme as developed under his guidance when holding the appointment of Director of Naval Ordnance.

A supplementary navy estimate has been issued. The total amount of the estimate is £12,000, and the items are as follows:—Breaking-up ships, £3,000; awarded to officers and crew of H.M.S. Nassau, for services against pirates on the north-east coast of Sulu, £2,000; compensation to owners of vessels for damage done in collision with Her Majesty's ships, £7,000.

The American House of Representatives has passed a Bill, authorising Lieutenant-Commander Frederick Pearson, U.S.N., to accept a decoration of Companion of the Military Division of the Order of the Bath tendered to him by the Queen for his courage in the attack upon the Japanese forts in September, 1864.

Vice-Admiral Drummond, Commander of the Mediterranean Squadron, left Malta on the 23rd ult., to visit the extreme eastern limits of his station. He will go through the Suez Canal in the Helicon.

Commander George Truman Morrell, on the retired list, has been awarded the lieutenant's naval pension of £50 per annum, vacant by the recent death of reserved Commander John O. Freeland.

The Royalist, which is being fitted at Chatham Dockyard as a surveying vessel, is to have a complement of 107 officers and men all told.

A telegram from Yokohama announces the arrival of the Adventure on the 14th ult. to embark the Royal Marine battalion.

LOSS OF THE STEAMER "HONG KONG."

The following telegram has been received at Lloyd's, dated Aden, February 26, 11 A.M.:—"The Hong Kong, steamer, from London to Japan, struck on a sunken rock of Abdel Kuri and foundered. Second mate and eighteen of the crew took to the boats, were picked up, and brought here by the Tiara, steamer. Captain and seventeen of the crew left the vessel, and have not since been heard of. A lady and five children lost." Messrs. Watts, Milburn, and Co. have also received from Messrs. James Burness and Son a telegram, despatched from Messrs. Luke, Thomas and Co., of Aden, in the following words:—"Inform owners immediately steamer Hong Kong struck sunken reef off Abdel Kuri Islands and foundered. Lady passenger, five children, mate, chief and third steward, cook, fourth engineer, and butcher, drowned. Eighteen men arrived. Captain, 17 (second boat) missing."

The Hong Kong was an iron screw steamer, with four bulkheads She was 290ft. long, 35ft. broad, and 25ft. deep, and was built in 1871. Her gross tonnage was 1,881, her burden 2,800 tons She was classed A1 at Lloyd's, and fully insured. Her value is estimated at about £40,000, and she carried besides a valuable cargo. Her master was Captain W. G. Conley, who had, till he recently succeeded Captain Symmington, been chief officer of the same vessel. The Hong Kong left Gravesend on January 24, and arrived at Port Said on Feb. 10th. She left Port Said on the 11th, passed Suez on the 13th, and must then have made her passage down the Red Sea and passed the Bab-el-mandeb Strait. The steamer was to touch first at Penang, afterwards at Singapore, then at Hong Kong, Yokohama, and Hiogo. The last point on the African coast she had to pass was Cape Guardafui, between that promontory and the Island of Socotra, in latitude about 14 N., longitude about 53 E., lie a number ofislands and rocks. It was here she struck, and it was not far from here that the same owners lost the Singapore in 1873. In the list of passengers published in our issue of 25th Jan. occurs the name of Mrs. J. Walton, with five children. The other passengers were only three in number—namely, Mr. Golding, Mr. E. B. Peterson, and Mr. H. J. Lorne. The first mate, who is described in the telegram as drowned, was Mr. F. L. Murphy. The five others who make up the total of 12 people known to have perished were E. Pitman, chief steward; W. Phelps, third steward; C. Stocking, the cook; W. Smith, fourth engineer; and the butcher.

A telegram received this morning states that Captain Conley and seventeen of the crew have arrived at Aden in an open boat.

REFRACTORY SEAMEN.—A few days since seven seamen belonging to the barque *Bussorah*, of Sunderland, bound to China with coals, refused duty when at sea, and compelled the captain to put back to Grimsby, alleging that the ship was unseaworthy. They were taken before the Grimsby magistrates, and it being shown that the ship was perfectly seaworthy, and the men still refusing to proceed to sea, they were committed for ten weeks with hard labour.

IN the House of Commons this evening Mr. Eustace Smith will ask the Postmaster-General if he can state to the House how often during the months of November and December the P. and O. Company delivered the outward mails at Bombay after the contract time, the amount of penalties to which they became liable, and whether it is his intention to enforce such penalties

UNITED STATES.

Mr. John Roach, the well-known shipbuilder, has protested against the cancellation of the contract of 1872 with the Pacific Mail Steamship Line. The protest is signed with his own name, and addressed to Congress. He says: "After searching enquiry, it appears almost certain that not one dollar ever went into the hands of a member of Congress." He represents Irwin as extorting money from "a timid and anxious president of the company for a handful of adventurers. It does not appear that this wasting of money influenced a single vote. Neither the company, nor its present stockholders, nor the builders of their ships, should be held responsible." He claims that vast advantage has accrued to the country from the appropriations for the company, and advertises the ships which he has built. The cancellation of the contract will be a fatal blow to the credit of the company. It will leave the company many ships on hand, not adapted for any other use. It will stop American iron shipbuilding. The protest concludes: "The undersigned, in behalf of himself and his workmen, earnestly prays that the ships which he is proud of having built in American shipyards, of American material, and with American labour, may not, by the hasty action of Congress, be driven from under the American flag."

The House of Representatives has passed the Revenue Bill, increasing the whisky tax to 90c. per gallon, raising the duties on cigars and tobacco, increasing the sugar duties 25 per cent., and repealing the 10 per cent. reduction made in 1872 in the tariff on manufactured goods. Tea and coffee remain untaxed. The Bill provides that the new rates shall not affect goods actually on shipboard bound to the United States on February 10. The Bill goes to the Senate.

Monetary and Commercial.

The report of the directors of the Submarine Telegraph Company (Limited), presented to the proprietors at the meeting on the 23rd ult., states that during the half-year ending 1874 the accidents to the company's cables, and the consequent cost of the ordinary repairs, have been less than usual. Notwithstanding the continued dulness in trade the receipts of the company have exceeded those of the corresponding six months of 1873, and enable the directors to recommend a dividend for the half-year ending 31st December, 1874, at the rate of 16½ per cent. per annum, and add £2,287 15s. 9d. to the reserve fund.

The report of the National Steamship Company (Limited), states that the serious falling off in traffic between this country and America accounts for the fact that the profit on the year's business is only £15,449. They have, however, been able to pay a dividend of 8 per cent. for the year. The sum of £70,000 has been taken from the insurance fund and placed to credit of profit and loss to enable them to do this, and to add £32,224 to the depreciation fund. A balance of £3,962 has been carried forward on the profit and loss account, and the insurance fund balance stands at £101,946, as against £178,552 last year.

The report of the International Bank of Hamburg and London for the past year has been issued. The net profit amounts

Digitized by Google

to £78,356 3s. 11d., and a dividend is recommended at the rat of 9 per cent. per annum, £20,000 to be placed to the reserv fund, and £5,706 3s. 11d. carried forward.

Our advices from New York state that the long-talked-of opposition to the Pacific Mail Company's China line is at length a fixed fact, the contract between the high contracting parties having been signed by Vice-President C. P. Huntington, on behalf of the Central Pacific Railroad; Sidney Dillon, for the Union Pacific Railroad; and David D. Colton for the Occidental and Oriental Steamship Company. The Steamship Company is organised with a capital of $10,000,000, and by the terms of the contract the Pacific Railroads agree to raise $5,000,000, while General Colton, on behalf of his company, undertakes to furnish the remainder. In view of the consummation of the contract, the three White Star steamers, *Oceanic*, *Belgic*, and *Gaelic*, have been secured, and it is expected that they will soon be on their way to New York and China. Capt. George H. Bradbury, ex-President of the Pacific Mail Steamship Company, it is understood, will be the China agent of the company, while General Colton will administer the general affairs of the company from San Francisco.

A meeting of merchants and others, Mr. J. G. Hubbard, M.P., in the chair, has been held at the Baltic, to take into consideration the present unsatisfactory forms of bills of lading. It was resolved, "That the special clauses introduced into bills of lading for the purpose of protecting shipowners from the defaults and negligence of themselves and their servants, by relieving them from all responsibility which properly attaches to them as carriers, are unfair to merchants and contrary to public policy;" and "That a committee be appointed to obtain the assistance of members of Parliament, and to wait upon the President of the Board of Trade to induce him to insert in the New Merchant Shipping Amendment Act a provision which shall render inoperative such unreasonable clauses."

The Stock Exchange Committee have ordered the shares of the Suez Canal Company to be quoted in the official list.

With reference to the deliveries of tea *The Times* prints the following:—

The tea trade shows the usual tendency towards decrease which characterises the weeks intervening between the month of January—the period of highest pressure in the whole year—and the delivery of the Chancellor of the Exchequer's Financial Statement. During the week which ended on the 20th of February the quantity of tea cleared from the bonded warehouses in London amounted to 3,068,195lb. This was less by 129,609lb. than that delivered during the previous week, which had itself shown a falling-off of upwards of half a million pounds, when compared with the week before. Of the quantity delivered last week, 2,023,311lb. were for home consumption, 249,241lb. for exportation, 2,985lb. for stores, and 792,658lb. for removal to various outports, of which 77,191lb. were for immediate exportation. The tea duty paid in London last week amounted to £50,582 15s. 6d.

The amount of bullion by the P. and O. Company's steamer *Peshawur*, from Southampton on the 25th ult., was—in gold, to Aden, £1,500; to Galle, £1,365; in silver, to Hong Kong, £23,593 15s.; to Shanghai, £12,700; total in gold, £2,865; in silver, £36,293 15s.

The arrivals of Bar Silver have been rather large; they comprise £59,400 from New York and £74,250 per *Iberia* from the Pacific. A part of the former amount has been sold at 57⅜d. per oz.; the latter has not yet been sold. There have been no arrivals of Mexican Dollars, and we have therefore no business to report.

ARTICLES OF IMPORT.

Dulness is still the characteristic of the Produce Markets. Only a limited business has been done, and no alteration of any importance has occurred, with the exception of a slight recovery in Tin.

TEA.

Messrs. Capel and Co.'s Circular says:—We have no improvement to notice in the tone of our market, business still continues limited, and prices for common red-leaf Congous and Canton Scented Capers have again ruled rather in favour of buyers, large quantities of both having been offered at public sale. In other descriptions there has been no material alteration to notice. In the public sales the total quantity brought forward has been 24,192 packages, the whole of which have been sold without reserve. The deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	1,919,248	1,657,131
Coastwise	767,680	787,751
Exports	316,452	491,078
Total delivered	3,003,380	2,935,960

Congous: Red-leaf kinds: Siftings have sold from 6¾d. to 7¼d., being a shade easier. Broken-leaf kinds have also declined ¼d. to ½d. per lb. Common, at 9½d. to 11d. per lb., show ½d. per lb. reduction, large sales having been made privately and at public sale. Good Common, free from dust, has sold rather lower. Fair Kaisows, from 1s. 1d. to 1s. 3d., have been in moderate demand, also good from 1s. 4d. to 1s. 8d.; a few free have been sold from 1s. 9d. to 1s. 10d., but they are difficult to move. Finest show no improvement. Pak Lin kinds: Common to fair have been dull of sale, and good to fine in fair request. Black-leaf kinds: Common have sold at auction from 9¾d. to 10d. per lb.; good common sell slowly from 11d. to 1s. per lb., the latter for superior, free from dust. Fair kinds show no alteration. Good medium have sold at former prices; good to fine have been enquired for from 1s. 7d. to 1s. 10d. per lb.; in finest transactions have been few. New-make Canton kinds: Common have sold from 11d. to 1s. per lb., fair from 1s. 1d. to 1s. 3d. per lb., good from 1s. 4d. to 1s. 6½d. per lb., being about former rates. Oolongs: Common have sold at 10d. to 10½d., fair from 1s. 0½d. to 1s. 2½d., good at 1s. 5d. to 1s. 5½d. per lb., being rather easier prices. Souchongs show no material alteration; same at auction realised 1s. 5¾d. to 1s. 6¼d. per lb. for good quality. Scented Teas: Canton Capers show a further decline for common to fair kinds of ¼d. to ½d. per lb., common selling from 8¼d. to 8¾d., good common to fair from 10¼d. to 1s. per lb., with a few good from 1s. 2d. to 1s. 3d. per lb. Canton Orange Pekoes from 10d. to 1s. 0¼d. per lb., being about previous prices. Foochow Capers have sold at public sale at low prices. In Orange Pekoes not much has been done, prices being much as before. Green Teas: The market remains much in the same state, the chief sales being at auction. Imperials and medium Young Hysons have sold about 1d. per lb. lower. Finest Gunpowders also rather lower, and common to fair kinds are only saleable at low rates. Ping Suey kinds have been saleable at about last week's prices.

Messrs. Sillar and Co.'s Circular says:—A dispute having arisen between the dealers and importers as to the time of the delivery of teas, the former have formed a combination not to purchase teas except with "Three Months' Prompt from the completed delivery of the Weight Notes, and with the condition that the buyer may cancel any portion of the purchase for which Weight Notes have not been delivered within seven days after date of contract." This is to come into force on the 1st proximo.

SILK.

Messrs. Kilburn, Kershaw, and Co.'s Circular says:—The public sales of Silk to which we referred in our report of 19th Feb. have just concluded. The bulk of the China Silk sold without reserve was "second hand," and for such prices were irregular, but generally 6d. or so under previous quotations, new Silk, however, realising full rates. Cantons are unchanged and firm at previous quotations. Japans, of which about 500 bales were sold without reserve, realised 13s. 6d. to 18s. 6d. for common Mybach to Sinchew, and of Bengal Silk about 650 bales of filature Surdahs and Comcollys sold without reserve at from 12s. to 14s. 2d. for the former and 11s. to 11s. 8d. for the latter. Deliveries from 1st to 25th Feb.:—1875: 2,650, 350, 397, 170, total, 3,567; 1874: 2,138, 518, 561, 256, total, 3,473.

FREIGHTS AND CHARTERS.

Rates of freight for vessels on the berth show no alteration from our last quotations, and business is quiet. In coal freights there is but little improvement. Homeward chartering is dull

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 50s. weight, 50s. meast. To Hiogo: 75s. weight, 75s. meast. To Nagasaki: 75s. weight, 70s. meast. To Shanghai: 37s. 6d. weight, 35s. meast. To Hankow: 60s. weight or meast. To Hong Kong: 35s. weight, 30s. meast. To Singapore: 35s. weight, 30s. meast. To Penang: 35s. weight, 30s. meast. To Colombo: 35s. weight or meast. To Batavia: 65s. meast. To Sourabaya or Samarang: 70s. meast.

Per SAILING VESSELS.—To Yokohama: 35s. weight, 40s. meast. To Hiogo: 40s. weight, 45s. meast. To Nagasaki: 50s. weight, 40s. meast. To Shanghai: 30s. weight, 25s. meast. To Hong Kong: 30s. weight, 25s. meast. To Singapore: 25s. weight, 20s. meast. To Penang: 25s. weight, 20s. meast. To Batavia, Samarang, and Sourabaya: 20s. to 25s. weight, 25s. to 30s. meast. To Colombo: 25s. weight, 22s. 6d. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Yokohama: £38. To Shanghai: £35. To Hong Kong: £28. To Singapore: £25 to £26. To Penang: £25, f.c. To Galle: £23.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Shanghai: 35s. To Hong Kong: 33s. To Singapore: 25s. to 26s. To Colombo: 25s. To Galle: 25s. To Batavia and Sourabaya: 24s. to 25s.

From Birkenhead, per ton.—To Singapore: 20s.

CASUALTIES.

The rents in the Duke of Buccleuch's sides have been plated up, and the vessel has been floated, and towed into the South West India Docks; previous to her being floated she discharged a large quantity of cargo into lighters, which has been landed in the South West India Dock basin.

Advices received from Mauritius, by telegram from Aden, dated Feb. 17, state that the Mary M. Francis, schooner, Francis, from Cheribon to Baltimore, which put in there Dec. 12, leaky, had discharged her cargo and gone into dock; she was stripped, caulked, and re-metalled, had re-embarked the sound portion of her cargo, and would proceed shortly on her voyage.

MISCELLANEOUS.

At GIBRALTAR.—Feb. 20, Oxfordshire (str.), from Colombo, &c., and left, 21, for London.

Off GIBRALTAR.—Feb. 19, Voorwaarts (str.), from Nieuwe Diep, for Batavia; 20, Gordon Castle, from London, for Singapore, China, &c.; 4, N.K.V.R. (Dutch str.), from Batavia, for Medemblik; P.F.J.R. (Dutch str.), for Batavia.

Passed MALTA.—Feb. 7, Emiliano (str.), from Liverpool, for Manila.

At MALTA.—Feb. 12, Kingston (str.), Chitham, from Colombo.

At PORT SAID.—Olympia, from Hamburg, for Shanghai, &c.; Feb. 18, Java (str.), from Nieuwe Diep, and was to proceed, 19, for Java; 22, Eleanor Batters, Toms, from Cardiff, for Shanghai; Fyen (Danish str.), for Singapore; Langeat, for Penang.

At SUEZ.—Glenlyon, from Singapore, &c.

At TABLE BAY.—Jan. 14, Assyrian, Langford, sailed for Singapore; 18, Oleander, Taylor, sailed for Colombo.

At JEDDAH,—Jan. 7. Tom Morton (str.), Webster, from Singapore.

At ADEN.—Lady Clare (str.), Jordison, sailed for Galle.

At MAURITIUS.—Jan. 19, Ephrem, Vaujoyeux, sailed for Galle.

The Bussorah, Gibb, which sailed from Sunderland, Feb. 18, for Galle, anchored at Grimsby, Feb. 22, with crew refractory.

The Cerwyn (str.) has sailed from Falmouth to Bristol, with part cargo, ex Antipodes, from Ilo Ilo, which vessel put into Falmouth, Jan. 28, leaky.

LAUNCHES, &c.

AT Whitelnch, on the 23rd Feb., there was launched from the ship-building-yard of Messrs. Thos. Wingate and Co. a finely-modelled iron sailing ship, for Messrs. Thos. Skinner and Co.'s celebrated "Castle" line, of the following dimensions:—Length, 250 feet, breadth, 40 feet; depth of hold, 23½ feet; 1,923 tons B.M., and classed A 100 at Lloyd's. She is fitted with all recent improvements, including an Emerson and Walker's independent steam windlass, and large donkey engines for working the pumps and cargo gear, and otherwise economising manual labour. The poop is elegantly fitted up in polished maple and teak, and has accommodation for thirty cabin passengers, besides captain and officers. The ship was named the Culzean Castle. Messrs. Wingate have a sister ship on the stocks for the same owners, to be named Brodick Castle, which will be launched in about a month.

ON the 24th inst. Messrs. John Elder and Co. launched from their building-yard at Fairfield a screw-steamer of 573 tons B.M., of the following dimensions:—Length between perpendiculars, 175ft.; breadth, 26ft.; depth, 14ft. 10in. This vessel has been built to the order of the Nederlandsch-Indische Handelsbank, Amsterdam, for their East India trade. The engines, which are to be supplied by the same firm, are upon their compound principle, and of 75-horse power nominal, having two inverted cylinders (direct-acting), with all recent improvements. She was named the *Egeron*.

THE Pyah Pekhet (str.), Captain A. Bowers, built for the Burma Steam Company, had her trial trip on the 20th ult., when she attained a speed of 12 knots. She has since left Greenock for Penang, for service between that and the Siamese ports on the Burma side of the Malayan Peninsula. This is the second steamer for the above Company despatched during the past month.

AN inquiry relating to the loss of the ship Queen of the Colonies, from Java for England, near Brest, has been held at Greenwich Police-court, before Mr. Patteson, Magistrate, and Captains Harris and White, R.N., Nautical Assessors. Mr. Hargrave Hamel attended as counsel for the Board of Trade, and Mr. Wood Hill for the owners and captain. The Court held that no blame attached to the master for the loss of the vessel, and returned him his certificate.

SINCE the ill-fated steamer Chusan sank at the Crinan Rock she has formed a considerable obstruction to vessels entering Ardrossan harbour. The wreck has been shifted some 300 yards towards the shore, and completely clear of the harbour entrance, so that it will no longer prove a dangerous obstruction. At low water all parts of the hull will be easily got at, and temporary repairs effected.

THE new screw steamship Salak, 1,100 tons, 180-horse power, cleared out at Glasgow on the 20th ult. for Batavia and Sourabaya, with a cargo of general goods. The Salak is the property of the Netherlands India Steam Navigation Company, and was built by Messrs. Caird, and Co., Greenock. She is sister to the Sindora, also built by Messrs. Caird and Co., and makes the fourth steamer built on Clyde for this fleet within five months.

THE Board of Trade has suspended for three months the certificate of Kenneth Cameron, mate of the Elizabeth Childs, of Sunderland, in consequence of his conviction by the Marine Magistrate of Singapore for a "brutal assault" upon a seaman.

The China Trans-Pacific Steamship Company's steamer Vasco de Gama arrived at Yokohama on the 22nd ult. from San Francisco—all well—and will leave again for San Francisco on the 3rd inst.

NOTICES TO MARINERS.

China Sea.—Position of the Raglan Bank.—Information has been received through the French Government, that the vessel Jackmel has passed near a shoal, supposed to be the same as that seen by the British ship Lady Raglan in 1858, in lat. 9 deg. 28 min. N., and lon. 109 deg. 25 min. E., and subsequently unsuccessfully searched for by H.M.S. surveying ship Rifleman in the year 1863. The Jackmel passed close to the shoal, on which the sea was breaking heavily, and the position assigned to it by that vessel is lat. 9 deg. 24 min. N., lon. 109 deg. 26 min. E. The position of this danger must be considered as approximate, and caution is necessary when navigating near it.—Hydrographic Office, Admiralty, February, 1875.

EDUCATION.

A HOME is offered to two or three LITTLE GIRLS, with high educational advantages, by a LADY who has lately parted with the children of an Indian officer. French resident Governess; fine locality, ten miles from London; detached house; good garden, &c. Terms, 50 Guineas.

A. B., Office of the *London and China Telegraph*, 2, Cowper's-court, Cornhill, London, E.C.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.
Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,
48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—

Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

HOLLOWAY'S PILLS

Sir SAMUEL BAKER,

In his work on the Sources of the Nile, says:—

"I ordered my dragoman Mahomet to inform the "Faky that I was a doctor, and that I had the best "medicines at the service of the sick, with advice "gratis. In a short time I had many applicants, to "whom I served out a quantity of Holloway's Pills. "These are most useful to an explorer, as, possessing "unmistakable purgative properties, they create an "undeniable effect upon the patient, which satisfies "him of their value."

This fine Medicine cures all disorders of the Liver, Stomach, Kidneys and Bowels, is a Great PURIFIER of the BLOOD, and wonderfully efficacious in all ailments incidental to Females—young or aged.

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, this morning, its due date. The next inward (P. and O.) mail, with advices Yokohama 26th, Shanghai 29th Jan., Hong Kong 4th, Singapore 11th Feb., which is due, *via* Brindisi, on Monday next, the 15th inst., left Suez yesterday.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Provence*, arrived March 5.—From Yokohama: M. C. Comte de Litha, Messrs. Beretta, Struve, Echemann, Chapsal, Hasselberg, Petrowsky, Muratta, Yamazana, Wringer, Miss Croome. From Shanghai: Messrs. Forbes, Woodall, Fabrè D'Almida, Mrs. Bidwell. From Hong Kong: Messrs. Gregor, Bidwell, Van Leesen, Daal, Mr. and Mrs. Odell, Mr. and Mrs. Coare, Mr. and Mrs. Kyle, Miss DeKuyter. From Saigon: M. Morin, Mdme. Blouset, Le Sœur Marie Adelaide. From Batavia: Messrs. Bornand, Olrick, Hagemann. From Singapore: Messrs. Fischer, Romhantz, Falcon, Schwieger. From Galle: Messrs. Lisle, St. Rene Churchward.

Per steamer *Ajax* (Holt's line), arrived March 6.—From Shanghai to Port Said: Captain Harmon, and Mr. A. Warrwick. From Hong Kong to London: Mr. James Bain. From Singapore to London: Master Martin, Surgeon-Major and Mrs. Baker and child.

PASSENGERS OUTWARD.

Per P. and O. steamer *Peshawur*, from Southampton, Feb. 25.—To Yokohama: Mr. and Mrs. Troup, Mr. J. T. Griffin, and three second-class passengers. To Shanghai: Miss E. Finch, Miss M. Valentine, Mr. A. Johnsford, Mr. M. Nelson. To Hong Kong: Mr. C. H. Beveridge. To Singapore: Mr. and Mrs. Innes, Mr. A. C. McBean, Mr. H. A. O'Brien. To Penang: Mrs. P. Carr. To Ceylon: Mr. Arch Macphail, Mr. S. Miller.

Per P. and O. steamer *Lombardy*, from Venice, March 5.—To Shanghai: Mr. R. Anderson, Mr. R. Nichol. To Ceylon: Mr. and Mrs. Duncan, child, and servant.

Per P. and O. steamer *Lombardy*, from Brindisi, March 8.—To Hong Kong: Mr. W. Paterson. To Galle: Mr. Anthony Trollope.

Per P. and O. steamer *Khedive*, from Southampton, March 11.—To Shanghai: Mr. O. Percival, Mr. P. M. Grant, Mr. W. Smith. To Hong Kong: Mrs. Maclean and party, Lieut. H. B. Warren, Lieut. C. K. Purvis, Lieut. C. E. Reynard.

Per P. and O. steamer *Baroda*, from Brindisi, March 23.—To Shanghai: Mr. J. M. Ringer, Mr. and Mrs. F. M. Yond, Mr. A. L. Pearey. To Hong Kong: Mr. J. G. T. Hassell, Mr. T. J. Gardiner.

Per P. and O. steamer *Thibet*, from Southampton, March 25.—To Singapore: Mr. E. Young, Mr. A. Clarke. To Galle: Rev. and Mrs. McLean. To Ceylon: Mr. E. Johnstone.

Per P. and O. steamer from Southampton, April 8.—To Hong Kong: Mrs. Green. To Ceylon: Mr. and Mrs. A. Ross.

Per French steamer *Sindh*, March 14.—To Shanghai: Mr. and Mrs. Cunningham, Mr. F. S. Deacon, Mr. and Mrs. Wheatley, Mr. and Mrs. Evans, Mr. S. Marsh, and one second-class passenger. To Hong Kong: Mr. W. M. Reeves, Mr. and Mrs. R. J. McKenzie, Miss Read, Mr. and Mrs. Vickers. To Singapore: Mr. Daguin. To Batavia: Mr. and Mrs. Erdman, Mr. Van Goens. To Galle: Mr. Tennant, Mr. Fraser Tytler.

Per French steamer *Anadyr*, March 28.—To Yokohama: Mr. F. S. Jacobs, Mr. Geo. S. Aspinall. To Shanghai: Mr. J. B. Johnson, Mr. Geo. Lewis, Mr. Hyde. To Hong Kong: Mr. Fairhurst, Mr. Sydney Deacon. To Batavia: Mr. Van Oven, Mr. Lucassin.

Per French steamer *Djemnah*, April 11.—To Singapore: Sir William and Lady Jervois and daughters and private secretary, Capt. and Mrs. Patton and child and five second-class passengers. To Saigon: Mrs. Langier and three children. To Batavia: Mr. and Mrs. Van der Lew.

Per French steamer *Tigre*, April 25.—To Batavia: Mr. and Mrs. J. Hudig.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The Pacific Mail Company's chartered steamer *Vancouver* arrived at San Francisco on the 18th Feb., bringing Yokohama advices to the 30th of January. The subjoined summary of news has been telegraphed to the New York press:—

Two hundred thousand dollars have been appropriated by the Japanese Government for expenditures in connection with the Philadelphia Centennial.

For expenses of the Commissioners to examine industries and report	$100,000
For the exhibition of Japan articles	80,000
For transportation	20,000
Total	$200,000

The provincial offices in Yedo of the various Kens, or former provinces, about 250 in number, have just been abolished, and the business concentrated in a bureau of the Interior Department.

The ex-Damio of Arva offers to construct a road from Yedo to the northern extremity of the island at his own cost.

The small-pox continues among the foreigners in Yokohama and Yedo, but the disease has been declared by the physicians to have reached its limits.

A commemorative medal is to be given to all the participants in the Formosa Expedition.

CHINA.

PEKING AND TIENTSIN.

The correspondent of the *North China Herald* writes as follows:—

During the day and night of the 29th December we had a furious gale from N.N.W., and at daybreak on the 30th the thermometer stood at three degrees above zero.

Amongst the sporting members of the community fox-hunting is at present the order of the day, meets taking place some two or three times a week, as business and weather will admit. On the 31st Dec. the meet took place in a range of wild country known by the name of the Shan-ling-sze, lying on the east side of the river, and beginning at some seven miles distance from the British settlement. A fine well-grown knowing fox was started, who at once went across country in gallant style, and gave the hounds a splendid run of about eight miles ere he took to earth, and thus saved his life and brush. It is almost unnecessary for me to say that this is a splendid country for hunting

Digitized by Google

on horseback, as it is open and almost free from obstacles which would prevent horsemen going straight; very different in that respect from the country around Shanghai, where so many large creeks exist.

Immediately after the clocks struck the last twelfth hour of the year 1874 guns were fired from some of the vessels of war in port, to welcome the opening of the new year. The greater part of the 1st of January, in accordance with time-honoured custom, was devoted by the gentlemen of the community to calling upon the ladies. Fortunately the weather was very favourable, being mild and pleasant. The walking about from residence to residence was of itself quite a delight, to say nothing of the pleasure derived from the agreeable occupation of calling personally upon one's friends to wish them a happy new year.

His Excellency Sun Szeta, the acting Customs Taoutai, called upon the Consuls and the Commissioner of Customs on the 3rd of January to wish them a happy new year; and as he is popular with the community, from his tact and courtesy in his intercourse with foreign officials, and from his ability in discharging the duties of his office, his visit was, as a matter of course, received with cordiality.

As I have already mentioned, his Excellency Le Hung-chang, the Governor-General of this province, left here for Paouting on the 23rd Dec.; and I now learn that, while *en route*, he met Ying Han, the newly-appointed Governor-General of Kwangtung and Kwangse, on his way to the metropolis. Ying Han I suppose, will only stay to have audience, and then proceed to the south, overland. At one time it was thought he would stay in the north till the opening of the river in spring, and proceed from Tientsin to Canton *via* Shanghai by steamer. He will now, it is stated, go from Peking overland to Chinkeang, and thence by steamer *via* Shanghai.

In the *Peking Gazette* of the 30th Dec. there is a short Edict granting the great statesman Wanseang a further extension of three months' leave of absence to re-establish his health. In the *Gazette* of the 1st Jan. a decree appoints the Prince of Kung and other Imperial princes to repair on the 4th Jan. to certain temples, to pray for further falls of snow.

SHANGHAI.

The present mail brings advices from this port to the 22nd January; no later mail from London had been received since the 11th January. The following summary of news is from the *North China Herald*:—

The Hong Kong and Shanghai Bank announce that the applications for the £300,000 Chinese loan reached £2,017,100, or more than six times the amount required, and that the applicants will receive bonds *pro rata*. This result would show that the loan is regarded with very great favour, as there was every reason to expect it would be from its conditions; but at the same time it might be unwise to assume that the money market out here is prepared to devote over two millions sterling to one investment on a few weeks' notice. Telegraphic instructions to send in applications might of course be received by agents here from investors at home, but it is probable that the amount has been swollen by not a few people placing their applications higher than their actual wants, in the hope that the allotments would more closely approximate to the latter.—There is some rumour of another and larger loan being contracted for by the Chinese, through the same agency. We have heard the amount put at ten million taels, but we can only give the rumour at present for what it may be worth.

We hear that a scheme for a Chinese naval reserve is being arranged in connection with the China Merchants Steam Navigation Company. It is intended that each of the larger provinces shall furnish two steamers, and the smaller provinces one, to be added to the fleet of that company, and used by it while the country is at peace, but to be at the service of the Imperial Government on the outbreak of war. The scheme has been submitted to the Emperor by his Excellency Li Hung Chang, the Viceroy of Chihli (the prime mover, apparently, in all matters of this nature), and it is stated that the Emperor has given it his approval. The fleet to be thus furnished will number twenty-eight steamers; and we are informed on good Chinese authority that a telegram has been despatched from Shanghai to England to have one built on behalf of the province of Hupeh, at a cost of Tls. 56,000. This prospective enlargement of the C.M.S.N. Co.'s fleet is a serious menace to foreign steam shipping interests in China. We give our information with some reserve, as coming from a Chinese source, but we have been assured of, and have no reason to doubt, its truth.

In accordance with instructions received from Hong Kong, negotiations have been going on for the charter of the China Merchant Company's steamer *Aden*, to proceed to the wreck of the *Japan*, with the view of recovering, if possible, the large amount of treasure on board. The *Aden* will probably leave almost immediately for the scene of the loss, with divers and appliances. We have been informed that the wreck lies in about fourteen fathoms of water.

The steamer *Lee Yuen*, when about thirty miles from Foochow, abreast of Fuhyan, on her passage from this port to Foochow, carried away the lignum vitæ bush in the stern tube. She was beached for one tide under the lee of Matsu Island, for temporary repairs, and then proceeded to Foochow, where she has gone into dock.

At the half-yearly meeting of the Poo-tung Dock Company a dividend of 5 per cent. was declared, and Messrs. Coryell, Webb, and Dr. Little were appointed directors. Messrs. Farnham and Co.'s offer to renew their lease of the Dock for a further period of five years was accepted.

Mr. Keswick has been appointed Chairman of the Shanghai General Hospital, in place of Mr. Forbes, who has resigned on his departure for home. Mr. Forbes has devoted a great deal of valuable time to the affairs of the Hospital, having been one of its Board of Trustees for a number of years; and it gives us pleasure to acknowledge, on behalf of the community, the eminent services he has rendered to this and other public institutions during his past residence in Shanghai. E. Iveson, Esq., has been appointed Vice-Chairman.

A meeting of the North China Branch of the Royal Asiatic Society has been held at the Society's Rooms, the President, Mr. Forbes, in the chair. The minutes of the preceding meeting were read, confirmed, and signed. Messrs. E. J. Caldbeck and H. W. Daniel were elected resident members; and Mr. Harry Wickings, of Hong Kong, a non-resident member. The President tendered his resignation of that office, consequent upon his approaching departure for America and Europe. He also expressed his appreciation of the honour of being appointed delegate to the parent society at home, and hoped during his visit to be able to procure contributions to the library of the Shanghai branch. Mr. A. J. Little moved a vote of thanks to Mr. Forbes, to whom the society owed more than to any man in China, during the six or seven years he had been connected with it, and for the last two of which he had filled the office of President. The motion was seconded by Mr. Reding, and caried by acclamation. Mr. Forbes returned thanks in an appropriate speech. Mr. Wylie rose with a feeling of melancholy to offer a tribute to the memory of the late Mr. H. Lang, whose sudden departure from among them he was sure they would all deeply regret. Mr. Wyllie then proceeded to read a lengthy but interesting paper by the Archimandrite Palladius, entitled "Elucidations of Marco Polo's Travels in North China, &c., drawn from Chinese sources." The meeting closed with the customary vote of thanks.

It has been rumoured that the Japanese mean to include Shanghai in the ports of call of their principal line of steamers; and though we cannot say whether it is intended to keep up a regular service, we hear that an occasional steamer may be expected, and that a special agency will probably be established. The new arrangement by which Japan undertakes the distribution of the American mails after their delivery in Yokohama, might give additional weight to the rumour; but we understand that a contract has been entered into by the Government of that country with the Pacific Mail Steam Company for the conveyance of mails between Yokohama, Hakodadi, Hiogo, Nagasaki, and Shanghai. The contract dates from the beginning of the present year.

A robbery has been committed under peculiar circumstances at the premises of Messrs. Lane, Crawford, and C., Nanking Road. Shortly after day-break it was discovered that one of the large panes of plate glass had been smashed from the outside with a piece of stone, which must have been thrown with considerable force, and which was afterwards found inside the window. Further examination showed that a large piece of Russian Astracan wool-lining and a valuable sea-otter skin had been stolen. The police having inspected the hole in the glass, and the position in the window from whence the articles were taken, some thirty or more inches distant, incline to the belief that they could not have been drawn through the fractured pane, or a much larger hole would have been made. It is right to add, however, that suspicion does not attach to anyone on the premises, and at present there is no clue to the thief.

A concert given by Mr. G. B. Fentum at the Masonic Hall was attended by an audience numbering nearly 200, including many ladies. The programme was an excellent one, and among the selections were several not usually attempted by amateurs. Taken as a whole, the concert was a decided success, the audience being at times roused to enthusiasm, and *encores* being numerous. Mr. Edmund Wells made a very favourable impression on this the first Shanghai audience to which he has sung, and he will be welcomed on future occasions. A pleasing innovation, very successfully carried out, was the perfuming of the programmes, *à la* Rimmel, by Messrs. Watson and Cleave; it is, we believe, the first time this has been done in Shanghai.

The case of "C. E. Hill *v.* Estate of Yang Taikee" has been resumed at the Mixed Court, before Mr. Seward, United States Consul-General, and his Excellency the Taoutai of Shanghai, Dr. Yates being interpreter. Mr. Eames conducted the plaintiff's case, the defendants being represented by Mr. Drummond and Mr. Cowie. The afternoon was occupied in the examination of witnesses on behalf of the plaintiff, and at the close Mr. Eames, in reply to the Court, said he would refrain from calling any further testimony now, upon the understanding that should the other side attempt anything startling or novel in defence he should be permitted to call further witnesses, of whom he had several in reserve. Mr. Drummond said that was a

Digitized by Google

question that could be submitted if occasion arose. The Court shortly afterwards adjourned.

It is with deep regret that we record the sudden and unlooked-for death of Mr. Hugh Lang, the editor and proprietor of the *Shanghai Evening Courier*. Mr. Lang seemed in his usual health in the morning, when, between eight and nine o'clock, he visited the office to arrange the conduct of his business for the day. Shortly before the latter hour he returned to his room to dress, and a few minutes later he was found there, lying on the floor, apparently dead. Drs. Johnston and Henderson were sent for, but on their arrival were only able to confirm the melancholy fact; and we understand it is their opinion that rupture of an aneurism of the aorta was the cause of death. Mr. Lang was an old resident, having arrived in Shanghai some thirteen years ago. Up till 1869 he was engaged in commercial pursuits, but in that year he began the connection with the Press which he has ever since very ably and worthily maintained. About four years ago he became sole editor of the *Courier*, and shortly afterwards its proprietor. Mr. Lang wielded a vigorous and graceful pen; his style was scholarly and attractive; and his treatment of public matters was characterised by a force and clearness which, allied to thorough integrity of purpose, exercised a beneficial influence. Where writing of a lighter sort was appropriate, his racy humour overflowed; and his graphic notices of local events have frequently given the highest pleasure to a wide circle of readers. On several occasions also he has contributed to the gratification of local audiences as a public speaker; and a lecture which he delivered a few years since, and afterwards published under the title, "Shanghai Socially Considered," was so favourably received that we believe the published edition is now almost out of print. Mr. Lang's familiar figure and genial manner will be much missed at local assemblies. In the earlier years of his residence he was prominent as a man tall among his fellows; and if we venture to touch on the physical infirmity which later bowed him down after a severe rheumatic attack, it is only because it placed in stronger contrast his remarkable activity, his indomitable energy, and his unvarying cheerfulness. Aside from his duties as a public journalist, Mr. Lang was always at the command of a large circle of personal friends, whose concern at his untimely death will be shared by those who knew him even less intimately. Much sympathy is felt for those on whom the weight of this sudden bereavement directly falls.

The Chinese occasionally betray a fiendish ingenuity in their mode of committing capital crimes. A few days ago one of the native newspapers in Shanghai reported that the body of a woman had been found, crucified on a shutter or doorway, floating in the river outside Woosung. The head of a man was attached to the waist of the woman's body, and both were taken to the district city of Paoshan. The circumstances of this crime have not been discovered, but it is conjectured that the poor crucified wretch had been faithless, and that this revolting revenge had been taken by the injured husband and his friends. Our *Peking Gazette* translations relate how a wife, tired of a dissipated husband, compassed his death by smothering him in a bag of lime, the father and son of the murdered man assisting her. The punishment, however, is equal to the crime in this case—more, it is the most frightful inflicted, even in any of the darkest habitations of cruelty, at the present day. Yet the criminal records of the *Peking Gazette* show that its infliction is a matter of frequent occurrence in this highly civilised empire!

The following items of intelligence are from the *Shanghai Budget*:—

A somewhat awkward *contretemps* occurred at H.B.M. Supreme Court on the 15th Jan. It was the day appointed for the trial of Suleiman Morbrooke, a seaman of a P. and O. steamer, on the charge of stabbing a Chinaman, about the end of November. The due number of British subjects were duly summoned to be in attendance to serve as a jury, and were in attendance, the chief judge was on the bench, the barrister who appeared for the defence was there in his professional robes, the witnesses, the prisoner—all were there, yet no trial could take place. The prisoner managed—how we don't know—to let it be known that he was not a British subject, but an Arab, a subject of the Imaum of Muscat, but when asked in English to plead guilty or not guilty, all he could—or at least would—reply was "no savee"—he had savee enough for that. Thus the Court was brought to a stand still, no interpreter being retained who could question the prisoner in his own language.

We hear, on what is stated to be the best authority, that Fêng, who has so long presided over the Kaou-Chang-meaou Arsenal, has been promoted to be Taoutai of Shanghai. Regarding this change in the Taoutaiship of Shanghai, the *Daily News* of the 20th says:—"The place of the departing Taoutai, a decree in the *Gazette* of 4th January informs us, will be filled by Feng Tsun-kwang, the mandarin who has so long been the native head of the Shanghai Arsenal. Feng has the reputation of being a clever and energetic officer, and we may assume that his connection with the Arsenal and his intimate dealings with foreigners have inbued him with progressive tendencies. He is credited with being the author, or at any rate the warm advocate, of a scheme to establish a public company for the development of Formosa; and though little has been heard of this project lately we believe the idea has not been altogether lost sight of. Feng has a good literary status, having taken the Ku-jen or Master of Arts degree. Instead of proceeding to the capital to have audience, before taking up his appointment, we hear that for the present he will merely visit the Viceroy at Nanking, and consult with him. He leaves by steamer at once, and will return without delay, so as to enable the Taoutai to set out for his new place of residence, Kai-fung-foo, as soon as possible."

A clever forgery has been successfully imposed upon a Chinese clerk at the Shanghai and Hong Kong Bank. A respectable looking Chinaman presented what purported to be an order for the payment of Tls. 1,000. This document bears the chop of one of the most influential firms on the Bund, and was made payable to a well-known wholesale teaman, whose chop was also stamped upon it. The man who presented it said he had been sent by this gentleman to collect the money, and it was paid over to him without hesitation, in ten Tls. 100 notes. Subsequent inspection and enquiry proved the order to be fictitious, and that a double forgery had thus been perpetrated. A somewhat singular feature of the fraud is that the forger is quite unknown, even by appearance; but the fact that the notes paid are all for large amounts it is thought likely will lead to his prompt detection.

FOOCHOW.

The following items of news from this port are from the *Foochow Herald*:—

Captain Hoskier, the Engineer-in-Chief of the Great Northern Telegraph Company, has started for Amoy. Captain Hoskier will proceed overland, and we understand that he is instructed to push forward the construction of the telegraph line between this place and Amoy. The telegraph line to Pagoda Anchorage was cut on the 16th Jan., near the Arsenal, and about 1,500 feet of wire stolen. H.B.M.'s Consul—as senior member of the Consular body—was, we understand, requested to render friendly assistance to the company in their endeavours to discover the thieves; but, for reasons best known to himself, he absolutely refused to give any assistance in the matter. We believe that he was instrumental in obtaining permission from the Chinese authorities to build the line; it therefore seems strange that he should decline to move in the matter, especially when—as we are informed—the other Consuls have taken up the case on behalf of the company, and have insisted upon the arrest and punishment of the thieves. The line has been repaired, and is, we believe, again in working order.

The arsenal has recently received an important addition to its warlike material, in the shape of an 18-ton Armstrong gun, or "Woolwich Infant." This expensive toy will shortly be placed in position on one of the recently-constructed batteries in the neighbourhood of the arsenal.

The projected withdrawal of the *Kestrel* from this station has, we understand, been abandoned for the present. She will probably remain for a further period of three months.

HONG KONG.

Our advices by the present mail extend to the 28th January; no later mail from London had been received since the P. and O. mail of Dec. 11, which arrived out on the 19th January. The following items of news are from the *Hong Kong Daily Press*:—

The Emperor of China is dead. A brief telegram, received on the 27th Jan., announces this momentous fact. He expired on the 12th Jan., probably from some after effects of the small-pox, which disease he was reported to have recovered from. At present, however, this is only conjecture, no information on the point having reached us up to the time of writing. The Emperor Tung-chi was born on the 4th April, 1857, and was, therefore, in his eighteenth year. He succeeded his father, Hien-fung, who died at the early age of thirty years, when an infant in his fifth year. He married on the 14th October, 1872, an accomplished and virtuous lady, Ah-lu-te, the daughter of Chung-chih, lecturer at the Hanlin, and subsequently raised to the dignity of duke. His public acts have been few, and scarcely worthy of mention; his last public edicts indicate a not ungenerous disposition, their purport being pardon to some and reward for good service to others. Generally speaking, however, he has been ruled by the Empresses-dowager and his ministers, and, therefore, kept very much in the back-ground. On the 26th June, 1873, the Foreign Ministers at Peking were admitted to an audience with him, when he comported himself with the dignity worthy of a prince.

It is not yet known who will succeed to the throne. The telegram says it is probable that the grandson of Prince Tun will be the new Emperor, but this is, of course, only conjecture. According to the Chinese laws of succession, the Sovereign has the power of nominating any male member of the Royal Family that he pleases as his successor, and as Tung-chi has left no children, it is rather difficult to surmise on whom the purple will really fall. Hien-Fung was the fourth son of his predecessor, and his elder brothers were passed over by their father without scruple. It was thought when Hien-Fung died Prince Kung would be likely to succeed him, to the exclusion of the infant Prince,

Digitized by Google

his son. But English hopes were disappointed, the child was proclaimed Emperor, and a Regency established. Prince Kung stands no better chance now, we fear. The advisers of the late Emperor were always hostile to him, and though his succession would be regarded with pleasure by foreigners generally, and great masses of his countrymen, the event is highly improbable. But we trust the Prince upon whom the royal mantle has fallen, whoever he may be, will prove worthy of the honour, and show a little more vigour than the Princes of the Mongolian dynasty have been wont to display. As a rule, they have surrendered themselves to the enjoyment of low and sensual pleasures, leaving the State to be governed by men whose single object was to wring as much as possible out of the poor and possessed people. Jealous alike of all interference, foreign or native, these princes and officials have made it their almost undeviating policy to seclude the monarch, and render him inaccessible. And until the Imperial seat is occupied by a man who possesses a mind and will of his own, and who is not the slave of his baser passions, there is small hope of China making much more rapid progress, moral or material.

At the Criminal Sessions of the Supreme Court on the 25th January the case of the *Spark* tragedy was brought forward, two Chinamen—Chun Fook Yow and Chun Kwai Yow—being charged with murder and piracy. The Attorney-General said he thought it his duty to inform the Court that he was not in a position to put these men on their trial. The authorities at Canton had been notified as to the day on which the prisoners would be arraigned, and they were requested to take care that the witnesses should then attend. He had received a reply that the witnesses would not be in attendance that day, and he was therefore unable to lay the evidence for the prosecution before the Court, and it was unnecessary to put the prisoners before a jury. As he had no guarantee that the witnesses would attend on any future day, he asked that prisoners might be discharged on their own recognisances to appear if called upon at any time within the next three months. His lordship said he did not see how, under the circumstances, the Attorney-General could have done anything else, but he must say he thought the Colonial authorities—he would not say the Government, because he always considered it necessary in matters like these to draw a line—and the Court had been trifled with in a way that he could not say was at all satisfactory. The prisoners entered into their recognisances, and were discharged accordingly.

With reference to this case Mr. Brereton has appeared in Court at the Magistracy to state he had had no further communication from the Canton authorities concerning Chun Kum Chune, out on bail on a charge of wilfully giving false evidence, and would leave it to his Worship to decide the case. His Worship said fortunately the Captain of H.I.C.M. gunboat *Ching-on* had deposited the $400 security, and under the circumstances he saw no other course than that the covenant should be estreated. Mr. Brereton said he could raise no objection to it.

The Ocean Race for Yachts for the Douglas Challenge Cup has taken place. The yachts started from the coalsheds at Kowloon, round a mark-boat in Macao Roads and back, finishing off a flagboat moored off the south-west point of Stonecutter's Island. The race resulted in the *Wave* arriving at the winning mark first, followed by the *Naiad* and *Naomi*, some fifteen minutes later. It appears that the *Naomi* obtained the lead after passing Green Island, and gradually got away from the other vessels, rounding the mark-boat at Macao twenty-one minutes ahead; and whilst holding a lead of some miles on the return trip unfortunately grounded on the rock which lies in mid-channel off the island of Chung Chow, and remained there, "hard and fast," for a considerable time. The *Wave*, upon coming up to her unfortunate antagonist, hailed her, asking if assistance was required, but as she was making no water, and appeared fixed, the *Wave* was requested to keep on, and to send assistance from Hong Kong, and she accordingly filled away again. The *Naiad*, however, on arriving at the spot, decided to stand by the *Naomi*, but shortly afterwards she slipped off the rock, and the two vessels proceeded on their way together. It is unfortunate that the mishap should have occurred, but on the other hand it is very fortunate that it was not attended with more serious results. We understand the *Naomi* is not injured.

The *Gazette* contains a notification to the effect that "his Excellency the Governor has been pleased to appoint provisionally, until Her Majesty's pleasure may be known, Mr. Henry Lowcock to be a member of the Legislative Council, vice Mr. Rowett, resigned."

An application has been made to Mr. Justice Snowden, in the Supreme Court, on behalf of Messrs. W. F. B. Sams and William McGregor Smith, lately trading in co-partnership with Mr. Victor Kresser, in the Sugar Refinery, to have them adjudicated bankrupts. His lordship granted the application.

The steamship *Scotland*, on leaving her moorings, ran into the stern of a Government steam launch which was making for Kowloon. The launch was passing under the bow of the Government hulk *Meanes* when she was run down. No lives were lost, and as the damage was slight, she proceeded on her passage.

The Saigon *Indépendant* reports the sudden death of M. Larrieu, the founder and director of the Messageries Maritimes Company of Cochin-China. The deceased gentleman was seized with an apoplectic fit when promenading in his garden.

A public examination of the scholars at the Government Central School is announced to be held on the 29th Jan. The Governor will distribute the prizes at noon.

Two attempts have been made to float the *Albay* at high tide, but both proved unsuccessful.

PHILIPPINES.

MANILA.

The accession of Alfonso XII. to the Spanish throne was announced to the inhabitants of Manila by means of a proclamation signed by the Governor-General, and published in an extraordinary number of the Manila *Official Gazette* on Jan. 15.

The close of the old year and beginning of the new was signalised in the Philippines by the taking place of hurricanes of great severity, accompanied by great destruction of life and property. The *Diario de Manila* of Jan. 12 thus summarises the nature and extent of the ravages effected by these storms:—

Quite unexpectedly, because the season in which the N. E. monsoon prevails is far advanced, two typhoons came by surprise upon the country and upon merchant shipping; one on the 26th Dec. and the other on the 1st Jan. By traversing as they did a wide extent of country, these typhoons have conveyed devastation over a large portion of the Archipelago. Letters announce that the damage done to agriculture in Ilo Ilo, Negros, and Capir has been very great, which leads to the inference that similar destruction has been effected in Cebu and Bohal. The agricultural interest has been stricken by these storms at the worst period of the year for the former. The grain crops were either on the eve of being reaped, or had been stacked in the fields; the sugar cane was also being cut, and part had been already taken to the mills and stored in weak buildings, many of which were destroyed along with their contents by the hurricanes. In the Visayas themselves and in several provinces of Luzon the seed plants on various plantations, especially those of tobacco, have been destroyed. Sorrowful news is now coming in of losses of vessels and numerous accidents and loss of life by sea and on land. The recent hurricanes, which have been felt with the greatest severity in the Visayas, have tended to make worse the sad condition in which had been the agricultural interest of those provinces.

The loss of life may be judged of from the fact that at two places in the province of Isla de Negros 134 persons, who had perished in consequence of the typhoons, have been buried. A correspondent writing from this province to the *Porvenir Filipino* thus describes the disastrous effects on human and animal life of the typhoon of the 26th Dec.:—

The unfortunate circumstance of a high tide, happening at the very time that heavy rain was falling and the wind blowing with violence, was the cause of a large number of rivers overflowing their banks in such a manner that the number of victims who have perished by being swept away by the violence of the waters is said to be beyond calculation, for the unfortunates who became victims of the floods found neither on the roofs of the houses nor on the tops of the trees the safe places of refuge they had sought for, and fancied they had reached. Houses and trees, and everything that stood in the way of the floods, were carried away by the unchained elements. I am merely in possession of intelligence of a vast number of personal disasters in the villages of Ginigarum and Ilog, where it is said that after the typhoon the fields were strewn with corpses and with a multitude of drowned animals.

During the typhoon in this same province on the 1st Jan several rivers having overflowed their banks desolated the plantations in the neighbourhood, and caused great loss of life, many persons having been carried away to sea along with their dwellings. Respecting the destruction caused there by this second typhoon a corrrespondent of the *Comercio* says:—

It is not possible to estimate the losses of the persons concerned; many cattle have perished. The sugar canes ready for crushing have been blown down and broken, and the young canes seriously injured. Almost all the buildings on the estate have been thrown down, especially the crushing mills. In short, it had been estimated that there would be a sugar crop amounting to from 500,000 to 600,000 piculs, but it is probable that these figures will have to be diminished by 25 per cent.; besides this a reduction will have to be made of about 25 per cent. in the quality, because it is not possible to make superior sugar from the sugar cane.

According to letters from Ilo Ilo to the same journal, it appears the loss of small craft in the waters near that province have been very great, and that in Ilo Ilo and Isla de Negros alone the lives lost exceed a thousand in number.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 5th Feb.; the French mail from London, Jan. 1, arrived out on the 2nd Feb. We take the following items of intelligence from the *Straits Times*:—

The *Government Gazette* notifies that as the anniversary of the foundation of the Settlement and Chinese New-year fall together on the 6th Feb., Friday and Saturday, the 5th and 6th, will be observed as Government holidays.—The new Municipal Ordinance is ordered to come into operation on the 1st Feb.—Dr.

Digitized by Google

F. E. Jackson and Mr. F. C. Sheppard are appointed justices of the peace and magistrates for the Settlement of Penang.—Dr. F. E. Jackson, colonial surgeon, Province Wellesley, is appointed Registering Officer under the Contagious Disease Ordinance.—Mr. Alexander Gentle, having reported his return, has resumed his duties as United States Consular Agent at Penang.

Mr. N. de Maclay, the Russian traveller, has returned to Johore Bahru from an interesting excursion into the interior of Johore, undertaken with the object of learning something of the wild races inhabiting the jungle,—the Jakuns, Oran Rajet and Oran Utrn. As these races always withdraw deeper into the interior, seeking shelter in the forests and mountains on the approach of strangers, Mr. de Maclay had to extend his explorations into places never yet visited by Europeans, and rarely even by the Malays. His travels occupied fifty days, proceeding sometimes by boat, but performing the greater part of the journey on foot. Leaving Johore Bahru, Mr. Maclay went to the Muar river, up which he proceeded as far as Pallon, whence he made a visit to the Oran Rajet. Thence he pushed his way on to Badon Kraton and Djekati (in the district of Rumpen), and from there across over Tenan and Bicko (Batu Pahat) to Leba, Pongut, and Lundan, the settlements of the Oran Utan, and thence down the river Rahan to Indau. This was a trip right across the territory of Johore, in accomplishing which Mr. de Maclay had to travel on foot for thirty days. From Indau he returned overland to the Johore river, and reached Johore Bahru yesterday, where he is being most hospitably entertained as the guest of the Maharajah.

Mr. Maclay's travels were very much facilitated through the kindness of the Maharajah, who gave him circular letters to all the chiefs in his territory, by which the transport of his luggage was greatly facilitated, and he was enabled to obtain occasional supplies of provisions. Considering that the rainy season is not yet over, and that he was obliged to spend many days and nights in flooded jungle, Mr. de Maclay has returned in good health, having only a slight fever. The results of this excursion have so far encouraged him, that as soon as he is fully recovered he intends resuming his researches in the interior of the Peninsula, starting from Pahang and proceeding across the country to Malacca and Quedah.

A few nights since a couple of soldiers and some sailors, who had struck up a sudden friendship, went into the Sailors' Home, and, as almost invariably happens when soldiers and sailors fraternise, they finished up with a fight. The disturbance began in the Home, but was continued in the street, where they attracted the interference of the police. One of the soldiers was arrested, and several times rescued by the crowd, who appeared to want to have the matter all their own way, but were overpowered, and several of them were lodged in the lock-up. One of the men was so severely handled in the fight that he had to be sent to the hospital.

We understand that a committee has been appointed, consisting of the Hon. E. A. Irving, the Hon. H. W. Wood, and Mr. MacArthur, to inquire into and report upon the question of the sufficiency or insufficiency of the existing salaries of Government officials.

Intelligence has been received from Perak, dated the 31st January, from which it appears that all was perfectly quiet—that the residence of the British representative had been fixed upon, and that on the 30th January the flags of England and Perak had been hoisted there with a salute to each.

The *Audacious*, flagship of Vice-Admiral Ryder, the new commander of the China squadron, arrived here on the 1st Feb. H.M.S. *Lapwing*, from Trincomali, 17th Jan., arrived the same day.

THE MAILS.

—o—

PRESENT INWARD MAIL.—MARSEILLES, MARCH 5.—The Messageries Maritimes Company's steamer Provence, with the inward French mails from China and Japan, arrived here to-day at 7 A.M. She brings ninety-six passengers and a general cargo, including 212 bales of silk, 4,345 packages of tea, 245 packages of coffee, 164 bales of hides, and specie to the value of £883, for London, which part of her cargo will be forwarded to its destination per company's steamer Indus, due in London on or about the 16th of March.

HEAVY PORTION OF LAST INWARD MAIL.—GIBRALTAR, MARCH 3.—The P. and O. Company's steamer Mirzapore left at 6 P.M. for Southampton, with the India and China heavy mail, where she may be expected on Monday morning, the 8th inst. Experienced heavy weather; all well.

NEXT INWARD MAIL.—SUEZ, MARCH 7.—The P. and O. Company's steamer Mongolia arrived at 6 A.M. on the 5th inst., and the Zambesi at 6 A.M. to-day, with the India, China, and Australian mails, from Calcutta and Bombay respectively.

OUTWARD MAIL OF FEBRUARY 19.—SUEZ, FEB. 28.—The P. and O. Company's steamer Teheran left for Bombay at 10 P.M. on the 26th, and the Baroda, for Calcutta, at 9 P.M. to-day, with the India, China, and Australian mails. The Surat, with the heavy portion of the China and Australian mails, having damaged her screw in her passage through the Canal, transferred her mails, passengers (with the exception of a few who preferred to remain by her), specie, and Australian cargo at Suez to the Baroda. The Surat, after fitting her spare screw at Suez, will proceed to Calcutta in a few days with her cargo for that port, &c.

From PENANG.—None.

TELEGRAMS FROM THE FAR EAST.

THE WAR IN ATCHIN.

THE HAGUE, MARCH 1.—The Government has received a despatch from Atchin, dated the 23rd of February, announcing that the Dutch have captured three fortifications in Lamara and one in Tibang. The Atchinese suffered considerable loss.

AMSTERDAM, MARCH 5.—The local newspapers contradict the intelligence published by a London evening journal, asserting that the Netherlands Government was preparing a third expedition for Atchin. They point out that the state of things in Atchin naturally necessitates a frequent despatch of troops to keep the Dutch force up to its proper strength, but that these reliefs can in no way be described as a fresh expedition.

WITHDRAWAL OF TROOPS FROM JAPAN.

YOKOHAMA, MARCH 1.—The European troops formerly stationed here have been withdrawn. The British force of marines will proceed to Natal. The French troops return to France.

THE MURDER OF MR. MARGARY.

(TIMES' TELEGRAM.)

RANGOON, MARCH 5.—The Western China Expedition has been attacked and Mr. Margary murdered. Colonel Brown is returning.

THE POLITICAL RUPTURE IN SPAIN.

SINGAPORE, MARCH 6.—Sir Andrew Clarke's friendly intervention at Bangkok between the Supreme and Second Kings of Siam has been successful. The two Kings are reconciled, and the Second King has returned to the Palace with the honours due to his rank. Trade is being actively resumed.

THE OUTBREAK OF PRISONERS AT SINGAPORE.

SINGAPORE, MARCH 6.—The coroner's jury which held an inquest on the body of the late Mr. Digby Dent, superintendent of the criminal jail, who was killed in the outbreak among the Chinese prisoners on the 13th of February, has returned a verdict of wilful murder against fourteen of the convicts implicated in the crime.

At the last meeting of the Anthropological Society a communication was read on the "History of the Heung-Noo in their Relations with China," translated by Mr. A. Wylie, with notes by Mr. H. H. Howorth. Also a paper "On the Milanows of Borneo," by Lieut. C. C. de Crespigny.

The Senatus Academicus of the University of Edinburgh have resolved to confer a degree of D.D. upon the Rev. Joseph Edkins, B.A., of Peking, author of "China's Place in Philology."

Messrs. Hudson, Malcolm and Co. are appointed agents in Japan for the Merchants' Marine Insurance Company, in place of Messrs. Gilman and Co., who are closing their house in Japan.

A meeting of importers of tea will be held on the 11th inst., to discuss proposals for altering the conditions of sale of tea, and putting an end to the "strike" now prevailing.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—March 4, at London, from Colombo, &c., Sultan (str.); off Penzance, from Shanghai, Coulnakyle; at Queenstown, from Bassein, Yubas; at San Francisco, from Hong Kong, Frederick Tudor; at New York, from Hong Kong, Lathley Rich; at Dunmore East, from Java, Indus; 5, off Dungeness, from Macassar, for Amsterdam, Christine; at Clyde, from Rangoon, Mary Aliee; at New York, from Batavia, Templar; 7, at Deal, from Zebu, Alma; 5, at Greenock, from Java, Duke of Richmond.

DEPARTURES.—March 2, from Greenock, for Penang, Pyah Pekhet, (str.).; 5, from London, for Penang, Singapore, China, and Japan, via Suez Canal, Cheviot (str.); from Shields, for Batavia, Borneo (str.); 5, from Sunderland, for Shanghai, Horriang (str.); from Liverpool, for Batavia or Sourabaya, Aurora Australis.

SPOKEN.—Lady Lisgar, Cardiff to Singapore, Jan. 19, 13 S., 32 W.

LAID ON.—At London, for Colombo, &c. (via S.C.), Dhoolia (str.), Sultan (str.); at Liverpool, for Singapore and Manila (via Suez), Yrurac Bat (str.).

MISCELLANEOUS.—At Suez, March 2, Redewater (str.), Richards, and left same day for Colombo, &c.; ———, Colombo (str.).

The steamer Duke of Buccleuch, which sunk after collision, has discharged her cargo in the South West India Docks, and has been towed to dry dock.

At PORT SAID.—Eldorado (str.), from London, for Colombo, &c.

At SUEZ.—March 3, Voorwaarts (str.), from Nieuwe Diep, and left for Batavia.

At MAURITIUS.—Julia Ann, from Singapore.

Off MAURITIUS.—Scawfell, from Zebu.

SHANGHAI, MARCH 8.—Hoogly (French mail steamer) grounded at Woosung, but was got off after discharging part of cargo.

The steamer built and engined by Messrs. Caird and Co., Greenock, for the British Burmah Steam Navigation Company, and named Pyah-Pekhet, was a few days ago stopped by the Board of Trade surveyors at Greenock from proceeding to sea, on the ground that she was too deeply laden with coals. The vessel, being of somewhat peculiar construction, it was alleged that it is necessary that her propeller should be deeply submerged in order to navigate her safely. The owners, in accordance with the decision of the Board of Trade's officers, at once set to work and had the vessel lightened (under protest, we understand), and the head officials of the Board of Trade were promptly communicated with on the subject, as was also Mr. Grieve, M.P. After the vessel had been lightened, permission was given to proceed; but on Friday the owners caused another survey to be made upon her by Mr. Boolds (Lloyd's surveyor) and Captain William Neill (underwriters' surveyor), and these gentlemen have, we believe, submitted a report, that in her present trim she is not fit to go to sea. Here the matter rests for the present; but we are informed that representatives of the Board of Trade from London are expected in Greenock, when a further survey will be made. As the question is a peculiar one, the probability is that a searching examination will be made into the whole circumstances connected with the original order to stop the steamer.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BERGEN—On the 4th Jan., at Saigon, the wife of Baron F. L. Werner von Bergen, Consul General for the German Empire, of a daughter.

DELMEGE—On the 22nd Feb., at Galle, the wife of E. T. Delmege, prematurely, of a son, who survived his birth one day.

DENT—On the 26th Feb., at Singapore, a few days after the death of her husband, the widow of Digby Dent, Superintendent of the Convict Establishments in the Straits Settlements, of a daughter, who survived her birth only half-an-hour.

EVERS—On the 4th March, at Yokohama, the wife of August Evers, of a son.

HALLAM—On the 23rd Feb., at Minglee, Hampstead, the wife of J. B. Hallam, of a daughter.

JARDINE—On the 1st March, at Southwood Hall, Highgate, the wife of William Jardine, of a son.

KNECHT—On the 20th Jan., at Bangkok, the wife of E. Knecht, Chancellier to the Franch Consulate, of a son.

MORRIS—On the 24th Jan., at the Hermitage, Hong Kong, Mrs. A. G. Morris, of a son.

SPENCE—On the 3rd March, at Bickley, Kent, the wife of Robert Spence, of a daughter.

DEATHS.

BEAUFORT—On the 26th Feb., at Larkby, Exeter, Mary Anne, relict of the late Stephen Beaufort, of Ceylon.

DELMEGE—On the 27th Feb., at Galle, aged 25, Agnes Jessy, the beloved wife of E. T. Delmege, eldest daughter of John Scott, Prince's-park, Liverpool.

JEFFERSON—On the 26th Feb., at the Albany, Piccadilly, Richard Jefferson, late of the Ceylon Rifle Regiment, in his 75th year.

KELLETT—On the 1st March, at Clonacody, Clonmel, Ireland, Vice Admiral Sir Henry Kellett, K.C.B., in his 69th year.

LANG—On the 19th Jan., at Shanghai, suddenly, Hugh Lang, editor and proprietor of the *Shanghai Evening Courier* and *Shanghai Budget and Weekly News Letter*, aged 43 years.

SANDERS—On the 25th Feb., at Hastings, aged 79, Mr. John E. Sanders, for more than half a century the valued friend and assistant of Messrs. Dent, Palmer, and Co., King's Arms-yard, Moorgate-street, and their predecessors.

Naval and Military.

The 1st Battalion 10th Regiment, now quartered at Singapore, under the command of Lieut.-Colonel Cuthbert Barlow, is about to return home. The regiment left Ireland on foreign service in September, 1864, and after being stationed at the Cape of Good Hope, has been quartered in Japan, at Hong Kong, and at Singapore.

The Royal Marine Battalion, which has just left for home on board Her Majesty's ship Adventure, will proceed by way of the

Digitized by Google

Cape, calling at Natal, where the marines will be placed at the disposal of Sir Garnet Wolseley. The Adventure will not be detained at Natal longer than is necessary, nor will the marines be landed unless considered advisable by Sir Garnet Wolseley.

Vice-Admiral Sir Henry Kellett, K.C.B., died at his residence, Clonacody House, county Tipperary, at the age of sixty-eight years, on the 1st inst. The gallant officer entered the navy at fourteen, and commenced active service on the West Coast of Africa, where he was several times mentioned in despatches for having "cut out" slavers and performed other similar feats of daring. He commanded the *Starling* in the first Chinese war, and commanded the Naval Brigade under the late Lord Gough. He distinguished himself in the operations against Canton, and was present at the fall of Shanghai and the subsequent operations. For his services in China he obtained his promotion to the rank of captain, and in the following year was nominated a Companion of the Bath. Returning from China, Captain Kellett played a prominent part in the first and second Arctic expeditions in search of Sir John Franklin. In the second expedition he commanded the *Resolute*, endured unparalleled sufferings, and exhibited consummate pluck and seamanship. Having been subsequently employed on surveying service on the Pacific Station, he attained flag rank, and was promoted to Vice-Admiral in 1868. In 1869 he was appointed to the chief command of the China station, but was placed on the Retired List about two years' later. The evening of his life was spent in his native county of Tipperary, where he was respected and beloved by men of all classes.

We have to announce the death of General Sir James Hope Grant, G.C.B. The deceased General entered the army as cornet in the 9th (the Queen's Royal) Lancers in 1826, and served with that regiment several years in India. He served as brigade-major to General Lord Saltoun in China in 1842, and was present at the assault and capture of Ching Kiang and at the landing before Nankin. After his return to India he served with his regiment, the 9th Lancers, under Sir Hugh Gough (afterwards Viscount Gough) at the battle of Sobraon, in February, 1846, and he commanded his regiment during the greater part of the campaign in the Punjaub in 1848-49. In 1857, at the outbreak of the Indian Mutiny, he commanded the cavalry brigade as brigadier-general during the siege and at the assault of Delhi. He commanded the British forces throughout the campaign of 1860 in China, terminating with the capture of Peking, for which he received the thanks of Parliament for "the distinguished skill, zeal, and intrepidity" displayed in the command of the military forces, and was nominated a Grand Cross of the Bath. He received the freedom of the cities of Edinburgh and Perth, in recognition of his military services to his country, and was made a knight of the second class of the Legion of Honour by the late Emperor Napoleon III., had received the China medal and two additional clasps for the last war, the medal for Sobraon, and the medal and clasps for his services in the Punjaub campaign of 1848-9, and medal and clasps for the Indian Mutiny.

It will be remembered that the Hon. C. D. R. Hanbury-Tracy, M.P., himself some time an officer in the Navy—he having served in the Baltic, as also in China, at the action of Fatshan—very warmly espoused the cause of those officers of the Executive ranks who, from no fault of their own, found their service career virtually stopped by the deadlock in promotion, consequent upon the overcrowded state of the Active Lists in 1873, and succeeded in procuring for them more liberal terms of retirement from Mr. Goschen, then First Lord of the Admiralty. To mark in some slight degree their appreciation of these services, a deputation of Naval officers waited upon the honourable Member, and presented him with an address on vellum, handsomely framed, and bearing the signatures of the officers benefited by his kind and judicious advocacy of their cause.

Colonel William Cooper, 1st battalion 19th Regiment, has been selected for the command of one of the vacant Brigade Depôts. He entered the service in 1843, and was many years connected with the 70th Regiment, which he commanded from April, 1867, to August, 1872. He was attached to the 18th Royal Irish in the Burmese War of 1852-53, and was present at the capture of Rangoon, taking of Prome, and other affairs.

The Royalist, three-gun screw sloop, which has been taken in hand to be brought forward for surveying purposes in the Eastern seas, is found to be in so defective and generally rotten a condition that the repairs to her have been suspended, in order to enable the officials at the Admiralty to decide whether she shall be employed on the service for which she was originally destined.

Major George Grant Suttie, Senior Major of the 75th Regiment, died on the 20th January, at King William's Town, Cape of Good Hope, on the eve of the departure of his regiment for home. The deceased served through the campaign of 1860 in China, and was present at the taking of the Taku forts, and received the medal with clasp.

It is understood that the Right Rev. Bishop Piers Claughton, late Bishop of Ceylon, will succeed the Venerable George Robert Gleig as Chaplain-General to the forces. Dr. Gleig has held the office of Chaplain-General since 1846, and his resignation will be received with great regret.

The appointment of Colonel Sir Andrew Clarke, R.E., K.C.M.G., C.B., the late Governor of the Straits Settlements, to be an Ordinary Member of the Council of the Governor-General of India, for Public Works purposes, is gazetted.
